COLLIER COUNTY
Board of County Commissioners
Community Redevelopment Agency Board (CRAB)
Airport Authority

AGENDA

Board of County Commission Chambers
Collier County Government Center
3299 Tamiami Trail East, 3rd Floor
Naples, FL 34112

January 14, 2025
9:00 AM

Commissioner Chris Hall, District 2; – Chair
Commissioner Burt Saunders, District 3; – Vice Chair
Commissioner Rick LoCastro, District 1
Commissioner Dan Kowal, District 4; – CRAB Co-Chair
Commissioner William L. McDaniel, Jr., District 5; – CRAB Co-Chair

NOTICE: All persons wishing to speak on Agenda items must register prior to presentation of the Agenda item to be addressed. All registered speakers will receive up to three minutes unless the time is adjusted by the Chair. Additional minutes may be ceded to an in-person speaker by other registered speakers who must be present at the time the speaker is heard. No public speakers will be heard for Proclamations, Presentations and Public Petitions. Speakers on Presentations are limited to 10 minutes, unless extended by the Chair. All persons wishing to speak on a Consent Item must register prior to the Board's Approval of the day's Consent Agenda, which is heard at the beginning of the meeting following the Pledge of Allegiance.

Anyone wishing to address the Board on Public Petition must submit the request in writing to the County Manager at least 13 days prior to the date of the meeting. The request shall provide detailed information as to the nature of the Petition. The Public Petition may not involve a matter on a future Board agenda, and must concern a matter in which the Board can take action. Public petitions are limited to a single presenter, with a maximum time of ten minutes, unless extended by the Chair. Should the petition be granted, the item will be placed on a future agenda for a public hearing.

Anyone wishing to address the Board on general topics not on this agenda or a future agenda must register to speak prior to the Public Comment portion of the agenda being called by the Chair. Speakers will be limited to three minutes, and no additional minutes may be ceded to the speaker. At the Chair's discretion, the number of public speakers may be limited to 5 for that meeting.

Any person who decides to appeal a decision of this Board will need a record of the proceeding pertaining thereto, and therefore may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based.

Collier County Ordinance No. 2003-53 as amended by ordinance 2004-05 and 2007-24, requires that all lobbyists shall, before engaging in any lobbying activities (including but not limited to, addressing the Board of County Commissioners), register with the Clerk to the Board at the Board Minutes and Records Department.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, the provision of certain assistance. Please contact the Collier County Facilities Management Division located at 3335 East Tamiami Trail, Suite 1, Naples, Florida, 34112-5356, (239) 252-8380; assisted listening devices for the hearing impaired are available in the Facilities Management Division.

Lunch Recess scheduled for 12:00 Noon to 1:00 P.M.

1. Invocation and Pledge of Allegiance

16.K.1. Recommendation to appoint Kevin Johnson to the Contractors Licensing Board. *(2024-2355)*

16.K.2. Recommendation to reappoint Larry Holloway to the Ochopee Fire District Advisory Committee. *(2024-2356)*

16.K.3. Recommendation to appoint three members to the Black Affairs Advisory Board. *(2024-2357)*

16.L. Community Redevelopment Agency (Consent)

17. Summary Agenda

This section is for advertised public hearings and must meet the following criteria: 1) A recommendation for approval from staff; 2) Unanimous recommendation for approval by the Collier County Planning Commission or other authorizing agencies of all members present and voting; 3) No written or oral objections to the item received by staff, the Collier County Planning Commission, other authorizing agencies or the Board, prior to the commencement of the BCC meeting on which the items are scheduled to be heard; and 4) No individuals are registered to speak in opposition to the item. For those items which are quasi-judicial in nature, all participants must be sworn in.

17.A. This item requires ex parte disclosure to be provided by the Commission members. Should a hearing be held on this item, all participants are required to be sworn in. Recommendation to approve a Resolution designating Metro South as a Mixed-Use Project (MUP) in the Gateway Triangle Zoning Overlay District, Commercial Mixed-Use Sub-District (GTZO-MXD), comprising 0.64± acres pursuant to Land Development Code Sec. 2.03.07.N.4; providing for designation as "MUP," and approving up to a maximum of 8 residential dwelling units, including 7 bonus density units as determined through the SDP process and 3,860 square feet of permitted commercial uses, with one deviation; and providing for conceptual site plan approval, for parcels located south of Tamiami Trail East, approximately 295 feet east of Bayshore Drive. *(2024-1990)*

17.B. This item requires that Commission members provide ex-parte disclosure. Should a hearing be held on this item, all participants are required to be sworn in. Recommendation to approve Petition VAC-PL20240002006, to conditionally disclaim, renounce, and vacate a portion of the Trail Boulevard, depicted as an 80-foot right of way adjacent to Lots 25 through 30, Block A, Pine Ridge, as recorded in Plat Book 3, Page 24, of the Public Records of Collier County, Florida, located approximately 200 feet north of Pine Ridge Road (C.R. 896), abutting the east side of Tamiami Trail North (U.S. 41), located in Section 10, Township 49 South, Range 25 East, Collier County, Florida. *(2024-2276)*

17.C. Recommendation to adopt a Resolution approving amendments (appropriating carry forward, transfers, and supplemental revenue) to the Fiscal Year 2024-25 Adopted Budget. (The Budget

Amendments in the attached Resolution have been reviewed and approved by the Board of County Commissioners via separate Executive Summaries.) *(2024-2348)*

17.D. *** This item has been continued to the January 28, 2025 BCC Meeting. *** Recommendation to repeal and replace Procurement Ordinance No. 2013-69, as amended, with the attached updated Procurement Ordinance. *(2025-38)*

18. Adjourn

Inquiries concerning changes to the Board's Agenda should be made to the County Manager's Office at 252-8383.

TRANSCRIPT OF THE MEETING OF THE BOARD OF COUNTY COMMISSIONERS

Naples, Florida December 10, 2024

LET IT BE REMEMBERED that the Board of County Commissioners, in and for the County of Collier, and also acting as the Board of Zoning Appeals and as the governing board(s) of such special districts as have been created according to law and having conducted business herein, met on this date at 9:00 a.m., in REGULAR SESSION in Building "F" of the Government Complex, East Naples, Florida, with the following Board members present:

Chairman: Chris Hall
Rick LoCastro
Dan Kowal
William L. McDaniel, Jr.
Burt L. Saunders

ALSO PRESENT:

Amy Patterson, County Manager
Trinity Scott, Transportation Management Services
Jeffrey A. Klatzkow, County Attorney
Crystal K. Kinzel, Clerk of the Circuit Court
Troy Miller, Communications & Customer Relations

DRAFT

MS. PATTERSON: Chair, you have a live mic.

CHAIRMAN HALL: Good morning, everyone. Welcome to the commissioner meeting.

I want to let everybody know that we have a full day today, very full day. And if you haven't silenced your cell phone, please do so at the moment.

And we're going to have some procedural changes today a little bit. We'll explain those later.

I want to remind every speaker that speaks on any subject that you have three minutes, not three minutes and a second. We've got a lot of people to move through the chute this morning. And we want to hear what you have to say, but we don't want to hear more than you have to say.

So with that, let's get started. Let's get the Lord in on this deal.

Item #1A

INVOCATION BY PASTOR JOHN HUFFMAN – HARVEST RECOVERY MINISTRIES – PLEDGE OF ALLEGIANCE BY ARMY VETERAN JR RESTREPO – INVOCATION AND PLEDGE OF ALLEGIANCE GIVEN

MS. PATTERSON: Very good. Today we have our invocation by Pastor John Huffman, Harvest Recovery Ministries, and our Pledge of Allegiance will be led by JR Restrepo, Army veteran, Desert Storm, five years, and VFW 7721.

PASTOR HUFFMAN: Father, I just thank you, Lord. I thank you for this county, Lord. I thank you for the leaders that are leading this county, Lord. I just pray that you give them a supernatural wisdom, Father. Lord, that you just give them the ability to articulate their hearts, Father, for this county. Lord, I pray that you protect

them and their families.

Lord, I pray for those that are going to come up here with their petitions today, Lord, that you allow them to articulate properly so that we can understand them, Lord, and this county can continue to grow with your grace.

Lord, be involved in this meeting, Lord. As the commissioners said today, Lord, there's not a lot of time. So we just pray that everybody here is heard, they feel heard, Lord, and that the County Commissioners that you blessed to serve over us, Lord, hear them loud and clear and implement properly.

So we thank you for that wisdom. We love you for this wisdom, and we ask all this in Jesus' name, amen.

MR. RESTREPO: Ladies and gentlemen, please join me in the Pledge of Allegiance.

(The Pledge of Allegiance was recited in unison.)

Item #2A

APPROVAL OF TODAY'S REGULAR, CONSENT AND SUMMARY AGENDA AS AMENDED (EX PARTE DISCLOSURE PROVIDED BY COMMISSION MEMBERS FOR CONSENT AGENDA.) - MOTION TO APPROVE BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER LOCASTRO - APPROVED AND/OR ADOPTED W/CHANGES

CHAIRMAN HALL: Good job.

MS. PATTERSON: Commissioners, agenda changes for December 10th, 2024.

First is to move Item 16K12 to 12B. This is a recommendation to approve and authorize the Chairman to execute a settlement agreement which will dismiss all prejudice -- all claims brought by

DRAFT

Naples Golf Development, LLC, against Collier County and Commissioner McDaniel related to a Bert Harris claim filed pursuant to Florida Statutes 70.001 regarding application of the county's golf course conversion ordinance on the Links of Naples Golf Course and approve all necessary budget amendments. This is being moved at the County Manager's request.

Second is to move Item 16K8 to 12C. This is a recommendation to appoint four members to the Library Advisory Board. This is being moved at Commissioner Hall's request.

We have an agenda note for 16B12. It should include the following additional text to the recommendation: "And authorize staff to enter into a work order for Task D for permitting, bidding, and post-design services for the Wiggins Pass maintenance dredge." This add is at staff's request.

We do have a couple of time-certain items. First, we have Companion Items 9A, 9B, and 9C are to be heard no sooner than 10 a.m. This is related to the Fiddler's Creek Section 29 development area, Marco Shores Fiddler's Creek Planned Unit Development, and Marco Shores Fiddler's Creek Development Order Amendment.

Second, Companion Items 11A and 11B to be heard no sooner than 1 p.m., which is the Collier County Behavioral Health Center updates and the related naming rights agreement with the David Lawrence Mental Health Center, Inc.

We do have court reporter breaks scheduled for 10:30 and 2:50.

With that, County Attorney.

MR. KLATZKOW: Nothing. Thank you.

MS. PATTERSON: Commissioners, ex parte on the consent and summary and any changes.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: I have no changes on the summary. 17B, I do have meetings.

DRAFT

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Thank you, Mr. Chairman.

I have no changes to the agenda and no ex parte on the agenda.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Good morning, sir.

I have no changes either, and I do have meetings on 17B and meetings and calls on 17D on the summary.

CHAIRMAN HALL: All right. Thank you.

Commissioner LoCastro.

COMMISSIONER LoCASTRO: No changes, and I had meetings on 17B.

CHAIRMAN HALL: I have no changes, and I do have meetings and e-mails on 17B and meetings on 17D as well.

Troy, do we have any speakers regarding one of the summary items?

MR. MILLER: I have no one listed for consent or summary at this time, sir.

CHAIRMAN HALL: Okay. With that, can I get a motion to approve the consent and summary.

COMMISSIONER McDANIEL: So moved.

COMMISSIONER LoCASTRO: Second.

CHAIRMAN HALL: All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

CHAIRMAN HALL: Done.

DRAFT

Item #2B

OCTOBER 22, 2024, BCC MINUTES - MOTION TO APPROVE AS PRESENTED BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER LOCASTRO - APPROVED

Item #2C

NOVEMBER 12, 2024, BCC MINUTES - MOTION TO APPROVE AS PRESENTED BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER LOCASTRO - APPROVED

MS. PATTERSON: Commissioners, Item 2, agenda, and minutes. We have Item 2A and 2B if you'd like to take them together. Those are the meeting minutes for October 22nd, 2024, and November 12th, 2024.

COMMISSIONER McDANIEL: Move for approval.

COMMISSIONER LoCASTRO: Second.

CHAIRMAN HALL: Moved and seconded. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

MS. PATTERSON: Very good. Before we move past our awards and recognitions, I did just want to thank the staff. We had several staff members scheduled to get awards today, and they graciously agreed to be moved to January so that we could make way on this agenda for some of the more lengthy items, so we'll be seeing all of those folks in January. And thank you again to those of you

that agreed to be moved.

Item #5

ARTIST OF THE MONTH – EMILIO TODRIGUEZ AND JOHN MELLEKY, COLLIER COUNTY EMPLOYEES

That brings us to Item 5. Before we start the presentation for 5A, I just want to direct your attention to the back of the room for the Artist of the Month. We have two Collier County employees as the December Artists of the Month.

Along the back wall are two original paintings by Emilio Rodriguez, tangible personal property appraiser, who has worked in the Property Appraiser's Office for seven years. Emilio grew up in New York City as a young aspiring artist. He marveled at the explosive high-energy colors and diverse themes depicted in the New York City subway system. Since moving to Florida in 2011, he has carried forward those themes in his artistic work as seen in his paintings here.

On the side wall are two digital prints created by John Melleky, arts and culture manager, Naples, Marco Island, and Everglades CVB. John likes to travel and photograph the places he visits. Since the -- since the Employee Art Exhibition, he is now working on developing his digital editing skills and taking more photos on his journeys.

Both Emilio and John participated in the Creative Collier Employee Art Exhibition held earlier this year at the Collier County Government Center Museum. Additional artists from this exhibition will be displayed throughout the year in the Board chambers.

Item #5a

DRAFT

PRESENTATION OF THE COLLIER COUNTY BUSINESS OF THE QUARTER FOR DECEMBER 2024 TO SPHERION STAFFING & RECRUITING, ACCEPTED BY REPRESENTATIVES OF THE BUSINESS. ALSO ATTENDING IS BETHANY SAWYER, GREATER NAPLES CHAMBER OF COMMERCE - PRESENTED

With that, that brings us to Item 5A. This is a presentation of the Collier County Business of the Quarter for December 2024 to Spherion Staffing and Recruiting. The award will be accepted by representatives of the business. Also attending is Bethany Sawyer, Greater Naples Chamber of Commerce. Congratulations.

MR. DAVID MILLER: Hi. My name's David Miller. I'm the owner of Spherion Staffing and Recruiting.

We want to thank Collier County for this recognition. We've been in Collier County/Naples since 2011. We really enjoy the pro-business climate you guys have provided for us, which was a great recognition for our company.

We basically help people find employment, and we help companies find people. So if you're looking for a job or you know somebody who needs a job, we're your people, Spherion Staffing.

And just on another note, our branch here in Naples, they have won the Branch of the Year four times. So congratulations to Denise Serdahl and her team. Thank you very much.

(Applause.)

CHAIRMAN HALL: All right. County Manager, what can we knock out before 10?

Item #7

DRAFT

PUBLIC COMMENTS ON GENERAL TOPICS NOT ON THE CURRENT OR FUTURE AGENDA

MS. PATTERSON: Troy, do we have any public comments?

MR. MILLER: Yes, ma'am. We have two for public comment. Your first speaker is Patrick Wack, and he'll be followed by Sue Black.

MR. WACK: Wack and Black.

Hi. Thanks for your time. I'm Patrick Wack, president of the Seagate Property Owners Association in Naples, joined by Joanne Jaddy (phonetic), who's representing Naples Cay and many of our neighbors.

We're here to speak to you about two issues with regard to Clam Bay. The first is the declining water quality and ecological health. The second is our community's lack of representation in matters critical to the bay.

As a bit of background, the waters of Clam Bay about our communities. The waters have been impaired for many years and were recently added to FDEP's list of impaired waters. Now, we care about the bay for two reasons. One, it's our back yard, it's integral to our quality of life and property values. Also, it's a jewel of Collier County enjoyed by residents and tourists alike.

We're concerned that the continued decline could result in a situation like the late 1990s where the system collapsed, and remediation costs millions in today's dollars.

Clam Bay's water quality and ecological issues are well documented in the county's Pelican Bay Services Division report. I can provide copies of the relevant data. These issues are primarily a function of nutrients entering the system, which has a lot to do with reclaimed irrigation water and also inadequate flushing, which is partially related to dredging effectiveness. The bay is small and

shallow and particularly sensitive to how water flows and restrictions.

The second issue is our community's lack of representation, both of our communities. In 2016, in a contentious 3-2 vote, the BCC gave oversight of both the dredging and the water quality to the Pelican Bay taxing unit. This was largely done as a result of a conflict between Coastal Zone Management and Pelican Bay over dredging for navigation.

At the time a dissenting commissioner said, I feel the County Commissioners are really abdicating their role for the rest of the county by approving this for one community. Essentially, a private entity was given control of a public asset.

I will also add that Pelican Bay has historically been reimbursed with TDC funds for the dredging and related costs. One real-world implication of this structure occurred in 2022 when, during a dredging operation, PBSD's contractor built an unauthorized land bridge. For at least six weeks, this shut off the water flow. And if your toilet doesn't flush for six weeks, it stinks. This was -- there was never a heads-up, never an apology.

Now, we've met extensively with Pelican Bay representatives over the last year. Unfortunately, I think the response is best summed up at a recent PBSD board meeting where our request for an action plan was met with no discussion and an eye roll by one member.

To address these issues, we suggest three things: One, the formation of a Clam Bay advisory committee to advise the county on issues related to the health of the bay; water-quality flushing/dredging. This should represent all stakeholders. Second, consider our request for $75,000 to fund an alternative engineering and biological analysis of the bay. Third, there should be greater oversight by other entities within the county, whether the County Manager or otherwise.

DRAFT

Thank you.

MR. MILLER: Your next speaker is Sue Black.

Now might be a good time to remind all of our speakers, there is a timer with lights at each podium. When the light goes yellow, you'll have 30 seconds. You'll hear a single beep. When the light goes red, you will hear beeps. Your time is up.

Sue.

MS. BLACK: Good morning, Commissioners. My name is Sue Black. I'm a resident of Seagate for the past 22 --

CHAIRMAN HALL: Excuse me, ma'am. Excuse me. Before you get started, we'll reset your clock.

COMMISSIONER McDANIEL: Don't be sorry. He was sleeping at the switch.

There's a fellow in the room that knows more about Clam Bay and everything that transpires that's in the far back corner there. I think maybe at some particular point in time -- Tim Hall. And I think at some particular point in time, we ought to -- we ought to bring this up as a hearing and have the public discussion with regard to it. I think --

CHAIRMAN HALL: Yeah, I agree about several --

COMMISSIONER McDANIEL: I would like -- I would like to do that.

COMMISSIONER KOWAL: Can I just make a comment on the subject?

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Myself and Trinity attended a meeting last week with the individuals at Pelican Bay, the organization there with Chad and the other individuals. We had another gentleman from the county. These fine folks came to see me at the beginning of last week and brought this to my attention.

So we are in the infinite stages of moving this in a direction

hopefully everybody can be satisfied with. I know I didn't have an opportunity -- I think I e-mailed Mr. Wack back the other day. I think the meeting went pretty well to a point, and I believe they had a meeting right before my meeting, and it seemed to be more positive than a typical meeting they've had in the past. So we are -- it's -- we are -- the problem is it's jurisdictional. These individuals live in the City of Naples.

COMMISSIONER McDANIEL: Right.

COMMISSIONER KOWAL: They're right on the line.

COMMISSIONER McDANIEL: Yeah.

COMMISSIONER KOWAL: And they are closer to the bay than most of the people in Pelican Bay, and they feel the effects anybody else, but they don't have any voice in that. So I think that's something we need to just start moving forward.

COMMISSIONER McDANIEL: I remember when I first got elected, I went and sat with Tim and learned everything there was to know about upper, lower Clam Bay and everything that goes on with the ultimate flushing and the loss of the mangroves that we have up there and so on and so forth. So I think bringing it forward and having a public discussion about it is a really good idea.

COMMISSIONER SAUNDERS: And, Mr. Chairman, none of us were on the Board at the time that decision was made.

COMMISSIONER McDANIEL: Right.

COMMISSIONER SAUNDERS: And it does seem a little odd that we don't have authority over the environmental impacts of dredging on a body of water that is within our jurisdiction. So I agree. And I think sooner is better than later.

COMMISSIONER McDANIEL: Agreed.

COMMISSIONER SAUNDERS: So thank you, Mr. Chairman.

CHAIRMAN HALL: No, I think it warrants a great discussion. So thank you. All right.

Sorry about that.

MS. BLACK: No worries. As I said, I'm Sue Black. I've lived in Seagate for 20-plus years. I just want to reiterate and thank you gentlemen for your comments and feedback of getting support for our cause.

Hurricanes are not going to stop. We're always going to have the sand shifting and the shoals being created. As Patrick said, this is about 50 feet from our backyard. We don't have a view of it; we live it. So we really need to look at the health of the water.

There's got to be an amicable solution for the cleansing and the dredging of the water. Do the right things, and the right things will happen.

So thank you very much for your time.

MR. MILLER: That is all of our speakers on Item 7.

MS. PATTERSON: Commissioners, we're going to try to jump around the agenda a little bit here and take some of the items that we can address prior to our 10 o'clock time-certain.

Item #11C

AWARD CONSTRUCTION INVITATION TO BID (“ITB”) NO. 24-8222, “MEDICAL EXAMINER OFFICE EXPANSION,” TO RYCON CONSTRUCTION, INC., IN THE AMOUNT OF $4,584,760 AND AN OWNER’S ALLOWANCE OF $250,000.00 FOR POTENTIAL UNFORESEEN CONDITIONS, AUTHORIZE THE CHAIRMAN TO SIGN THE ATTACHED AGREEMENT, AND APPROVE THE NECESSARY BUDGET AMENDMENTS. (BRIAN DELONY, SUPERVISOR - PROJECT MANAGEMENT (LICENSED) - MOTION TO APPROVE BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER LOCASTRO – APPROVE

DRAFT

So let's start with Item 11C. This is a recommendation to award construction Invitation to Bid No. 24-8222, Medical Examiner Office expansion, to Rycon Construction, Inc., in the amount of $4,584,760, and an owner's allowance of $250,000 for potential unforeseen conditions, authorize the Chairman to sign the attached agreement, and approve the necessary budget amendments.

Mr. Brian DeLony, your Director of Facilities Management, is here to present.

MR. DeLONY: Good morning, Commissioners. Brian DeLony, Director of Facilities Management.

Today I'm here to present on the construction contract 24-8422 for the Medical Examiner expansion project.

COMMISSIONER McDANIEL: Do you want a quick motion for approval?

MR. DeLONY: That would be good.

COMMISSIONER McDANIEL: I'll move that.

COMMISSIONER LoCASTRO: Do you have anything in your presentation that you want to get on the record that maybe -- you know, for the public or anything that, you know --

MR. DeLONY: I mean, the biggest part of the project is -- this construction project is the Medical Examiner has to stay in operation. So this will be a phased project for an expansion, but it's a little -- been a little bit of difficulty there associated with it. But other than that --

COMMISSIONER LoCASTRO: It's a planned expansion. I didn't want anybody that never heard of it to think that all of a sudden you're squeezing something in.

MR. DeLONY: It is a planned expansion, yes, sir.

COMMISSIONER LoCASTRO: Yeah, okay.

COMMISSIONER McDANIEL: So moved.

DRAFT

COMMISSIONER LoCASTRO: Second.

CHAIRMAN HALL: All right. Moved and seconded. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

CHAIRMAN HALL: Good job, Brian.

MR. DeLONY: Thank you.

COMMISSIONER McDANIEL: Nice presentation.

Item #12A

BOARD OF COUNTY COMMISSIONERS APPOINTING ITS MEMBERS TO THE COMMUNITY REDEVELOPMENT AGENCY, THE TOURIST DEVELOPMENT COUNCIL, THE COMMUNITY AND ECONOMIC DEVELOPMENT BOARD, THE AFFORDABLE HOUSING ADVISORY COMMITTEE, THE PUBLIC SAFETY COORDINATING COUNCIL, AND THE SOUTHWEST FLORIDA REGIONAL PLANNING COUNCIL

- COMMISSIONER KOWAL AND COMMISSIONER MCDANIEL -COMMUNITY REDEVELOPMENT AGENCY
- COMMISSIONER HALL - TOURIST DEVELOPMENT COUNCIL
- COMMISSIONER LOCASTRO - COMMUNITY AND ECONOMIC DEVELOPMENT BOARD

- COMMISSIONER KOWAL - AFFORDABLE HOUSING COMMITTEE
- COMMISSIONER KOWAL - PUBLIC SAFETY COORDINATING COUNCIL
- COMMISSIONER MCDANIEL AND COMMISSIONER LOCASTRO - SOUTHWEST FLORIDA REGIONAL PLANNING COUNCIL - MOTION TO APPROVE WITH CHANGES BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER HALL – APPROVED

MS. PATTERSON: Commissioners let's go ahead and go to Item 12A. This is a recommendation that the Board of County Commissioners appoint its members to the Community Redevelopment Agency, the Tourist Development Council, the Community and Economic Development Board, the Affordable Housing Advisory Committee, the Public Safety Coordinating Council, and the Southwest Florida Regional Planning Council.

This item is brought onto the agenda under the County Attorney's Office's section, but these are your annual appointments to the advisory boards.

CHAIRMAN HALL: So basically -- I have to move to the Tourist Development --

MS. PATTERSON: Yes, sir.

CHAIRMAN HALL: -- so that's going to put a hole in the Affordable Housing Advisory Committee.

And, Commissioner Kowal, are you satisfied where you're at, or do you want to move?

COMMISSIONER KOWAL: You know, I could take on a little extra responsibility. With the public safety board, it's -- I mean, I have -- it's pretty scheduled out, and, you know, it's not like we get a lot of extra meetings or extra stuff that comes up. So I could -- I

could help out with the Affordable Housing Committee.

CHAIRMAN HALL: I would like that. I mean, we've talked about that. We've talked about you behind your back.

COMMISSIONER KOWAL: Oh, okay. I didn't know that. I guess I have that sixth sense.

CHAIRMAN HALL: No. With your real estate background, I think you would be a good fit to fill those shoes.

COMMISSIONER KOWAL: All right. Well, I'll be more than happy to accept that.

COMMISSIONER LoCASTRO: Ha.

CHAIRMAN HALL: What about you, Commissioner LoCastro, you got any desires where you'd like to go?

COMMISSIONER LoCASTRO: You know, one of the things that we've said at previous meetings is that we want to spread the wealth so we all get a chance to have exposure to these boards. So I've done AHAC. I'm obviously coming off of TDC. When I was first elected, I did Public Safety Coordinating Council and then turned it over to Commissioner Kowal. So I look at those as things I've already gotten exposure to.

The South Florida Regional Planning Council, that's what you and I tag team on. But Colonel -- or Commissioner McDaniel really leads the charge on that one, and that one I look at as sort of like almost the subset. You know, I actually think, before I volunteer for anything else, unless you think differently, we should stay on that one for continuity because --

COMMISSIONER McDANIEL: Yes.

COMMISSIONER LoCASTRO: Especially you. You're in the guts of that one, and that one -- to save some time here, you know, I strongly suggest the two of us, you know, stay on that one. It could dissolve this coming year. It could totally be overhauled, and, you know, we don't want to change horses on that one.

DRAFT

So I'm basically his backup, but I try to go to as many meetings as possible. And then, you know, when we're there together, we really sort of lead the charge in some discussions or, you know, my job's to back up Commissioner McDaniel. So I'll stay on that one.

The Community and Economic Development Board, that's you, Commissioner Saunders --

COMMISSIONER SAUNDERS: Yes.

COMMISSIONER LoCASTRO: -- right? Okay. What do you want to say about that one? Is this your second year?

COMMISSIONER SAUNDERS: Yeah. I have no problem staying on that. I am going to be chairing next year, so -- and that particular board does not -- is not really active, so I can certainly handle both of those.

COMMISSIONER LoCASTRO: Okay. I mean, that's the only board that I haven't been a part of. I guess -- I'm sorry, the Community Redevelopment Agency is another board.
That's -- who's the -- that's you.

COMMISSIONER McDANIEL: Immokalee and Bayshore.

COMMISSIONER LoCASTRO: Yeah, so that really can't swap.

COMMISSIONER McDANIEL: It could, but it would be better --

COMMISSIONER LoCASTRO: Yeah, it doesn't make sense.

So it looks like there's nothing left for me, so I'll pass my time to Commissioner Saunders.

COMMISSIONER SAUNDERS: Well, why don't you take over the Economic Development Board then.

COMMISSIONER LoCASTRO: Okay.

COMMISSIONER McDANIEL: That will free him up.

COMMISSIONER LoCASTRO: Yeah. And also because you're about to be chair, so I'll take the EDB.

CHAIRMAN HALL: Commissioner Saunders, is there anything that you haven't done?

COMMISSIONER SAUNDERS: There are a lot of things I haven't done that I can't talk about.

COMMISSIONER McDANIEL: So with those anointments, then we'll --

COMMISSIONER LoCASTRO: I think we covered it all, right?

COMMISSIONER McDANIEL: We covered it all.

COMMISSIONER LoCASTRO: Commissioner Kowal, you're staying on safety, right?

COMMISSIONER KOWAL: Yeah, I would like to stay on there.

COMMISSIONER McDANIEL: Do you need a motion on those things?

MS. PATTERSON: County Attorney?

MR. KLATZKOW: You may as well.

COMMISSIONER McDANIEL: So I'll make a motion that those appointments stand.

CHAIRMAN HALL: I'll second it.

All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: All opposed, speak now or forever hold their peace.

(No response.)

Item #14A

DRAFT

AWARD INVITATION TO BID (“ITB”) NO. 24-8267, THE BAYSHORE 17 ACRES PEDESTRIAN BOARDWALK CONNECTION TO SUGDEN PARK PROJECT, TO INFINITE CONSTRUCTION, LLC IN THE BASE BID AMOUNT OF $3,335,497.77, APPROVE AN OWNER’S ALLOWANCE OF $37,000.00, AND AUTHORIZE THE CHAIRMAN TO SIGN THE ATTACHED AGREEMENT - MOTION TO APPROVE BY COMMISSIONER KOWAL; SECONDED BY COMMISSIONER SAUNDERS – APPROVED

MS. PATTERSON: Commissioners let's move on to Item 14A. This is a recommendation -- this is under your Community Redevelopment Agency. This is a recommendation to award Invitation to Bid 24-8267, the Bayshore 17 acres pedestrian boardwalk connection to Sugden Park project to Infinite Construction, LLC, in the base bid amount of $3,335,497.77, approve an owner's allowance of $37,000, and authorize the Chairman to sign the attached agreement.

Mr. John Dunnuck, your Director of CRAs and Facilities Management, is here to answer questions or present.

MR. DUNNUCK: Good morning. The pleasure of the Board, I can do a full presentation or cut to the chase.

This has been a long-standing --

COMMISSIONER KOWAL: I could make a motion to approve. I think it's something we've been working on for a long time.

CHAIRMAN HALL: Yeah, I'm very familiar.

COMMISSIONER KOWAL: I'm very familiar, I mean, with what's going on. And the contractor that got awarded this is very reputable, and they actually come in lower than a lot of other

contractors.

COMMISSIONER SAUNDERS: I'll second that, Mr. Chairman.

CHAIRMAN HALL: All right. Motion and second to approve. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

MR. DUNNUCK: Thank you. I'd like to take a moment to thank Tami Scott from on our team who's worked on this for six years. Thank you.

MS. PATTERSON: Thank you. All right.

Item #12C

RESOLUTION 2024-257: APPOINTING FOUR MEMBERS TO THE LIBRARY ADVISORY BOARD. (COMMISSIONER HALL'S REQUEST) - MOTION TO APPROVE WITH CHANGE TO ADD JENNIFER ASHLEY FOR DISTRICT 2 BY COMMISSIONER HALL; SECONDED BY COMMISSIONER SAUNDERS – ADOPTED

CHAIRMAN HALL: County Manager, if we want to, we can just do 12C real quick. It will take a minute.

MS. PATTERSON: Sure. 12C is moved from Item 16K8. This is a recommendation to appoint four members to the library advisory board, and this was moved at Commissioner Hall's request.

DRAFT

CHAIRMAN HALL: I am only going to change one thing. In District 2, I'm going to recommend that we approve Jennifer Ashford to sit on that board, and that's the only change.

So I'll make a motion to approve Jennifer Ashford to the Library Advisory Committee.

COMMISSIONER LoCASTRO: So that adds five? We're appointing five?

CHAIRMAN HALL: It's the same one. There was one -- there was just one spot for District 2, and it was another person, but I would like to see Jennifer Ashford in that spot.

COMMISSIONER SAUNDERS: And the motion includes the appointment of the others?

CHAIRMAN HALL: Correct.

COMMISSIONER SAUNDERS: I'll second that motion.

CHAIRMAN HALL: All right. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

CHAIRMAN HALL: Thank you.

Item #11D

COUNTY ATTORNEY TO ADVERTISE AN ORDINANCE REPEALING AND REPLACING PROCUREMENT ORDINANCE NO. 2013-69, AS AMENDED. (SANDRA SRNKA, DIVISION DIRECTOR) - MOTION TO APPROVE BY COMMISSIONER HALL SECONDED BY COMMISSIONER SAUNDERS –

MS. PATTERSON: Commissioners, with that, let's jump back to Item 11D. I think we have enough time to take the procurement ordinance item. This is a recommendation to authorize the County Attorney to advertise an ordinance repealing and replacing Procurement Ordinance No. 2013-69, as amended. And here comes Sandra, your division director. Now, you'll have to say your name for me.

MS. SRNKA: Sandra Srnka, for the record.

MS. PATTERSON: Division Director for Procurement.

MS. SRNKA: I do have a presentation. This definitely is a good-news item. If you'd like, I'll start my presentation.

So this has been -- the development of the procurement ordinance, which is part of your agenda packet, has been really a joint effort. We have worked with outside legal counsel, the office of the County Attorney, key county stakeholders, along with the Clerk's Office, and we also have a consultant that provided benchmarking comparison with other local agencies.

Now, the establishment of the procurement ordinance, it was established in 1987. In 2015, there was an increase to the thresholds. Those are the current thresholds in place. So keep that in mind during this presentation that we have not requested an increase since 2015.

In 2013, there was a repeal of the ordinance, and there were subsequent amendments.

Now, the key benefits of repealing the ordinance, it ensures that we're in compliance with Florida Statute. It promotes fair competition and transparency. It aligns the thresholds with peer organizations, reduces administrative burden while streamlining processes, and it improves efficiencies and maximizes county

DRAFT

resources.

We are recommending an increase in the thresholds. We are recommending, from the small purchase, a single quote to increase it from 3,000 to 10,000. For your informal competition, your three quotes, from the $3,000-50,000 range to 10,000-to-250- range. For the formal competition threshold, we are requesting an increase from 50,000 to 250,000.

Now, as part of the benchmarking study, our consultant looked at surrounding agencies that were similar in nature and size. And as you can see here, Collier County is among the lowest at a $3,000 range for your informal competition, highest being 50,000 for Lee County.

For your competitive bidding threshold, again, Collier County is among the lowest at 50,000. City of Cape Coral is at 250-, along with Lee County and Manatee.

The same applies for the governing body approved threshold. Collier County is at a $50,000 range, where we have Sarasota, Broward, Manatee at a higher range.

Now, as we were putting this together, we didn't want to lose sight on the fact that it's important to have internal controls to mitigate risk associated with an increase of thresholds. We want to make sure that they're strong, accountable measures. We want to make sure that we provide mandatory training, and this would be at all levels of the procurement cycle, and everyone that is involved in this cycle.

And then we also wanted to make sure that we implemented and leveraged our OpenGov, which is our bidding platform. We want to make it mandatory for quotes between that 5,000 to $250,000 range to be mandatory use through that bidding platform.

Now, the bidding platform does provide a lot of security. There is a lot of reporting capabilities, and there's also an ability to have that audit trail. We are also on a leverage SAP, and we're working on

seeing if we can add additional fields that will provide additional reporting capability.

CHAIRMAN HALL: I have a question.

MS. SRNKA: Yes, sir.

CHAIRMAN HALL: Explain "strong accountability measures."

MS. SRNKA: So strong accountability measures comes at -- in all facets of it. We have to start with the individuals that are requesting services. For example, those that are out in the field, along with those in the accounting division, along with those that are managing it, approving the managers, and also director. So we are working with our corporate compliance, along with our Clerk's Office, to ensure that there are internal controls at each of those -- in each of those areas.

CHAIRMAN HALL: I mention that because -- I mention that because, you know, for two years we've dealt with after-the-facts and single source, you know, all of these things that we have to basically ratify because they're already done. And I can see, you know, internal controls to mitigate the risk. I'm all about empowering people, empowering people to do their job, empowering people to streamline the process.

Procurement is a slow part of the speed of government. So I'm all about empowering people to do that, but I'm also more about holding them accountable.

I understand that there's things that fall out of the normal processes, and that's fine. But if you have to come out of the normal process, find somebody to talk about it. Find a superior to talk about it. Find somebody -- get with the Clerk's Office. Find out a legal way to do this instead of just willy-nilly doing it and it coming back to us, "Commissioners, why did you-all make that decision?"

Well, we didn't. It was already done.

DRAFT

MS. SRNKA: I understand.

CHAIRMAN HALL: So I'm all about the strong accountability. So I want to empower people, but I also want to hold them accountable, because they need to act like their job depends on it because, basically, it does.

MS. SRNKA: And we also included additional language in our ethics section that really adds a little bit more value overall, and we also are adding additional language in the procurement manual, which the County Manager will execute.

So we're trying to cover all areas, but also what goes hand in hand is the educational part of that. That's why we are developing a more comprehensive training that would be mandatory and, again, at all levels.

Any additional questions, sir?

CHAIRMAN HALL: No. I love it. Set them up to win.

MS. SRNKA: Thank you.

COMMISSIONER McDANIEL: One quick question.

MS. SRNKA: A couple additional significant proposal --

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Before you jump, are the manuals going to come back to us for review before they're signed off on?

MS. SRNKA: Yes, absolutely. And, again, those manuals, it's the purchasing manual and the procurement manual that are executed by the County Manager. But, yes, we would make that part of the packet.

COMMISSIONER McDANIEL: Because I concur with the Chairman with regard to accountability, but I'd like -- I'd like to be able to see what those measures that we're going to implement, in fact, are to hold people accountable that -- you know, we want to empower them, but at the same time they've got to step up to the plate. So I

want to make sure that if we're authorizing greater authority that there is, at the same time, accountability that comes with that.

MS. SRNKA: Absolutely.

COMMISSIONER McDANIEL: Okay.

MS. SRNKA: So a couple additional significant changes that you'll find in the ordinance is Section 3. It increases the County Manager's approval from the 5,000 to 250-. And, again, this is aligned with that formal competitive threshold.

Like I mentioned, the ethics section we expanded a little bit more, added more language. We wanted to make sure that it aligned with Florida Statutes, included a conflict-of-interest section, along with a code of silence process.

For Section 12, that is your procurement methods, for your exemption of competitions, along with the waiver, we went ahead and aligned it with the formal threshold. For your exemption of competition, we added a few additional categories, and for your waiver competition, we went ahead and aligned the single-source definition with the Florida Statute. Currently, we have a sole source, and a lot of times that causes a little bit of confusion, so we went ahead and just mirrored the language from the Florida Statute.

For your emergency purchases, we clarified the language in the ordinance and also in the manual, and that's more aligned with Florida Statutes.

We have a new section titled "Formal Competitive Awards," and that outlines the bidding process along with negotiations, and it's aligned with current and best practices.

For your purchasing card program, we clarified a lot of the language in there. We went ahead and clarified the language that the County Manager is responsible for setting those limits for your single transactions and your monthly spending limits.

Section 20, your contract administration section, again, we

wanted to make sure that we aligned the approval with that competitive threshold. So for your change orders and amendments that exceed the original Board amount, anything over 250- would be presented to the Board for approval. Anything under will be presented to the Board for approval through that ratification -- Procurement Ratification Report.

It also allows the procurement director to approve increases and decreases to Board-approved days, and we have incorporated a process for requests that come in for contractual price adjustments.

In addition to that section, we went ahead and stated that any request from staff to reduce the retainage below that 5 percent that is Florida Statute or waive the assessment of liquidated damages, those would be coming back to the Board for approval.

And then it also authorizes the procurement director to approve assignments of contracts and after-the-facts. I know a lot of people don't want to hear the after-the-fact term, but we went ahead and aligned it up also with the formal competitive threshold that will streamline a lot of our processes. So anything over 250- would be presented to the Board for approval. Anything less than that amount would be reported to the Board through that ratification report.

So our next steps is for the Board to approve the advertisement of the procurement ordinance. We would bring it back at the next meeting, and we continue to work with internal staff, corporate compliance, and the Clerk's Office to establish those internal controls.

CHAIRMAN HALL: Great.

MS. SRNKA: Thank you.

CHAIRMAN HALL: Can you include how we can incorporate the cone of silence?

MS. SRNKA: Absolutely, sir.

CHAIRMAN HALL: I'll make a move for approval.

COMMISSIONER McDANIEL: Second.

CHAIRMAN HALL: Moved and seconded. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.
COMMISSIONER LoCASTRO: Aye.
CHAIRMAN HALL: Aye.
COMMISSIONER SAUNDERS: Aye.
COMMISSIONER KOWAL: Aye.
CHAIRMAN HALL: Opposed?
(No response.)
CHAIRMAN HALL: Good job.
MS. SRNKA: Thank you very much.
CHAIRMAN HALL: Good job.

Item #11E

THE PROPOSED COLLIER COUNTY STATE AND FEDERAL LEGISLATIVE AND ADMINISTRATIVE PRIORITIES FOR 2025. (BRIDGET CORCORAN, LEGISLATIVE AFFAIRS COORDINATOR) - MOTION TO APPROVE BY COMMISSIONER HALL; SECONDED BY COMMISSIONER KOWAL – APPROVED

MS. PATTERSON: Commissioners, if you are okay with it, we can take the county -- Item 11E, which is our federal and state priorities. I think we have enough time to get through that one, even with a little bit of discussion. So, Item 11E is a recommendation to approve the proposed Collier County State and Federal Legislative and Administrative Priorities for 2025.

Ms. Bridget Corcoran, legislative affairs coordinator, is here to present.

MS. CORCORAN: Good morning. For the record, Bridget

DRAFT

Corcoran, Legislative Affairs coordinator.

So this document was produced in conjunction with the lobbying teams, county management, department staff, and, of course, with your input.

It's not an exhaustive list, and it's a snapshot in time. And I'll bring back any issues which I cannot derive direction from this document; I'll bring those back to you for your approval.

It is formatted in alphabetical order. There is -- the only one that is in order of priority is the appropriation projects, and the appropriation projects will be presented by Chairman Hall to the legislative delegation in this room on January 8th at 9 a.m.

So given your input in this document, if you have any questions, you know, I'm happy to answer them at this time. If not, I would just ask for a motion to approve. That also authorizes the Chair to draft as needed any correspondences on behalf of the Board for any of these projects.

CHAIRMAN HALL: Any questions?

(No response.)

CHAIRMAN HALL: All right. I don't think we have any questions. We've seen the document pretty extensively, so we're pretty familiar with it. With that, I'll make a motion to approve it.

COMMISSIONER KOWAL: Second.

CHAIRMAN HALL: All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

MS. CORCORAN: Great, thank you.

Item #11F

AN EXEMPTION FROM THE COMPETITIVE PROCESS TO EXECUTE EXPENDITURES TO VISIT FLORIDA FOR MEMBERSHIP FEES AND DESTINATION MARKETING PROGRAMS UP TO $82,000 FOR THE PERIOD OF OCTOBER 2024 THROUGH SEPTEMBER 2025, AND TO MAKE A FINDING THAT THESE EXPENDITURES PROMOTE TOURISM. (JAY TUSA, DIVISION DIRECTOR - TOURISM) - MOTION TO APPROVE A ONE-TIME $82,000 WITH THE CONTINUATION OF VALUE ASSESSMENT BY COMMISSIONER LOCASTRO; SECONDED BY COMMISSIONER SAUNDERS – APPROVED

MS. PATTERSON: Commissioners, just in time, I saw Mr. Tusa walk in the room, so let's go ahead and continue on with Item 11F. It's a recommendation to approve and authorize the Chairman, through an exemption from the competitive process, to execute expenditures to Visit Florida for membership fees and destination marketing programs up to $82,000 for the period of October 2024 through September 2025, and to make a finding that these expenditures promote tourism.

Mr. Jay Tusa, your division director of Tourism, is here to present. Sorry to get you right coming in the room.

MR. TUSA: But I've been in the hall, so I just --

MS. PATTERSON: Okay.

MR. TUSA: Yeah, I've been here. I'm just waiting to step in when --

MS. PATTERSON: Very good.

CHAIRMAN HALL: A man that stays ready doesn't have to get ready.

MR. TUSA: Good morning, Mr. Chairman, Commissioners.

Just -- I've prepared a brief overview for this agenda item for you, and I can walk you through this if you'd like.

I think that this presentation demonstrates the value of this partnership, this relationship that we have with Visit Florida, and then certainly when I'm through presenting this, any questions that the Board might have, I'm happy to answer those for you.

All right. So here is just a few -- a little brief overview, a few items on here. Visit Florida in their role, you know, official tourism marketing corporation for the state of Florida and then the partnership and what it provides to us. You know, marketing opportunities, marketing campaigns, co-op opportunities for tour operators, PR opportunities. So, these are just a few things. Also, their research, we have access to that, and then inclusion in photo and video shoots.

Let's see what else on here. And then this is a big one here at the bottom, assistance with recovery messaging and digital campaigns to support the destination after declared emergencies, as was the case with Hurricane Ian.

So, Visit Florida put up $200,000 in advertising for us after Hurricane Ian which really, you know, that's a great benefit for us when maybe we're not spending as much dollars in the event of a storm situation like that. And Visit Florida just did this recently with Bradenton and Sarasota as well following the storms we just recently had. So, they put up $500,000 for those two destinations. So definitely some added value there in our relationship with Visit Florida.

This is something that I wanted to demonstrate the value of our relationship with opportunities through tour operators. So, there's actually two of them here, and I'll just kind of show you this one real quick, and then I'll jump to this one. So, one was Germany; one was UK.

These are really important because these are where we do co-op marketing opportunities in international markets, and then people go through a tour operator and they book their stay to come to Collier County. So, this is something that we can track. So, this is number of room nights and revenue that were booked through these various operators. And you can kind of see here there's two for Germany, and then there are several others here for the UK.

One thing that I want to point out is I sent an e-mail to the commissioners yesterday afternoon in regard to this item in particular. The Clerk had brought up a point about this and maybe being a duplication of efforts with our international reps, and this actually works in concert with our international reps. Our international reps take advantage of these coop marketing opportunities to market these packages to people and then sell them.

So, in addition to these opportunities with Visit Florida, they also do this with other tour operators as well that generate room nights and revenue. So, I had asked our reps to send us a couple of examples yesterday, which they did. And just kind of a real quick note, there's probably about another $2 million in revenue that's realized through tour operators. So, tour operators are really important for us in a destination.

And then this is just some marketing campaigns, some support that we received. You can see there the cost savings, $255,000. And that $200,000 that I mentioned earlier in the presentation is listed here. That was the funds that Visit Florida put up. There was no matching for that. That was something they put up on behalf of the organization, the county.

And then you can kind of see there some other opportunities through AAA, and then there was also something we did for Hurricane Ian. Visit Florida matched some funds that we put up.

And then again, here's some cost savings through co-op

advertising, $85,000. So, if we were to go and do these different programs on this slide, it would cost an additional $85,000 outside of the Visit Florida partnership.

And then here's just some UK public relations. So, you can see there, we had some -- an opportunity for an article in *The Times.* The reach was one and a half million, and the value was $146,000.

So, you know, these PR opportunities, and then we have some here as well for Germany, these are really great opportunities for us to get out from a PR standpoint. It stands up and works in concert with our marketing efforts. So, when people see our ads or they go to a tour operator, they see articles and publications, they all work hand in hand together to showcase Collier County.

And then these are media mission opportunities through Visit Florida. This is where, basically, Visit Florida is taking us and other destinations as well to journalists in certain areas. So you can kind of see there, there was one in New York City, California. So what they'll do is they'll do a mission, and then they'll meet up with all these different media folks, and then they'll represent the destination.

That also saves us a little bit of money on the back end where we don't have to fly somebody out to California or New York. So there's also some cost savings there that's not reflected in this slide.

And then here's one slide that was asked when I presented this earlier to the Board on kind of what other counties are spending, and you can kind of see here it's broken down. This is a 2023 fiscal year spend by county for Visit Florida. And you can kind of see there, and then we're highlighted a little bit more down towards the bottom at $206,000.

And then -- so the request now -- when I originally came to the Board, it was $150,000, but that was across the remainder of FY '24 and then for '25. This ask is just for FY '25. So, it went from $150,000 to $82,000.

And then certainly, if you-all have any questions, I'm happy to entertain those.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: My main memory -- and I don't have specifics, Jay, but my main memory is telling me that the Visit Florida has a lot of conflicts, has a lot of duplication. And I'm not in support of this -- of this expenditure. I'm -- and I apologize for not having those specifics with me here right now. I was in the process of trying to get them, and I didn't come up with that because of my computer blip. But just in remembering what's, in fact, transpired going -- in the past with Visit Florida, I'm not -- I'm not in support of this request.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: So, Jay, what's your response to that? You know, one of the things we charged you with when we recently hired you was shake the trees. Take a look at things that maybe we think aren't worth the money or, on the flip side, that we're not investing in, hence our last meeting where we basically allowed you to spend money you already had but it needed our approval to double what we were putting against tourism because you brought in front of us something we hadn't really seen before, which was how quickly Collier County was dropping down the list of communities who were investing money in tourism.

What's your honest assessment of this? I mean, you know, you do come from this world, so it's not like you haven't heard of Visit Florida before.

MR. TUSA: Right.

COMMISSIONER LoCASTRO: Obviously, you wouldn't be standing before us if you didn't think it was an investment. But, you know, this is your chance to plead your case. I actually don't disagree with Commissioner McDaniel. I have some concerns as

well. But to just give another perspective -- and we've done it on a few other votes, we've given you the latitude of saying, "You know what, we're going to fund this one particular thing" -- and I'm talking generically, not about this -- "but we're going to fund this one particular thing." But, Jay, this could be it, so go in and really take a look and then come back to us, and then with deep experience as a Collier County employee, you're able to stand in front of us and said -- and not just sort of say, "Well, in my previous job I think Visit Florida was great," or "I hear from my colleagues that it's great or not great, but I appreciate the latitude of continuing the investment so I could be present, my team could be."

I'm not saying this is the answer, but this is one possibility. And then you come back here and say, "You know, the $82,000 was well spent, but it wasn't well invested. I think we should back off from it," or "Wow, what you guys don't know is Visit Florida might have a bad rep on social media or in some sort of circles," but the way you and your team are utilizing it, it is big bang for the buck. So, you know, I look at it as that is a possibility.

What are your thoughts hearing that? I mean, do you have enough knowledge already to know, "Oh, Commissioner, you're going to give me 82,000. I'm going to get you a million dollars' worth of investment," or "I'm not really sure, and Commissioner McDaniel could be right, and the 82,000 might be better spent somewhere else"?

It's not like we haven't recently invested in tourism in a major way. We just voted for you to spend millions and millions of dollars.

Give us your perspective. Because I'm sort of on the fence. We've had other discussion about Visit Florida, I think, even before you were hired. You know, it was sort of in the TikTok discussion, remember that? You know, why are we investing in TikTok? And that might not be the best use of our money, you know.

So, either fight for Visit Florida right now, or tell us you're not

sure or say that, you know, you think it's somewhere in the middle.

MR. TUSA: No. I think there's definitely value to the partnership and the relationship. Visit Florida definitely brings some advantages to us. There are trade shows that we're able to take advantage of specially through Visit Florida that we would not have access to if we were not a member of Visit Florida. That's a pretty big thing.

And then, you know, as far as what I just demonstrated on the slides, you know, those relationships with those tour operators, the value that we get from those room nights that are generated through that. You know, could we pick that up in another means, another way? Yeah, perhaps, but it's probably a little bit easier to do that and a little bit less expensive to do that through Visit Florida than it would be to do that on our own or through our international reps.

And then, you know, the same thing with the marketing opportunities, you know, there are savings there for us. So, you know, we're able to take advantage of that when we place an ad in, like, a *Southern Living* type magazine, you know, versus if we went and did it on our own.

So, you know, if we didn't have the Visit Florida partnership, you know, could we survive? Yes. It would cost us probably a little bit more money, in my opinion, at the end of the day. But it's obviously, you know, the decision the Board has to make on how they feel about this.

COMMISSIONER LoCASTRO: Because here's something I would not want to see happen. We vote down Visit Florida to save 82,000, but you keep going to the trade shows, and instead of getting 80 percent discount because you're a Visit Florida member, you're paying top dollar, and in the end, instead of paying 82,000 for Visit Florida, you spend 270,000 on things that Visit Florida would have given you free admission to or a greatly reduced price. I think part of

the decision here is -- I would say, if I vote against funding you for Visit Florida, or any commissioner does, what they're really voting against is not going to many of the things that a Visit Florida membership allows you to go to, because if you don't get this 82,000 but you keep doing business as usual, then you're going to spend three times this amount possibly --

MR. TUSA: Perhaps.

COMMISSIONER LoCASTRO: -- going to things that Visit Florida gives you a discount to.

So, I just wanted to get that on the record. I'm not banging on tables saying Visit Florida is a great and wonderful organization. I think it does do some good things that we've done a deeper dive during our TDC meeting, but my vote's going to be an either/or, either for Visit Florida and then you do a deep dive and make sure we've got biggest bang for our buck, or if we don't vote for the 82,000, you don't have a blank check to then be paying triple and going to all the same things. That would be stupid.

MR. TUSA: Yeah.

COMMISSIONER LoCASTRO: Then we would have been -- you know, even if -- whether we thought Visit Florida was great or not, then I think we want the ability to say yes or no to the things you're about to overpay for if you're not a Visit Florida member.

MR. TUSA: And that's a really good point, Commissioner. You know, just one thing off the top of my head, I mean, IPW's international trade show, we participate through Visit Florida with that. We spend $10,000 on that show, but if we were going to do that on our own, it would cost $30,000. So you see right there in that instance, I mean, it's $20,000 more, so -- and depending on where, you know, budgets fall, it could possibly be a missed opportunity.

So I mean, that's just something that, if this is not accepted, then,

you know, we'll just have to relook at what we do, and the number of shows we go to and those types of things, which, you know, we certainly can do that, but there might be some missed opportunities there.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chairman.

I'm going to shed a little different light on it. I was -- you know, I was sitting up here like the rest of us, you know, when we first made a decision not to participate a year or so ago and just see where it took us.

And since then I've had the opportunity -- I think it was the organization -- they call theirselves BID, I believe. It was small private-owned restaurants, galleries, stuff like that, within the City of Naples and Collier County that do not participate with the big hotels, do not participate with -- or even get any money from the city CRA for Fifth Avenue and some other organizations where we provide money as taxpayers to these organizations.

They went, as usual, to get a grant from Visit Florida, which they've done every year since they've been in existence, and they went up there this past year to get their grant, and they were told they weren't allowed because Collier County didn't participate.

So, there's more affected by this than what meets the eye. We sit up here and look at the big numbers as it compares to the other counties and stuff like that, but then you have a group of ma-and-pa-owned restaurants here, or whatever, that rely on some of this money, and they weren't allowed to participate because of the fact that we didn't participate.

So, I mean, there's a lot more to it when you peel the -- peel the skin back on the onion. So -- and I don't know what they would have got in the grant regardless, but, you know, they see theirselves getting choked out by a lot of bigger corporation restaurants, I think. And if

you look just recently a transaction happened down on Fifth Avenue was Chops, Yabba's, Pazzo's, they were all bought out by a corporation which used to be owned by a local guy that built them from nothing.

So, you know, there is some unseen things that, you know, these little things do affect from time to time. So, I kind of got a different perspective of what some of these organizations depend on and I didn't even realize, so just -- I wanted to put it out there to my fellow commissioners.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Thank you.

How much are we spending on advertising going forward? I know we've had an increase in that. What is that number again?

MR. TUSA: So, we increased the budget at the last board meeting, and so now we're looking at $12 million.

COMMISSIONER SAUNDERS: So, we're spending $12 million on advertising. Your recommendation is to approve this. You're our hired expert on this issue. I don't have any hesitation in saying I really don't know the real benefits from Visit Florida. I do know it's our job to second guess and to inquire and to learn as much as we can about these issues. But I'm relying on you, so I'm going to support your recommendation. If it turns out that your recommendation is wrong, then we can change that. But you're the expert, so I'm going to rely on your recommendation.

MR. TUSA: Thank you, Commissioner.

CHAIRMAN HALL: I guess, you know, I sit here -- my fundamental question is, I feel the burden as a commissioner to advertise for all these hotels and these restaurants, and I shouldn't have to feel that burden. That's their burden. "But, Commissioner, if you don't approve this, then the blood's on your hands with -- our vacancies are down, and there's nobody coming to our restaurants."

Well, lower your rates, lower your prices. You'll -- I mean, that's capitalism. So that's just my fundamental -- I mean, just basically where I'm at.

Whether $82,000 is going to generate, you know, a couple million bucks in revenue, I could see how that'd happen.

But I'm going to support the request, but going forward I want you to remember the basic core fundamental values that we have as commissioners, to spend taxpayer money and do it wisely. And to throw money against the marketing wall and see what sticks is something that I just don't -- I don't geehaw. That's g-e-e...

Anyway, that's my thoughts.

Commissioner McDaniel.

COMMISSIONER McDANIEL: Yeah. And this has nothing to do with you, Jay. My -- and, again, I've already apologized once, and I'll say "I'm sorry" again for being ill-prepared.

I'm not going to throw myself on the sword. I can count noses, so this is going to pass. But it has nothing to do with your recommendation.

There was an effort shortly after I became a commissioner by I think it was maybe Governor Scott to actually eliminate Visit Florida in its entirety and put that onus back on the private sector with regard to the capitalism requisites that we all like and love. And so my negative vote has nothing to do with your professional opinion. I can certainly see the rationale that Commissioner LoCastro brought up, but I'm going to hold.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: I think we have a motion on the floor to -- did you make a motion?

COMMISSIONER McDANIEL: I haven't made a motion at all.

COMMISSIONER LoCASTRO: So, I'm going to make a motion to approve. I guess it's the last formal thing I'll do as the

TDC chair. Actually, we have one more meeting.

MR. TUSA: One more meeting.

COMMISSIONER LoCASTRO: But the other thing I'll remind my colleagues of is you've already done an incredible job, you and the team that you've joined, squeezing the budget and making sure our money is invested properly.

So, I echo what Commissioner Hall says. I make a motion to approve this, but much like we've said before -- and this isn't negative or anything at you. You and your team are on notice to really make sure we're getting major value. And one of the things I've said at the TDC when we've had all these great ideas -- and Commissioner Hall will pick up on this -- is we can do anything, but we can't always do everything.

And so you don't have an unlimited checkbook. And I'd rather see money sit in an account than see it wasted or, like we say, throw it against the wall and see what happens. Although, sometimes you don't have a crystal ball either.

So I'm going to make the motion to support this 82,000, but similar to what we said, it's kind of a one-time good deal, so -- or, you know, one-time approval would be my motion, and that you come back here and tell us what you saw.

Was this one of the things that was a nice-to-do but not a must-do, and if we gave you 82,000 for something else, there would be bigger bang for your buck? And then it will allow you on a discount to go to all those things that you haven't maybe personally witnessed wearing the Collier County, you know, badge.

But having said that, I expect that you continue to keep us updated on -- when you do go to those trade shows, I personally want to know how did it go, not hear at the end of the year or in 2025 when we talk about the budget, "Oh, that show eight months ago, it was worthless."

MR. TUSA: Right.

COMMISSIONER LoCASTRO: As I've said at the TDC, you never need permission to come to the podium and give us a state-of-tourism update, especially when you come back from events that we invest quite a bit of money.

So, my motion will be to approve the 82,000 and then continue to get your assessment on the value of this investment.

COMMISSIONER SAUNDERS: Second.

CHAIRMAN HALL: All right. We have -- is the public comment going to be in opposition? Because we're about to pass this. So, if you want to oppose this...

MR. MILLER: Kristina Park.

MS. PARK: In support.

CHAIRMAN HALL: Great. All right. We have a motion and a second. All in favor, say aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

COMMISSIONER McDANIEL: Aye.

MR. TUSA: All right. Thank you, Commissioners. Appreciate it.

MS. PATTERSON: Commissioners, that brings us, by the time I read this in, to our 10 -- to our no-sooner-than 10 o'clock time-certain.

Item #9A

ORDINANCE 2024-51: AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA,

AMENDING ORDINANCE NO. 89-05, AS AMENDED, THE COLLIER COUNTY GROWTH MANAGEMENT PLAN FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, SPECIFICALLY AMENDING THE FUTURE LAND USE ELEMENT AND MAP SERIES BY ADDING THE FIDDLER'S CREEK SECTION 29 DEVELOPMENT AREA AND AMENDING THE ALLOWABLE USES IN THE NEUTRAL LANDS WITHIN THE RURAL FRINGE MIXED USE DISTRICT, AGRICULTURAL/RURAL DESIGNATION, TO REMOVE DEVELOPMENT RESTRICTIONS ON SECTION 29 AND ALLOW 750 ADDITIONAL RESIDENTIAL DWELLING UNITS, 22.6% OF WHICH WILL BE RENT RESTRICTED AS AFFORDABLE, ON 49.91± ACRES OF PROPERTY LOCATED ¾ MILES SOUTH OF TAMIAMI TRAIL EAST (U.S. 41) AND ¾ MILES EAST OF AUTO RANCH ROAD, IN SECTION 29, TOWNSHIP 51 SOUTH, RANGE 27 EAST, COLLIER COUNTY, FLORIDA; AND FURTHERMORE, DIRECTING TRANSMITTAL OF THE ADOPTED AMENDMENT TO THE FLORIDA DEPARTMENT OF COMMERCE; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE. (COMPANION TO ITEMS 9B AND 9C) (PL20210003111- GMPA) - MOTION TO APPROVE WITH CHANGES BY COMMISSIONER LOCASTRO; SECONDED BY COMMISSIONER HALL – ADOPTED

We have three companion items. It's Item 9A, 9B, and 9C. And now I'm going to look at the County Attorney and see if I have to read these all in their entirety.

MR. KLATZKOW: Just a summary would be sufficient.

MS. PATTERSON: Okay. Very good.

MR. KLATZKOW: Life is short.

DRAFT

MS. PATTERSON: Yes. All three of these items were continued from the November 12th, 2024, meeting.

First, 9A is a recommendation to approve an ordinance of the Board of County Commissioners of Collier County, Florida, amending Ordinance No. 89-05, as amended, the Collier County Growth Management Plan, for the unincorporated areas of Collier County, Florida, specifically amending the Future Land Use Element and map series by adding the Fiddler's Creek Section 29 development area and amending the allowable uses in the Neutral Lands within the Rural Fringe Mixed-Use District Agricultural/Rural designation to remove the development restrictions on Section 29 and allow 750 additional residential dwelling units, 22.6 percent of which will be rent restricted as "affordable."

Item #9B

ORDINANCE 2024-52: AN ORDINANCE AMENDING THE MARCO SHORES/FIDDLER'S CREEK PLANNED UNIT DEVELOPMENT ORDINANCES TO INCREASE THE NUMBER OF DWELLING UNITS FROM 6,000 TO 6,750 BY ADDING 750 MULTI-FAMILY UNITS WITH SOME AFFORDABLE HOUSING TO SECTION 29; INCREASE THE RESIDENTIAL DEVELOPMENT AREA, DECREASE PARK AND RECONFIGURE PRESERVE ACREAGE IN SECTION 29; AND TO ADD ADULT CONGREGATE LIVING FACILITIES AS A LAND USE TO THE RESIDENTIAL DISTRICT AND THE BUSINESS DISTRICT AMONG OTHER PUD CHANGES. THE SUBJECT PROPERTY, CONSISTING OF 3932+/- ACRES, IS LOCATED EAST OF COLLIER BOULEVARD (CR 951) AND SOUTH OF TAMIAMI TRAIL EAST (US 41) IN SECTIONS 11,13, 14, 15, 22, 23, AND 24,

TOWNSHIP 51 SOUTH, RANGE 26 EAST AND SECTIONS 18, 19, AND 29, TOWNSHIP 51 SOUTH, RANGE 27 EAST, IN COLLIER COUNTY, FLORIDA. (COMPANION TO ITEMS #9A AND #9C) (PL20210003112) - MOTION TO APPROVE WITH CHANGES BY COMMISSIONER LOCASTRO; SECONDED BY COMMISSIONER HALL – ADOPTED

Item 9B is a recommendation to approve an ordinance amending the Marco Shores/Fiddler's Creek Planned Unit Development ordinances to increase the number of dwelling units from 6,000 to 6,750 by adding 750 multifamily units with some affordable housing to Section 29; increase the residential development area, decrease park and reconfigure preserve acreage in Section 29; and to add adult congregate living facilities as a land use to the residential district and business district.

Item #9C

RESOLUTION 2024-256: A RESOLUTION AMENDING DEVELOPMENT ORDER 84-3, AS AMENDED, FOR THE MARCO SHORES/FIDDLER'S CREEK DEVELOPMENT OF REGIONAL IMPACT TO ADD 750 MULTI-FAMILY DWELLING UNITS FOR A TOTAL OF 6,750 SINGLE-FAMILY AND MULTI-FAMILY DWELLING UNITS; TO LIMIT THE ADDITIONAL 750 MULTI-FAMILY DWELLING UNITS TO SECTION 29 ONLY AND DISALLOW THEM FROM THE CONVERSION FORMULA; AND REVISE THE MASTER DEVELOPMENT PLAN. THE SUBJECT PROPERTY, CONSISTING OF 3,932+/- ACRES, IS LOCATED EAST OF COLLIER BOULEVARD (CR 951) AND SOUTH OF TAMIAMI TRAIL EAST (US 41) IN SECTIONS 11,13, 14, 15,

22, 23, AND 24, TOWNSHIP 51 SOUTH, RANGE 26 EAST AND SECTIONS 18, 19, AND 29, TOWNSHIP 51 SOUTH, RANGE 27 EAST, IN COLLIER COUNTY, FLORIDA. (COMPANION TO ITEMS #9A AND #9B) (PL20210003115 - DOA) - MOTION TO APPROVE WITH CHANGES BY COMMISSIONER LOCASTRO; SECONDED BY COMMISSIONER HALL – APPROVED

Item 9C is a -- sorry, I lost my place -- oh, is a recommendation to approve a resolution amending Development Order 84-3, as amended, for the Marco Shores/Fiddler's Creek Development of Regional Impact to add 750 multifamily dwelling units for a total of 6,750 single-family and multifamily dwelling units, to limit the additional 750 multifamily dwelling units to Section 29 only, and disallow them from the conservation formula, and revise the master development plan.

With that, Chair, did you want to make any opening comments regarding public comment, or County Attorney, either? And then we have to swear everybody in.

CHAIRMAN HALL: Okay. Let's go ahead and swear everybody.

MS. PATTERSON: Okay. All of those that are going to be participating, including public speakers, need to stand up and be sworn in by the court reporter.

CHAIRMAN HAL REPORTER: Do you swear or affirm the testimony you will give will be the truth, the whole truth, and nothing but the truth?

(The speakers were duly sworn and indicated in the affirmative.)

MS. PATTERSON: Commissioners, we also have to do ex parte, and then we can get into your comments and get started.

CHAIRMAN HALL: Ex parte, Commissioner Kowal.

COMMISSIONER KOWAL: Yes. I have, on all the items above, meetings, correspondence, and e-mails.

CHAIRMAN HALL: On 9B?

COMMISSIONER KOWAL: Yeah, 9B, 9C.

CHAIRMAN HALL: Great.

Commissioner Saunders.

COMMISSIONER SAUNDERS: Mr. Chairman, I have the same; meetings, correspondence, e-mails, telephone calls on both items.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Same.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Same. All four; meetings, correspondence, e-mails, calls.

CHAIRMAN HALL: Me as well. I've got everything on all of it.

With that, I'd like to open up the floor to Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Mr. Chairman.

I had asked Commissioner Hall if he would indulge me to make some opening comments since I've spent an inordinate amount of time, as is required on something this complex. And as you see, all of us have. You know, I think this is a first that we have an issue where we all have everything across the board, or at least this deep.

So if you'd indulge me, I think -- I wanted to set the table on a couple of things before we get into this issue, because it's a deep dive.

This is a complicated case, and it's bigger than just District 1. I look for all four of my colleagues today to do a deep dive, ask tough questions, and get satisfactory answers, because we have to remember every decision we make sets a precedent for many future construction projects. Although this issue today might be district specific, it

affects our overall county. That's why all five of us vote on everything when we are in these chambers, regardless of district.

This is the very reason why I personally delayed this discussion for over a month to give all sides a chance to have more discussions, meet with us, and for us to spend more time with the county staff to understand this request for rezone and changes to the possible growth -- and possible changes to the Growth Management Plan, among other things. I trust we've all done that.

I know I've used this additional time to further meet with multitudes of citizens and those even more deeply involved who are here today to fully hear their concerns but also ensure all sides understand what we can and at times what we can't do.

The many e-mails we all received show there is quite a few citizens who care deeply about this area but some who don't fully understand the environmental, legal, and moving parts of the issue at times. Sending us all e-mails demanding a traffic study first or talking about how this is a panther preserve shows the confusion. Any traffic study would come after a rezone, and I think we will hear today, although anything with grass, water, trees, et cetera, obviously contains wildlife and vegetation, there's a major difference between a protected preserve like the Everglades and an undeveloped parcel of land with vegetation.

However, we aren't looking to arbitrarily allow construction on every undeveloped parcel of land, but landowners also have rights, when they pay for a piece of property, to be able to do something with it.

We can't vote no to everything just because somebody took a poll or handed us a petition. That said, this has many moving unique parts, and the key today is we aren't voting on a construction project and the many details of one. We are voting on allowing a parcel of land currently zoned for a park, a golf course, boat storage, and a

multitude of other things to possible be rezoned so the landowner can then pursue the extremely complicated continued steps before any shovels would ever go in the ground or not. Many of these steps have huge hurdles which could easily stop any project.

Today our main decision is to determine if a rezone should be approved to allow the landowner the opportunity to explore all of the needed future steps to pursue possible construction.

There is quite a bit of misinformation out there whenever something comes to us for a vote. Much of this at times swirls around the role of the Planning Commission. I first want to thank the Planning Commission for spending three days in discussions with all sides to give us their recommendation.

First, however, Planning Commission members are volunteers. They're not commissioners. Many of the e-mails we received talked about telling us how to, quote, "follow the lead of those commissioners." The only commissioners in the county are sitting right here. The Planning Commission role is to allow both sides a preliminary step to, in essence, dry-run their proposals and allow Planning Commission members who are volunteers appointed by us to begin the initial process of questions and answers which leads to their recommendation and gives the five of us, the actual elected commissioners, Planning Commission perspective, not a decision or a final vote. That's our job.

I often say presentations before the Planning Commission is a formal practice or dry run. Yes, a very critical part of the process, but presenting here is what leads to the actual vote and decision. Often, and as is expected, between the Planning Commission's overview and questions, both sides then have a time to regroup, reassess, and even retool their presentations for our consideration and final vote.

The other main differences are these five county commissioners

spent a massive amount of time speaking with the county staff before any vote. Over this extra past month that I provided by moving this to today's meeting, every commissioner up here used that extra time to do a deeper dive with not only county staff but the citizens who have concerns with the rezone and the other things to be decided today.

That time with staff and citizens is something the Planning Commission doesn't do at the level these elected County Commissioners accomplish.

So hearing the first volley of presentations by the Planning Commission is far different than what we will hear today, and the five of us have much more depth in not only the issues, but especially the law, as to what is feasible and what is not. We're not here today to direct traffic studies, debate the size of an apartment building, how many trees could be planted around a structure, or what the setback distances might be or not.

Should we decide a rezone is feasible, all of those discussions come later, as well as a huge uphill battle by the landowner as they possibly pursue required additional approvals in many other areas before anything could ever be considered for construction.

I applauded the citizens who are here today. We often hear from citizens demanding us to vote a certain way, telling us if we make, in their eyes, the wrong decision, it will ruin their entire community for 100 years, yet often in the same e-mail they remind us they won't be able to attend the meeting today. And often some questions embedded in their e-mail are off base because they don't fully understand the issues being considered or the sequence of events.

I don't fault those citizens for that, but instead, I strongly applaud the ones who are here today who have been visiting our offices regularly and who understand the many moving parts, especially environmentally, when it comes to our consideration to allow a rezone

DRAFT

of this property for possible future construction or not.

We have a lot of details to dive into today, many which this panel already have done but which we must get on the record during this formal proceeding. There is no rush to judgment here. And as I've told every single person I've met with, coming to this meeting as a commissioner with any premature determination of how you will vote is irresponsible.

We've all heard pieces of the puzzle from all sides and received tons of e-mails but hearing everything collectively together today in this room has no substitute.

I look for my colleagues to do a deep dive in questioning because although this issue today might be in District 1, the next similar case to come before us might very well be in their district.

I look to the speakers who come to the podiums to be professional, factual, and concise in your presentations.

We all know what happened in the three days of the Planning Commission and, as I said, those discussions and their eventual recommendation gave us perspective, but today we are here to work towards an actual decision and vote. Let's not let discussions today get off track or wander down multiple unrelated premature paths that we aren't here to decide yet, or maybe even at all.

I look forward to both sides outlining their positions, and as I've said for myself and my colleagues to continue the deep-dive analysis we have done outside of this room separately and collectively bring together our brain power and understanding of the environmental issues and legalities involved to come to the best decision possible.

Thank you.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Mr. Chairman, I just want to make one or two quick comments. In reference to the Planning Commission, I don't want the members of the Planning Commission

to think in any way that we don't value their input.

Commissioner LoCastro, you indicated that you considered the Planning Commission to be a dry run. And I just want to say that it's not just a dry run. I know those were your words, and I just want to make sure it is on the record that the Planning Commission input is critically important. It's not just a dry run. From my personal consideration, it's the critical step, and I want the planning commissioners individually to know that we really value what they do for us.

COMMISSIONER LoCASTRO: Sir, my sentence, if you continue with the rest of that sentence, says it was a dry run but a critical piece in the entire process. So, we might differ on the words "dry run," but obviously, it's not a vote, and it's not a decision.

COMMISSIONER SAUNDERS: I disagree with using the terms "a dry run."

COMMISSIONER McDANIEL: Okay.

COMMISSIONER SAUNDERS: To me that means -- if I was sitting there and a commissioner said this was a dry run, I don't care what comes after that. I'd probably resign from the Planning Commission. Why have that dry run for developers? It is not a dry run. It is a critical piece. And I understand that you had some --

COMMISSIONER LoCASTRO: After that.

COMMISSIONER SAUNDERS: -- words after that. But you did use the words "dry run," and I just want to make clear that's not what it is.

COMMISSIONER LoCASTRO: Noted.

CHAIRMAN HALL: All right. Procedurally, the way this is going to work is we're going to hear from the applicant. We're going to hear from the county. The applicant can ask some questions after that. And if there's anybody that's here to speak that represents five or more people, you've got 15 minutes to present your case, and that's

including -- including expert witness. Every individual has -- we want to hear from every individual who wants to speak on this matter. Every individual has three minutes. There will be no ceding of time, so we're not going to have 30 people cede three minutes to a speaker who pontificates for 90 minutes.

So, every individual has that right to speak, and we want to hear from you, but that's three minutes individually. If there's somebody that represents five or more people, an attorney or a Homeowners Association or whatever, you've got 15 minutes, and that's a lot of time to talk.

Remember, the Gettysburg Address is the greatest speech of all time, and it was delivered in less than three minutes. However, we want to hear that. It's important to us.

Commissioner LoCastro did a great job of laying it out with the posture that we have.

I have no idea how this is going to go, but we're going to listen. We're going to ask questions. We're going to get as clear and as clarity -- as much clarity as we possibly can, because this is a big decision, whether it goes one way or whether it goes the other, and we take it to heart. And whatever -- however this turns out to be this morning and this afternoon, it's because we've taken great diligence and great care to arrive at whatever decision that we come to.

So with that, Mr. Yovanovich, let's hear your stuff.

MR. YOVANOVICH: Good morning. For the record, Rich Yovanovich on behalf of the petitioner.

Terri gets a break in 15 minutes.

CHAIRMAN HALL: Yes.

MR. YOVANOVICH: Would it be possible to take that break now so I don't get started and then stop 15 minutes into the presentation?

COMMISSIONER McDANIEL: I like that.

CHAIRMAN HALL: Yeah. You're not going to hurt her feelings doing that.

MR. YOVANOVICH: No. But I -- that's my request is that if we could take the break a little early.

CHAIRMAN HALL: Let's take a break, and we'll be back at 10:25.

MR. YOVANOVICH: Thank you.

(A brief recess was had from 10:15 a.m. to 10:25 a.m.)

MS. PATTERSON: Chair, you have a live mic.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you for your indulgence, Mr. Chair.

Just to get on the record, and because we always say up here, you know, "Words do matter," I read a five-page speech, and I hope people got more out of it than just the two words "dry run."

But for the sake of the record, a "preliminary step" of the county Planning Commission is more correct. I'm not looking for a mass exodus of the Planning Commission but merely to put it in context. So, I hope that the people that heard me heard everything else which, to me, was the meat of what I had to say. So, it is an important preliminary step, as I said afterwards that -- to complete that sentence.

So, for the record, I'll say instead of "dry run," maybe "preliminary step" is better wordology. But I hope nobody missed the message of my opening comments. And due to the thanks and appreciation I got from several people who came up to me afterwards thanking me for my comments, I think it was heard by proper ears. So, thank you.

MR. YOVANOVICH: Ready?

CHAIRMAN HALL: Yes.

MR. YOVANOVICH: Before I get too much into our presentation, I just want to kind of clarify the process. I understood

DRAFT

that if you represent five or more individuals, you get 15 minutes, and that includes your experts. I assume that that person who says that's going to identify the five that they represent and that someone else can't come up later and say, "I represent those same five individuals" to also get another 15 minutes. I'm assuming it's just --

CHAIRMAN HALL: That's correct.

MR. YOVANOVICH: Okay. All right. Thank you.

For the record again, Rich Yovanovich on behalf of the applicant. The applicant is FCC Preserve, LLC. Joe Parisi is the applicant's representative, I am the land-use attorney on this matter, Mr. Arnold is our professional planner, Mark Minor is our professional engineer, Jim Banks is our traffic expert, and Tim Hall is our environmental consultant.

You've heard from them many times on their individual areas of expertise, and I am -- I will be -- I am tendering them as our experts in those specific areas.

Our presentation will be fairly detailed. It will address all of the requested changes in the PUD; however, the Planning Commission recommended approval of all the changes that were not related to Section 29, so I don't -- I'm not going to spend a lot of time in our presentation addressing those other minor changes related to senior housing and floor area ratio and things like that.

We are going to spend a fair amount of time discussing the history of Section 29 and what was committed to as part of the PUD approval process in 1998 and what is committed to as part of a separate Army Corps of Engineers permitting process with regard to Section 29. They are two separate processes. They are two separate commitments. And, in my humble opinion, I think at the Planning Commission level there was a confusion as to melding both of those separate processes into a county-related commitment.

We will -- I will also address -- and I think very early on at the

Planning Commission there was a question of Mr. Bosi, "Would you be recommending approval of this project if it didn't include affordable housing?"

And Mr. Bosi said, "No, we would not be recommending approval of this if it didn't include affordable housing."

And I think the Planning Commission went off on a tangent focusing on, well, that means the rest of the project wasn't worthwhile; it's only affordable housing.

What Mr. Bosi was responding to was your requirement in your Growth Management Plan that says if we request through a Growth Management Plan amendment an increase in density, we have to provide affordable housing to support that increase in density. So he had no alternative but -- other than to say, "No, I would not be recommending approval," because he was legally bound to recommend denial had we not included an affordable housing density bonus as part of our two petitions, the Growth Management Plan amendment as well as the PUD.

Mr. Bosi never said, "This wasn't a good project, and the only reason I'm recommending approval is because it included an affordable housing density bonus commitment as part of this project."

As I mentioned, there are several amendments that we're proposing today related to Section 29, which is 49.9 acres. We are asking to be allowed to put 750 dwelling units on that 49.9 acres. Currently the Growth Management Plan amendment -- Growth Management Plan does not allow density on that parcel.

We are proposing a 30 percent affordable housing commitment. That is 15 percent at the 100 percent and below median income and 15 percent at the 80 percent and below income. If all 750 units are built, that is 225 income-restricted units, which I believe is probably the highest private-sector proposed affordable housing commitment in Collier County.

We're modifying Map H to -- and Mr. Arnold will take you through this process. There's a business -- business area parcel out front of Fiddler's Creek on Collier Boulevard. We're modifying the boundaries of a few of those tracts to make it work better for potential future businesses as well as for a senior housing project at that entrance, and that's what that's related to.

We're modifying Map H to -- which is -- and the PUD master plan to address that change as well as the changes related to Section 29. We're updating the acreages based upon the modifications we're asking to Section 29 and other areas throughout the PUD changes.

We're asking to increase what is today a 6,000-unit DRI to 6,750 units, and that's to address the 750 units on Section 29.

We're asking to -- we already can convert multifamily to single-family and stay within the 6,000 units. We want to do the same for the ability to convert single-family to multifamily staying within the 6,000 units that -- this conversion does not apply to Section 29.

We're modifying the senior housing commitment to have it be a floor area ratio, which is what is typically done for senior housing.

And I think, finally, and very importantly, we are making significant improvements to Auto Ranch Road to address the traffic that will be coming to and from Section 29. These are mandatory commitments. These aren't something that we may do or we may not do. These are mandatory commitments that are in the PUD, and we'll go through in great detail what those commitments are and how Auto Ranch Road will be improved, will be much safer, it won't flood, and there will be overall improvements for those who live along Auto Ranch Road.

We are providing a CAT bus stop at the intersection of Auto Ranch Road and U.S. 41, and we're providing 480 general-population

cots, 84 special-needs cots, and a towable generator related to our request to provide additional density on Section 29.

The existing Growth Management Plan designation for this property is agricultural/rural designation, Rural Fringe Mixed-Use District, Neutral Lands. What Neutral Lands are in the Rural Fringe Mixed-Use District regulatory scheme are not Sending Lands. Sending Lands are the environmentally sensitive lands. Rural Fringe Neutral Lands are not environmentally sensitive lands. And in fact, other than in Section 29, you can put residential housing in Neutral Lands, and you can do density blending in Neutral Lands for purposes of developing residential uses.

Our current zoning is the Fiddler's Creek PUD and DRI. Our overall project acreage is 3,932 acres. Our proposed Growth Management Plan amendment applies to 49.9 of those acres.

You're the best. Thank you.

And so the overall acreage remains the same.

Our dwelling unit count today is 6,000 units. I will take you through the history of Fiddler's Creek to show you how it went from basically 9,000 vested units down to the current 6,000 vested units. And we're asking to increase the overall dwelling units to 6,750 because of what we're asking to do on Section 29.

This is a little bit unique. We're not asking you to increase the overall density the Growth Management Plan would allow us to generate on the acreage that consists of Fiddler's Creek, because we have enough density based upon the Growth Management Plan designations of urban neutral lands related to this project; however, we are asking you to increase the density on Section 29 because currently we're not allowed to have any units on Section 29.

So we can generate almost 6,900 units from the current acreage within Fiddler's Creek. Because we're asking to put some of those 900 units on Section 29, we are increasing the density; therefore, we

have to provide an affordable housing density commitment that Mr. Bosi was asked about and commented on at the Planning Commission.

From an overall density on the project, we can calculate it a bunch of different ways. If you want to calculate it purely based upon the existing acreage within the PUD by adding the 750 units, we go from 1.53 dwelling units per acre to 1.72 dwelling units per acre. If you want to look at it solely based upon what can come from Section 29, we are going to 2.25 dwelling units within Section 29.

And if you want to look at just Section -- the 49.9 acres within Section 29, we're asking for 15 dwelling units per acre. Fifteen dwelling units per acre is not an abnormal number of dwelling units per acre for a multifamily rental project in Collier County.

So what we're asking for is in line with previously approved projects, and the overall project density is having a very minimal increase in overall density.

Fiddler's Creek on this is everything outlined in red. The yellow is Section 29. Fiddler's Creek was originally approved in 1984 at 9,110 dwelling units. There were several amendments to the project over time adding acreage, and as part of that amendment process, in 1989 the units went down to 7,000 units. In 1996, it went down to 6,000 units. It's remained at 6,000 units since 1996; however, acreage has been added, including the acreage we're discussing in Section 29. Over time, there was basically 2,266 acres added to Fiddler's Creek without any request to increase density, so that density was being spread out over an increase in acreage.

As I mentioned -- did I get it right, Troy?

Where you see the arrow, there is a gray area; that is where Section 29 is. That is Neutral Lands on your current Future Land Use Map, and Neutral Lands are not environmentally sensitive lands. They are lands that can be developed under your current Rural Fringe

Mixed-Use District regulatory scheme.

Immediately across the street are Receiving Lands. That's where you encourage development to occur. That's basically where the Six L's 6,000 acres currently is, and that's slated for development in the future.

The environmentally sensitive lands are here. Those are the Sending Lands in the Rural Fringe Mixed-Use District regulatory scheme, and that is where you generate TDRs, and that is where you want to put your preserves.

You'll note that right here -- it's hard for me to be -- there they are. You can see that on the Neutral Lands in the gray area and the Receiving Lands in the blue area, it's bisected by U.S. 41. The Sending Lands, under your Rural Fringe Mixed-Use District regulatory scheme, are all on the north side of U.S. 41.

Tim Hall is going to get into greater detail as his part of the presentation about environmentally sensitive lands and what these specific lands in Section 29 are, and Tim will provide the expert testimony that this is not panther habitat land for purposes of the regulatory scheme as far as primary, secondary panther habitat.

I will note that as we go through this process and why it takes us so long to get through this process, you have professionals on your own staff, Environmental, Transportation, Planning, that we work with, and we go through this process, and every one of your experts has concluded that this is a project that they're recommending approval. Your Environmental staff is not saying, "This is environmentally sensitive land; this shall be protected at all costs."

As Commissioner LoCastro pointed out, as we go through this process, just like every other project that comes before you, we start with the zoning approval. Sometimes there's a Growth Management Plan amendment that goes with that. We start with that zoning approval, then we go to the state and federal -- applicable state and

federal regulatory agencies, and if they say no, well, then I don't have a project. If they say yes, then I have a project.

So should we be fortunate enough today to get an approval from the -- I'm sorry -- from the Board of County Commissioners, we still have to deal with the state and federal agencies, and we will have to amend an existing Army Corps of Engineers permit, which I'll get into in a little bit greater detail, for this project to be able to move forward.

This is a closeup of Section 29 outlined in yellow. The dotted yellow line is the 49.9 acres that we're requesting to put the residential units on. You will see that we're asking to put those residential units on what was previously cleared agricultural lands. There will be some minor clearing. There's a farm road buried in those trees. That farm road will get removed, and a real road will be placed in that area.

And as Mr. Minor will point out, that farm road currently is acting as a dam. When we rebuild that road, it will actually have culverts underneath it to allow for water that overflows right now from that long lake to continue to flow through the preserve area in Section 29 and ultimately through state lands and into the gulf.

Section 29, when it was originally approved, had multiple designations on it, and I'll take you through that master plan in a second. But suffice it to say that where you see the trees, that was originally, in 1998, designated "reserve." Now they call them "preserves." And where you can see the farm field, that was designated "active recreational" as well as "lake." So the farm field was also intended in 1998 to have some form of development on that property.

This was the master plan that was approved in 1998. That's where the trees are; that's designated "preserve." That's where the farm field is; that's designated "park." That's where the farm field is, and that was designated "lake."

So in 1998, based upon the PUD master plan, Section 29 was

partially a preserve, partially a lake, and partially a park at which -- in which active recreational uses can occur on that site including boat storage and boat launching facilities, tennis facilities, pickleball facilities. You name it, any active recreational use under the PUD can occur on that property.

This was repeatedly stated by myself and my team and your staff at the Planning Commission meeting. Anybody who tells you otherwise that in the PUD all of Section 29 was committed to be a preserve is factually incorrect.

As I mentioned, Section 29 was not -- the entirety of Section 29 was not designated a preserve. It's neither primary or secondary panther habitat. It's designated Neutral Lands in the Rural Fringe Mixed-Use District. I mentioned typically Neutral Lands allow for residential development, and Section 29 allows for active recreational uses.

There's a separate permit that was for the Estancia portion of Fiddler's Creek. Estancia is not Section 29. Estancia is another residential community. Originally Estancia the permit said, "Thou shall buy panther credits." The panther credit system is a bank where more important lands have been restored as panther habitat, and developers buy those panther credits so these panther banks and better panther habitat are provided for the cat.

Initially, the developer said, you know, maybe I won't do the recreational uses as part of the Corps permit. They elected to put Section 29 as preserve under the Corps permit instead of buying the credits.

The developer in 2019 started talking to me five years ago about, "Hey, we've got an affordable housing crisis. I'm feeling it. Everybody in Collier County are feeling it. What do I need to do to be able to develop a portion of Section 29 that's already been cleared as an affordable housing project?"

And I said, "Well, you're going to have to do a couple things. You're going to have to amend the Growth Management Plan because right now it currently says no residential, you're going to have to amend the PUD because it currently says you can only have active recreational uses on that, and then you have to amend the existing Army Corps of Engineers permit because right now you've made a commitment."

He said, "Okay. I'll want to start that process."

Well, we're almost -- almost hitting six years into this process, and we're working on the Corps permit. We're going to have to remove 58 acres of Section 29 from the existing Corps permit.

Now, I think a fact that needs to be pointed out is U.S. Fish and Wildlife Service has never said to us, "We are never going to agree to amend the Army Corps of Engineers permit." They've never said that. They said, "We would recommend doing it if you purchase 120 acres in Glades County for purchase price at that time for $1,600,000." That was the cost to amend the Army Corps of Engineers permit at that time.

Keep in mind that the value of panther credits for the 58 acres to be removed from the Corps permit was $100,000. My client had offered 200,000, and that wasn't good enough. He was not willing to pay a million-six for a parcel of property in Glades County. And we are in that process.

And then we got another -- which is not unusual from federal agencies. We get another letter that says, "You're in the wrong process. Because the Army Corps of Engineers permit has closed for the Estancia project, you're going to have to start the process all over. You can't amend that permit. You're going to have to start over again with a new Army Corp of Engineering permit."

We will do that if we get approved today. We will start over with the Army Corps of Engineers, and if we're successful with them,

we will have a project. If we're not successful with them, we will not have a project, and that will be the end of the story.

It makes no sense for us to go through that process, have the Army Corps of Engineers say yes, and then come back here today to possibly be told no by the Board of County Commissioners. So that's why we're here today. If this project makes sense to the Board of County Commissioners, and we think the evidence is there that it should, we will go through the process of hopefully amending the existing Army Corps of Engineers permit.

So I hope I've made this clear there's the PUD commitment with regard to what can be allowed zoning-wise on Section 29 today. And zoning-wise on Section 29 today, active -- I'm sorry -- active recreational is a permitted use on that property that we're talking about today. Under the Corps permit it is not. We're going to have to amend that permit.

So anybody who is saying that in 1998 my client committed to the Board of County Commissioners that the entirety of Section 29 would be in a preserve is not accurate. You can read the PUD for yourself. And even if we were supposed to put a PUD -- a conservation easement on the lands that were identified as a preserve in 1998, the lands we're talking to you today about would not be part of that conservation easement. And I'll show you the actual provisions in the existing PUD, the 1998 PUD when these lands were added to the Fiddler's Creek PUD.

Section 5.5 talks about the reserve district, and it says, "We will place a conservation easement on the property pursuant to Section 3.2.8.4.7.3 of your Collier County Land Development Code." Clear as day. For the Fiddler's Creek addition, which were the lands that were being added, we will do it pursuant to Section 3.2.8.4.7.3.

What that section says, and your staff agrees, it says -- this is what it says. It says we'll do it when we are platting or developing

that portion of the project. We are not platting or developing that portion of the project yet; therefore, no, we're not tardy in providing a conservation easement on that property. That doesn't mean we can develop anything on that property, because the zoning document in the PUD limits Section 29 to these uses. This is what we can do in Section 29 under the PUD. And I've highlighted those portions of what can go on the existing farm field in Section 29.

We can do launching and storage facilities for watercraft, and we can do active recreational activities. I thought that was fixed. That typo is still there. And not only there, it's highlighted so you can see there's a typo. And then any other conservation, recreation, or related open-space use is currently allowed on that piece of property under the PUD.

The proposed change to the Growth Management Plan is in the -- it's obviously in the ordinance. I've highlighted a couple of sections of it for you to show you what I previously mentioned was the 15 percent income restriction for those making 80 percent or below and the 15 percent for those making 100 percent or below, and we have the typical essential service personnel definition for those who will be eligible to reside in these units. And we'll tell you that if you -- I guess you guys jointly -- you, the county, jointly developed a property on the Bembridge PUD out on Santa Barbara, and I think it was 82 units, and you had 300 applicants for those 82 units.

The other projects like Allura and other projects that have these units either constructed or getting ready to construct, like the project up on Immokalee Road, there's way more demand than the number of income-restricted units that are being developed so far, and this project will be very important to the success of starting to address a critical housing shortage that we have in Collier County.

And I would point out that the DRI development order that was approved as part of the Fiddler's Creek DRI has a housing

commitment that says the developer shall explore the economic feasibility of providing residences within Fiddler's Creek that are affordable by middle or lower income families. So we are fulfilling that obligation that is in the DRI development order as part of this process.

The income levels, as you can see, for a family of four making 80 percent or less, it's $79,850. It may have gone up a little bit since this table was published in '23. And for those making 100 percent or less, it's $99,805.

And in the PUD, I wanted to point out we had added to this PUD, and it has become pretty common, that we also consider essential -- as essential service personnel military veterans. So there is a significant portion of our essential people in this county; nurses, firefighters, teachers, police officers, and skilled building trades that we need for our county to function, and this project will provide 225 units for that much-needed workforce. And I agree with what -- some of what -- well, I agree with everything that Commissioner LoCastro said at the opening except for -- I will tell you -- I want to tell you that I have all the respect in the world for the Planning Commission and going through that process. It's arduous. We don't always agree, and that's fine. We get feedback back and forth, and I try to understand where they're coming from.

I think they got a little off track on why this was being recommended for approval by the staff and why -- I think they got a little off -- a little confused as to what were the PUD commitments for preserve. But the Planning Commission recognizes the need for affordable housing, and the definitions that we've come up with have been with great input from the Planning Commission.

And as Commissioner LoCastro pointed out, this is a countywide problem. This is not a District 1, a District 2, a District 3, District 4, or District 5 problem. This is -- this is critical to all of our quality of

life in Collier County. If we do not provide housing for these essential workers, we're not going to have the quality of life we currently have in Collier County. We're not going to have the quality schools. We're not going to have the quality Sheriff's Department and police forces that we have. We're not going to have the quality EMS that we have or the quality care when we go to our hospitals. This is a countywide problem.

And all portions of Collier County where there is -- where there is a good piece of property where it makes sense to have housing that provides for essential service personnel, that needs to happen. There's not a lot of land left in the urban area. That's why you see us going east and you see us going south for this to occur.

Wayne's going to take you through the master plan, the changes we're going to talk to. He's going to show you an exhibit that shows you within a 10-mile radius all the employers that are close to this parcel of property. But keep in mind -- and I'm sure we've all driven north in the mornings during the week. On I-75 you see all those cars coming south. They're not coming here to go to the beach. They're coming here to work, and Mr. Bosi has pointed out on many occasions we're probably 5,000 units short in providing affordable housing, and we're going to have to do this one project at a time to make a dent. I don't think we're ever going to get where we address all 50,000 of those people.

But I guarantee you those 50,000 people that are driving south from Fort Myers are driving to employment that's a lot further away than if they were living here on this particular piece of property for them to go to -- to work at.

With that, unless you have any questions of me at this point, I'll have Wayne come up, and we'll take you through our presentation. Hopefully we'll address most of your questions and comments but, of course, interrupt us at any time, and we'll be happy to answer any of

your questions.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Mr. Yovanovich, can you go to Slide 1, which was titled "Summary of Proposed Request."

So just for the record -- and I want to hear your understanding because I believe the other side maybe has a different take. But during the extremely critical and important preliminary step of the Planning Commission, what was their take on -- like I said before, this isn't just one vote on one thing, and your opening comment sort of said that. But can you give a quick summary on the things that are on here that weren't subject to their concern, confusion, recommendation against? Because, you know, there's quite a bit on here that are, you know, separate decisions. Can you give a rough overview of what --

MR. YOVANOVICH: I could tell you what they approved.

COMMISSIONER LoCASTRO: Right.

MR. YOVANOVICH: I can tell you I think there was even some confusion as to what they were approving, and we had to slow down the process because there was a focus on Section 29.

COMMISSIONER LoCASTRO: And the reason I think it's important you state that is before the other side comes up, I think they should -- they should hear what you say so they can either rebut it or say, "Well, he's got us there." And I don't know what their position is, but I think this is a critical piece in interpretation of the preliminary step the Planning Commission provides.

MR. YOVANOVICH: They recommended approval to revise Map H with regard to what Wayne's going to show you, the business park parcel at the entrance of Fiddler's Creek. They -- they approved the change to the master plan. They approved -- other than Section 29. They approved the floor area ratio that was part of senior housing. They approved the conversion from single-family to multifamily because it had nothing to do with Section 29. They

partially approved, if you will, the updates to the acreage other than the updates relating to Section 29.

And they approved the master plan changes other than the Section 29-related master plan changes.

And Wayne will get into this, or maybe I'll just get into this real quick before I turn it over to Wayne. Whoops, now I've got to go -- sorry.

This is the proposed master plan that's before you today. Right about here, there -- if you look back in I think 2018, that connecting road didn't exist. We went through the process of having plats approved within the PUD that showed that road. Those plats came to the Board of County Commissioners. They were all approved.

Actually, that road itself is an administrative amendment that could occur. And what we're doing is we're truing up, if you will, the master plan to be consistent with the Board-approved plats that show that connection road that is an administrative amendment that does not require Board approval. But we did receive Board approval through that platting process.

So that came up as a discussion point. Your staff agrees that this is -- we're basically just truing up the master plan to address that. And then Wayne will take you through the changes to this portion, obviously, of the PUD, and then specifically to what's occurring in Section 29.

Does that answer your questions, Commissioner?

COMMISSIONER LoCASTRO: Yes. Thank you.

MR. YOVANOVICH: Anything else before I --

CHAIRMAN HALL: Yes, Mr. Yovanovich. You said that this is not designated as panther lands but panthers exist.

MR. YOVANOVICH: Panthers exist throughout Collier County.

CHAIRMAN HALL: Okay. So the 50 acres that we're talking

about where the 750 units are being proposed, that's over ag land. That's not over vegetated land?

MR. YOVANOVICH: That's correct. That's been already cleared.

CHAIRMAN HALL: And then if you'll go just a couple of -- maybe it's a couple of slides forward, you showed in a master plan of 1998 -- yeah, that one along with the lakes. Can you go back to the first map and kind of overlay those for me?

MR. YOVANOVICH: I don't know that I can overlay them, but I can describe them for you.

CHAIRMAN HALL: No. I'm just saying, just with your arrow there.

MR. YOVANOVICH: Okay. Where I showed you the lakes and the parks --

CHAIRMAN HALL: Right.

MR. YOVANOVICH: -- all this is lakes and parks.

CHAIRMAN HALL: Okay.

MR. YOVANOVICH: This was -- on the master plan, it was where the --

CHAIRMAN HALL: Originally the master plan was going to be in the vegetated area?

MR. YOVANOVICH: The preserve was going to be in the vegetated area.

CHAIRMAN HALL: Okay. And we're talking about 50 acres for the site, but we're talking about 58 acres to reapply with the Army Corps of Engineers out -- to take out a preserve. Is that the same -- is the 50 acres part of the 58 acres?

MR. YOVANOVICH: The -- yeah, 49.9. 49.9 acres is this area, and then there's -- it's hard to see, but you can see the farm road that kind of goes from here to here.

CHAIRMAN HALL: Right.

DRAFT

MR. YOVANOVICH: That's the other eight acres.

CHAIRMAN HALL: Gotcha.

MR. YOVANOVICH: Okay. That's the other eight acres. So that's the access road that will connect to Auto Ranch Road.

CHAIRMAN HALL: Okay. That clarified it. All right. Thank you.

MR. YOVANOVICH: All right. Okay. Let me get you back to where Wayne...

All yours.

MR. ARNOLD: Good morning. I'm Wayne Arnold. I'm a certified planner with Grady Minor & Associates here representing the applicant.

And starting with the slide that we have; this is our proposed master plan. Rich highlighted a couple of areas, primarily the area near the entrance for Fiddler's Creek on Collier Boulevard. We're realigning that. A big portion of that that's currently designated just above the arrow, that's currently designated as a business tract, so that would allow commercial shopping centers and other office uses.

We don't think the market's there for a large-scale commercial property along that entrance. So, we're reidentifying most of that tract as a residential tract that would also allow the senior housing project. We think that makes a lot more sense on Collier Boulevard than a large-scale commercial. And then just south of there we've reconfigured and retained a small amount of the red business park -- or we call it business tract area that would allow for additional offices and some miscellaneous retail that would serve primarily the residents of Fiddler's Creek.

The small red area that's located -- these arrows are not very precise -- but in that area, that's where the current offices are. If you go there, the Gulf Bay offices and some of their other administration functions for Fiddler's Creek are located there.

The other change that Rich mentioned, there was a true-up of this overall master plan. So, this iteration, this is one of the first digital versions of the master plan that has been created. These were all hand-drawn exhibits starting back in the early 1990s. So, this has been trued up based on the actual configuration of the golf course tract, the platted residential tracts, et cetera, so that reflects the internal road system that has been platted.

So that explains how that connection point was made. And as Rich said, not to get too into the weeds, but your code allows for administrative changes as you plat property to deal with configuration of internal roadways for these large master plans, set aside of the final preserve areas, and things of that nature. So that's what was -- what was handled there.

And then the larger change, obviously, is everything -- what we call Section 29. So, it's not a full section, but it is located in Section 29. And a good portion of that was designated, which we've been through, as a park area, part of what was a preserve area, then called reserve.

So, on the master plan today, we're reflecting the area that will be retained as preserve in green, and then the residential tract which would be the tan color, and then park areas that would be retained as open space around the 49.9-acre development tract.

So here -- and unfortunately, not a color exhibit from back in the day, but showing you the two primary areas that we're reconfiguring on the plan. Here's a little closer-up version of what's going on on the entrance on Collier Boulevard. But, again, Planning Commission -- and I don't think any of the residents in Fiddler's Creek had an issue with it. We reconfigured the business tract which was, you can see, a large B tract in favor of keeping a small B and then converting the balance of that to residential. And I think that's been well accepted by everyone.

DRAFT

Here's Section 29. So, Rich has already showed you -- in essence, this on the left depicts everything in this area was called reserve back in the days. Everything to the right was open space and lake, and that open space area, as you have heard, allowed everything from active recreation to agriculture. It would have allowed polo fields, golf courses, et cetera. So active recreation for sure.

And then, of course, we're modifying that to identify on the 49.9-acre tract that would have the 750 units and then still retaining the "P" park designation for the surrounding lands.

So the tract does not directly abut the -- the development tract does not directly abut our neighbors to the north, and I know that they're here represented and here in the audience.

Here's a little bit of perspective on our Section 29 development area. And so the Royal Palm Estates to our north -- Boyne South for those of us who've been in town long enough. We started laying out where our 49-acre tract is. And you can see the large yellow line to the north represents the 49-acre tract line. When we apply setbacks where we can put the apartments, it becomes this area. So you can see the separation from the property line, which is the canal. It's 361 -- let's call it 350 feet at minimum up to 500 feet away from the neighboring properties to the north.

We will be providing a 15-foot-wide Type B buffer that separates multifamily from single-family use. It doesn't matter that we're separated by 500 feet. That's what the code requires, and that's what we're happy to provide.

Now, we also created this cross-section -- and I'm not going to take you through all of the cross-section, but it extends -- north is to your left on the cross-section. North is up on the color exhibit. But what we did, identified as you move across the site from north to south, you go from the canal to the north, across the open space areas, you get into our development tract and our landscape buffers that will

be provided adjacent to our neighbors.

We went out and took photographs of the existing property. So this is from Royal Palm Estates looking south across the canal that you can see in the prior aerial. We had conceptual elevations. The buildings have not been designed, but these were designed to be four-story over parking buildings. So, we have morphed in into the imagery what that looks like at the distances, and these are approximate, but -- so that would be the image that's viewed from the neighboring properties looking south toward the 750 proposed units in Fiddler's Creek.

So, there was discussion by experts representing some of the other neighbors about how this was incompatible, and multifamily is out of place here. And I would only tell you that the same people who were objecting have a multifamily tract in their community and that their density is very similar to what's allowed in Fiddler's Creek.

We don't think that this is incompatible, and in fact, our proposed height that we're asking for -- currently in Fiddler's Creek, multifamily units can be up to 150 feet high, and there are certain setbacks that are applicable, but the relationship of our multifamily to single-family is much greater in this concept than you would find in the balance of Fiddler's Creek.

We also heard a lot about this is an inappropriate land-use change because it's an isolated area. It's too hard to get to. So, I did a little Google mapping and determined that from the homes down here on Royal Hammock Way to get out to U.S. 41 and up to the intersection at Auto Ranch Road and U.S. 41, it's 1.99 miles. So, if you leave our community that we're proposing and get to the same intersection at Auto Ranch Road, it's about 1.95 miles. So, I don't consider that to be something that's an isolated district.

As you can also see that we don't extend farther to the east of the Boyne South community to the north. And as Rich briefly

mentioned, the areas to the north that contain 6L Farms, as we all know it, that qualifies for a village under your Growth Management Plan, and I fully expect that in the next several years you'll see a proposal for them to develop more housing and more commercial east on U.S. 41.

We also looked at a 10-mile radius around the project. And when you look at a 10-mile radius, we also associated drive times to demonstrate that from an employment standpoint, we have a lot of employers that are within 10 miles. And when you look at our time, we have Section 29 time and distances, we also had the Royal Palm Golf Estate time and distances that we did from Google mapping, and you can see that the times are within a minute difference to drive from their community or from Section 29. I don't think that's a significant difference, and I don't think that points us out as an isolated area.

But interesting, though, when you look within that 10-mile drive radius, we have all of Marco Island, and I think we're all aware how many hotels and other businesses that we have there as well as schools, hospital, Physicians Regional up on Collier Boulevard is also there, the multitude of retail opportunities, Lely High School, and other things that fall within this drive-time area. So, again, demonstrating that we're not an isolated district; that we're very much in the center of the mix.

And as Rich pointed out, you know, as a business owner that's located barely across the Collier County line in Bonita Springs, you know, it's a struggle to retain people, it's a struggle to hire people. And for those people that, unfortunately, have to drive here from Cape Coral, Lehigh Acres, other parts in Lee County, it's a chore, and it's significantly more than 10 miles. And I can tell you from somebody who does it in the evenings a lot of times, it's probably closer to an hour drive. So, if I can drive less than half an hour to be within a major employment center, this really does look good, especially for

our first responders and other folks who would be getting the first opportunity to rent these facilities.

A lot of good planning considerations. You know, we had objectors that talked about our density was too high. Well, we showed you how we calculated the density for both overall Fiddler's Creek or just on the Section 29 density. And I would tell you that under your Growth Management Plan, the only exception, because we are in the coastal high hazard area for increased density, is for provision of affordable housing. Your Emergency Management department reviewed this application. They're the ones who made the recommendation for the emergency generator purchases as well as the cots, to put those, because you don't want to put more people at risk for the sheltering, but you do want to make sure you have facilities elsewhere for them. So that's been well coordinated, and we're consistent with your Growth Management Plan provisions for that.

From a compatibility standpoint, I don't think it is an issue. It is very compatible. The separation that we're providing between multifamily housing and residential housing is greater than you would find under your typical Land Development Code. And in fact, Fiddler's Creek puts units much closer than we are from our neighboring property.

This isn't an isolated district. The drive-time exhibits and the other, just, distance to get back to U.S. 41 from both communities demonstrates that we're not creating an isolated area.

And I think we also need to point out that -- you'll hear a little bit more about it, but in addition to the affordable housing commitment that's been made, we will be reconstructing large portions of Auto Ranch Road to eliminate flooding and make it safer by installation of sidewalk. We committed to providing a CAT bus stop. Though not currently serviced on the roadway at Auto Ranch Road, there will be

the opportunity for a future CAT stop there, and that will be coordinated with Florida Department of Transportation. And then you'll hear Mark Minor talk to you about stormwater benefits that are going to accrue from the improvements we're making to Auto Ranch Road.

So, you know, we heard a lot of interesting things, but I think as Rich mentioned, I think much of the discussion at the Planning Commission got sidetracked on this whole "the preserve was committed," and I think it's been clear that this was not intended -- all of Section 29 was never intended to be part of a preserve. They're going to tell you that, you know, me personally stood up in 1998 and said they're proposing not to put residential density here. I did that in my capacity as what Mike Bosi is for you today. The application that was before us by Fiddler's Creek then said we're adding this acreage; we're not intending to spread density out there. That was 20-plus years ago, and here we are. We're proposing to put in some affordable housing that we all need, and we know we need it.

And I think we've got a good project and hope you can support it. Be happy to answer any questions you might have for me.

CHAIRMAN HALL: Good job, Wayne.

MR. MINOR: Good morning, Commissioners. My name is Mark Minor, and I'm a civil engineer representing the petitioners.

And I was asked to start off talking about access to the property, Section 29, from U.S. 41 down to Section 29. The proposed access is by Auto Ranch Road. It's an existing 20-foot-wide paved roadway with open swales in a 60-foot right-of-way. It is a public road right-of-way. It was deeded to the county back in the early '80s.

It shows some pictures up here, photographs at the -- at U.S. 41 and at the end and then along quarter points.

The asphalt and the structural elements of the road are in pretty good shape. We feel that the road is a little narrow. The shoulders

are not in very good shape. The roadside drainage is not in that -- very good shape, so it needs -- in our opinion, to operate into service, our proposed community would need substantial upgrades, and I'd like to go through those if I could. If I can find -- oh, there it is.

On this slide is the improvements that we're proposing for Auto Ranch Road and U.S. 41. At the intersection along U.S. 41, pretty standard improvements; extend the existing right-hand turn lane into Auto Ranch Road, and then the northbound left-turn lane would need to be constructed.

Number two is to reconstruct portions of Auto Ranch Road to elevate the finished ground above the 25-year, 3-day storm.

So, this is important. We did a survey of the center line of Auto Ranch Road, and there's a low spot about halfway down that goes below the recommended minimum road crown elevations within any part of Collier County. We have observed inundation of the road during regular rainy seasons. Not too bad, but an inch of water, two inches of water topping it.

And then after Hurricane Ian -- this is Auto Ranch Road after the hurricane, and there's several inches of water along a large stretch of the road. Obviously, we wouldn't want the existing residents nor the potential future residents to have to drive through puddles to get home every night.

So, we propose to elevate -- to physically elevate the crown in the road between just a few inches at the ends and up to a foot and a half in the middle in the existing low spot. So, the road would remain dry in a normal wet season and in most -- after most heavy storm events; of course, storm surge. In Ian, we would have remained dry there. So that's very important and a commitment that we're willing to make.

Number three is to widen the road and resurface it. We've got a

cross-section. It's right there. There it is.

So, again, there's 20-foot of existing asphalt and roadside swales that are in not very good condition, very little bit of shoulder that's existing. So in reconstruction of the road, we're proposing to increase the travel lanes to 11 feet with a four-foot paved shoulder on one side and an open swale. On the other side, non-mountable curb, a utility strip, and a five-foot sidewalk that would run from U.S. 41 down to the project.

We feel these are significant improvements and would provide adequate facilities to service our project and the existing residents and the future residents along Auto Ranch Road.

Number four, again, is the sidewalk shown on the cross-section.

Number five is to re-grade the shoulders, which is a benefit, of course, on this section.

Number six, existing today there's, I don't know, 15 driveways that connect to Auto Ranch Road. Most contain a culvert underneath the driveway closing in the swale. These culverts are of different materials, different sizes, and different operating conditions. Found some that are crushed, one that was missing. They're just -- they're in poor shape. So as part of rebuilding the one-and-quarter mile of Auto Ranch Road, we would replace each of the driveway connections with a brand-new culvert of same material and adequate size to direct water to flow underneath their driveways.

Number seven is along that point, that the driveways are of different materials and widths. And anyway, so after we install the new culverts, we would also provide the owner with a new driveway apron much like you see on many of the county projects that we are doing now.

As far as helping with the water flow, Auto Ranch Road does have some existing cross culverts. They're culverts that run from one side of the road to the other to allow the stormwater surface waters to

equalize. I've done some preliminary engineering and have identified at least one point where an additional drive cross-culvert would want to be installed, and also replace the existing cross-culverts underneath Auto Ranch Road.

The proposed apartments in Section 29, of course, would want to be provided with municipal water and sewer, Collier County water and sewer, so we would install an adequately sized water main with fire hydrants down Auto Ranch Road and also a sewage force main along there. So the capacity would be both for the 750 apartment units as well as the lots along Auto Ranch Road.

I do believe that while -- they would be provided with fire protection immediately, and then they could always get a water meter from the county, apply for a water meter and get water. The sewer would -- they would have to abandon their septic system and put in their own pump stations to get into that. This is a pressure system. But still, the water and sewer would be available to them.

Wayne talked about the bus stop at 41, so I won't talk about that.

So the developer would commit to making these improvements to Auto Ranch Road. We estimated the cost of what I just went through at $7.8 million of improvements just on the Auto Ranch Road portion of the property.

The immediate benefits to the surrounding neighbors, I think, most importantly, is with drainage and flood relief. The road would be elevated above the flood stages so it doesn't periodically become inundated. There would be brand-new swales on both sides of the road graded at an equal gradient all the way down from 41 down to Section 29 with brand-new functioning culverts under each of the existing driveways. So, when we get heavy rains, the water would -- today it moves slow or barely moves, and with these improvements it would allow the water to be able to traverse its way down Auto Ranch Road and get into the estuary down below

Section 29.

Do you want me to do water management now?

MR. YOVANOVICH: Yeah.

MR. MINOR: Is there a map? That one.

So as part of the access and utility corridor to the apartment complex, we're proposing to run the same cross-section that you see for Auto Ranch Road down along that old farm road. That road acts as a dam and blocks the water which naturally travels to the south, or down on this picture, into the wetlands and the estuary, finally into the backwaters in the Gulf of Mexico.

The cross-section for the roadway would be similar to section -- or to Auto Ranch Road, which would take up 60 feet. And you heard the number of the area for the -- that we were proposing to impact through that wetland area at 5.8 acres. Most of that is for drainage and water management.

So, we propose to have a collector swale along the northerly side of that road with cross-culverts underneath this new road to a spreader swale along the southerly edge of the road. So, in other words, we would be facilitating the movement of surface water flow from the north side of Section 29 down through the estuary.

Moving over to the development portion of the apartment projects, that -- the surface water management system would be stand-alone per South Florida Water Management regulations to where we would retain an attenuated 25-year storm. We would discharge to the south. So, there's no users south of us that will be impacted; however, the Boyne South neighbors to the north have that long, linear lake there. Some of that water could overflow or flow -- inflows into the site. And our preliminary water management plans show that we will be collecting that -- any offsite inflows along our northerly development boundary and carry them over to the access road from the end of the existing Auto Ranch Road to our

development and cross them -- pass that water through to the south side and let it go down into the estuary and move on to the south.

So, this project would provide additional drainage and much superior drainage along Auto Ranch Road than what we have today, and then it would also overcome the dam that was created by the farm road many, many decades ago by us passing the water -- collecting it, collecting the water first of all and then passing it under our new driveway to the south. So, any water that would be backing up and collecting along that linear lake would be able to sheet-flow out and then down through the new facilities that we're proposing to build.

So, if you have any questions, I can try and answer them.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Yes. You referenced a couple of times portions of Auto Ranch Road the plan is to improve. Which portions, or is it -- do you have a map that shows what you're going to do and where?

MR. MINOR: We may have a map, but no, the improvements to Auto Ranch Road are from -- including the intersection at U.S. 41 all the way down to Section 29.

COMMISSIONER McDANIEL: Basic -- so the reference of portions of Auto Ranch Road really is different improvements to Auto Ranch Road on portions of Auto Ranch Road, but you're going to improve the whole road to the crown for -- to be above the 25-year storm event?

MR. MINOR: Yes, sir. My reference to a portion of Auto Ranch Road is in the -- about halfway down Auto Ranch Road from 41 to Section 29 it gets really low; there's a belly.

COMMISSIONER McDANIEL: I get -- yes, sir. I got that. I just wanted to -- I just wanted to clarify, because both you and Wayne mentioned portions of Auto Ranch Road, and I just wanted to make sure -- my understanding was what you've got -- what you just said is

from 41 and the improvements there all the way down to the access road to Section 29.

MR. MINOR: Yes, sir. The cross-section that's on the screen now is what we're proposing; Auto Ranch Road, 41 to Section 29.

COMMISSIONER McDANIEL: Was any modeling accomplished with regard to the capacities for movement of water east and west on Auto Ranch Road? You talked about some -- some cross-culverts underneath Auto Ranch Road to move water back and forth. We don't want to negatively impact somebody by moving somebody else's water to them.

MR. MINOR: Yes. There was some preliminary modeling that was performed, and we relied on that.

COMMISSIONER McDANIEL: Okay. And I don't know if you're the appropriate person to ask, but when water and sewer is also extended down to the site, is there a requirement for the people on Auto Ranch to connect, or is it voluntary?

MR. YOVANOVICH: And I was going to hit that point. Since they're zoned ag land, it's voluntary. They're not required.

COMMISSIONER McDANIEL: Say that again.

MR. YOVANOVICH: The properties on Auto Ranch Road are zoned agricultural. They're not required to connect. It's purely voluntary if they want to connect to water and/or sewer.

COMMISSIONER McDANIEL: Thank you.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chairman.

Yeah, don't say "portions," because that confuses us. It's the entire road. You don't want to mix words.

Ms. Scott, I actually have a question for you. So, seeing -- since we're on Auto Ranch Road, seeing those photos, historically what's been the county's position? I realize there's not 10,000 people that live on Auto Ranch Road, but is there a recent time that we did some

improvements on there? Is there something -- forget this. If this never happens, is there something in our future road improvement that would significantly enhance Auto Ranch Road at the county's -- you know, using the county's budget?

MS. SCOTT: A few years back -- a few years back the county undertook what we called the Lake Park flowway study, which is actually looking at stormwater in the area along Auto Ranch Road as well as Lake Park Boulevard, which is a roadway that runs parallel to Auto Ranch Road. And as part of that study for stormwater improvements in the area, we identified the need to improve Auto Ranch Road. The project is not funded, but it was a study that the county did undertake.

So in the future, if we were to undertake those improvements for stormwater, also potential looking at going through perhaps some grant opportunities to do a septic-to-sewer type conversion in the area, then absolutely we would look at improving Auto Ranch Road at that same time.

COMMISSIONER LoCASTRO: Did we do anything in the last three, five, six years, whatever, to make repairs? You know, hearing culverts are crushed, you know, culverts are all -- because the culverts serve a very important role. Have we done anything out there at a smaller level? I realize, like you say, oh, there was a master plan to maybe hit it hard, but have we done any type of just maintenance? Have we addressed those culverts or any type of drainage that was maybe at a smaller level as just part of normal road maintenance?

MS. SCOTT: I do not believe so, but I can check in our system to look at that.

COMMISSIONER LoCASTRO: Okay, thanks.

COMMISSIONER KOWAL: I have a follow-up.

Trinity, since you're on -- Trinity, can you just clarify. Just from my experience, if it's a culvert on a driveway, is it the county's

DRAFT

responsibility or the property owner's responsibility to maintain the culvert?

MS. SCOTT: It is the property owner's responsibility to maintain the culvert for their driveway.

COMMISSIONER KOWAL: All right. Thank you.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: And this is just an after-the-fact thought. If this project were to be approved, are there any speed-control mechanisms to be installed on Auto Ranch? Because that's going to be a mile-long straightaway.

MR. BANKS: For the record, Jim Banks.

It's currently 30 miles per hour, and it will remain 30 miles per hour.

COMMISSIONER McDANIEL: That's not what I asked, Jim. I know it's 30.

MR. BANKS: I'm sorry.

COMMISSIONER McDANIEL: I'm talking about how do you get people to throw out the anchor?

MR. BANKS: Like traffic-calming devices?

COMMISSIONER McDANIEL: Yes, sir.

MR. BANKS: No, we're not proposing any traffic-calming devices. It's a public road. You typically don't put speed humps and that type of thing on a public road.

COMMISSIONER McDANIEL: Okay. I know there's positives and negatives that come along with, but that's something we may need to address at some stage.

MR. BANKS: I will talk a little bit more about that when I'm up.

COMMISSIONER McDANIEL: Okay.

MR. YOVANOVICH: That's a good segue. Mr. Banks is --

COMMISSIONER McDANIEL: Here he comes.

MR. BANKS: Good morning; good late morning. For the record, Jim Banks here on behalf of the applicant. I will be relatively brief.

My firm prepared the traffic impact study for this project. The project -- the traffic study was prepared pursuant to Collier County standards. Your staff reviewed the report, and they agreed with its findings.

The report was based upon the proposed development of a 750-unit apartment complex, and we determined that the trip cap that would be applied on this project is 343 p.m. peak-hour, two-way trips. The report also established that at project completion and in considering the improvements that Mr. Minor had mentioned, which I'll discuss a little bit more here in a minute, that at project completion, that the Auto Ranch Road will operate at Level of Service C standards and at a volume-to-capacity ratio of 42 percent. So that means at project completion there is a 58 percent surplus of capacity remaining on Auto Ranch Road.

We also determined that U.S. 41 -- am I too close to the microphone? -- that U.S. 41 would also operate at Level of Service C and at 80 percent of its capacity.

So, the traffic study concludes, and as agreed to with your staff, that the proposed apartment complex will not negatively impact the adjacent road network and that there -- that the roadways under influence have adequate capacity to accommodate the traffic associated with this project. Now, this conclusion also considers the improvements on Auto Ranch Road, which again, begin at U.S. 41 and extend all the way down to Section 29.

So, the improvements, I refer to them as both safety improvements and capacity improvements; again, widening the lanes, the north/south travel lanes on Auto Ranch Road the entire length of Auto Ranch Road. We'll also be providing a paved shoulder on one

side of the road, and on the other side of the road we'll have a curb-and-gutter feature as well as a sidewalk that's offset of the road.

The roadway will be elevated in those sections where it's needed. So again, the entire length of the road is being improved, but in those lower sections where the road has a tendency to flood, it will be elevated. But the cross-section, as shown now, is what the drivers will experience the entire length of Auto Ranch Road.

There will be roadside drainage feature improvements, which includes reestablishing the swales and culverts.

In addition, the corridor's drainage outfall will be reestablished, which is a very important element of the drainage operation. As I said before, the speed limit will remain posted 30 miles per hour legally enforceable, but we are not proposing traffic-calming devices.

There will be intersection improvements at U.S. 41 and Auto Ranch Road. As you can see from this aerial, the right-turn lane that's on U.S. 41 today is grossly substandard. The developer commits to extending that right-turn lane to meet FDOT standards. In addition, if you're traveling northwest on U.S. 41, we're also going to -- the developer will also construct a left-turn lane for those motorists that want to turn southbound on Auto Ranch Road. These are very important safety improvements that the developer will undertake.

I submit to you that these proposed safety enhancements on Auto Ranch Road as well as at the intersection at U.S. 41 will substantially increase the road's capacity. Today in its current condition it's estimated to be 400 vehicles per hour peak direction. With these improvements, the capacity is raised to 600 vehicles per hour peak direction, and that is a conservative estimate. We're understating the actual capacity of the road.

And it will also provide superior safety features for the residents that live along Auto Ranch Road. And that -- one of the critical

features of that is that offset sidewalk along Auto Ranch Road that will accommodate pedestrians.

That concludes my testimony, and I'm happy to answer any questions that you may have.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chairman.

Can you put back the traffic numbers, your --

MR. BANKS: Yes, sir.

COMMISSIONER LoCASTRO: Ms. Scott, have you seen this slide before, at least these numbers? Is this part of something you're aware of?

MS. SCOTT: Yes.

COMMISSIONER LoCASTRO: Okay. So, do you concur that these numbers are at least close? You know, they're always plus or minus, but are they -- you know, would you agree with the estimation of the trips?

MS. SCOTT: Yes, sir. They use the Institute of Traffic Engineers. We require that as part of our Traffic Impact Statement guidelines.

COMMISSIONER LoCASTRO: Okay. So, what I -- what I recommend to the other side before you come to the podium -- and as a said in my opening statement, I greatly appreciate the preliminary steps of the Planning Commission, but I watched and read the entire transcript of the Planning Commission, and a lot of discussion was about the increased traffic on Auto Ranch Road.

Let me read you an excerpt from one of many citizen e-mails I got, which -- we're here to separate rumor from fact. So, I'm going to read it verbatim. And I got this from quite a few citizens, and it was also mentioned in the Planning Commission discussion.

And I don't say this to take sides, but we're here to figure out truth, facts, details. We already heard several people talk about

preserves and panthers. And, you know, it's one thing to say, you know, I saw a tree and I saw an animal, but is it a preserve? And we have to deal with the law. We have to deal with facts.

And they're just two short sentences, but this is what has gone out on social media and also it came to all five of these commissioners in a plethora of e-mails. "If approved, this development will cause 4,000 vehicle trips on Auto Ranch Road exiting onto State Road 41 in East Naples per day. It will also destroy the storm surge protection of this preserve" and gives Royal -- "that it gives Royal Palm Golf Estates. It will further endanger the Florida panther, 35 of which were killed by vehicle traffic this year alone in Collier County, and other wildlife living within the Seminole State Forest."

I don't say that to pick sides here, but there's a huge difference in what is being sort of told by you-all and what we're going to hear.

So, what I would tell the other side is we're here to hear you prove this. So, if these numbers are wrong and it's 4,000 trips, boy, I've got a significant issue with Auto Ranch Road and with Section 29. If the trips are in the several hundreds, we've approved projects where vehicular traffic was much greater. And if it's on an improved road that you're going to spend $7 million on improving, I have a lot less concern over the number of trips I see on this slide than the 4,000 that came to us in a flood of e-mails from citizens who all were begging us to disapprove of this project of which, if this was true, it would be one of my main concerns, and probably all of us.

So, what say you? I've already heard from Ms. Scott who I consider our traffic expert. I know there'll be an opposing view, which I welcome hearing. But we have to -- we have to sort out what maybe the people before us who heard the preliminary presentation might not have sorted out.

MR. YOVANOVICH: I think -- and I'm sure Trinity will correct me if I'm wrong -- is the way Traffic Impact Statements are

done in Collier County is you do it based upon the peak hours, the morning peak hours and the afternoon peak hours. That's the critical time because that's when you're going to have the most people on the road at the same time. So that's the analysis we do is the peak-hour trip.

There are -- there are going to be trips throughout the day. And I don't think their number is wrong for total daily trips, but that's not how you measure capacity and how you measure safety. You measure traffic and safety based upon the peak hour, because people come and go throughout the day.

So I don't think they're wrong in telling you that there's going to be 4,000 trips a day, but that's not the safety analysis that's done. The safety analysis that's done is at the peak hour.

So I think what they're trying to imply is this great number of trips is going to make the road unsafe. That's not factually correct.

COMMISSIONER LoCASTRO: Ms. Scott, your comment on that; true or false?

MS. SCOTT: Mark it down: I'm going to agree with Mr. Yovanovich.

COMMISSIONER LoCASTRO: Okay.

MS. SCOTT: Yes, that's true. We do look at the peak times for the highest concentration. That's the highest concentration that we anticipate having those vehicles out there. But certainly they're going to have traffic throughout the day.

COMMISSIONER LoCASTRO: Would you -- and this will be my last question. Would you agree that if the -- if in the end the 750 units were approved, could the current Auto Ranch Road, as it sits right now, sustain the traffic that would go back and forth to those units, or the improvements they're making would be a requirement, not sort of a carrot or a benefit, but it would be a requirement for that project due to the increased trips and the large residential area that

would be created if it got to that point? What would be your professional opinion?

MS. SCOTT: From a pure technical standpoint, can it withstand those trips, yes, it can from looking at our capacity manuals and things like that. But would that -- that's not what staff would recommend.

COMMISSIONER LoCASTRO: Okay.

MS. SCOTT: We would -- we would say we would want the improvements. That is a lot of traffic going down a roadway that we know does have some stormwater challenges, so you really don't want to have an additional 750 units at the end of that without having some improvements to it.

COMMISSIONER LoCASTRO: When you looked at the schematics of their proposed drawing of what the road would look like, with your expertise, does it look like that their $7 million enhancement hits all the bells and whistles of the things that you look for? If we had the 7 million and we were going to upgrade that road, would it look very similar to this, or is this even above and beyond what the county standard normally is? I'm just trying to get an idea of quality of improvement compared to other things that the county does or that we expect of other developers.

MS. SCOTT: This is what we would expect to do. Certainly, the addition of the sidewalk with having the 750 units at the end is certainly something -- perhaps if I was looking to improve that road, we always look to put a sidewalk in, but we would look at what we had from a funding standpoint and all of that. So yes, I mean, raising the road is a significant improvement to what we're dealing with today.

COMMISSIONER LoCASTRO: And what's the height of the road -- what's the height of the road now and what it could be if you did this? How much higher would it be raised, ballpark?

MR. YOVANOVICH: Well, I think he said it could be from inches to 18 inches in the middle that we're raising the road. It's significant.

COMMISSIONER LoCASTRO: Okay. Which some people think is a small amount, but raise the road 18 inches, and just look at what we did in Goodland. It made a significant difference. Yeah, absolutely.

Okay. Thank you, sir, and, ma'am.

MR. YOVANOVICH: If I could just -- and I'm going to bring up Tim to talk about the conservation qualities of the land in a second. But I want to point out something, all of the expert testimony at the Planning Commission was that we met all the criteria from a conservation standpoint, from a transportation standpoint, and from a water management standpoint. There was no expert testimony to the counter of that at the hearing.

So going on let's talk about facts, that's what we're trying to present today is what is the expert testimony. Not what people may feel, but what's the actual expert testimony. It's taken a little bit longer than I had hoped, but I want to make sure that it's all in the record not only for you-all but for -- again, for the people who live in that area. And I'll bring Tim up, and then we'll have a conclusion slide and --

CHAIRMAN HALL: I have a real quick question about the traffic study. It says a.m. peak hours, p.m. peak hours. What is the -- is that one hour or several hours?

MR. YOVANOVICH: I'm going to -- I know it's from four to six in the afternoon. I don't --

CHAIRMAN HALL: Okay. So it's not just, like, in an hour's time?

MR. YOVANOVICH: No. There's a -- we've been doing these for -- I know enough now that Trinity's trained me to give you those

answers. So even though she was agreeing with me, I was actually agreeing with her.

CHAIRMAN HALL: Good. Thanks.

MR. HALL: Good morning. For the record, Tim Hall with Turrell, Hall & Associates. I'm the environmental consultant here on behalf of the petitioner.

I'll start talking about, I guess, the quality of the habitat in terms of listed species. The big one that everybody keeps talking about is the panther. The exhibit I have up here shows kind of a little regional area. And when the wildlife agencies were developing the management plan for the panther to try to help prolong the species, they looked at all of the habitats within the panther's range, and they kind of ranked them. And they looked at those highest priority areas where there was the most use where prey species were being -- were present, where the panthers were moving in terms of corridors, and they ranked those. They gave those highest quality habitats a designation of primary habitat. The kind of buffer areas and those that were still being used but not to the extent, they qualified as secondary habitat. And then other lands are just designated as "other lands."

And so what this exhibit shows is that when they were doing that exercise, the primary habitat, if you look at -- Rich had a map up earlier that kind of showed the Sending Lands and Receiving Land kind of areas. And you can see that the primary habitat kind of mirrors the Sending Land boundaries to the north of the project, and the secondary habitat kind of mirrors those Receiving Land areas.

The land south of U.S. 41 was not designated under the panther management plan as primary or secondary habitat. It was looked at "other lands." That's not to say that panthers can't -- sorry. That's not to say that panthers can't go down into that area.

MR. MILLER: Give me a minute.

MR. HALL: And the FWC, the state wildlife agency, does have a tracking system where when cats get collared they're able to -- they used to do it by planes. They would fly three days a week, rain or shine, and the guys would use the radar tracking to triangulate the panther locations out of these small planes. I've done that. If you don't have a very strong stomach for the guy doing circles in the airplane, it's no fun. But they actually were able to pretty accurately find and designate where all of those panthers were and how they moved around.

With the advent of technology, they use GPS collars now, so it's a little bit easier. They don't have to do quite so many aerial flights and all.

But I say that because there are exhibits that show that there are -- there has been panther movement kind of around this property. One of the reasons -- and I can't speak for the wildlife agencies, but I have, you know, worked with them quite a bit. The area south of 41 with Fiddler's Creek and the mangrove habitat that's down there and all, mangroves are not primary preferred habitat by the panthers and all.

So this area between south of U.S. 41 and San Marco Road and 951 kind of forms this little cul-de-sac. So when you look at the panther movement through there, based on the radio telemetry and all, you can kind of see that they'll come down into that area, and then they'll leave. They kind of loop down, and so they don't spend a whole lot of time around this site. And that's kind of why it wasn't looked at as high-quality habitat when any of these were being established.

When you get to the property specifically -- I think I might have lost control.

MR. MILLER: What is going on?

COMMISSIONER McDANIEL: Gremlins.

MR. HALL: There we go.

So the property itself, originally it was cleared and used for row crop agriculture. After the row crops, there was a time frame where there were some nursery operations that happened out there, and then in the most recent time frame, the last, I don't know, maybe 10, 12 years, it's been pasture. It's been used as pasture.

And so when we went through the process with the Fish and Wildlife Service and this area was offered for preserve, they use a -- kind of a complicated math problem, math equation to look at what that value is in terms of mitigation or benefits for the panther.

And as I showed you on the slide before, because this was outside of any of those designated areas, this -- the property as a whole, both the Section 19 and the Section 29 preserve areas, were treated as one-third of the value as if they would have been in primary habitat. So they're discounted by that value initially.

And then looking at the type of habitat that's on there, the highest quality habitat has a numerical ranking; it's called a PHU value of 9.5 PHUs per acre. And you get down to exotic vegetation, which is 3 PHUs per acre; water, which has no value.

So the pasture area was looked at a lower value, and when we made the application to try to just amend the Estancia project, the value associated with this 50 acres out of the 1,300-plus that the project was providing, this -- the value of this one was 119 PHUs. So you can see it had a very low value in terms of the credit that Fish and Wildlife Service gave to the project in terms of the panther mitigation.

The two other species that were also addressed in the discussions with Fish and Wildlife Service was the Florida bonneted bat and the American crocodile. The bonneted bat needs tall, relatively large, like 15-inch DBHs or bigger cavities in trees for their roosting and all. And you can see on the pasture areas there are no trees that meet the criteria that would support any type of bonneted bat roosting.

Foraging can occur. They like to forage over the open-water areas and all. We did some radio echolocation monitoring out there and did not see any evidence of any Florida bonneted bats in this area based on the echolocation surveys that were done.

And then the last species was the crocodile. When we originally permitted this project with Fish and Wildlife and all, the crocodile was not an issue. After we made the application, I believe it was in 2019 or 2020, there was some crocodile nesting that was documented to the east of the Curcie fill pits, which are -- this is Curcie. Did that show up? The fill pits.

In the marsh mangrove area to the west of those fill pits, I believe there was two crocodile nests that were documented down there. So that was an additional -- when we were trying to make the modification to this project, they asked us to verify whether or not there was any crocodile use within the farm fields or the project area, and so I did a crocodile nesting survey and found no evidence of any crocodiles. There are alligators within the ditches there, but we didn't see any evidence of crocodiles at that time.

So as Rich had said, the application that we had made previously to Fish and Wildlife Service didn't have really anything to do directly with the development of this parcel. The application that was made to Fish and Wildlife was to amend the panther mitigation that was provided to the Estancia project and make that change.

Fish and Wildlife came back and denied that application, but a lot of the denial was based on process in terms of -- the Army Corps of Engineers permit had expired, and U.S. Fish and Wildlife Service process, through their Section 7 consultations and the Endangered Species Act, has to have a permitting agency -- they call it a nexus. Commissioner LoCastro probably knows this better than I do in terms of how the different agencies interact with each other.

COMMISSIONER LoCASTRO: Poorly.

MR. HALL: But without a -- without a -- without an active Corps application, the Fish and Wildlife Service basically said they would not act on our -- on our request to make that amendment and so denied it.

And as Rich said early in the presentation, as this moves forward, if it is approved, then a new application will go in to the Corps of Engineers which will address the impacts associated with developing this property as well as that mitigation associated with this property that was assigned to the -- to the Estancia project. So, essentially, there will be two different mitigation analyses done that -- which will provide the credit back towards the Estancia project plus the impacts that would be associated with actually developing this and removing it from the -- from use by any of the cats or other listed species.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Can you go back to the map that has the striped maps that show primary and secondary. So my first question is, for the record, can you define the difference between the yellow primary section and the purple secondary section with regard to level of panther concern, preservation; define the difference between those two areas.

MR. HALL: So as I said, the yellow striped area is the primary habitat. That's the area that the Fish and Wildlife Service and FWC consider has the most benefit and the most value to the panther. So if you go in with a project to impact lands within those areas, they will assess a higher mitigation value to those lands in order to impact them.

COMMISSIONER LoCASTRO: And the secondary one would be similar but less of a mitigation?

MR. HALL: Yes.

COMMISSIONER LoCASTRO: But the reality is, a major portion of Royal Palm Golf Estates sits in the secondary area, correct?

MR. HALL: No.

COMMISSIONER LoCASTRO: No?

MR. HALL: The Royal Palm is also south of 41.

COMMISSIONER LoCASTRO: So, in that secondary area, there's no residential communities at all?

MR. HALL: No, there are.

COMMISSIONER LoCASTRO: Yeah.

MR. HALL: I think Greenway Road. There's a couple of the little roads that go to the north there that are up in there.

COMMISSIONER LoCASTRO: Yeah, okay.

COMMISSIONER McDANIEL: 6L Farms.

COMMISSIONER LoCASTRO: Yeah, 6L Farms and all those.

So one of the things that I say to the folks that are going to come up, you know, I guess probably after lunch, in opposition is although the Planning Commission had three days and uncovered so many things, went in so many different directions, please listen to what the five commissioners here are asking of this group. These are the things that we're zeroing in on. We do this full-time with lots of other things, many things that don't even come to the Planning Commission or just conversations we have with developers.

So it's important that the questions we're asking aren't steering us to a certain preliminary, you know, decision, but these are the particular things we're zeroing in on: Traffic density, preservation, the wildlife, water runoff. We're trying to get down to the brass tacks.

And some of the numbers on their side differ on your side. It means that maybe some of them are -- like, Ms. Scott said, the numbers for traffic actually are not incorrect. It just depends on perception, and you could be giving a perception that's actually not how we do it, maybe.

And the other cases, the things that you -- that are important to

you, make sure it's important -- or it is important that you hear the questions that we're zeroing in on, because those are the main points that lead to our decision, not a recommendation, a decision on what's going to happen.

So things that you don't hear, it doesn't mean they're not important, but all of you who have been in my office, and it's almost everybody in this room, I said over and over again, "Pick the main, huge points. Don't go down a rabbit trail on Point No. 11 which actually has merit but might be a lot less significant to our decision here today."

So I hope that helps. If it doesn't -- but it's my view. But I appreciate your clarification on the map.

CHAIRMAN HALL: Mr. Hall -- that sounds pretty good, by the way -- I have a question.

So back in the day when Estancia was come [sic]

, they could have mitigated the panthers for a million dollars, and in lieu of that they offered Section 29 in lieu of paying a million dollars; is that correct? A million dollars would have solved all the panther's credit -- solved all the panther's problems.

MR. HALL: The original -- the mitigation requirement for the Estancia project -- and forgive me, these numbers may not be exactly right, but it was about 2,400 PHUs; 2,400 PHUs. The properties in Section 29 and 19 that they offered for preserve provided 1,390-some-odd PHUs. They still had to go purchase that other thousand that they were short from the bank.

They had the option to purchase that whole 2,000-and-some from the bank, and they used this option as a -- as a -- kind of a way to lessen that offsite purchase that they had to do.

CHAIRMAN HALL: So, my point in asking that question is --

MR. HALL: How much -- if you looked at that number, the 1,300-and-some that this whole preserve area provided, about $800

per PHU. So, 1,300 would be about a million, a million-one, a million-two.

MR. YOVANOVICH: And I would just want to point -- you're right. I would point out Section 19 was additional lands within that. So I don't know how many, you know, what, 400 acres in Section 19?

MR. HALL: Three hundred.

MR. YOVANOVICH: Three hundred. So, it would be even -- you're right. They could have just bought it for a million dollars, and we wouldn't be sitting here today, or even less. We could have gotten that for $100,000, and we wouldn't be sitting here today.

CHAIRMAN HALL: My point was money would have solved the panther's problem.

MR. YOVANOVICH: Absolutely.

CHAIRMAN HALL: So now you're -- I saw something earlier in a bullet point or something where the applicant is asking -- you know, we will provide twice the amount of panther coverage to be able to take back the obligation that they offered in the first place.

MR. YOVANOVICH: Correct. We had talked to the agencies about paying 200,000 to remove the 58 acres, and they wanted a million-six.

CHAIRMAN HALL: Okay. Great. Thank you.

COMMISSIONER LoCASTRO: And if I just might clarify, they wanted a million-six, but it was, like, in a different county.

MR. YOVANOVICH: Glades County.

COMMISSIONER LoCASTRO: Yeah.

MR. YOVANOVICH: Which was hard for us to understand how that really benefited Collier County. But, you know, it's the federal government.

We're at the end of our presentation. Your staff is recommending approval of all three petitions: A change to the DRI,

a change to the PUD, and the change to the Growth Management Plan. Your staff are experts in their individual areas of expertise.

It is a -- it's an arduous process to get through to get here, and we wouldn't be here if staff weren't recommending approval and satisfying all the criteria for making sure we're handling water management, we're handling traffic, we're handling environmental-related issues.

We have checked the box with every one of your staff reviews and in their expertise, and we're requesting that -- this is -- this is a project, focusing specifically on Section 29, that you-all have identified as a priority to provide affordable housing. We are doing that. We are doing it in a location that makes sense. It's close to employers. It's on lands that are not environmentally sensitive, and it is going to be done in a safe way including roughly $7.8 million worth of improvements to Auto Ranch Road that we would make, I would think is probably above and beyond what the county might do themselves, but we're doing it because it makes sense for the residents on Auto Ranch, but it also makes sense for the residents who are going to reside in our community.

That's our presentation. If you have any more questions regarding everything we've gone into, we're happy to address them or turn it over to however you want to go next as a Board. If you want to go to staff, take a break, or whatever you want to do.

CHAIRMAN HALL: Mr. Bosi, how long do you think you're going to need?

MR. BOSI: Twenty, 25 minutes.

CHAIRMAN HALL: All right. So, we'll do you, and then we'll take a lunch before we hear public comment.

MR. BOSI: Mike Bosi, Planning and Zoning director.

Good afternoon. Hopefully I'll be able to wrap this up in 20, 25 minutes.

What I'm really looking to do -- we've expressed our recommendations within our executive summary. We've included our staff reports. I wanted to get some more pertinent things on the record. A lot of stuff has been covered by the applicant, so I can expediate those in a little bit.

I just wanted to go back to the Planning Commission recommendation. It was a recommendation of 4-0 on July 28th to recommend denial to the Planning Commission [sic]. They identified the importance of the GMP as being a high bar to pass, and they felt that the applicant hadn't met that. Lack of creating jobs, creating economic development, discourage urban sprawl, not adequately protecting natural resources, providing goods accessible to related land uses, and limited development in Coastal High Hazard Area to protect human life.

Those were the issues that the Planning Commission had identified to recommend denial of the petition, but they did have an alternative recommendation that they said if you remove all references to Section 29, all of the other master plan changes, the reduction -- or the reallocation of the land uses on Collier Boulevard, the internal modifications to the master plan, the floor area ratio, all those changes were recommended for approval by the Planning Commission.

As it was pointed out, since 1998 -- since 1998, from a local perspective, we have -- we have always anticipated -- we've always anticipated that some development was going to be -- and I'm just trying to find the actual page. And this is where -- this is -- '98 is when they added it. I think Mr. Yovanovich has already highlighted these. It's tough to read. But it's passive reaction; biking, hiking, launching, storage facilities, active recreational, agricultural, boat storage facilities within there.

And another thing I think that is important to understand, and that's within the -- that's within that section area -- Area 29, if you

look, it says, "In addition, there shall be a 0-foot setback line required from water bodies and structures." So, they're having -- the development standards that are contained within that section are not that demanding. If you look up to the top, your front yard, side yard, or rear yard's going to be 50 feet or 30 feet. So, what's that saying? Is the development that was going to be proposed since 1998 with a maximum height of 35 feet -- that's not -- that's not an actual height. That's a zoned height, but 35 feet -- could be within 30 feet or 50 feet of -- of the property line. Pretty -- places it in closer proximity to the development that's within Boyne South within the Royal Golf Estates. I thought that was significant.

And we've always known, for 26 years there's been land-use activity that has been allocated to Section 29. I think -- I wanted to put that forward, because during the Planning Commission, there was -- it was stated, I couldn't tell you how many times, that all of 29 is supposed to be in preserve. All of -- what they're referencing was the federal permitting act, and I don't deny that that could have been -- that that's the case. But what was done at the local level has always called for activity. Something was going to happen. Something was planned. Something was allowed for within this -- within this area.

Rich had alluded to the -- alluded to location in terms of where it sits within the Rural Fringe Mixed-Use District. The Rural Fringe Mixed-Use District was adopted in 2002. It became effective in 2003 because of some legal challenges. It's made up of a series of Sending Lands, Receiving Lands, Neutral Lands.

Sending Lands are the areas that are the most environmentally sensitive. You've got -- you want to really send the development away from there.

Your Receiving Lands are less environmentally sensitive; more prone to development. It's where you want to receive that

development.

Neutral is -- is neither environmentally sensitive or directly prone for development. So, they're really outside of the program, and they're entitled to, you know, your traditional agricultural uses that it's originally zoned for, and I think that's important.

I will acknowledge that as you -- this is the -- basically the southernmost portion of the -- of that land use that is -- been disturbed, because the rest of the land uses basically make up your Rookery Bay estuary, your Collier-Seminole State Park system. So, the land is environmentally sensitive. But this is -- where this is being proposed is the end of the disturbed area, and then south of that is when you really start your environmentally sensitive areas.

And Mr. Hall referenced, you know, the utilization of this area in limited fashion from the panthers as well.

The next slide I wanted to put up, it just highlights some of the other activities that are being requested. Not only -- and I think Mr. Yovanovich is probably going to cover this. And I don't have to get into it -- but changing the intensity from group homes from 26 units per acre to .60 for floor area ratio to allow for the provision of a CAT bus stop, removal of lakes, and reconfigure the residential and the business tracts along Collier Boulevard.

So, there is -- there's a lot of different things that are being asked for. There has been objections from -- obviously from the Boyne South folks relating to the affordable housing. There has been some objection from homeowners within -- within the Fiddler's Creek about the relocation of some of those internal alignments. And I want to really -- I really want to address that point with these next couple slides.

So, this is the master plan that currently exists with the '18 ordinance. And as you can see, I have circled in red here, you have a road that comes down and ends here. And when you go to what's

being proposed, we see that road now extends here. So, what the objection has been has been that folks that live in the neighborhoods to the west are objecting to that amount of residential development that is now going to be routed through their individual neighborhood saying that it all -- and a lot of the statement has been a generalization: It's all going to end up onto 951.

Now, there's some other access routes towards where they could access to 41 that probably has a little bit different distribution of where that -- where those trips are going to be, but that's really irrelevant to the point that I want to make. And it's related to what our code says, what our Land Development Code says about this particular activity of modifying some internal realignments within a master plan and what that master plan does and does not vest.

And that's related to 10.02.13. These are our PUD procedures. So, these are from our Land Development Code. And it basically says, this is what -- this is what staff is obligated to follow when we're proposing a PUD or a PUD master plan. And I highlighted the pertinent area for this development. And it says, effective -- and this is under C, "effective Planned Unit Development zoning." And it says, "The development in the area designated as the PUD district on the official zoning atlas shall proceed only in accordance with the adopted development regulations, and master plan does not authorize or vest the location, design, capacity, or routing of traffic for access point depicted on or described in such ordinance or plan."

So, it's a lot of words, but what it's saying is there's no vesting within the location design, capacity, or routing of traffic for any one access plan depicted on or within such plan. So that statement stands by itself, and staff feels that gives the reader the understanding that that PUD master plan is conceptual -- conceptual in design and is not a Site Development Plan.

And it's further refined with this section where it talks about

minor changes, and this is how you deal with minor changes within a PUD and within a PUD master plan. And basically underneath 3, minor changes, "The County Manager or designee shall also be authorized to allow minor changes to the PUD master plan during its subdivision improvement plan or Site Development Plan process to accommodate topography, vegetation, or other site conditions not identified or accounted for during its original submittal, and review when said changes have been determined to be compatible with adjacent land uses have no impacts external to the site, existing or proposed, and is otherwise consistent with the provisions of this code and the Growth Management Plan," and these changes shall include, the very first one, internal realignment of rights-of-way including a relocation of access points onto the PUD itself where no water management facilities, conservation/preservation areas, or required easements are affected. That second provision authorizes staff to make those modifications that the platting -- that this master plan is trying to catch up to.

So staff feels we have been within the rights that the Land Development Code -- the instruction that the regulations are contained within the Land Development Code in terms of moving forward with approving plats that maybe aren't 100 percent in alignment with the site plan, but that's -- or with the master plan, but that master plan is not a site plan. It's a conceptual development plan, and the LDC specifically within these sections allows for staff to take those administrative functions.

Another aspect that we wanted to -- just to highlight -- and this is related to the distinction between our local permitting and our federal permitting -- and this is straight from the Florida Statutes, and it talks about development permits and orders. And you go down to --

MR. MILLER: Sorry, Mike. It's some sort of a Zoom issue.

MR. BOSI: That's all right.

And if you look at No. 5, "For any development permit applied -- application filed with the county after July 1st of 2012, a county may not require as a condition of process or issuing a development permit or development order that an applicant obtain a permit or approval from any state or federal agency unless the agency has issued a final agency action that denies the federal or state permit before the action of the local county." So what he's saying, has the -- has the agency issued a final development permit?

And then second, 6 says, "The issuance of a development permit or permit ordered by a county does not in any way create any rights of the party or the applicant to obtain a permit from the state or federal agency and does not create a liability on the part of the county for issuance of the permits if the applicant fails to obtain requested approvals or fulfills the obligations imposed by the state agency or undertakes actions that results from a violation of state or federal law. A county shall attach such a disclaimer to the issuance of the development permit and shall include a permit condition that all other applicable state and federal permits obtained before commencing development."

That's what we do within every single one of our PUDs. Within our PUDs, we say that when you come for a Site Development Plan and a plat, and actually the development order that will be associated with those building permits, you're required to show your federal and state permitting, but not until that stage. We are at the entitlement stage. It still has to go through an SDP or a plat and then the request for building permits before that -- before that preconstruction meeting would happen.

So in that regard, there are two distinct processes, and we think we are -- that the county is within its rights in terms of acting upon the request that we -- that we currently have.

And one last thing staff would like to get on the record, and I can

wrap it up. Hopefully I'm within that time frame I estimated. But I did notice -- and Mr. Yovanovich had recommended, staff is recommending, but staff is recommending approval with conditions. One of the conditions that was contained within the staff report, and staff is still requesting, is that a type -- a 15-foot Type B landscape buffer be provided along the northern -- the northern and western portions of the development area.

And another aspect -- and another reason that staff is looking at, and it's one of the things that -- or that helped us reach a recommendation of approval, if you look at the development area on the eastern side, the closest proximity to the development area of the apartments and the amenities to the south side of the canal is 361 -- is 361 feet. On the west side, to the north side of the canal, you're at 518 feet. Now, what's being proposed is the maximum height of 69 feet.

So, from the west side, you're close to nine times the height of the building setback, and on the eastern side you're closer to seven times the height of the building setback. Those are -- those are significant setbacks that help mitigate the impact of this potential development on the residential development that sits to the -- that sits to the north of the property. That was one of the reasons staff, from a design standpoint, felt that compatibility could be arranged.

From a public benefit standpoint, the 225 units that are being proposed as income restricted is a significant benefit. If you remember, this Board of County Commissioners provided over $3 million of money for affordable -- from our surtax fundage for Ekos on Collier, and that was 162 units of 100 percent affordable. This -- this proposal is significantly higher than that proposal. Both of those proposals were in the Coastal High Hazard Area, and because of that both of those proposals do have to mitigate. The applicant has -- has indicated they are willing to provide for the cots that are

requested from EMS as well as the portable generator to provide for the -- to provide for the expansion of the sheltering facilities within the county.

That -- in addition to the improvements upon Auto Ranch Road, one of the things staff was wondering as part of the Planning Commission presentations, what was the value? What's the estimated value of those improvements? And I think there was significant consideration that's going to be required for that, as well as the bus stop, as well as the contributions to EMS.

Those reasons, with the site planning, are all the reasons why staff arrived upon this recommendation of approval. But staff would be insistent -- if there was a recommendation of approval, we think that the setbacks that are provided for within the current display has to be incorporated with into the PUD. It's not explicitly incorporated within the PUD. And because of that and because of that separation, that's one of the reasons why staff was able to sign off in support of the program.

And with that, any questions you would like for myself, Ms. Scott, or Ms. Cook, or any other staff.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chairman.

Yeah, Mr. Bosi, I just -- real quick. I just want to kind of touch on some things. The way the language is written right now, from what I understand from Mr. Yovanovich's presentation, and you just reinforced it yourself, the particular 49 plus/minus acre section that right now basically has been used as farmland, agricultural, and it's clear-cut, it's not part of the vegetated area of Section 29, but you said that it could be used for several different things the way that it's written right now, like boat storage. And I'm just kind of, like, spit balling. Could they do, like, dry boat storage, like put buildings? Because it says you could go up to 35 feet.

MR. BOSI: Yes. It's --

COMMISSIONER KOWAL: They can do, like, dry storage, like almost storage buildings up to 35 feet for boats? And what would the setback be according to what the language is now?

MR. BOSI: It's kind of tough because there's no real road system there, but the most prohibitive setback is 50 feet for rear and front, so -- and it's 30 feet on the side. So it would either be 30 feet or 50 feet from the property line that that would have to be set back.

COMMISSIONER KOWAL: You could have a building as big as a storage boat facility building, as big as 35 feet high within 30 to 50 feet of residential property as the way it's written right now?

MR. BOSI: From the -- from the property line of their development envelope, it would have to be set back, yes, 50 feet.

COMMISSIONER KOWAL: Okay. And could the developer, the owner, could he go in there and put, let's say, a tennis/pickleball court center that he could build in there for his residents and/or members of his club for Fiddler's Creek?

MR. BOSI: I think that would fit. Recreational facilities is one of the allowed use -- allowed uses within Section 29 currently.

COMMISSIONER KOWAL: And would they have -- of course, they'd have the right-of-way to get back there, and Auto Ranch Road would more than likely be the way?

MR. BOSI: Well, that would be -- that would be the way that Transportation would direct them.

COMMISSIONER KOWAL: So that's just as of right now, if we did nothing, the developer -- the owner of the property still has these rights to do these things as it is right now?

MR. BOSI: Yes, vested -- vested by the PUD.

COMMISSIONER KOWAL: Thank you.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Mr. Bosi, the buffer height

that you -- the buffer that you talked about north and also to the west, what would be the required height that the county would -- if we approved this, would mandate?

MR. BOSI: I believe the trees only have to come in at 8 feet, and I believe it's 25 feet on center with a hedge that's planted at 3 feet that grows to 6 feet.

COMMISSIONER LoCASTRO: Okay. We got a lot of concern about Auto Ranch Road, and I think that we've talked about that, you know, quite a bit. A lot of concern from people talking about Marsh Drive. And just the short of it, is that a -- is Marsh Drive a concern? What would the county's recommendation be? Does it need to be enhanced? Would the increased traffic be above and beyond what we expect?

You know, a lot of Marsh Drive complaints came in kind of late, at least to me, and all of a sudden it was, oh, my gosh, you know, Marsh Drive -- or to Ms. Scott. What's the short version of our concern? Impact? Is that just somebody grabbing at straws trying to, you know, stop a project or slow a project, or do we have a real concern about Marsh Drive being impacted?

MS. SCOTT: That is an internal between the CDD and the HOA.

COMMISSIONER LoCASTRO: So it's a private road, as we discussed. I'm trying to get a little bit of this on the record.

MS. SCOTT: So from a traffic impact standpoint, we're looking at where that traffic is hitting the major county roadway network. So Fiddler's Creek development is one of our older communities within the county. It's a vested development. So when they're vested, we already have the trips for that -- those 6,000 units already accounted for within our transportation concurrency network, so where those trips are hitting U.S. 41 or Collier Boulevard.

So the internal private roadways, that is a private matter between

the community development district and the associated homeowners associations within the --

COMMISSIONER McDANIEL: So if they felt there was some sort of significant impact, they would have to address that with their citizens as we've discussed?

MS. SCOTT: Correct.

COMMISSIONER LoCASTRO: Okay. And then this might be for later, but just stew on this. So I appreciate all the details, all the specifics going through the maps and everything. But my question for you probably at the end of this is, why didn't the Planning Commission after three days agree with you, or why did they think what you presented was incorrect and they recommended something almost totally different than what our entire county staff is recommending?

So maybe that's not the answer for now. I have a feeling you're going to be back at the podium. But that's a big question, you know, for me. Three days' worth of testimony, most of it from Mr. Bosi going through all of this here, yet, you know, our Planning Commission after three days said, sorry -- you know, now they did agree to quite a bit, so I will preface that, that you said in the beginning. But, you know, the part that is really the biggest moving part that we have to decide here -- obviously, you've outlined how you don't -- you know, you don't feel it's a major impact. And all those bullets that they considered, I think you have a rebuttal to every single one.

But I would say hold that answer because I think we're also going to get a lot from the opposite side. But, you know, before any vote happens, that's really a big concern on my mind. If the Collier County Planning Commission isn't a dry run and it's a major preliminary step, why did they unanimously disagree with every single thing when it came to Section 29 that our educated, informed

county staff presented to them? I need that answer before I vote on this, so -- and I think you're the person to give it.

I'm sure Mr. Yovanovich is going to have an answer, because he's the applicant. I want to hear it from county staff. But I think right -- not now, or Commissioner Hall will kill me, because it's -- I think it's a long answer, but that would be something, I think, for you all to chew on.

CHAIRMAN HALL: It's something that all of us is wondering.

Commissioner McDaniel.

COMMISSIONER McDANIEL: Have you got an answer for him or --

MR. YOVANOVICH: I was going to ask him one question before the break.

COMMISSIONER McDANIEL: Okay. Help me a little bit with the density, Mike. This is -- this is a Rural Fringe Mixed-Use piece of property that's already been delineated as neutral. Help me -- help me get to the density request that's been -- that you're recommending approval on here from a -- go ahead.

MR. BOSI: Sure. As a whole, the current allocation within Fiddler's, about 1.52. This would take the overall PUD to 1.71, but that's spread over close to 4,000 units. As a -- as a net, it's 15 units an acre.

The most comparable that would be in close proximity, the receiving area, the blue area that was within the Rural Fringe Mixed-Use District, it's just right across the street from this development. If they did affordable housing, they would be eligible for 11.2. So basically, it's about 3.8 units above what they could do within the receiving areas when they have a project that contains affordable housing.

That was -- that was part of our evaluation. And the net density at 15 -- at 15 units an acre most certainly is much higher than what

the -- the Boyne South PUD is allocated. And we felt that because their access point is on Auto Ranch Road and that has no interaction with the -- with the Boyne South PUD -- and additionally, the proposed setbacks of being over 350 and 500 feet set back, we felt that that density would be ameliorated by that distance, and that traffic impact associated with this would not be experienced by the existing residential development to the north because there's no interaction within -- within the roadway system that accesses this apartment complex and that individual development.

COMMISSIONER McDANIEL: Okay. Being designated as neutral, what's allowed?

MR. BOSI: It's -- right now it's traditionally what your ag would allow for, and that's one to five units with residential development; any of your agricultural activities.

COMMISSIONER McDANIEL: And because this is in the Rural Fringe Mixed-Use District, are there any requisites of TDRs in this calculation to allow them to get to this density?

MR. BOSI: There's no -- there's been no consideration for TDRs, as this is a project that predated the Rural Fringe Mixed-Use District.

COMMISSIONER McDANIEL: Okay. That was the rationale -- that was the rationale behind not having TDRs, okay. That was one of my first notes from back in the beginning when Rich was talking, so -- all right. Thank you.

CHAIRMAN HALL: Any other questions? Go ahead.

COMMISSIONER SAUNDERS: Oh, no.

CHAIRMAN HALL: Okay. All right. This is a good time to break for lunch.

MR. YOVANOVICH: Can I ask the one question before the break?

CHAIRMAN HALL: Sure.

MR. YOVANOVICH: Actually maybe two, and it kind of goes to -- I think to what Commissioner LoCastro was asking you.

Would you agree that one of the first questions asked by the Chairman of the Planning Commission is, are you recommending approval of this solely because you're providing -- we're providing affordable housing; do you remember that question?

MR. BOSI: Yes.

MR. YOVANOVICH: Are you recommending approval of this project solely because we're providing affordable housing?

MR. BOSI: And that's one of the responses I wish I would have elaborated on instead of just a simple affirmative. It's one of the reasons. It's one of the reasons I just listed. It's one of the public benefits that we've identified. But not only the public -- not the additional public benefit of the bus stop, of the additional -- of the affordable housing, of the significant improvements upon Auto Ranch Road, but also the -- but also the fact that the site design has taken into great consideration the adjoining properties to the north and set themselves back.

Five hundred and thirty-one feet is a significant setback. That's a football field and a half away from your existing residential development. That type of distance will ameliorate the heights that are proposing, and with the additional buffering, we think can most certainly find compatibility within that built environment.

But it's not the -- affordable housing's not the only reason why. I think it's the most significant of the public benefits that's provided for. The drive time that was provided by their submittal showed a tremendous number of employers within that 10-mile -- within that 10-mile area that would -- that would be a prime location for the workforce and our essential services personnel to locate.

CHAIRMAN HALL: All right. Let's break for lunch. Let's come back at 1:30, and we'll begin with the public speaking.

(A luncheon recess was had from 12:41 p.m. to 1:30 p.m.)

MS. PATTERSON: Chair, you have a live mic.

CHAIRMAN HALL: All right. We are to the point now where we can start listening to the public comment. Is there somebody that's going to speak for --

MR. MILLER: Mr. Chair, I have three people submitted slips saying they represent an organization. The first one is Mr. Oldehoff, who is an attorney, representing the group, who has two experts; the other is Christine Koren, who represents an HOA or possibly two, I can't remember. One HOA. And then Brad Cornell, who represents, I think -- is it Audubon of Western Everglades, Brad? Yes. So would you -- and then we have 28 individual speakers.

CHAIRMAN HALL: Okay. I'm going to hold Brad to three minutes because we -- that's not actually a part of -- a party to the deal.

MR. MILLER: Yes, sir.

CHAIRMAN HALL: But we'll be glad to hear what you have to say.

MR. MILLER: Would you like to start, then, with these representatives?

CHAIRMAN HALL: Yes.

MR. MILLER: Okay. Gary Oldehoff. I'm sorry, I'm having trouble reading the handwriting, sir. Is it Oldchoff?

MR. OLDEHOFF: Oldehoff.

MR. MILLER: Oldehoff. I'm sorry, sir. Okay. And he has two experts that will be testifying with him, Dan Trescott and Max Forges.

MR. OLDEHOFF: I believe they'll speak to you after I've finished.

MR. MILLER: I believe they're supposed to be a part of the 15 minutes, but that's -- is that correct, the experts?

CHAIRMAN HALL: Yes, including the experts is 15 minutes.
MR. MILLER: Okay, sir.
MR. OLDEHOFF: We're ready whenever you are.
MR. MILLER: Do you have a PowerPoint, sir?
MR. OLDEHOFF: No.
MR. MILLER: Okay, thank you.
MR. OLDEHOFF: Mr. Chairman, members of the Commission, my name is Gary Oldehoff, and I represent a large group of people that have a very, very keen interest in this application.

Let me give you just a moment of my background. I've been a land-use law expert since 1990. I'm an expert in the Florida comprehensive planning law, I'm an expert in land use, I'm an expert in Comprehensive Plan writing. I've written Comprehensive Plans; I've done it all over the state.

And so I take a look at this, and I want to try to put this in the proper context, because it seems to be a little upside down. The first item on your agenda is a Comprehensive Plan amendment. That -- that has to be addressed first. If you do not approve the Comprehensive Plan amendment, you do not approve the PUD amendments associated with Section 29, because they are inconsistent with the Comprehensive Plan. The law is very clear on that. Now, you can take up a motion to deny that request because it's inconsistent with the plan, but that's how the law goes.

Now, something you haven't heard anything about so far is the law. The law is in the Comprehensive Plan Act. It's in the statutes that provide for how you create and form and modify and amend a Comprehensive Plan. That statute is in Chapter 163 of the Florida Statutes, and you haven't heard anything at all about what the law says you have to do with regard to a Comprehensive Plan amendment.

I had written a memorandum because I -- to the County Attorney because of that omission. You only have a memo in your packet that

deals with a rezoning. You don't have anything there that deals with the law of Comprehensive Plan amendments.

A Comprehensive Plan amendment has to start from the baseline that the Comprehensive Plan that is in existence that someone is seeking to amend is lawfully established in light of all the data that is available with regard to Comprehensive Planning and writing Comprehensive Plans. If someone wants you to amend a Comprehensive Plan, they have to demonstrate to you that this plan is out of sync with the data and with the analysis of the data, and it has to be changed.

If it's with regard to a specific property, it has to follow the requirements of the Comprehensive Planning law, the statute. It also has to maintain absolute internal consistency with all of the other elements of the plan. It has to be connected.

I heard somebody say during the Planning Commission discussions that there was something about a balancing of plan policies. That's illegal. That's clear. The statute couldn't be clearer. Section 163.3177(2), Subparagraph 2 says, "Coordination of the elements of the Comprehensive Plan shall be a major objective of the plan and the planning process. The elements of the Comprehensive Plan shall be consistent." You can't just pick and choose which ones you want.

Now, when I take a look at this as a County Attorney, as I was -- I sat in that chair, like that one, for 20 years. I'm coming to you, and I'm talking to you, and I'm inviting you to please question me. I'm telling you exactly what I would tell my county commissions and what I have told my county commissions.

I'm going to be perfectly candid with you. This application to change the Comprehensive Plan -- and mind you, what's available for that property is exactly what this developer wanted. It's exactly what he gave in return for entitlements to you as well as to the federal

government, and it's also exactly the uses that he says he wants. So that's your baseline. Your baseline is this is Neutral Land. This is ag land. This is a little tiny piece. This is ag land. It's one per four, and it is not a place where you can put any other units, including affordable housing units. This is not a transfer right. This is intended to be that dense.

So my take on this, in looking at this over the past almost two years, I'm going to really simplify it, and I'm going to be perfectly candid with you. In 35 years, I have never seen an application for a Comprehensive Plan amendment as unbelievable as this one. I've never seen one. This is breathtakingly illegal. This is breathtakingly illegal. It's also incredibly audacious. And what it's really asking you is how low will you go to give this applicant what it wants? How low will you go? What will a commission do for this applicant, to please this applicant?

This applicant has all the development entitlements that it ever asked for. It's used them all. It has never paid the bill. It has not given the county a single conservation easement.

I want to digress for a second. The easement. The problem with this is if you look at the 2018 master plan, the 2018 master plan for this property shows this property in an enlarged area of preserve. They changed the preserve on it. Now, during the hearings, we got this new thing which was, oh, wait a minute, it turns out that we left this land out of the masterpiece. It suddenly reappeared.

Look at the 2018 master plan. Compare it to the one that you're getting to make the modification with. But, anyway -- so there we are. Now, when we look at this, we are looking at this from the standpoint of affordable housing. Affordable housing, let's look at the affordable housing that we're talking about here. The affordable housing is between $84,000 and $110,000 -- 104,000. So if you make $80,000, based on the rent amount, you can live here. If you

make more than $104,000, you can't live here. A majority of your people that need workforce housing don't fall into that upper-crust category of this 80,000 to 104,000.

Look, if you make this amendment -- and I'm absolutely confident on this -- you will violate the federal law; you'll violate the Endangered Species Act; you will violate several sections, at least four sections of the state statutes; you'll violate the -- you'll violate the conservation easement that's on this property pursuant to a federal permit. You will -- and that's final action by the way. You have that in your materials. That's final action.

So when you heard a staff member who's not a lawyer tell you that the staff cannot consider that, number one, you absolutely have to consider that in connection with the Comprehensive Plan amendment. Absolutely clear. It only applies to development orders. It would only apply in the context of a rezoning, but that statute says, if the agency has said, "This is final," that's it. That's it. We're not going to reopen this. We're not going to amend it. It's done.

A question that was raised about, well, what about the value of this land? There is no dispute. That's undisputed. This land is panther land. This land is blue bonneted bat land. And how do we know that? Because Mr. Hall in his own expert reports that he gave to the Fish and Wildlife Service says it. And in the Fish and Wildlife Service analysis that they did for this permit, they said it, too. They said, "It's there."

Now, what did they say in their final letter where they said, no, we're done? They said, "We are not going to give back or take back that conservation easement." They said, the -- this is January 31st of this year. "The value to Florida panthers alone is especially significant as indicated by panther telemetry data showing the area is used by panthers" -- and this is about this specific land -- "is used by panthers and provides an important travel corridor. Because the 57

requested acres to be released are situated near the center of the full 606.8 acres designated for protection, the habitat fragmentation effect is larger than just 57 acres. Developing 57 acres in the center of this protected area severely compromises the entire area as a corridor and habitat for panthers. One of the most significant threats to Florida panthers is habitat loss and fragmentation."

It goes on -- it's in your materials, and I take it that you've read these, because you've said that you've gone to painstaking detail to go through all these things. I don't want to get off my point.

You have to be able to support an amendment to the Comprehensive Plan which is a change from the established constitution for the county. You have to be able to show that it's supported by data and analysis of the data.

There is no data. You have heard no data at all that would support this Comprehensive Plan amendment on this particular property. None. There's zero data. You have to have that data to show that you're required to make this change. You also are completely abandoning it. You're completely violating it.

I'm looking here, it could be a dozen -- a dozen established policies in your Future Land Use Plan. The same with regard to the number of policies in your coastal management plan. This land is not urban or coastal residential fringe. This is not urban coastal fringe. This is rural neutral. It does not provide for -- and as a matter of fact, they want you to put that language into that element solely and specifically with regard to this property. It doesn't fly without it.

It violates a host of your plan policies. It is incompatible. It is not internally consistent with the plan.

Public benefit. Public benefit. You know, when I listened to, over all these days, the comments and the justifications that are being made by this applicant, and now with staff with its impassioned plea, it does seem to me -- it does seem to me that it's really, really, really

mumbo-jumbo. It's smoke and mirrors. It doesn't add up.

Why -- when asked why do we have to make this Comprehensive Plan amendment, why is it necessary, the response that we got from -- and this is in your -- you know, in the Planning Commission record, is it's necessary because we have to do this to amend the -- to amend the PUD, to amend the PUD. That's not data. That's not analysis.

Auto Ranch Road, that's going to be a wonderful benefit to the people of who? This isn't a public benefit. That benefits nobody except for this applicant, nobody. Auto Ranch Road doesn't want this. They don't want a levy down the middle of their neighborhood. They don't want to do this.

Four thousand average daily trips. That means this project is going to put 4,000 cars back and forth on that road every single day. When you look at peak hour, peak season, that's an hour in the p.m., it's a 60-minute period during that period, and that's where you're getting those numbers. It's not a matter of safety. It's quality of life. This is a rural neighborhood. You're going to destroy it completely. Public benefit? It doesn't benefit anybody, anybody at all.

An elevated levy, two, $7.8 million. I'm telling you, I'm telling everybody here, I've done this for years. The taxpayers are going to pay for that road either directly or indirectly, I guarantee it. The utility ratepayers are going to pay for that utility line. Directly or indirectly, they are going to pay for it. You are going to be asked to pay for it directly, or it's going to be done indirectly in your budget process and your Capital Improvement Plan process. So that's not a public benefit.

Look, this violates the federal law. Do you really, really, really want to make this Comprehensive Plan amendment and entitle this land that the federal government has said, at the agreement of this applicant, is limited and can't be used, are you going to fight the

federal government over this?

CHAIRMAN HALL: Thank you, Mr. Oldehoff.

MR. OLDEHOFF: You're going to -- you're going to tick off -- in one way or another --

CHAIRMAN HALL: Thank you so much.

MR. OLDEHOFF: -- you're going to tick off all of the residents and all of the taxpayers --

CHAIRMAN HALL: You're done.

MR. OLDEHOFF: -- in the county.

CHAIRMAN HALL: Thank you so much, sir. You're done.

MR. OLDEHOFF: Thank you.

MR. MILLER: Mr. Chair, he did have two experts that obviously didn't get heard in that time. Do you want to give them three minutes as stand-alone speakers? How do you want me to proceed on this, sir?

CHAIRMAN HALL: You know what, the rules are 15 minutes including testimony and expert witnesses, so we'll move forward.

MR. MILLER: Your next speaker --

CHAIRMAN HALL: I do have a question for you.

MR. OLDEHOFF: Oh, please.

CHAIRMAN HALL: Which federal agency are we violating? You mentioned federal this and federal that.

MR. OLDEHOFF: Yeah. The --

CHAIRMAN HALL: Just which one?

MR. OLDEHOFF: The Endangered Species Act.

CHAIRMAN HALL: Which federal agency?

MR. OLDEHOFF: The federal government, the Department of the Interior.

CHAIRMAN HALL: Which federal agency? Either just answer that question, or just say I don't know.

MR. OLDEHOFF: No, I know. It's the Department of the

DRAFT

Interior --

CHAIRMAN HALL: Okay. That's what I needed to know.

MR. OLDEHOFF: -- but it's the federal government.

CHAIRMAN HALL: Thanks. That's what -- I was just curious.

MR. OLDEHOFF: Yeah. You're violating the federal law.

CHAIRMAN HALL: Thank you.

MR. MILLER: Your next speaker representing -- she'll have to tell us which homeowners association -- Christine Koren. I'm sorry, Christine, I didn't get a chance to write it down when you told me. My apologies.

MS. KOREN: Royal Palm Golf Estates.

MR. MILLER: Representing Royal Palm Golf Estates.

MS. KOREN: My original speech was three and a half, four pages long. I've been timing myself for days to get this down to three minutes, so...

CHAIRMAN HALL: You're good. Go right ahead.

MS. KOREN: So bear with me. I thank Gary for that presentation. That was wonderful.

MR. MILLER: You do have 15 minutes. Go slower so the court reporter can get it all down.

MS. KOREN: Okay. This -- I am a director on the board of directors for Royal Palm Golf Estates. I am also the co-chair for the Protect the Preserve committee which was organized two and a half years ago, so we've been -- I've met all the commissioners. And, believe me, I'm glad to have that opportunity to meet all of you. I was absolutely impressed with your credentials and your backgrounds.

But now that I schmoozed a little bit, I just want you-all to know that I viewed this project not on a lot of the areas we've been talking about but on the amount of impact this is going to have to Royal Palm

Golf Estates. And I don't think anybody could be more of a witness than the people living in Royal Palm Golf Estates during Hurricane Ian in 2022. I must say I think I have PS -- yeah.

CHAIRMAN HALL: We know.

MS. KOREN: -- PTSD because of that hurricane.

But the thing is -- and I learned this early on when I was speaking with Stormwater Management and Mr. Orth that I believe has retired now from Collier County, and he said to me, he said, "Chris, I'm going to tell you one thing; if there's ever a threat of a hurricane or storm surge, you pack up and leave. Do you hear me?" He said, "Leave."

And I said, "Why?"

Well, Royal Palm Golf Estates, during its construction, was not required to bring in fill to elevate the homes that were being built. As we all know in Collier County, fill is extremely expensive. So what they did -- what the developer did, he left it up to individual landowners to bring in their own fill. So consequently, Royal Palm Golf Estates sits extremely low, and those of us that live on that east/west spreader canal, which you might have seen on some of the overheads, we lost our backyards totally this year just from regular wet season. Well, I'm not talking hurricanes. I'm just talking our regular season that -- to emphasize how low these homes were built on.

Now, yes, there is new constructions going up. I mean, they look unbelievably high, which is a good thing. It doesn't help my house that was built in 2005.

Anyways, during Hurricane Ian, a bunch of us just watched the preserve because what South Florida Water Management District had told me is that the soils within 29 have rare consistencies to it. It's called a short hydro period wetland. And what the -- what the soils do in 29 is they absorb the stormwater like a sponge, and they hold it,

and it did that during Ian until 8:30 that night it surged.

Now, luckily it was holding most of the water at that time, and then it got to the point it could hold no more. It come rushing across the canal. It came into the swales, out onto Royal Hammock Boulevard. There was a neighbor of mine that called me and says, "Oh, my God. I have fish in my driveway," and the water just surged over.

Now, I feel because of the qualities of that soil, that if this development gets approved, it's going to totally destroy those soils which I -- which I will say again that South Florida Water says is extremely rare and that we need to protect those type of soils in Southwest Florida.

Now, I don't know why I wrote this, because I'm not even paying attention to it. But for me, I'm scared to death to think what they're going to do to the -- to the delicate balance of the preserve. And that's why, you know, I am standing here pleading with you, you know, "Don't take away our protection."

I did further research on that. I found documents within Collier County stating that 29 protects -- it said it protects the development to the north from dangerous storm surge. So going in there and disrupting those could be very bad for us, all of us in the community. Like I said, we're unique. We are very low. We're in a high hazard flood zone now that it's been changed, and we're very unique because no dirt was required to come in when they were doing that development.

Thank you. Does anybody have a question for me?

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Christine, do you have documentation from the Southwest Florida Water Management District talking about the --

MS. KOREN: You know, I do. I don't have it on me. I could

send it to you, though. Yes, I do. I mean, I was learning two and a half years ago.

COMMISSIONER LoCASTRO: I know. That's a pretty bold statement that Southwest Florida Water Management District says Section 29 contains special soil.

MS. KOREN: Yes.

COMMISSIONER LoCASTRO: Yeah. So I mean, we've all done a pretty deep dive. I guess I didn't get the special soil document. And you and I met several times. And I'm not trying to be disrespectful or anything, but like I said at the start, I'm trying to separate rumor from fact. So the special soil violating the interior, Department of Interior, somebody hand me that in writing.

MS. KOREN: It's a short period -- short hydro period wetland. That's how they classified 29.

COMMISSIONER LoCASTRO: And respectfully, if that is such a major part of your rebuttal of this project, wouldn't that be one of the first things that you would have sent to all of us or that, you know --

MS. KOREN: Oh, everybody got these, especially when we met.

COMMISSIONER LoCASTRO: Never saw anything on special soil.

MS. KOREN: No. I said it was a short hydro period wetland.

COMMISSIONER LoCASTRO: Okay.

MS. KOREN: And that's how they classified it. And if you look up the terms with South Florida Water Management, they'll explain it to you.

COMMISSIONER LoCASTRO: No, but I mean, you have something --

MS. KOREN: Yes.

COMMISSIONER LoCASTRO: -- sent to you from them --

MS. KOREN: Yeah, I gave that --

CHAIRMAN HAL REPORTER: Please let him ask the question. I can't write two people at the same time.

MS. KOREN: I'm sorry. Yeah, when we came and visited you, it was in the packets that I submitted. We all submitted different things. Mine was storm surge, because that is personal, a concern to me.

COMMISSIONER LoCASTRO: Okay. But my question is, in that packet there's a letter from the South Florida Water Management District on their letterhead addressed to you talking about the special soil in Section 29?

MS. KOREN: No. It's not on letterhead, no.

COMMISSIONER LoCASTRO: But it's from them? It's signed by them, or it's your comment saying you heard from them? I mean, it's important because these are key points.

MS. KOREN: Yeah, I know. When I was doing my research on it, I have a document with the picture of the preserve, and it says this preserve has these -- the short hydro period wetland. I have it --

COMMISSIONER LoCASTRO: Okay.

MS. KOREN: -- several places. That's why I included it in your packets. And I realize that we dumped a lot of material on the commissioners when we met with you, and I didn't expect everybody to read all that. I didn't even want to read it all. So I know how it could have been missed. That's why I wanted to make this part of my discussion is because of the soils in there. I feel very strongly we need to preserve the preserve for several reasons, but that to me is the most important.

COMMISSIONER LoCASTRO: But you understand that from our --

MS. KOREN: I understand.

COMMISSIONER LoCASTRO: -- standpoint here --

MS. KOREN: Yeah.

COMMISSIONER LoCASTRO: -- citizens laundry listing all their concerns is not as effective as very specific evidence from the Department of the Interior saying we're about to violate law --

MS. KOREN: Oh, I agree.

COMMISSIONER LoCASTRO: -- from the Southwest Florida Water Management District saying Section 29 has special soil. I mean, of course citizens who are against this project are going to say there's 4,000 cars all day long that are going to --

MS. KOREN: Right.

COMMISSIONER LoCASTRO: And you hear -- I'm not disputing that.

MS. KOREN: Well, I couldn't make this up, because I have no idea what a short hydro period wetland is. So I never heard the terms before, but I did talk to Collier County staff back two and a half years ago, and it was explained to me, and that's -- you know, that's all I can say.

COMMISSIONER LoCASTRO: Okay.

MS. KOREN: You know, I understand where you're coming from, too.

COMMISSIONER LoCASTRO: Yes, ma'am. No, I do, too.

MS. KOREN: Thank you.

COMMISSIONER LoCASTRO: Thank you.

MR. MILLER: All right, Mr. Chair, it's time for our individual speakers.

Just a reminder of the process to those here in the room. I'll call two names. Please queue up at both podiums, first speaker followed by the second speaker. And last reminder, there will be a single beep when you have 30 seconds to go.

MR. YOVANOVICH: Mr. Chairman, point of clarification. If any -- if these speakers were represented by either of the two

speakers, are they also allowed to speak? Because I thought the reason these speakers were given extra time is because they were speaking on behalf of the individuals they represent.

MR. MILLER: If it helps, Mr. Chair, I have no way to identify who these individuals are that are being represented because all I got was the note from the attorney saying he represents them.

MR. YOVANOVICH: I mean, all I'm asking you is, if that's -- if that's the case, then if you can ask them were they represented by either of the two speakers, then Troy can answer that question.

MR. MILLER: All right. We'll move forward. Your first speaker is Brad Cornell, and Brad will be followed by Matthew Holliday.

MR. CORNELL: Good afternoon, Commissioners. I'm Brad Cornell, Mr. Chair. It's good to see you all this afternoon. I'm here on behalf of Audubon Western Everglades which has 3,000 members here in Collier County, and Audubon Florida that owns the 13,000-acre Corkscrew Swamp Sanctuary.

I'm here to share that we have reviewed the three petitions before you. We have also attended and testified before the Planning Commission. And based on numerous factors and principles, we strongly oppose the approval of these changes for this project, this proposed project.

Our reasons are summarized in the following points: The proposal is inconsistent with the Collier County Growth Management Plan. Audubon objects to changing the Growth Management Plan's Rural Fringe Mixed-Use District Neutral Lands on Section 29 to add 750 residential units. Audubon Western Everglades helped write the Rural Fringe Mixed-Use District policies and helped defend them in court alongside Collier County in 2003. We hired our own attorney that worked with your attorney, and we were successful in that

defense.

Neutral Lands do have significant environmental value, such as the Corkscrew Island Neighborhood, which is right next to Corkscrew Swamp Sanctuary and is Neutral Lands, and North Belle Meade Section 24 where the Nancy Payton Preserve is is also Neutral Lands. These are highly valuable habitats.

Section 29 is also surrounded on three sides by preserves: Outstanding Florida Waters, Collier-Seminole State Park, and very near the Picayune Strand Everglades restoration project, which is the panther conservation bank for all of Everglades restoration in South Florida.

It's also near Ten Thousand Islands' National Wildlife Refuge and Rookery Bay Reserve. The habitat value of this proposed development site listed as a park in the PUD is fairly high as currently pasture which is a prominent habitat in Primary Panther Zones. The Primary and Secondary Panther Zones, by the way, have not been updated since the Fish and Wildlife Service adopted them in 2008 based on earlier data. The abandonment of row craps -- row crops has made this area much better panther habitat in recent years.

Audubon also objects to the violation of the original 1998 PUD commitments in Section 29. Panthers -- and the objection we have is that eight acres of the forested preserve, the actual preserve in that PUD, are going to be destroyed for a road, and that's a significant loss, especially when you consider this is a panther preserve. And panthers are wide-ranging species. You put a road through, you fragment that habitat. The value is much, much less. That's a big deal.

And finally, I just want to -- I guess I'm not going to say anything else.

CHAIRMAN HALL: Go ahead.

MR. CORNELL: But we do oppose this project. Thank you

very much.

MR. MILLER: Your next speaker is Matthew Holliday. He'll be followed by William Mallas.

MR. HOLLIDAY: Good afternoon, Commissioners. On behalf of NCH, I'm grateful to be here today to talk to you a little bit about what's impacting your healthcare and this community.

I wish I could remember where I found it, but I found an article once upon a time from 1976 bemoaning the lack of affordable housing in Collier County. I know how much you love anecdotes, but that's the best I've got today there.

Consider in your outing that you've been out to lately, restaurants, any services you're going after, finding workforce is challenging. Now imagine that in a hospital. I live up in Lee County, because that's where my bride works, that's where my child goes to school, but I travel this route from Fort Myers to Naples every day. I can tell you the volume of traffic coming into here for people that work is overwhelming. These folks are coming on the roads anyway; they're here.

When they find employment in Lee County, that's where they'll go. You're going to lose services. You're going to lose access to people that keep this county moving forward. And I know it affects the county because I see county vehicles commuting morning and evening back and forth to Lee County. So there are multiple agencies, multiple organizations that are feeling the same effects we are.

I've talked to you in the past. We've done studies on our workforce. We know that about a third or 30 percent of our workforce live in Lee County. That represents about an $88 million economic impact that leaves Collier County every day with our payroll.

We very much are sensitive to the needs of the environment, of

our wildlife. I spend a lot of time in the Everglades just having fun looking for animals myself; however, with 800 residents a day moving to Florida -- that's one estimate -- these folks are going to come somewhere. And if you want to continue to have access to the best of services, the best medical care, you've got to do something about accessible housing for the workforce. Keeping them local, keeping those payroll dollars local. Keeping the interests local is absolutely important to our mission, your school district, your law enforcement, and all the other good people that keep everything moving forward. So I thank you for your time.

MR. MILLER: Your next speaker is William Mallas. He will be followed by Jan Mallas.

MS. MALLAS: We were going to cede our time.

MR. MILLER: Do you want to speak?

MR. MALLAS: No.

MR. MILLER: Your next speaker is Marlene -- oh, my goodness. Is this Church? Lurch?

(No response.)

MR. MILLER: All right. Steven John?

MR. JOHN: I was going to concede my time.

MR. MILLER: Do you want to speak individually, sir?

MR. JOHN: No.

MR. MILLER: Lawrence Peterson.

Mr. Peterson will be followed by Brad Clough. I hope I'm saying that right.

UNIDENTIFIED SPEAKER: Clough. He left.

MR. MILLER: He left. So Karen Clough, I'm --

UNIDENTIFIED SPEAKER: She left.

MR. MILLER: She left as well.

Annette Macaluso.

UNIDENTIFIED SPEAKER: She had to leave.

MR. MILLER: John Robinson. Mr. Robinson, you'll be after this gentleman at the next podium.

Please go ahead, sir.

MR. PETERSON: Thank you. I'm here to deny the Section 29 --

MR. MILLER: Can you start with your name, please, sir. Can you state your name, please.

MR. PETERSON: Oh, Lawrence Peterson.

I'm here to try to deny the Section 29 development. A little bit about my background, my parents were residents of Marco Island since 1970s. My wife and I own property on Marco as well. Therefore, I have firsthand experience with Andrew, Wilma, Irma, and all the others that have impacted us. Now I own property on Royal Palm.

In October, I sent a letter to Commissioner LoCastro, which he answered, and I thank you, Commissioner.

I submitted -- submitted to the Board here for your review. In that letter is a picture of my neighbor's backyard during Hurricane Ian. The flooding approached their house, but I took the photograph to document the damage to my screen. So it didn't show their house, but it was pretty significant.

I would also offer this testimony that the flooding has touched the shoulders of U.S. 41 during their recent -- during the recent hurricanes, especially after all the rain that we had this year.

You're probably aware of the high-tide flooding on San Marco Road, and I'm sure that you're -- your highway people can attest to that.

I found Fiddler's presentation interesting in that they document significant flooding on Auto Ranch. It's unfortunate they did not picture the flooded yards.

My final statement is an opinion, but if -- as an old person, if the

Army Corps of Engineers has not fully figured out how to solve the impact of human develop and Mother Nature on the Everglades and Okeechobee, for example, how does this applicant avoid adding to our flooding problem?

Thank you.

MR. MILLER: Your next speaker is John Robinson, and he will be followed by Mara Robinson.

MS. ROBINSON: I was going to cede my time.

MR. MILLER: Do you want to speak individually, ma'am?

MS. ROBON: No.

MR. MILLER: John will be followed by Lawrence Hanba. You'll be at this podium, sir.

Mr. Robinson.

MR. ROBINSON: John Robinson, Royal Palms Golf Estates resident. Thank you for hearing me today.

The Planning Commission, when they denied this, were completely aware of the separate preserve areas, park, and I'll emphasize again, parkland, adult use. That whole area, for decades, has been designated reserve, preserve, lakes, and park. It has never meant to have multistory buildings at a density of 15 people per acre. That is totally inappropriate use of that area.

It is going to cost millions of dollars to put in a road and a sewer that won't benefit any of the people that currently live there. They couldn't afford to hook up to the water or the sewer. In any case, it potentially is going to make it worse for them because of -- the flooding usually has to go to the low areas. Their homes are probably even lower than ours in the Royal Palm Golf Estates.

As far as the workforce housing, there has to be, and there are, much better locations. I know when we had the last Planning Commission meeting, Mr. Yovanovich was representing another group that was putting in a new neighborhood very appropriately

mixed-use, mixed single-family, multifamily dwellings, and it was in an area that was very appropriate.

This area in Section 29 preserve/reserve, park, and lakes should remain that way. If they want to put in boat storage houses, fine. If they want to put in single-family workforce housing, fine. That would be up to them.

Thank you.

MR. MILLER: Your next speaker is Lawrence Hanba. He'll be followed by John Erario. I hope I'm saying that right.

You have three minutes, sir.

MR. HANBA: Yes. My name is Lawrence Hanba. I'm a resident of Royal Palm Golf Estates. I've been a permanent resident of Collier County for the past 10 years. I'm a retired attorney from Michigan. I was involved in defense trial work for counties, cities, school districts. I was also appointed a special attorney general for the state of Michigan handling complicated litigation.

Gentlemen, we're here simply for one reason: Affordable housing, period. This is why this was -- was not approved by the staff [sic].

Specifically, I'd refer you to the Planning Commission transcript where Commissioner Shea asked Mr. Bosi: "But for affordable housing, would you have recommended this proposal?"

And he gave a one-word answer. Well, actually, it was more than one word. He said, "No, we would not support it," period. He didn't -- now they're trying to candy-coat it. That's not going to work. That's in the transcript. It's in writing.

Now, the reason why they're trying to candy coat it, because that was the throat shot for them on this case, okay.

The other thing is -- of interest is Commissioner Shea is not only on the Planning Commission, he's also on the affordable housing commission. He's an avid advocate for affordable housing when

appropriate. But you know what, he said this isn't appropriate. He's the only nonlawyer on the Planning Commission.

And, you know, he said, I don't -- you've got all this mumbo-jumbo about the land code and all that stuff. All I know is this doesn't make common sense to put a 750-unit apartment complex in an area designated by FEMA as a special flood zone hazard with one way of getting in and out where people that live on Auto Ranch Road got to their homes after Ian in watercraft, and it was over two miles away from this development.

Secondly, you know, in terms of other reasons under the code, while this isn't a recommended application, Commissioner Fryer -- and I gave each of you the transcript -- portions of the transcript from the hearing at the Planning Commission. Commissioner Fryer listed at least 11 reasons why, under the code, this is not an appropriate development for this project.

Secondly, you know, my neighbors over here, as well as your constituents, are very interested in this. You know, it's your job under Subsection F.12 in the code -- the question is whether the proposed change will institute a grant of special privilege to individual owners as contrasted with the public welfare.

As indicated by Gary, the only people that are benefiting from this proposal is the developer. The people that live on Auto Ranch Road don't want it. They don't want all that traffic going by their nice little community. And you're here to represent the community, not just this particular development.

And getting to this -- getting to this developer -- getting to this developer -- let's take a look at this developer, okay. He's promised you guys that this is -- that this particular land was going to be set aside as a preserve in --

CHAIRMAN HALL: Gary, your time's up. Thank you, sir.

MR. MILLER: Your next speaker is John Erario. He will be

followed by Terri May.

Terri, are you here?

MS. MAY: I ceded.

MR. MILLER: Did you want to speak individually?

MS. MAY: No.

MR. MILLER: Thomas W. May.

Sir, you'll be at this podium when Mr. Erario is done.

MR. ERARIO: Chairman Hall and Commissioners, my name is John Erario, and I'd like to start by acknowledging and thanking the Chairman for giving me some extra time up here. I requested about 20 minutes, and he agreed to that.

And I would just point out that the many -- virtually all of the people who ceded their time intended to do so so that I could represent them, and I appreciate the ability to do that.

I have been -- I live on Royal Hammock Boulevard. Again, John Erario. I live on Royal Hammock Boulevard. And my home directly borders the Lake 25 canal directly to the north of Section 29.

The group that I belong to has been involved in this research for two and a half years, and much of the material that you've received has, in one way or another, come out of the research that we've done.

I'll say at the outset, Mr. Yovanovich is a terrific advocate, and he's been doing everything I think he can to make the case that much of the history of this very complicated issue doesn't matter, and what I need to do here is to try and refute that. And it's important that I do so because there are a number of Fiddler's Creek commitments to Collier County that weren't kept, U.S. Army Corps and U.S. Wildlife Service permit conditions that were not complied with over time, and portions of the petitioner's past public testimony at the NIM meetings, at the Planning Commission hearings, and even today, I would suggest are not quite accurate.

So in a few minutes I'll discuss some of that, and that's what I

handed out to you, a number of exhibits that I'll be referring to later.

Since 1998, 26 years of history have produced local ordinances, permits, and numerous contractual agreements regarding the petitioner in Section 29, and that basically begins with Ordinance 98-13, the Fiddler's Creek addition.

Now, we grant that the master plan has been revised a number of times since 1998, and most recently with 18-27 in May of 2018, but it's nonetheless critical, I think, for us to understand what was happening in 1998, because this is when a conservation easement covering all of Section 29 -- and I know that Mr. Yovanovich has said that this is not the case, but that was supposed to cover all of Section 29 was supposed to have been put in place.

So I'd like to please call your attention to Exhibit A, which is Section 8. This actually was up on the viewer earlier. It's Section 8 from the ordinance indicating the parks designation uses, permitted uses and structures, et cetera.

So one of the things that was not talked about when this was put up on the viewer is -- if we look at Section 8.5-1 -- A rather. I know it's hard to read, but it says that the uses set forth in preserve areas as set forth in Section 5 of this PUD will apply to the park areas of Section 29. So what this says, I think, is really important for us to consider. It's saying that when you look at a park designated area in the PUD, you have a -- now a linkage between the allowable uses in a park and a preserve. That's exactly what that writing says, that the uses set forth will apply in the preserve to the parks area.

And why is this important? If we look at Exhibit B, again, it's the 5.5 reserve district conservation easement that's been spoken about numerous times. And what we're trying to say is that it has to be considered that if you link the preserve area uses to the park area use, you also have to link the required conservation requirements of a preserve with the areas in the park, and that was the intent.

Especially when you read the minutes of 1998, that was the intent, that the entirety of Section 29 would be placed under conservation easement, because at the time it had purposes that were completely unrelated to the conservation efforts that were made by the Fish and Wildlife Service. At that time it was because -- providing a buffer, urban sprawl, all those things that you're well aware of. In 2018, it was a totally different reason for looking for conservation on that land.

So, again, I would ask you to consider the importance of that very important 8.5-A, which talks about linking the uses in a preserve to the park areas of the Fiddler's Creek PUD.

So the applicant has talked about -- to a great extent about platting and that the land wasn't supposed to be -- didn't need to be platted -- the land did not have to, excuse me, go under a conservation easement until it was platted, and I think we have a big problem with that reasoning.

Section 5.5 requires the conservation easement to Collier County on all park and preserve land, and when would that apply? Well, in Ordinance 19 -- 98-13 it was established that no residential construction was permitted on Section 29. That's what the law said in 1998. So it would have been clear at that time that the land would never be platted by definition, because if you can't build on it, you'll never plat it.

So the easement was never filed in 1998, and the reasons cited in a memorandum that Mr. Yovanovich wrote for the planners, and which was even referred to today, is that, you know, to date the lands have not been platted, and so therefore, no conservation easement. But here's the problem. The applicant can't base the reason for not filing the easement in 1998 on conditions that he thought would occur in the future.

So it's a -- it's a requirement that was made in 1998, and it should

have been executed in 1998. So we feel very strongly that those conditions should be satisfied now, that an easement should be placed on the land now. And I would also note, just for your consideration, that if he will not file that easement now -- and this is just a logical thing to consider. Let's agree that as soon as a plat is required, he will go ahead and file the conservation easement which will, in effect, block him from doing the very development on that land that they just platted. So it actually is a total illogical thing to suggest that they want to handle the conservation easement based on platting in that way.

What I -- what I had planned to do -- and I'll really try to make this brief, and I think it's important, is that we've had Tim Hall come up here. We've had opposing counsel come up here. And one of the things that we need to do is discuss what -- and Mr. LoCastro has pointed this out, what is the truth of things? And I want to point out just the record that points out some of the inconsistencies in what we're trying to determine is true and not true.

At the second NIM meeting in September of 2023, among other things, Mr. Hall stated that the reason that the conservation covenants weren't filed with regard to Oyster Harbor and Estancia and the U.S. Army Corps permit, they weren't filed -- and this is a quote, that they were not filed because the development of Section 29 was being contemplated as far back as then, so the coordination with the Fish and Wildlife Service was ongoing through that period.

A similar question at the hearings -- in answer to a similar question, he said, "The easements hadn't been filed because we had been in discussions to change this area, and to my mind, it made no sense to put a conservation easement on the property and then take it off."

If we can look at Exhibit E, Exhibit E is an e-mail I received from Robert Carey. I'm sorry, it was sent from John Policarpo from

the U.S. Army Corps to Robert Carey from the U.S. Fish and Wildlife Service on August 11th of 2022. And that letter states, "As of right now, no one has notified us," meaning the Corps, "about modifying the permit." So when we look at statements being made about the permit not being filed, but, you know, we were coordinating with the Wildlife Service to do so, this, to me, directly refutes that, and I think that it would be worth questioning Mr. Hall to find out why that exists.

Over more than two years of direct communications with the Corps and the Service, as well as a review of thousands of documents we obtained from FOIA and the federal -- from FOIA, from those two agencies. There's absolutely no evidence of any sort on the part of either of those agencies that there was any understanding with the applicant that easements had not been recorded or that discussions were underway to modify the biological opinion.

And in the absence of any information, like an e-mail or a letter, which I'm going to talk about in a few minutes, to the contrary, I leave it to the commissioners to ascertain from Mr. Hall how and why his statements are so incongruous with this evidence.

In the hearings, Mr. Yovanovich stated on a number of occasions that the petitioner is now, in the present, compliant with the federal permit, but let the record show that for four-plus years they were out of compliance until they were caught and cited in October of 2022. It's, therefore, I believe, likely that the conservation covenants that were finally filed in November of '22 would almost certainly not exist today if concerned citizens hadn't taken action to alert the federal agencies that the applicant had not filed for four years.

At the hearings, Mr. Yovanovich suggested that even after coming into compliance with the permit by filing the covenants, the applicant was in continuing negotiations with the federal agencies to modify the terms of the biological opinion, and these are verbatim.

And, again, I bring these to the microphone because we're trying to seek truth. These are verbatim quotes taken from the 4/18 hearing that were spoken. "We've been totally aboveboard with every agency. We're not hiding the ball from anybody. We weren't saying, 'Screw you. Catch us.' And maybe, most importantly, we are still talking through this process."

But if we look at Exhibit G, please, Exhibit G is an e-mail from Robert Carey to me where I had questioned him about these alleged conversations and communications that were going on. And Robert Carey, in part, writes, if you look at the highlighted area, "I have no indication that the Service had an agreement with the permitholder to delay meeting the terms and conditions of the BO."

So I would ask, Commissioners, if you think it will be useful to you to hear from the petitioner's counsel an explanation for these diametrically opposed inconsistencies between his version of the facts and this evidence.

Mr. Yovanovich is suggesting that there are -- still ongoing talks to modify the opinion to lift the mitigation requirements deserve even further scrutiny given a letter from Mr. Carey to Mr. Hall, if you look at Exhibit H. This letter was written on January 31st, and Mr. Oldehoff referred to it. The letter states in part, "Modifying" -- and this is about the finality of the condition of the conservation status of Section 29 and this notion that it can still somehow be changed by speaking to the federal agencies.

"Modifying the project and the biological opinion in the context of the original Corps permit is not possible. For the above reasons, we are unable to process the modification you have requested." It's impossible to misconstrue the finality of this letter.

Additionally, it's notable that this letter also refutes a number of representations we've heard today and in the past from Mr. Hall and other of the counsel's agents, that Section 29 is no longer

environmentally important. Well, in this very letter, Mr. Carey -- Mr. Carey refutes this contention on the part of the applicant, and his expert analysis is highlighted in blue. And you'll see that it talks about specifically -- and we heard a little bit about this before, of the value because of panthers and other species that are protected that are on this land.

It's also noteworthy that in 2018, Mr. Hall represented this land as being absolutely environmentally important enough to be traded as mitigation for the loss of panther habitat in the Oyster Harbor neighborhood, and a few years later suddenly that has completely changed.

Jim Banks came up here before. It was very interesting to hear what he had to say. And just quickly, I'll say that when he spoke at the Planning Commission, he talked about the fact that there had been six crashes in six years. If we look at Exhibit J, there was an exchange between Mr. Oldehoff and Mr. Banks. Much of that was, you know, brought out by Mr. Banks today.

But the report concluded six crashes in six years. His expert findings of how future traffic conditions at this intersection will change if the project is approved was a comparison of six crashes in six years on a one-way rural road dead-end as compared to an acknowledged 4,883 daily trips. This is in his -- these trips -- and Mr. LoCastro, you brought -- you asked this question before. The documentation is right in here. The trips and the peak counts, it's all there.

Yes, there will be peak hours where there's a few hundred vehicles per hour. It actually amounts to one per minute, if you look at it. But over the course of each and every day, 4,883 vehicle trips.

So I think that comparing six crashes in six years on a dead-end road to that amount of traffic is a strategy that speaks for itself.

I'll also say that in the diagrams that were put up about the

right-turn lane onto Auto Ranch Road from 41 and the left-turn lane off of 41, there was no mention -- and if you know Auto Ranch Road, you'll know what I'm talking about -- there's no mention -- when someone comes north on Auto Ranch Road to make a northbound turn onto 41, that is going to be the most dangerous traffic event that can possibly happen there. You're making a left turn on a road that has a 60-mile-per-hour speed limit, and I heard nothing from Mr. Banks about how that traffic condition would be handled.

I propose today that the bar's not been met to amend the GMP in favor of what the applicant is asking for. The public benefit is clearly limited to 225 apartments and Auto Ranch Road. That is the totality of the public benefit.

The major benefit goes to the 525 luxury apartment owners who will live in this complex, and that leads us to question, do the goals of balanced land-use decisions all go by the wayside on -- when we look at this protected parcel and the small amount of public benefit that we actually have when we look at it carefully?

These proceedings in my mind, represent a unique opportunity to set precedent, and Mr. LoCastro mentioned that before. When instances such as these come up, which I would say have a higher bar than many do where the land in question has been legally designated as conservation land not once but twice, and affordable -- the affordable housing workforce umbrella becomes a tool and a means to obtain, you know, a large, probably mostly incompatible use.

So on behalf of the entire community, I ask that consideration to allow or deny this change be undertaken with the greatest care, which I know you will do.

I had a couple other quick notes here. Mr. Bosi wrote -- said before that the diagram that he put up stated that federal and state permits would be reviewed at site development, and we understand that to be the case. But I would ask you this: It's peripherally

related to what you're going to decide today.

There was a Site Development Plan in 2018 when Oyster Harbor was constructed. If what Mr. Bosi said is going to happen, if this project moves forward, I have to ask -- and I have asked. I have not gotten an answer -- why didn't it happen in 2018? Because in 2018 at site development, if they had been asked to produce their federal permit, which they had just obtained at the time, and they had put it on the table, it would have said you cannot start construction unless this easement is filed within 90 days of putting a shovel in the ground. That did not happen. That's a failure on the part, I believe, of both this county and applicant, and I've never heard an explanation for why if site development is the time and place when a federal permit is put on the table, why wasn't it done there? Because if it had been, we wouldn't be talking about a conservation easement that had lapsed for four and a half years and was only satisfied in 2022.

In the future, developers who own land that is protected under easement or covenant will come into this room and cite the decision you make today. Will it be a decision that weakens the protection of preserve land and reinforces the use of affordable housing and the funding of capital improvements as a tool to do an end run around Growth Management Plan guidelines, or will it be a decision that upholds the county's commitment defined by the objectives and policies of the Growth Management Plan and the Land Development Code?

Mr. Chairman and Commissioners, your vote to reject this defective rezoning petition may well become a modern landmark decision and one that will set precedent for years to come, an affirmation that this body -- from this body that changes to the Growth Management Plan must always live in harmony with the Land Development Code and Florida Statute even when affordable housing is the driving force.

In one of the closing comments at the Planning Commission hearings on July 18th, Chairman Fryer said, "Right now what's before us, I think, is affordable housing above all else, and I reject that."

I believe that was -- there was much wisdom in those words, and I ask that you cast a vote of no to the rezoning portion of the petition before you today.

Thank you very much.

MR. MILLER: Your next speaker is Thomas May. I'm sorry. Hold on, Thomas.

CHAIRMAN HALL: Commissioner LoCastro's --

COMMISSIONER LoCASTRO: John, I have a couple questions for you.

MR. ERARIO: Yes.

COMMISSIONER LoCASTRO: First off, I hope the multitude of citizens who aren't here but who have sent us notes and whatnot realize how much work you and Christine, especially, have done on this project, you know, from day one. Every meeting in my office was extremely professional, and sometimes when we're dealing with these really difficult decisions, the citizen side isn't always that informed and professional.

If you're looking for a strike to the throat, as was said up here, you gave us a lot of exhibits. Do you have Exhibit H1 in front of you right now? Do you have a copy of it?

MR. ERARIO: Yes, I do. I can look at it with you.

COMMISSIONER LoCASTRO: Okay. So it's the letter from the Interior dated January 31st, 2024?

MR. ERARIO: Yes.

COMMISSIONER LoCASTRO: I want you to rip it out of your packet there, and I want you to hand it to Mr. Yovanovich.

MR. ERARIO: It's the first thing I've ever given Mr. Yovanovich.

COMMISSIONER LoCASTRO: Well, you're about -- see, you guys are cooperating now. We're working together.

There's some really significant things in this letter that concern me and always have. And so I'll -- I mean, I'll leave it to Mr. Yovanovich. You know, he'll have a chance to speak. But, you know, we're here to hear facts and rebuttals and maybe agree to disagree on certain things.

But, you know, there's a letter here from the Department of Interior with some very specific language in it that you read. You paraphrased a couple times a little bit. Like, read the exact words, you know. You kind of jumped over a couple things. But the tone is in here. I mean, I said before, if you've got a special letter talking about special soil, we need five copies of it.

MR. ERARIO: Oh --

COMMISSIONER LoCASTRO: So -- but this letter right here is significant. And so I'm sure the applicant -- I've never addressed this with the landowner, the applicant, the legal representation, so we'll get to that. But I just -- I'm sure this is something that Mr. Yovanovich has, and if he already has it, he can hand it back to you.

But at some point, in the closing or in the rebuttal, certainly this right here is, to me, in your packet -- we all read the dialogue. We know what happened at the Planning Commission. We know the difference between 4,000 trips and 200 trips, depending on how you do the algorithm. This right here is a thing I need some answers to, and maybe my colleagues would feel the same.

MR. ERARIO: If I could just say that I provided in here, but I didn't get to mention it, you had asked about panther trajectory, and there's a map in there --

COMMISSIONER LoCASTRO: Yeah, I saw it.

MR. ERARIO: -- which is actually part of this letter that talks about that.

DRAFT

COMMISSIONER LoCASTRO: Okay. We'll get to it. It's not a question -- or an answer we need now, but this is the main thing I pulled. And there again, thank you again for all the time you've put into this.

MR. ERARIO: Thank you.

MR. MILLER: Your next speaker is Thomas May. Mr. May will be followed by Kristina Park.

MR. MAY: Hi. My name is Thomas May. Thank you for taking a few minutes to listen to me. I am not an expert. I was raised a middle-class person in Wisconsin, and I did work at McDonald's.

Okay. Some questions I have that maybe could be answered after I'm done, 49.9, 49.9. I don't know why that number's there, 49.9 acres.

My home is 240 feet from the canal on the north side of Section 29. Ian brought the water within 30 feet of my house, halfway up my driveway. Scared the poop out of me. I was there. I was there for all the hurricanes.

Section 29, I looked at that a little bit, and I'm going, what the heck is that? Well, it's only valued at $16,099,000. Nice piece of property for 320 acres.

So I looked at -- there was a transition in 2011 where they sold it to FCC Preserve, LLC. Signed by one, two, three, four, five Delaware limited liability corporations. So it was not a local ownership even though the new ownership is Fiddler's Creek Ways.

When I look at this, I try and look at common sense. I don't want the land shoveled or anything because that's my protection against surge, as well as all the rest of these people that live on that canal, and I'm on the other side of the road.

What I look at is why are they doing this? Well, let's go back. They had permission to build 6,000 houses. They built 6,000. What

are we going to do now? Let's build some more on Section 29, some more houses. Can't do that. That's in a preserve. Well, if it's in a preserve, let's just change that so it's not a preserve anymore.

If you gave it to us as a preserve the way it was given to us in 2006, 11/18, whenever it was, that's the way it stays.

Thank you.

COMMISSIONER LoCASTRO: Sir, can I ask you a question?

MR. MAY: Yes.

COMMISSIONER LoCASTRO: I'll defer to the Chairman.

CHAIRMAN HALL: Go ahead.

COMMISSIONER LoCASTRO: Sir, so like you said, you're not an expert, and maybe none of us are perfect experts, but we're trying to digest all of this.

COMMISSIONER McDANIEL: Burt is.

COMMISSIONER LoCASTRO: Burt is. Yeah, that's right.

But your contention is the photos of your house, if we saw them during Ian, right, the way the water came up, that if they built 750 units 300-plus feet away from your house, or maybe it's more give or take or whatever, with improved drainage, improvement to Auto Ranch Road, and all the other things that would be required per code, I mean, you wouldn't be building -- and I'm asking this hypothetically, okay. Just hear me out, because I want to hear what -- because I think you're representing a lot of people that live on your same street that are all showing us pictures of what happened during Ian. I can tell you pictures of my house were way worse than yours.

But the reality of what I'm trying to get at is if anybody builds anything now, the level of requirement per code and permit is way more -- much higher expectation than your current house, my current house, and all of Fiddler's Creek.

But your contention is, if they built something to code now with all of the requirements and drainage and all the improvements to Auto

Ranch Road and Ian hit exactly the way it hit when it did, your house would be flooded more because of this new construction than if we build nothing on that -- on that parcel. I mean, is that -- that's basically your contention?

MR. MAY: No. If you take a 55-gallon drum, fill it with water to the top, and put a bowling ball in it, water's coming out.

COMMISSIONER LoCASTRO: Right.

MR. MAY: You disturb one cubic yard of that soil, that water's got nowhere to absorb.

COMMISSIONER LoCASTRO: Okay. So here's my reply to that --

MR. MAY: No matter what engineering can do, they're not going to fix the problem of surge.

COMMISSIONER LoCASTRO: So if they have to put a 55-gallon drum in the middle of a plot of land, before they drop the bowling ball, do you realize that the permit requirements for construction would be so intense that drainage around that 55-gallon drum and a whole bunch of other things would catch that water and not just throw it in your living room?

MR. MILLER: It's proven by Collier County that even our highway ditches retain water for more than three months after rainy season.

COMMISSIONER LoCASTRO: I know, and that's -- and that's not a --

MR. MAY: Agreed?

COMMISSIONER LoCASTRO: No, look up here, sir, because you're talking to me. So when there's water in swales for a month, two months, one of the things that I say a lot of times to my citizens is the reason the swale's there is because if it wasn't, that water would be in your living room.

And so when swales catch water, even if it sticks around a little

bit longer -- and as you know, we have king tides and we have all types of other things. It doesn't always drain in an hour.

But the fact that those swales are there or that significant permit and requirements now that we have on the books now would require significant drains around that 55-gallon drum, like, do you realize that the water from anything built on Section 29, if it was built, wouldn't just run off into your living room, that there would be such intense requirements, even above and beyond what the applicant's looking to do to Auto Ranch Road; that they would have to have the significant drainage and all of those things to catch that water? It wouldn't just roll right into your living room.

I mean, I don't want to oversimplify this, but they don't just build something on a hill, and then when it rains, they're dry and you're flooded. It doesn't work that way.

MR. MAY: There are some issues with the Southwest Water Management on a blockage on a drain that was permitted back in 2006, something like that. And that's being addressed and investigated now because we were told that it had to be maintained. I agree to disagree with the rest of your statement.

COMMISSIONER LoCASTRO: Okay.

MR. MAY: Auto Ranch Road, those people are going to be dramatically affected.

COMMISSIONER LoCASTRO: Okay, sir.

MR. MILLER: Your next speaker is Kristina Park. She'll be followed by Susan Caglioti. Susan, are you here?

(Raises hand.)

MR. MILLER: Go ahead, Kristina.

MS. PARK: Good afternoon, Commissioners. For the record, I'm Kristina Park, the President and CEO of the Greater Naples Chamber.

We represent approximately 1,000 members and over 50,000

employees across Collier County. We work every day to strength the local economy and to build our business community.

Housing affordability is the foremost concern for our members with employers through the entire community consistently telling us that the cost of housing is the number one most significant barrier to recruiting and retaining a qualified workforce. This concern was also reflected in the Collier County Community Foundation's most recent community needs assessment which found that 65 percent of respondents said that controlling housing costs should be a priority moving forward, making it the most selection -- selected option in this survey.

We saw similar results in a recent survey of our membership with 70 percent of our members stating that housing is the number-one concern facing continuity of business.

I'm encouraged by Fiddler's Creek desire to incorporate workforce housing into their plans, and I believe it demonstrates an understanding of our community's need as we consistently struggle with the workforce housing challenges. Their proposal would add an additional 225 below-market-rate units to our inventory ensuring that our essential workers, like you heard from Mr. Holliday earlier, can live in the community in which they serve.

I encourage you to approve this project today, and I am confident that once approved this will have a meaningful impact on the workforce housing needs for our community.

Thank you for your dedication to Collier County.

MR. MILLER: Your next speaker is Susan Caglioti. She will be followed by Robert Hartsell.

Is Mr. Hartsell present? Yes, sir. You'll be at that podium.

Ms. Caglioti, go ahead, please.

MS. CAGLIOTI: Hello, Commissioners.

MR. MILLER: Can you get the mic right in front of your mouth

there. Thank you, ma'am.

MS. CAGLIOTI: I'd like to help out a little bit with that hydro period wetland. I believe that is referred to in Tim Hall's environmental assessment on Section 29, if that's a help at all.

Okay. I had to pare down this, so I'm going to maybe have to jump all over the place. But Fiddler's Creek added Fiddler's Creek addition to their existing PUD in '98 coming to the county at a February 24th, '98, hearing wanting to amend their PUD stating, if allowed to add the 1,385 acres, they would do something important and needed in return for the county.

Dr. Nelson, who was one of their experts -- and this is taken directly word for word -- says, "Roughly the bottom third of -- of Section 19 and all of Section 29 will be preserved, thereby providing a buffer between urban development and the state-owned wetlands beyond."

Commissioner Hancock then says, "There's a common statement that urban boundary will someday get moved and that it's a shifting line, which is not what our plans indicate. But as you point out, in this case right now, there's no clear line in the sand in this particular area. With this amendment, if it's approved today, that line becomes far more clear to anyone in the future than it is currently."

Dr. Nelson says, "That's correct."

Commissioner Hancock says, "I think that's something that we need to consider because not to approve it would probably allow the waters to be muddied more so then clarifying them, and I think for our public clarifying that line is key to them. So I thank you for that."

The above was agreed upon unanimously, and both sides were under oath.

An argument we've heard is that this is an old agreement, and it's no longer relevant; however, this goes against the very reason the amendment was agreed upon in the first place, that being that growth

will happen in the future, and when it does, this agreement will serve as a hard line in the sand providing clear guidance to future lawmakers, as it surely should today here and now.

I'll skip to the end. What the petitioner is asking for was given away repeatedly over the years by this applicant. Please note -- please vote to uphold the clear directives that are memorialized in the '98 ordinance and minutes. Please honor the importance of this land environmentally, ecologically, to this county and to the State of Florida and, importantly, please deny, as there is so much at stake here to be lost for a project that lacks true affordable -- affordable housing benefits to the ones who truly need it. Please vote no to rezoning of Section 29. Thanks.

MR. MILLER: Your next speaker is Robert Hartsell.

COMMISSIONER LoCASTRO: I've got a question for you.

MR. MILLER: Hold on, ma'am.

COMMISSIONER LoCASTRO: So why do you think it provides no affordable housing benefit when it's 225 units? Why do you say that?

MS. CAGLIOTI: Well, because of where it is. Now, if it's for doctor -- or rather, nurses and teachers and whatnot, I don't know just how many of those jobs are immediately in that area. And with more and more affordable housing coming in, I mean, just how much is needed for that? So that's my question. And then they brought up, well, there's Walmart and there's this and there's that. Well, you know, you can't have it both ways.

COMMISSIONER LoCASTRO: What are the both ways?

MS. CAGLIOTI: Well, if it's going to be for people that make 80- to over 100-, 104-, and then you're going to say somebody at Walmart is going to be making that or working at Lowe's is going to be making that, that doesn't really jive. I don't know how many hours they'd have to work to get to that point. So I just think -- and I know

you don't like this, but I just think it would be better served elsewhere. It's --

COMMISSIONER LoCASTRO: Of course.

MS. CAGLIOTI: It's not on a main -- no, it's not on a main arterial road.

COMMISSIONER LoCASTRO: Let me ask you this, ma'am. Mr. Holliday who works at NCH drives from Lee County, and I guarantee you a large percentage of medical staff at NCH and the hospital that I ran, Physicians Regional where I was a COO for multiple years, came from a lot further than just a few miles down the road.

So I'm trying to separate rumor from fact. And when, you know, the main points being told to us are, "Wow, affordable housing's great, but it's the wrong area" -- first of all, this is my district. I can tell you it's a long walk to a whole bunch of places for 225 apartment renters if this project was put there.

So, you know, that particular argument, hey, H-1 here, I can't wait to talk about this one, you know, the flooding and those things. But I will tell you, we've put affordable housing, a unanimous vote here with the support of the Affordable Housing Advisory Committee, further away from commercial and employee-impacted areas than this. So, I mean, I'm just -- you know, I'm trying to decipher this one and make sure that people don't just come to the podium and talk about special soil but can't give me a letter.

And where's Christine? Christine, no disrespect. But I'm telling you, what did we talk about in my office? If you're going to bring forward the main arguments --

And same goes for Mr. Yovanovich. You don't think we're about to beat him up so that we can get down to brass tacks here? And same for Mr. Bosi. So make sure you don't leave either, Rich [sic].

But I will tell you, this area is in the middle of a place that does -- I will tell you, if we cut a ribbon on this place tomorrow, there will be -- there will be a line out the door. There would be a long wait list. Because we've done it on Santa Barbara, we've done it on Davis and some other places.

So I'm not saying what you say doesn't have merit, but, you know, when you make a statement that says, "Affordable housing in this area really has, like, you know, no basis, it should go somewhere else," that's not a strong argument with me.

MS. CAGLIOTI: It was in the context of --

COMMISSIONER LoCASTRO: Okay.

MS. CAGLIOTI: -- gains and losses --

COMMISSIONER LoCASTRO: Okay.

MS. CAGLIOTI: -- risks and benefits.

COMMISSIONER LoCASTRO: Okay. And that's what I wanted to give you, is I wanted you to clarify. You know, okay.

MS. CAGLIOTI: Yeah, to give up so much. I mean -- and you talked about accountability earlier. Accountability matters here. This land has been bargained away several times differently, but it keeps getting used, and now here we have affordable housing. Oh, yeah, let's do this. This is the time to do it. We'll get in there.

COMMISSIONER LoCASTRO: Okay.

MS. CAGLIOTI: Forget about every other agreement that we ever made. That was my point.

COMMISSIONER LoCASTRO: Okay. No. And that's I -- I wanted to give you the extra time to clarify your position.

MS. CAGLIOTI: Yeah, it was risk and benefit.

COMMISSIONER LoCASTRO: I got it. Thank you, ma'am.

MR. MILLER: After Mr. Hartsell is Amy Ernst.

Ms. Ernst, are you here? Okay. You'll be at this podium.

Mr. Hartsell, three minutes.

MR. HARTSELL: Robert Hartsell with Hartsell, Ozery, P.A. I represent Alicia Russo, Shannon Russo, David Russo, Kailey Russo, and Anthony Russo, who are all residents within the Fiddler Creek development.

We are -- my client is more concerned with the master plan revisions that are happening within the Fiddler Creek development, especially the ones that are being incorporated into this larger development plan.

First I want to go -- my planning is sort of checking off the boxes. You heard it today. You go through it, you look at the code, you look at the Comprehensive Plan, and you check off the boxes; do they comply?

First thing you want to do whenever you have a hearing like this, was there proper notice, right? Was there proper notice to the residents? Well, in the package I delivered to you, there's two pictures where it shows that the sign was down for 80 percent of the time that notice was required before the first hearing, which is in violation of the code, so you can't check that box.

Second box, was there written findings by the Planning Commission? And, Commissioner LoCastro, you hit it on the head. I want to know what they said. They were required under your code to provide written findings to this board. They didn't. You don't see it. We saw the minutes. We haven't found the written findings, and they're extensive findings. Those findings are -- are in 10.02.13.B.5, A through H, and they're extensive findings that they're supposed to give you of why they made that decision. And everybody keeps talking about "I don't know how they made that decision," and everybody's giving their different interpretation. They're required to give it to you. They didn't. You need to remand it back for them to give you that decision.

The next one -- there were substantial revisions in this from the

2018 master plan to the 2024 master plan. I list them. There's six. They were casually addressed that, "Oh, yeah, we put one roadway in." These are substantial because they change the traffic circulation within that development.

And when you want to talk about property rights and people's ability to use and enjoy their property to the best that they can, when you change a promise like the 2018 master plan and you sell that property to somebody and then you change the traffic circulation so everybody has to dump out into a failing road, that's a problem.

The last -- I want to talk about that external traffic of dumping the traffic from Estancia out through the development onto Collier Boulevard. Collier Boulevard's a failing road. Now, all that traffic comes out into a failing road that's over 125 percent at peak.

I ask that you deny this application. I ask that you remand it and send it back down to the Planning Commission to give you written findings so that we can at least know what we're all talking about and what they said and what their expert opinion was. Thank you.

MR. MILLER: Your next speaker is Amy Ernst. She'll be followed by Robert Weissmein.

Robert, are you present?

MR. WEISSMEIN: I am, but I going to cede my time.

MR. MILLER: Ashley -- is this Jones?

MS. JONES: Yes. You will be at the next podium after Ms. Ernst.

Amy, you have three minutes.

MS. ERNST: Hi. I'm Amy Ernst. I live on Royal Palm -- I live in Royal Palm on Royal Hammock Boulevard. I'm also a member of the HOA board.

I would just like to say that we do have crocodiles. They have come across from Section 29. I have pictures of them. We have panthers. I have seen bats. I can't tell if they're bonneted bats, but I

see them flying around. They don't stop and talk to me, so I don't know.

And I do know that landowners do have rights to their lands; however, Fiddler's Creek, this Section 29 wasn't land that they had purchased because they wanted to purchase it. They purchased it, they got it as panther habitat remediation land so that they could build their Estancia -- or Oyster Harbor land. So it's really a shell game -- now it's a shell game. Now it's like, "We have it. Let's do something with it," and that's what they want to do.

We're also talking about the affordable housing that they have back there, they're going to put back there, and if we just talk about the 225 apartments that they're going to put in there, they're 225 apartments. We have 342 lots/homes in our development, which if the flooding does get worse -- all the hurricanes are getting stronger. Ian, my house was surrounded by the water. I'm not directly on the canal. I'm across the street from it. But you're going to be potentially putting the homes in our development and the golf course in risk of flooding, and I know you understand that there's other things that they can do to remediate it. But these are apartments. They're not taxpayers, and I know all that kind of stuff.

And some of the older homes, I believe, are going to be put at risk for that -- the hydro period land. You put concrete on that, you're going to stop the water flow underground when that storm surge comes in. It's not the water going back out. I'm concerned more about the storm surge coming in with the high tides and everything else. And when you have concrete and asphalt and all that, that's not going to absorb any water. And I know you're going to say they're going to put palms in or whatever. I don't know.

You know, the Board, years ago in, I think it was, '98 promised the residents of Collier County that this land in 29 was going to be set aside as a buffer. It was promised to the residents of Collier County.

I don't care if it was 100 years ago or 300 years ago, it was a promise that was made, and I know it's something that I think that the Board should also keep in mind that promises should be kept that are important to the residents of the thing.

And I request that you vote this down. Thank you.

CHAIRMAN HALL: Mr. Miller, before Ms. Jones speaks, let's take a 10-minute court reporter break. We're due for that. Give Terri a break, and then we'll be back here at 10 after three.

(A brief recess was had from 2:58 p.m. to 3:10 p.m.)

MS. PATTERSON: Chair, you have a live mic.

CHAIRMAN HALL: All right. Ms. Jones, we're ready for you, yes.

CHAIRMAN HAL REPORTER: Do you swear or affirm the testimony you will give will be the truth, the whole truth, and nothing but the truth?

MS. JONES: Yes.

Good afternoon, Commissioners. My name is Ashley Jones. I'm the vice president of Community Impact at United Way of Collier in the Keys.

I'm writing to -- I'm here today to express my support for the proposed multifamily residential community with Fiddler's Creek Section 29. This development addresses a critical and pressing need in Collier County, the availability of affordable housing for our hardworking residents.

The asset-limited, income-constrained employed report for Collier County illustrates the severe challenges faced by 42 percent of households. Thirty-two percent of those households are ALICE households, and 10 percent are in poverty. These families struggle to afford the essential housing, childcare, food, and healthcare despite being employed in vital community roles.

The project's commitment to reserve 225 units for workforce

housing targeting those earning 80 to 100 percent of the area median income directly addresses these challenges. Financial hardship is growing, and it's a concern.

Collier County's median household income is 80,815, but with the rising cost of living leaves many behind. The household survival budget for a family of four was estimated at $82,164 annually, equating to an hourly wage of $41.08; however, as of 2024, the figure has risen significantly, approaching 110,000 per year, which equates to an hourly wage of $52.28, assuming a standard 40-hour workweek over 52 weeks.

Single-parent households, particularly those led by women, are disproportionately affected with 72 percent of the female households below the ALICE threshold. This proposed project provides a vital solution by offering housing that aligns with these economic realities.

Workforce impacts: Housing of 40 [sic] deeply impacts the county's ability to retain essential workers. For example, as we've heard today, public safety and healthcare workers, first responders and medical technicians often commute long distances due to prohibitive housing costs. In our education sector, educators essential to the future of our community face similar challenges. Addressing their housing needs supports recruitment and retention.

The Fiddler's Creek project not only promises to reduce these barriers but also aligns with Collier County's broader goals of workforce stability and economic growth.

The developer's commitment to preserving two-thirds of the property as nature reserves ensures that the project respects and enhances the county's environmental priorities. This balance between growth and preservation reflects thoughtful planning as a set -- sets a standard for future developments.

Support of the ALICE population by providing stable affordable housing also strengthens the local economy by allowing workers to

live closer to their jobs, reducing commute times and costs. As a non-profit professional and a long-term resident of Southwest Florida, I have seen firsthand the struggle ALICE households face.

Thank you for considering this essential step towards addressing the housing crisis in Collier County. Thank you very much.

MR. MILLER: Your next speaker is Robert Ferriby, and he will be followed by Lynn Copper.

MS. COPPEL: Coppel.

MR. MILLER: Coppo?

MR. FERRIBY: Good afternoon. My name's Robert Ferriby, and I live in Royal Palm Golf Estates also. I also am a retired lawyer, having done it for roughly 40 years.

That being said, I would like to talk a little bit about the Planning Commission hearing. It seems like we've kind of glossed over some of that. That was three days, multiple witnesses, examination and cross-examination not only by counsel for both sides, but also by the commissioners themselves. Interestingly enough, at the conclusion of that, all of the commissioners suggested that this was not a good place to put this project.

They all acknowledged that affordable housing was important; however, they made it clear in their analysis, and they stated right in their findings, that, in fact, that desire for affordable housing did not rise to the level that it should override all of these multiple reasons that they came up with that this project should not go forward.

It's important to note that they were very concerned and spent some time on the fact that Fiddler's Creek did not do what they were obligated to do in 1997 and 1998 when they undertook this project. They did not file the conservation easement and, in fact, they have never filed one.

Instead, they filed some conservation covenants that they drafted and that benefited them and that had provisions that allowed for

potential modification. This was not what was originally contemplated, and I think the Planning Commission was understandably bothered by that fact.

I believe, Commissioner LoCastro, you indicated you had concerns about this January 24th letter from the Department of Interior, specifically Fish and Wildlife. We can go farther back than that. In October of 1922 [sic], the Commission said, "The Service finds that revising the biological opinion is not in the best interest of the conservation of the Florida panther. Not only was the previously [sic] upon mitigation never completed, but additional development on this property would cause habitat for panthers in this area to become more fragmented and create additional adverse impacts."

And they go on to indicate that there is no reason they should change their opinion, and they say in '24, they will not change their opinion.

For these reasons and the almost 20 reasons cited by the planning commissioners after three days of testimony, I ask you -- putting affordable housing aside, because we can see this is not the appropriate area for it --

CHAIRMAN HALL: Thank you, sir.

MR. FERRIBY: -- it comes down to profit versus us wanting to protect our home.

CHAIRMAN HALL: Thank you so much, sir.

MR. MILLER: Your next speaker is Lynn Compo [sic]. She'll be followed by Tom -- is this Slaughter? I think. Lynn?

So Lynn must not be here.

Tom will be followed by Todd Lyon. Is Mr. Lyon here? Yes. Okay. You'll be at this speaker.

Tom, you have three minutes, sir.

MR. SLAUGHTER: Thank you. For the record, my name is Tom Slaughter. I'm a land-use planner by trade, spent 20 years in

local government. Since leaving government, I've also served on a community redevelopment agency as well as, in Lee County, Affordable Housing Advisory Committee.

In reviewing this petition, I'm going to keep my comments strictly just to the affordable housing and especially locational factors.

One of the interesting things I found is the absent [sic] of direct policies in answer to questions of how this is in support, and I have gone through the material and through your own Growth Management Plan, your Land Development Code. And then, lastly, we depend on state and federal guidelines as well for affordable housing.

And what I'm speaking to is really four big criteria: Proximity to employment centers and economic hubs; accessibility to our essential services; transit and mobility, which I'll get to in a second; and then, of course, avoidance, remoteness in those high-hazard areas, which we have learned this to be in.

In going through this development, we've identified that 2-mile trip. And for the average person walking, you can probably do that in about 40 minutes or so at about a 3-mile pace. That's not reasonable for somebody to actually walk to work. So I think we acknowledge you're pretty much stuck to driving. And I say driving because even on the roadway, which the engineer showed, there's no bike path. There's no mobility plan that goes beyond, "We're going to improve the road because we have to."

So when you look at this, that's the problem not only from a standpoint of mine reviewing this, but in your own Growth Management Policy 1.1.1, which talks about prioritizing workforce housing. We acknowledge we want it, but in this case it talks about near jobs, reducing commuting time. And one of the things we've heard is is, no, this won't address that at all.

So then we look into other areas, essential services, and these get into our financial resources, grocery stores, schools, those things that

we use beyond just going to and from work.

And again, it suffers from that same problem, because when I pulled up a Google map and started counting off how far away Publix was at about three miles, where these other things extend further out, I think it identifies that this is very much on a fringe of a development.

And again, I point you back just not only to my own review, but to Policy 1.3.4, which requires affordable housing near these essential services. And I think it's clear that this really hasn't been met at this point. It's close. You want it.

In the remaining 30 seconds, you also have the transit integration. Policy 5.1 speaks to that specifically, and that roadway by itself -- the internal roadway for the development is a much better roadway cross-profile section than the one you've got. So I think you really should take a step back and go, if you want to put in more development along that road, improve that road beyond simply those minimum.

And with that, I'm out of time, and I thank you very much for your consideration. Thank you.

MR. MILLER: Your next speaker is Todd Lyon. He will be followed on Zoom by our first Zoom speaker, Gary Kluckhuhn.

MR. LYON: Good afternoon, Commissioners. Thank you for letting me come and speak. I'm going to speak from two different lenses today. My first lens is as the vice president of human resources at NCH. We are the second largest employer in Collier County after the Collier County Public Schools, and the issue of employment and recruitment retention is very real among our workforce.

We are consistently losing staffing. We are at a turnover rate of 19.1 percent despite market increase aftermarket increase for all of our positions.

Our nurses, our technicians, our lab personnel work 12-hour

shifts with often more than a one-hour commute each way to work. This is not safe for our workforce here in Collier County. They also don't feel the assimilation into our community, thus creating a higher turnover rate. I'd like to mention, too, that the proximity to Marco Island and our southeast immediate-care locations and rehab facilities as well as imaging and our southeast location in Naples are very proximal to this development, and we would actually -- it would serve us well because these are some of our hardest areas to recruit into.

Our urgent care on Marco Island is actually one of the few medical facilities that was open during -- 24/7 during the hurricanes, and they are our hardest areas to staff.

I would like to say, too, there seems to be a misconception that these staff can't have cars. These folks do make, you know, $90,000 a year. They have a car. They don't need to be able to walk to a grocery store. They can't afford the cost of housing here in the community. I just wanted to make a point of that.

Also, residents, people are worried about who could really afford this. I will tell you that based on our pay scales, a nurse with about 10 years of experience would hit this income bracket. Or perhaps a new nurse grad, who is maybe engaged to or married to a first responder, this would be in their -- their income.

The other hat I'd like to wear today is as a member of the Affordable Housing Advisory Committee with the county here in Collier County. I've been on AHAC for about two years. Growing up, and then also in my work, I've always been taught that when there's a problem, you don't just bring the problem back, you bring a solution.

One of the things I always think about is if not here, then where? We are not going to solve this problem of affordable housing with one or two major projects. This project of 225 units is a great project.

I would like to say that there was a project recently approved in

North Naples two hours from my home, Ascend Naples. It hit a lot of controversy, a lot of opposition. I'm elated that that was approved. I want my neighbors to be our first responders, our teachers, our nurses. That, to me, is what it's all about to be here in Naples.

I encourage that everyone here take their energy and passion in wanting to protect their homes instead to perhaps help us find locations and areas for affordable workforce housing in Collier County. But today I would like to say that because we have people here who are bringing a solution to a problem we have, I vote to support this product.

Thank you.

MR. MILLER: Your next speaker is on Zoom, Gary Kluckhuhn, and he will be followed also on Zoom by Glenn Russo.

Gary, you're being prompted to unmute yourself, if you'll do so at this time. Gary, I see you online. You have three minutes, sir.

MR. KLUCKHUHN: Hello.

MR. MILLER: Hello. Go ahead, sir.

MR. KLUCKHUHN: Yes. I want to thank you guys for all the work you do and the time you spend in those meetings. I'm sorry I can't be there today. But I attended some of the workshops and, in fact, was denied the opportunity to speak on it at the last meeting because that had been shut down.

But I realize that the decision may have already been made; however, I believe that the comment about the other side that I keep hearing stated -- and I wonder -- I thought the commissioners, all of you -- and I know a couple of you pretty well and know that you represent We the People, and I don't think we're the other side.

But nonetheless, I go back over 45 years here, and I remember some of you might -- in fact, even 10 years ago we had a subtropical climate. The elimination of River of Grass has been way, way before that, but we still had all of that short hydro period wetland acreage

along 951 and on the south side of 41, the upper part of Rookery Bay. And I live in Rookery Bay.

And even as recent as five years ago, I could swim in the water here with impunity, and we had a bit of a subtropical climate. It rained most every day back when I first moved here, 2 o'clock. That's because we had the River of Grass, about a million acres of wetland. No, it wasn't short hydro period wetland. It was a swamp.

But we converted that into sugar cane desert, and our Growth Management Plan has left us with a lot of ground that's going to be covered up, eliminating what we did have was enough dirt, enough land to absorb the rain and then give it back to us in the form of cloud cover, and we had cloud cover mitigating the excessive heat.

Now the sun hitting the 13 UV rate, the gulf is getting hot, and right here on the -- on the Rookery Bay, it -- that 100-degree gulf temperature gives me a tidal surge. My house is not habitable because it floods in these storms.

But the solution, as the gentleman just before me mentioned, I don't want to just sit here and say why I think it's important that we draw a line in the sand and keep the wetland.

And it's not real complicated. This short hydro period wetlands, a term I just heard today, makes a lot of sense. But we've limited all of it, so now we get the sun extremely intense, 105 degrees it feels like frequently in June, July, and August. If we were to look at an alternative, such as developing some of the already developed land using air rights above these massive asphalt parking lots and go high-rise density like you did here on Isle of Capri for luxury housing, let our affordable housing be in high-rise and high-density above the existing already developed parking lots of which there are many right at Manatee Road and 951. There's --

CHAIRMAN HALL: Thank you, sir. Thank you, sir. Your time's up.

MR. KLUCKHUHN: Thank you.

MR. MILLER: Your next speaker and final speaker on this matter is Glenn Russo.

Mr. Russo, you're being prompted -- I see you've done that. Mr. Russo, you have three minutes.

MR. RUSSO: Oh, Glenn Russo, 3 -- 3169 Naples -- 3169 Capistrano Lane, Naples.

My attorney, Mr. Hartsell, gave you a pamphlet. I direct you to Exhibit P5, which is the 2018 master plan which shows all of the traffic from south Estancia going out to Tamiami, and Exhibit P6, which is the 2024 master plan which redirects all that traffic out to Collier.

I would direct your attention to Exhibit P18, which is an excerpt from the -- according to the Annual Update and Inventory Report Capital Improvements Element schedule update on public facilities 2023. This is a Collier County traffic -- a study that's done on a regular basis.

On Page 13, Item 95.1, 95.2, and -- 95.1 and 95.2 shows that Tamiami, where this southern Estancia was all going to dump the traffic, was operating at a Level B, 45.1 percent, and a Level C is 65.9 percent.

Now, all of that is being redirected through Marsh Cove to the other side of the development, which is Collier. Now, that's -- the roads of Collier are listed as 31.6 in the Exhibit P18, 36.2 and 37. They're operating at 99 -- 99 percent capacity, which is an E; 122 percent capacity, which is an F, it's failing; and 90.5 percent capacity, which is Level D.

So basically, this master plan takes traffic that was intended to go out towards Tamiami. And we all know Tamiami in this section, down by where this entrance is for Estancia, there's virtually no traffic down there. We know that Collier Boulevard between the Walmart

all the way down to Fiddler's is heavily trafficked. The entire island of Marco empties all the workers when everybody leaves there.

So you're taking traffic from an underutilized road, and you're redirecting it to a road that one section is operating at 122 percent of its capacity, it's failing today, and yet you're redirecting traffic from an unutilized [sic] road, Tamiami, where this exit is -- where this entry point is, and redirecting it to the other way.

So there is ways that this developer can get the traffic from the southern part of Estancia. It's a big parcel of land if you, again, look at the P5, which is the 2018 plan, and compare it to the P6 Exhibit, 2024. It's a very large substantial piece of property. You can get it out --

CHAIRMAN HALL: Thank you, sir.

MR. RUSSO: -- give access, but you can give access to --

CHAIRMAN HALL: Thank you, sir. Your time is up.

MR. RUSSO: -- the underutilized road --

CHAIRMAN HALL: Thank you.

MR. MILLER: That is all of our public speakers for this item, sir.

CHAIRMAN HALL: Before Mr. Yovanovich has a chance to debate, I want to talk to our colleagues just for a second. The whole thing about the federal permits and the federal environmental stuff and the conversations between the Fish and Wildlife and Mr. Hall, all that doesn't apply with us. That's all environmental stuff. That has nothing to do with our rezone decision that we have to make.

And regarding the easement, if -- big if. You know how I think about -- how I feel about "if." If the easement was recorded, we could still change it. It has nothing to do with if it was -- if it was recorded, it was in perpetuity, it's solid stone, you'd never change it in our life. The fact is we could change it if we wanted to.

So those two issues, you know, don't really play with the

decision that we have to make. I just want to keep that in mind.

Commissioner Saunders.

COMMISSIONER SAUNDERS: I just had a couple questions for the County Attorney, similar to some of the discussion you just had, Chairman Hall.

Mr. Klatzkow, you've been pretty quiet during this hearing. There has some discussion concerning whether we're violating federal laws, whether we're violating state laws, and whether we're violating our own ordinances in the potential approval of this project if it is approved. And I need some analysis on your part as to whether there was any merit to those arguments. The last thing I want to do is violate our own ordinances or our Comprehensive Plan or any of those other statutes that may apply here.

So I need some analysis as to whether or not we are doing some things potentially that would be in violation of those regulations.

MR. KLATZKOW: If I thought that, this item wouldn't come before the Board until that was cleared up. I don't find any merit to the allegations that were made.

COMMISSIONER SAUNDERS: So in terms of the procedural issues that were raised?

MR. KLATZKOW: Yes.

COMMISSIONER SAUNDERS: What about the issue of the sign being down? There's some pictures in our packets with the sign being down. Anything in regards to that?

MR. KLATZKOW: No, that's not material. I mean, this was duly advertised multiple times, and clearly the residents of the area were aware of it.

COMMISSIONER SAUNDERS: All right. Thank you, Mr. Chairman.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: I'm going to ask Ms. Scott to

make a comment if she'd like. But a couple things I had on here -- and I'll piggyback on what Commissioner Saunders said.

You know, when I hear, "Are we violating a, quote, a 'boatload of different policies, we are violating a host of federal policies and federal law,'" that was going to be a question I had for our County Attorney because, obviously, nobody wants to do that, but I didn't feel like we were, and you've answered that.

Ms. Scott, when you hear somebody make the claim and they say that, you know, Collier Boulevard is already operating past max capacity and it's a failing road, wow, I don't know that I've heard that before, especially with all the construction we have there and a lot of the improvement. What -- what's your comments to that? You're our traffic expert, for sure.

MS. SCOTT: So according to our Annual Update and Inventory Report, the 2023 adopted version, Collier Boulevard from Walmart driveway to U.S. 41 and really Manatee Road is severely congested. The State has another improvement to State Road 951 that they're trying to work into their -- and I say 951. Collier Boulevard, because some people don't talk the same lingo.

The State is working to get that final widening of Collier Boulevard that they have planned, which is Tower to Manatee, into their work program. It's currently not programmed, has been in and out of their work program.

What I would say is this is a vested development. Their traffic impacts are already figured into part of contributing to that exceedence of the -- of the capacity on the roadway. It's a state roadway, and we would work with the State to address any congestion issues that they have.

But from a state statute standpoint, it's a vested development, and we cannot turn it down. They're not increasing their density on that for the 6,000 units. They're not -- they're not changing their

traffic -- what traffic can come out of that development. They are remaining with 6,000 units for the Fiddler's Creek proper, if you will.

COMMISSIONER LoCASTRO: Okay. Thank you.

CHAIRMAN HALL: Mr. Yovanovich.

MR. YOVANOVICH: There was a lot that was said. A lot of -- I was thinking about -- and I try not to talk about people's names, but I have to in this case. Mr. Ossorio's [sic] 20 minutes of comments about how bad a people we are. It's essentially what he said.

This is -- it's Part 2 to what happened in the Planning Commission. He said the very same things at the Planning Commission, and he keeps repeating these inaccurate comments. I'm going to just highlight a couple of them because we'd be here all night if I were to put in all of the e-mails and all of the conversations back and forth with the State, including the letter from the person -- from Mr. Carey that you want to talk about.

But let's start with the first thing about how he somehow says, "Because there was a reference in 8.5.A to a provision," which he didn't put up on the podium -- put up on the visualizer, which I'm going to -- and he gave you his legal analysis that somehow allowing, in Section 29, uses that are allowed in a preserve somehow made this a preserve. That's not what it says. It says, "If we want to put those uses in Section 29, we are welcome to do that." And then we could do all these other uses, B, C, D, E, F G -- G's not yet. G, we're adding -- but H, which including what we showed you, active recreational activities, launching and storage facilities.

So he's giving you an inaccurate legal conclusion that somehow in 1998 this entire Section 29 was going to be a preserve.

I showed you the master plan. The master plan says what the master plan says. And Mr. Bosi and everybody else on your staff agrees that Section 29, as far as the PUD goes, was never entirely

going to be a conservation preserve area. That's the facts.

If we were to place a conservation easement on Section 29, according to the PUD, it would be the portions that are identified on the master plan I showed you that's a preserve. It would not be in the area we're talking about today, so I wouldn't be asking you to amend a conservation easement for the county's PUD. Factually incorrect, a misrepresentation, and it's consistent constant misrepresentation by him in a public forum as to what was agreed to and what is in today's PUD.

He then -- I almost feel like I should quote some of Mr. Oldehoff's language and how he basically dressed us all down with phrases like "breathtakingly illegal," "audacious to even ask for it," "How low will you go?"

We spent -- "we" being Tim Hall, who I've known for almost 30 years, the most honorable person or honest person I know when it comes to permitting that I know, and he testified and said, "I had multiple discussions with U.S. Fish and Wildlife, Army Corps of Engineers about Section 29 and modifying the commitment that these 57 acres were going to be part of the -- part of the conservation area."

He starts back in 2020 saying, "We want to remove the 57 acres from" -- let me put this up here. I've highlighted a few areas. He starts in April of 2020 with an e-mail to Robert Tuis (phonetic) with the Army Corps of Engineers notifying him that "the State won't take our lands. What are we supposed to do? How do we modify the permit? And, oh, by the way, I want to remind you, we're trying to take the land out." That's 2020.

He follows up several times in 2020. Finally, Mr. Carey, with the U.S. Fish and Wildlife Service, who wrote the letter says -- oh, he's confirming to everybody they're going to reopen up the biological opinion. Where's the -- we did such a good job of hiding that they were taking this land out, we told everybody. We did not hide

anything from anybody.

It was correct -- why would you write a conservation easement -- as Commissioner Hall pointed out, I could have put a conservation easement on it, and I could have said, "Please let me remove it." They didn't insist upon that. Ultimately, we did what the law says we could do, which was accepted by the Corps. We recorded these covenants, and in the covenants said, "We reserve the right to come back and ask to remove these 57 acres." No hiding. It was accepted by the Corps and U.S. Fish and Wildlife Service.

They say, in 2022, "We're going to reopen and reinitiate consultation."

Shortly after Mr. Carey says they're going to do that, the Corps sends him a letter saying, "We're reinitiating."

We're not hiding the ball. We're having conversations with the Corps and U.S. Fish and Wildlife Service about how do we take the 57 acres out.

Well, the Corps finally says, "You know what, we need to have -- let's record the covenants, record an easement." We did it with the language approved by the Corps saying we can remove the 57 acres if we go through the permitting process to remove the 57 acres.

At no time were we found not in compliance. At no time were we cited for anything. We did everything asked of us, and we followed through asking, "What do you want to do; how do you want to handle removing this 57 acres?"

If you remember, I said to you, oh, by the way, U.S. Fish and Wildlife Service said, "Hey, we're fine." We get an e-mail from Mr. Shindle, who works for Mr. Carey, saying, "For a million-six, we'll take the 57 acres out." That's summarized under that second asterisk right there, for the 57 acres that the PHU value is roughly $90,000.

We were being held hostage, to use some fiery language that others want to use in this room. We were held hostage, and we said, "Not going to happen." We're going to go through the process. The letter -- that's the -- what was the quote? -- the throat-shot letter.

If you remember, I started the presentation by saying we got a letter from U.S. Fish and Wildlife Service saying, "Guess what, we can't change it under the current permit." I underlined the language that he didn't highlight for you. It says finally, "The Corps' permit was the federal action subject to Section 7, consultation under the Endangered Species Act; however, that permit has now expired. There is no ongoing discretion for the purposes of" remaining -- or "reinitiating consultation as articulated in this rule. Therefore, modifying the project in the biological assessment in the context of the original Corps permit is not possible."

COMMISSIONER LoCASTRO: Because it's expired.

MR. YOVANOVICH: Because it's expired. I have to start all over again.

COMMISSIONER LoCASTRO: Yep.

MR. YOVANOVICH: And we've said to you, we will start all over again if the project is approved.

Now, Mr. Carey, I'm sure he was getting beaten up pretty good from people calling him, and he's got his own personal opinions. But, you know, he is subject to the rules and regulations, and when we submit a permit and we submit all of the biological information that follows up, he's going to have to review it, and he's going to have to follow the process. And if the process leads to modifying the permit, the permit will get modified.

This is not final agency action. This is someone telling us, "You're in the wrong process right now, and I'm going to delay and delay and delay and not take any action because you wouldn't pay me the million-six we originally asked for in 2023."

That's where we were, and that's where we are. And we are asking, and we will go ask, hopefully, if we get approved, for a modification to the permit for Estancia to remove this 57 acres and pay whatever mitigation we have to pay related to developing the project in Section 29. There will be additional mitigation for developing the project in Section 29. We will do all of that in accordance with all of the rules and regulations in effect at the time we ask for that.

I'm glad Mr. Klatzkow gave you his legal analysis about all those statements made by opposing counsel. There is data and analysis. We provided you all the data and analysis. There is a shortfall of affordable housing. We all know that. The data and analysis is there. We provided you the data and analysis about -- Tim Hall provided the testimony about what's the environmental attributes of the property that we're seeking to make a change to.

If you approve this, this will be internally consistent; your GMP will be internally consistent.

We provided drainage testimony from an actual engineer who does this for a living. You don't have any engineers up on the other side saying this won't work out. You have people -- and I get it, but they don't understand. They're not engineers. They don't understand how this all works and what the process will be for us to go through the Water Management District process, and if we can't satisfy those requirements, we will not get approved.

COMMISSIONER LoCASTRO: Can I ask you a question, Mr. Yovanovich --

MR. YOVANOVICH: Absolutely.

COMMISSIONER LoCASTRO: -- before you move on to these, like, federal letters?

MR. YOVANOVICH: Yes.

COMMISSIONER LoCASTRO: They matter.

MR. YOVANOVICH: Sure.

COMMISSIONER LoCASTRO: But I wanted to hear it from you, so I'll sort of summarize. What's stated in here -- and I read some of the things that weren't highlighted as well, so that's why I'm -- but I want to hear you bring it out. But the reality is, you will have to go back through all these steps and, in order to move forward, you'll have to get a much different letter than this.

MR. YOVANOVICH: Absolutely.

COMMISSIONER LoCASTRO: If you get a letter very similar to this, then it doesn't matter what we did today. The project never moves forward.

MR. YOVANOVICH: Absolutely, and I said that right from the very beginning. This is the first step in the process. I got -- and it's like every other project. Let's just say we never had a discussion, there's no history related to Section 29 whatsoever, no history, and I were to come to you today, and I asked you to do that, and they were still up here talking about their concerns -- forget any history about this was going to be a preserve or not a preserve.

I still would have to go through the very same process I'm going through on every other project. Get a Water Management District permit, and if there's wetland impacts or endangered species impacts, you deal with the Army Corps of Engineers. This is no different. You don't -- you're early on in process to get the entitlements. We have a lot of work to do before we actually move -- start moving any dirt.

There is no expert testimony in the record contrary to our experts and your expert's testimony with regard to environmental impacts, drainage impacts, transportation impacts. All of that, the experts agree we are not negatively impacting our neighbors, and we are making it better from a water management standpoint because of the improvements to Auto Ranch Road and actually removing the farm

road that is in Section 29 that is acting like a dam. We're making it better for the people who are concerned about the impact of this project.

This is no different than a bunch of other projects that come your way when there's vacant land. The reality is they just don't want to see anything on that land. So they'll just hope we don't build the boat barn, we don't build a racquet club. And don't forget, that's not limited just to the people that live in Fiddler's Creek. That's open -- we can open it and market it to the general public. They're just hoping that just won't happen.

It's no different than, you know, other projects that you've been involved in where I had likewise received a negative recommendation from the Planning Commission. They're hoping it will always stay vacant. It will not always stay vacant, and we're going to go through this process.

We've met with Commissioner LoCastro. When I say "we," my client and I and residents of -- I keep calling it Boyne South. I don't know why I can't get the new name in my head. I've been here so long.

We met to talk about water management issues. I said at that meeting, "Please come talk to me." Nobody's talked to me. Nobody's talked to my client. Nobody -- they've never talked to us about it. There's opportunities for us to help, but I guess they're not interested in those opportunities for us to help.

This is a good project. It's consistent with your -- the revisions we're making are consistent with your policy to encourage affordable housing at the right locations. You've heard from employers about this is the right location.

The last planner who spoke, who's from Lee County, you know, I would have asked him the question, "Is this particular project closer to Physicians Regional on Collier Boulevard or where he lives in Lee

County?" I'm assuming if he -- if he testified truthfully, he'd say this property is closer to Physicians Regional on 951, or Collier Boulevard, as well as to Marco Island. So anybody who's commuting from Lee County, Cape Coral, Lehigh Acres, Bonita Springs are traveling way further to come work here.

You've heard from, you know, the Chamber and Naples Community Hospital about how important it is to have people living in the community where they're working, because they're losing those employees.

You know, Commissioner Kowal has told me stories about the Sheriff's Office and losing recruits and losing deputies because they can't live here. They can't -- you know, they just can't -- they can't afford to live here. This is a crisis. It's a housing crisis, and we're trying to do our part.

We're not -- Mr. Ferrao has been here a long time. He's not a bad person. Because he wants to provide this affordable housing doesn't make him a bad person. And it's not illegal, immoral to change your mind from 1998. Yes, those were the original thoughts. Things have changed.

Your Growth Management Plan is a living, breathing document. It gets amended when it's appropriate. It's appropriate -- our request is appropriate, and we're asking you to vote in favor of all three petitions, the change to the Growth Management Plan, the change to the -- I'm sorry -- the PUD, and the change to the DRI development order.

And last thing, so I don't forget, the road connecting within the project, as staff has pointed out, that ship has already sailed. It's already been approved through the amended -- the different plats approved by the Board of County Commissioners. This is just a housekeeping detail, what we're doing. It's not something that you can say no to, because you've already said yes to it. So all we're

doing -- that's a housekeeping detail with regard to that road connecting.

As you know and Mr. Bosi pointed out, master plans are conceptual. They're not fixed in stone. And I'm sure whatever Mr. Russo handed out probably had a disclaimer on there that says, "All this was conceptual." But if he's got a gripe or he thinks he's got some kind of a lawsuit, then he can file it, and we'll defend against it.

And with that, we're available to answer any questions you may have regarding our request.

CHAIRMAN HALL: Commissioner McDaniel.

MR. YOVANOVICH: Thank you for your time.

COMMISSIONER McDANIEL: I have a couple of things. And first I want to talk about the fragmentation of the habitat between the 57 acres and the road that's going over to -- the connecting road that's going -- the old trail that's through the woods.

MR. YOVANOVICH: You mean the farm road?

COMMISSIONER McDANIEL: Yeah, the farm road that you're going to convert to the -- that will be the access road.

One of the -- while I was reading this actual letter from January of '24, I was talking about -- I was thinking about that fragmentation. How do you feel about fencing that road and extended oversized culvert for ingress and egress for the critters? Just to reduce the fragmentation. This letter here talks specifically about that fragmentation and its detriment to the habitat quality that's, in fact, there.

MR. HALL: And I think that's one of the things, when we do go in for the actual development of this parcel, that that would have to be dredged. You're talking like maybe a wildlife overpass or something like that that would --

COMMISSIONER McDANIEL: Underpass.

MR. HALL: Underpass.

COMMISSIONER McDANIEL: I was thinking of an underpass.

MR. HALL: Underpass, yeah. Sorry. Underpass.

COMMISSIONER McDANIEL: Yes.

MR. HALL: But yeah, I mean, that is -- I think that's definitely within the scope of what's available or scope of what's possible doing that kind of thing, the ground elevations out there related to where the road will need to be. There's some existing -- there's, I believe, two existing old culverts under that road that could be augmented a little bit to support an underpass.

COMMISSIONER McDANIEL: Okay. Because that was just a thought that -- and I don't know if that comes from us or if that comes from the Army Corps.

MR. HALL: That will come -- that kind of thing would come out of the discussions with the wildlife agencies, and then it would either be a permit condition -- it would either be a -- a terms and conditions as part of a BO or an actual permit condition within the state or the federal permit.

COMMISSIONER McDANIEL: With the agencies, not -- but that was a -- that was a thought that I had.

My next question has to do with the Auto Ranch Road improvements. The 60-foot right-of-way that's existent on the pictures that we've seen, is there enough room there -- are we going to have to do any eminent domain or anything to be able to do all that?

MR. YOVANOVICH: Everything -- I'm sorry. Everything you saw fits within the existing 60-foot right-of-way.

COMMISSIONER McDANIEL: Okay. The folks that are living along Auto Ranch that choose to -- and maybe this isn't a question for you. It might be for Dr. George or senior staff or somebody. It's only going -- it's not going to be a mandatory hookup. But if somebody wanted to volunteer to hook up to the water, I think I

heard during the testimony that it's a force main so there's a lift station, and there's other things there with regard to the sewer. But as far as the water goes, if someone couldn't afford to -- wanted to but couldn't afford the 4- or 5-, 10,000, whatever it was, the cost associated with tapping into the public water that's there, do we have capacity at the county level to allow for that to be accomplished and then -- I know we've done it in other subdivisions where we assess a non-ad valorem assessment for that fee. Is that a possibility here?

MS. SCOTT: So, Commissioner, that is certainly our desire is to get these folks on water and on our sewer system, and that's part of the study that we did anyhow.

And so our goal is -- if the Auto Ranch Road is improved, is to go seek those alternative funding sources to be able to buy down those assessments, which is what we've done in some of our partnerships with the City of Naples with our Goodlette-Frank project and other projects that we've done, as well as to go seek those grant opportunities, those legislative appropriations to be able to buy down that assessment.

COMMISSIONER McDANIEL: And after we've done all of those, we can still allow for someone that couldn't necessarily write a check for the spread between the grant monies and the actual expense to have that be attached as a non-ad valorem assessment, and they could still be accomplished?

MS. PATTERSON: Yes, sir. In the West Goodlette project, there were a number of options that were allowed. People could pay it over time; they could pay it all at once; they could pay it at the end if they knew they were going to be selling their house. So we could model a program after that.

COMMISSIONER McDANIEL: Okay. And I'm back to you now, Rich.

Let's talk about the spreader canal. Some folks have called it a

lake that's along the south side. And by the way, it's Boyne South to me, too.

MR. YOVANOVICH: Yeah. I --

COMMISSIONER McDANIEL: Let's talk about that a little bit. Yesterday when we were speaking -- and one of the residents, I think a fellow back there in the green shirt spoke about it. There is a culvert at the end of that that's crushed.

MR. YOVANOVICH: You're talking right here.

COMMISSIONER McDANIEL: Yes, approximately where you're -- yes, right there there's a culvert.

Now, yesterday you told me about -- there was an error in a survey. Somebody dug a ditch or there was an old farm ditch that went along the east side of your property, and that's that theoretical outfall potential for that. Is -- are you willing to put -- you said earlier that you haven't been communicated with by the -- by the subdivision. Would you be willing to communicate with them and rectify that and necessarily clean that ditch?

MR. YOVANOVICH: Well, here's what we -- had they actually called me and said, "What's your client willing to do?" -- hey, let me give you a little history because I think I have to put it in context.

The way this was always originally permitted, it was supposed to -- there's a pipe that brings the water here into the state lands. I don't know if they ever got permission from the State to do that, but over time what ended up happening, they had issues with that. And near as we can figure out, the State built a road around its property, and in getting enough fill to actually build the road, they dug up part of my client's property, and that canal that's out there today that's been there a few years was never the outfall --

COMMISSIONER McDANIEL: Okay.

MR. YOVANOVICH: -- for that development, never was the

outfall for that development.

So -- and we said that in a meeting. "Guys, you don't have any rights to flow across my client's property." Mr. Parisi was there. We said, "Come talk to us." I guess that -- they were going to hire an engineer, and maybe they've hired the engineer, maybe they haven't hired the engineer, but they haven't come talked to us.

What we would be willing to do is we would be willing to give them a 15-foot-wide easement, nonexclusive drainage easement along the boundary here. They could then install a pipe to get their water down here so they can have their outfall, they can have their straw, if you will, to drain their property, and we would give them that easement when we get our Water Management District permit and we get our Army Corps of Engineers permit.

We would be willing to do that to give them that drainage capacity or ability. By putting the pipe in, we don't lose any land. We could put -- we could put our landscape buffer over the top of it, and they can have their solution. It's going to cost them a little bit of money, but it's probably cheaper than going and dealing with the State to go get an easement from the State and having to do something there.

COMMISSIONER McDANIEL: What happens if you don't get your Corps permit or your District permit?

MR. YOVANOVICH: Well, I don't know. At that point, then, I guess -- getting the Corps permit and the Water Management District permit, it depends on how -- you know, how much opposition we have and who that opposition is from. But we're -- I guess at this point they haven't given us any encouragement to just give it to them.

COMMISSIONER McDANIEL: I'd like to see that rectified at some stage, somehow, someway, irrespective of whether or not you -- if the zoning's approved today, I'd like to see the ability for them to be able to move their water off.

MR. YOVANOVICH: I've got to get a Water Management District permit, and until I get a Water Management District permit, I --

COMMISSIONER McDANIEL: Do you do, or do they need to?

MR. YOVANOVICH: No. It's on my property. I wish it were my property. It's on my client's property.

COMMISSIONER McDANIEL: I understand.

MR. YOVANOVICH: So until I get a Water Management District permit, I can't put them on my property.

COMMISSIONER McDANIEL: And then last but not least, if the zoning were, in fact, approved, would you commit to traffic calming with some kind of a trigger on Auto Ranch?

MR. YOVANOVICH: You know, I've been schooled by Trinity enough that if Trinity says we want to put a couple of traffic-calming tables, sort of like on Solana Road there are a couple -- I don't know if they're tables or bumps or whatever, whatever they're called, I can't imagine that it's that much of a burden to us to go ahead and install that as part of our road improvements, but I've got to be given some direction from Ms. Scott.

COMMISSIONER McDANIEL: What kind of a trigger do you need to see in order to effectuate that?

MS. SCOTT: We have parameters in our neighborhood traffic management program that would trigger allowing traffic calming on a roadway, and if those thresholds are met -- it's typically certain volume of traffic, certain speed over the posted speed limit, and if those are triggered, then we could allow them to do so. We have language in other PUDs that I'm sure that we can pull to put that commitment in there.

COMMISSIONER McDANIEL: Okay. That's all.

CHAIRMAN HALL: Do you have triggers for e-mail calming

software?

MS. SCOTT: No, sir. I haven't figured that out yet.

CHAIRMAN HALL: Okay.

Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chair.

So I'm going to just ask two questions, and then I want to -- maybe my colleagues are lit up, and they'll have other questions, and then I'll go back to the bulk of what I have.

But, Mr. Yovanovich, first question I'll ask you is the thing that I asked at the beginning. And I know nobody wants to answer it because they don't want to throw anybody under the bus or sound rude or anything. But, you know, we've held up the Planning Commission to a pretty high standard that they spent three days, and these subject-matter experts across the board who, you know -- I'm being extremely respectful. I nominated one of the people who's on the Planning Commission.

But I'll defer to my colleagues here and say that if you added up all the time that the Planning Commission spent talking to the county staff, I bet if you picked just one of us here, our time dealing with the county staff, you know, exceeds the Planning Commission's time in total.

So they're part of the process, but we've done an unbelievable amount of heavy lifting talking to the staff. So my question is the same question I asked at the very beginning. And, you know, we're all big boys and girls here. This is a big decision, multi-million dollar. Don't worry about upsetting a Planning Commission person and they might give us their letter of resignation. If they're upset, then I want their letter of resignation, because I need people that are leaders and can sit on the Planning Commission and ask tough questions, give us a recommendation, outline it in detail, and not walk into that meeting and maybe not be as prepared as we are. So it's part

of the process. There's a reason why we vote and they recommend.

But my question is: Why did the Planning Commission -- and it wasn't unanimous. You had Mr. Schmitt who lives in Fiddler's Creek who had to recuse his vote. But I spoke with him as well as some others to get feedback, and he would have had a much different view, and he worked for the Army Corps of Engineers. So I value what he has to say and what he maybe would have said as, you know, I gather info.

But what do you think they missed or misunderstood that caused them, after three days, to give us a recommendation of denial when it comes to Section 29?

MR. YOVANOVICH: I'm going to give you Rich Yovanovich's take on how that whole three-day process went. And I'm probably going to make some people upset with -- upset with you -- or upset with me for telling you how that hearing went.

It started rather assertively with comments from some of the members pointedly asking and interrupting me several times during my presentation, jumping to Mr. Bosi and basically saying, is the only reason you're -- are you -- would you -- "Would you recommend this project if it didn't have affordable housing?"

Mr. Bosi gave the honest answer, and he told you he should have elaborated. But that was the tenor that was set right from the beginning.

We kept having to answer questions about these alleged commitments that all of Section 29 was going to be placed in a preserve. And in my opinion, we were not being listened to. That's my opinion. I thought it was one of the roughest Planning Commission hearings I've been in, and I've done a lot of rough ones. But I think that if you go and listen to that tape and you read that transcript, I can't say that we had an objective Planning Commission. I can't say everybody wasn't, but I think some of the members were

not objective in their considerations. Their minds were made up before we even got in there, which is okay. It happens. We're all human.

They had received some information, and they weren't listening, is my opinion. I don't think we were -- we were heard out. Because I think if you listen to everything that was presented, the traffic issues -- they said they didn't like the traffic, but all the experts said traffic was safe. They didn't like the drainage, but all the experts said drainage was fine.

There was a whole lot of "a promise is a promise." That's what was agreed to, and you can't change your mind. And I think, honestly, that's why they said no. They thought a promise was a promise. I think facts left the meeting, and there were a lot of people in that room that were speaking against the project, and the Planning Commission punted.

COMMISSIONER LoCASTRO: Well, one of the things that I'll say is how proud I am of my colleagues up here because you see the -- I watched that Planning Commission, and others as well. And, you know, maybe it's a little looser, it's a little more conversational, but that's why it's a recommendation.

But when we're here to vote on, you know, a multimillion-dollar project, you see how this meeting goes. So, you know, I commend the Chair for running a professional meeting. I commend the citizens for coming to the podium and doing their due diligence. I think the extra month that -- I didn't punt this for a month. I pushed it for a month because I had hoped that a lot of things would happen. And some did. Citizens meeting more with the commissioners here, and you can tell by the quality of the questions that we're very engaged and very informed of what can be done and what can't be done.

Having said that, I guess I'll continue with a couple of my other observations here. Growth Management Plan -- and you sort of stole

my thunder a little bit or my words. It is a -- it is a fluid document. We've changed it here before, so you can't just say it's set in stone when you don't want it to affect something in your backyard. And then if you want to build housing or something that benefits you, then it's fluid, and you make changes to it.

We try to be fair. We look at every single document, but some people that came up here and said, you know, you have to stick to this particular document, well, then you're not at the meetings that we all are in because we make adjustments to it all the time, and then other times we say "absolutely not."

Same with rezoning. Rezoning is a right, to ask for rezoning. One of the examples that I stress in my own district is there was something zoned near Lely that was zoned commercial for many, many years. While it sat empty, all the lots around it that were zoned commercial were all built out, and it proved that maybe they were overbuilt because some of the stores have gone out of business, and they haven't survived. So the bottom line was it was an easy decision to rezone the last remaining lot from commercial to something residential, because we didn't need more commercial. So we look at each thing, you know, on its own. So amendments are possible.

Let me ask you this: If you -- I'm disappointed between the Planning Commission and today that there wasn't dialogue between you and the citizens and the citizens and you. You know, I'm not here to finger-point who could have called each other up. But in previous decisions we've made when we've had a gap between a Planning Commission decision and an actual vote by elected -- you know, the five elected commissioners, it's benefited both sides at times when they have come together and have negotiated or talked, and even though they might agree to disagree, they come to our meeting with at least a little bit more in hand than the Planning Commission had.

Had you met with the citizens -- and Commissioner McDaniel took something right off of my list, the straw, that's -- regardless of how we vote on this, but if we vote to move forward -- because I know you're not going to make improvements here if this whole thing dies. But let's say that we agree to the rezone, what is the maximum that you are prepared to do in that area? You sort of touched on it, but I'd like you to put a little bit more detail in there.

What's the maximum that you're prepared to do to help with the runoff from the homes that -- on Royal Palm Golf Estates?

MR. YOVANOVICH: Well, there's a couple of things that will happen if we get our permits, because we have to get permits to move forward.

COMMISSIONER LoCASTRO: So let's assume you get the permits.

MR. YOVANOVICH: If I get the permits --

COMMISSIONER LoCASTRO: Tell me what you're prepared to do.

MR. YOVANOVICH: Okay. This road right here, which is our access road, is going to get replaced with a road that has culverts underneath it that's going to allow for water to flow and not get backed up. That's one thing we're willing to do.

Second thing would be to give them what I said was the 15-foot-wide drainage easement for them to install a pipe so they don't have to worry about ongoing maintenance. They can install a pipe to drain their water along the entire boundary right on our property. Fifteen feet's enough for them to install it. They will probably never have to maintain it, but if they did, there's enough room for them to maintain it.

COMMISSIONER LoCASTRO: So that's a meeting that I chaired --

MR. YOVANOVICH: You did.

COMMISSIONER LoCASTRO: -- between the citizens and you. And actually, Christine came up to me at one of the breaks and said, "Are we still meeting?"

And I said, "Yeah, that's totally, you know, separate from this."

And she said at the last break that they have secured an engineer, so it's probably time for a meeting.

So knowing that, like you said, you hadn't heard anything. So maybe we're informally hearing here, and that might be a separate issue, but we're going to have meeting number two.

So I would say to you, Christine, just since we're on the topic of drainage, if you have an engineer secured, what Mr. Yovanovich is proposing, should we pass this, is quite a bit of investment that would couple with what you-all would provide that would -- would allow for significant drainage and runoff that you don't have now. So maybe that's a separate thing.

But -- so what you've said is 15-foot wide, and you would work in conjunction with their engineer to greatly increase how water here drains off into the other areas, correct?

MR. YOVANOVICH: Yes.

COMMISSIONER LoCASTRO: Okay. One of the things I'll say as a comment is if this were -- everyone's throwing around the word "preserve." If it were a preserve, you couldn't build boat storage on it. So I appreciate what you said, but the long list of things that -- you know, yeah, if it's a preserve, but then, you know, the previous document that you put up -- and it showed all the things that you could do in Section 29.

So I mean, there's a lot of people that have said, "You can't build anything on here because it's a nature preserve," and, you know, I think you've already sort of commented on that, but we have the details of what could be on there as a minimum if we did nothing today, and it's pretty significant.

MR. YOVANOVICH: Right.

COMMISSIONER LoCASTRO: If I voted for this, here's what I would like to see -- or I'd like to hear if you say yes to this. So first, a very aggressive plan for the drainage, as we just discussed. And like I said, I've chaired that meeting, and you've been there and the citizens have been there.

The setbacks specifically put in the PUD 518 feet.

MR. YOVANOVICH: I think we should attach that document itself as an exhibit --

COMMISSIONER LoCASTRO: Right.

MR. YOVANOVICH: -- to show those distances instead of trying to call it out.

COMMISSIONER LoCASTRO: Right.

That the seven million Auto Ranch Road enhancements would be put into the plan in great detail.

MR. YOVANOVICH: It's already in.

COMMISSIONER LoCASTRO: But it -- okay.

MR. YOVANOVICH: It's already in -- it's already -- what I read to you is already in the PUD.

COMMISSIONER LoCASTRO: Okay. Let me ask you this -- and this might sound like smaller things. But a 10-foot sidewalk, does that footprint there fit anything larger than a 10-foot sidewalk, or that's the --

MR. YOVANOVICH: It's a 5-foot sidewalk.

COMMISSIONER LoCASTRO: I'm sorry, a 5-foot sidewalk. Could it fit anything bigger than that? I wrote down here 10 because that's what we're doing in a lot of different places.

MR. YOVANOVICH: I've only got 60 feet, and I've got to do the swales.

COMMISSIONER LoCASTRO: Okay. Okay.

One of the things that I'll say on the speed -- you know, speed

bumps aren't necessarily a player here. If you brought in every EMS and ambulance driver here, they would say, "Please remove every speed bump here in Collier County. When we're trying to save a life, stopping at every speed bump as we're trying to get to a house where somebody might be dying" --

But, Trinity, what you and I and Tony have been working on on St. Andrews, bumps, flashing lights, things like that. I'm not saying turn Auto Ranch Road into Las Vegas, but there's quite a bit that we've added to St. Andrews, which has been a real significant issue when it comes to speed and safety.

And, actually, I just got a call from a senior leader that lives in that St. Andrews neighborhood thanking us for the different things that we've done. So -- yeah, shocker.

There's an awful lot that can be agreed to that aren't necessarily speed bumps. But what did you -- what's the term you used? The little buzz word for -- "speed attenuation," or what's the -- you had a little sort of saying about slowing speed down.

COMMISSIONER McDANIEL: Throw out the anchor.

COMMISSIONER LoCASTRO: Well, that wasn't it.

MS. SCOTT: Traffic calming, sir.

COMMISSIONER LoCASTRO: Traffic calming, that was it.

So those would be all things that you'd be in favor of if this was approved, right?

MR. YOVANOVICH: Well, I can't give you a blank check on traffic calming.

COMMISSIONER LoCASTRO: Right. Okay. But none of these things that we're talking about that are realistic are a million dollars. I mean --

MR. YOVANOVICH: I don't know what they cost because I don't know what you did -- I just don't know what you did on St. Andrews. I don't know what that cost.

COMMISSIONER LoCASTRO: Okay. Well, take my word for it, it would be something you could afford if this project went forward, I would just tell you that.

MR. YOVANOVICH: Can I get a grant from the county?

COMMISSIONER LoCASTRO: No.

The height of the landscape on the buffer, it might not sound like a big deal -- and I think Mr. Bosi or somebody said it was eight feet. Several things that we've approved here, when we're really trying to create a buffer of something that's a certain height, 10 to 12 feet is the minimum that, you know, I fought for. And it might sound like no big deal, and in a year or two it will be 10 or 12 feet. But usually when we say eight, then I hear when the trees show up, they're really six to eight. So would you agree to a much higher, a much taller buffer of landscape?

MR. YOVANOVICH: At Home Depot, which you guys approved not that long ago, we had 14-foot trees at planting.

COMMISSIONER LoCASTRO: Right. Yeah.

MR. YOVANOVICH: So we could commit to our canopy trees will be 14 feet at planting.

COMMISSIONER LoCASTRO: Okay. I'd want to get that in writing.

MR. YOVANOVICH: You're just talking about the buffer. Is that -- this buffer right here, the north buffer?

COMMISSIONER LoCASTRO: Yes.

MR. YOVANOVICH: It's right here.

COMMISSIONER LoCASTRO: Yes.

Okay. And I mean, I don't mean to put you on the spot, but lastly, you know, besides, you know, putting in the pipe, if you and the citizens would have met several times over the last month, are there other things that, you know, you would have, you know, entertained as far as, you know, above and beyond the things that

DRAFT

we've mentioned here?

MR. YOVANOVICH: No. At that point -- you know, I've -- we've looked at everything, but at the end of the day, because we compacted the footprint to just 50 acres, minimized what we'd have to do to modify the Corps permit, I can't spread out. If I could spread out, I might be able to go lower in building height, but I can't. So this is -- what I understood to be the primary concern from residents was flooding. And I understand their concern. They are an older community. We can help address their solving some of their flooding problems.

COMMISSIONER LoCASTRO: Yeah. And some of their flooding problems have to do with elevation and dated drainage.

MR. YOVANOVICH: Giving them the ability to put a pipe in will be a significant improvement for them in their drainage issues.

COMMISSIONER LoCASTRO: Lastly, one of the comments made by somebody during their three minutes when they talked about affordable housing and the ability to walk to Publix and this and that, these five commissioners, we've been very focused on affordable housing, and if you think we've cut the ribbon on affordable housing all over this county and a Publix, a CVS, and all the bells and whistles that you need were all within two blocks -- I mean, that's not -- that's not feasible. The distances I look at on this map make it extremely advantageous, you know, to affordable housing. We've built affordable housing units in areas that we've very proud of that are further in distance from a lot of the bells and whistles and the critical needs and the transportation points, so...

MR. YOVANOVICH: Right. And I know you know this, but when you say "affordable housing," the units that are income-restricted are the very same units that market-rate people have. So it's got all the bells and whistles. Those units have the same bells and whistles as the market-rate units. So it's not a

lower-quality unit. I don't know if everybody in the audience knows that. I know you know that, but...

COMMISSIONER LoCASTRO: Yeah. Okay. Well, you've answered my questions on what could be possible if we -- when this comes to a vote and what you would have -- what you'd agree to above and beyond what's already in the packet.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Just a curveball on the drainage. Yes. Are you standing in the box? Get in the box.

The thought -- because one of the things is is that they have a drainage issue now. Why not offer a temporary drainage easement while you're in your permitting process?

MR. YOVANOVICH: To be quite candid with you --

COMMISSIONER McDANIEL: Yes?

MR. YOVANOVICH: -- the primary obstacle to my getting my permitting through is my neighbor.

COMMISSIONER McDANIEL: Say that again.

MR. YOVANOVICH: My primary -- the people who are going to come and try to kill my permit are the people where the arrow is, and if they're going to come and try to kill my permit, what's in it for me or my client to give them the solution to their problem? We want to work with them. We have to work together. This is a good project. But if they're going to try to kill the ability to get the Corps permit, why -- let's talk frank, as Mr. Oldehoff said. What's -- why would we -- why would we do that?

COMMISSIONER McDANIEL: All right. Let's do this then. Let's maybe, during your upcoming meetings with the neighborhood and the developer, have that on the table as a discussion point, as a -- as a temporary, because maybe if you can come to a consensus, we can alleviate the flooding circumstances that are, in fact, there, and -- and take care of it during your meetings.

COMMISSIONER LoCASTRO: Let me ask you this: Would you agree to this, that if you did get all your permits all the way up the chain here that you still are missing, that you'd make that the first project before you put the shovel in the ground for the 750 units?

MR. YOVANOVICH: We'll give them their easement. They're going to put the pipe in. We'll give them their easement as soon as I get all my permits.

COMMISSIONER LoCASTRO: Before you do anything else?

MR. YOVANOVICH: Sure.

COMMISSIONER LoCASTRO: Okay.

CHAIRMAN HALL: I just want to make a couple of comments, and then I'm going to ask a question.

It's been said would you have done this project had it not been for the affordable housing. And I get it, that's the right answer. But the fact is, it is affordable housing, and there's great public benefit to the project. If you don't believe it, ask people who are driving. Ask people who don't -- who are paying 35, 40 percent of their income for rent. And just the fact that the last project, the last ribbon-cutting that we attended, they had 82 units, or 89, and over 300 applicants before they were even finished. So the demand is there. People are wanting the housing.

The location, you know, everybody says, "This is not the right location." We're not -- "We're not opposed to the affordable housing. We're opposed to the location." The location is not the county's decision. The location is -- the burden is on the applicant. If people won't come, then people won't come. If it's too far out, then the people won't come. It will be -- he'll have to adjust his rents to get those people there. So I would say that the location is not the county's burden, but it's the burden of the applicant. He seems to be okay with it.

I think the improvements to Auto Ranch Road are spectacular.

"Well, the people, Commissioner, they're not going to appreciate that. They're not going to want that. They want to keep flooding." No, they don't. They don't want to keep flooding. They would welcome the improvements to Auto Ranch Road.

You know, no one likes to think about Collier County and the overcrowding, the congestion, the gridlock, and the decline of the quality of life. No one likes to think about that. It's easy to assume and to make broad statements. "You're turning this into Miami if you approve this project." We hear it all the time.

I was in -- I was on the East Coast for four days last week. This is nowhere near Miami, nowhere near Fort Lauderdale, nowhere near West Palm Beach. We live in paradise.

And we are -- we are going to grow. That is -- that is a fact. We can't put a gate at the interstate and say, "You can't come in."

We see what's going on with employment within the Sheriff's Department, at the hospitals, with the restaurants, with the hotels. We see that. We see the -- I see the turnover when we have a waiter that we like at a certain restaurant. "What happened to Luigi?"

"Well, he's no longer here. He had to move back to New York. He couldn't" --

COMMISSIONER McDANIEL: He's in jail.

CHAIRMAN HALL: Or he's in jail.

COMMISSIONER LoCASTRO: Don't use that name. We know what happened to Luigi.

CHAIRMAN HALL: Those are just my thoughts moving forward if we approve this project. It's still subject to getting all the federal stuff and getting all those ducks in a row.

As far as the Planning Commission comments, I watched -- I watched the Planning Commission. Two of them, especially, they were rude, they were interruptive, and they were very abrasive. I completely agree with the treatment that you said. Now, whether

they listened or not, I can't answer that. But I do -- I could answer for how they would interrupt and not allow you to answer the questions. And I hope they're listening, because I saw that, and I didn't appreciate it at all.

I do know that Joe Schmitt's comments -- he recused himself, but he did say in a summary in an e-mail that I read that there was great confusion at the Planning Commission with what was actually supposed to be decided on and what was not supposed to be decided on, and that was the commingling of the environmental issues. That's why I mentioned it earlier. That's aside from what we have to decide on.

So my question is: Can we get more than 225 units?

MR. YOVANOVICH: No.

CHAIRMAN HALL: Forty percent's 300.

MR. YOVANOVICH: I know. I know what it is, and I've already -- I've asked the question. It's been asked. The development-related costs for this project, including a $7.8 million access road, we're at the number. We're as -- remember we started this --

CHAIRMAN HALL: I saw that.

MR. YOVANOVICH: -- we started at 20 percent, because that was what the County Commission did. Then we went to 22.8 percent, because that was the County Commission. You know, I got --

CHAIRMAN HALL: I wanted to ask while you were getting -- while you were headed in the right direction.

MR. YOVANOVICH: Well, I got to the 30 percent, and, you know, there's no more -- there's no more give to give.

CHAIRMAN HALL: All right. Thanks.

Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chairman.

I echo a lot of what Commissioner Hall and my other commissioners said up here. I wish we could just dictate where we could put projects to put workforce housing in areas, but it's the individuals out there that are willing to put their neck out and spend their own money and obtain properties to do these projects.

You know, we can't just wave a magic wand and say, "Well, you can only do it here." But if they don't own the property, they can't do it there. And if they're not willing to do it or put their own skin in the game to do it, then, you know, it's not going to happen.

So we have to look at that, too. And when it comes along, we have to look at it with open eyes and say -- weigh the problems, weigh the evidence.

And we don't want to lose sight of what our decision here today is. You know, I -- you listen to the evidence from both sides. We sit up here, and we're -- a quasi-judicial decision we're going to make today with this vote on changing these Land Development Codes. And it's -- it is what it is. We hear the evidence, and we weigh it against the two sides, and we have to make an educated guess on who has proved their case or not.

And listening to the evidence -- and that was a little concerning that I was told that I'm breaking laws and that I'm below certain things or I'm getting -- whatever -- whatever the comments were, it is what it is. But, you know, I want to make sure I'm not breaking any laws, and my attorney, you know, basically told me that -- the County Attorney says we're not. We're in good standing.

And what we're going to make a decision today on is not based on if these individuals get their permits from the stormwater management or the Army Corps or the Department of Interior. We can't -- we don't base it on that. We base it on the facts presented to us today on what the ask is, and then we weigh who proved the case or didn't prove the case.

And that's -- I didn't come in here with a decision today one way or the other the way I was going to go with this. But sitting here since 10 a.m. this morning and giving everybody the opportunity in the room to state their case, I have to say, I am -- I'm in support of the project, and, you know, that's kind of my position.

And I'd just like to put something else on the record. I don't know -- if Mr. Bosi did mention the west side buffer, too -- I made a note -- for the trees. I don't know if you're in the posture to say anything about that.

MR. YOVANOVICH: Well, we've already -- which one?

COMMISSIONER KOWAL: He recommended west -- Mr. Bosi could probably correct me. He did recommend a west side buffer also.

MR. YOVANOVICH: We already -- Commissioner --

Wayne, tell me when I get there. We've already --

I think we've already addressed it, is what I'm trying to say.

MR. ARNOLD: Again, Wayne Arnold.

So this yellow line represents where it's our understanding staff had asked for the enhanced buffer.

COMMISSIONER KOWAL: Okay. All right. I just noted Commissioner LoCastro --

COMMISSIONER LoCASTRO: Yeah, my expectation is that yellow line be 14 feet across the board. So maybe I wasn't clear. So when you're north, south, east, west --

COMMISSIONER KOWAL: I think somebody said the north side or something, and I just wanted to make sure we were clear on that.

MR. YOVANOVICH: The answer is the trees along the yellow line will be planted at 14 feet.

COMMISSIONER LoCASTRO: Yes.

MR. YOVANOVICH: The actual width of the buffer, I think, is

15 feet. So I didn't want you to give me back a foot.

COMMISSIONER LoCASTRO: I'm just talking tree height, tree height. And so somebody from the county make a notation they've agreed to 14 feet instead of eight feet, if we approved this.

MR. YOVANOVICH: Okay.

COMMISSIONER KOWAL: All right. Thank you, Chair.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: I don't think it's me. I'm not lit up.

CHAIRMAN HALL: You're not?

Commissioner Saunders.

COMMISSIONER SAUNDERS: Our staff had indicated there were a couple other commitments they were looking for, so I don't know if you've --

MR. YOVANOVICH: I thought they were -- I'm sorry.

COMMISSIONER SAUNDERS: Have you listed all of them?

MR. YOVANOVICH: Yeah. They wanted the buffer along the yellow is my understanding --

COMMISSIONER SAUNDERS: Mr. Bosi?

MR. YOVANOVICH: -- is what Mr. Bosi wanted. Everything else we had already committed to. I think we had committed to that buffer as well.

COMMISSIONER SAUNDERS: Just nod your head if all of your recommendations are already included.

MR. BOSI: Yes.

MR. YOVANOVICH: Yeah.

COMMISSIONER SAUNDERS: Thank you.

CHAIRMAN HALL: Nod your head and act spiritual.

COMMISSIONER LoCASTRO: I'll light up.

CHAIRMAN HALL: All right. Go ahead.

COMMISSIONER LoCASTRO: So I'll go ahead and make a

motion. But to be clear, we're not putting shovels in the ground tomorrow. You have a long path from some people that wrote you some letters that said, "It doesn't sound like we're supportive."

So like, as you said, Mr. Yovanovich, you have to go back to those same people and explain to them what's different, what you've decided to agree to, where they might have been wrong or right or what could have been done but isn't and the here and now.

So I would tell the citizens, don't walk out of here and think that tomorrow something's all of a sudden going to be built or even improved. All these improvements actually go away if it doesn't -- if you don't get the proper approvals all the way up the chain. And those are -- those are -- I believe those are -- those are going to be a bit of a challenge and maybe even extremely difficult, but I don't think it's our position here to not give you the opportunity to move forward to get those approvals.

And as, you know, Commissioner Hall even stated -- I kind of wanted to hear it from you, Mr. Yovanovich, but he sort of stole your thunder. But I think we're all in agreement those aren't for us to decide, but to hamper you from having the opportunity to move forward to see if you could get all those approvals, I don't think that is -- that is our role, especially when all the other things that have been lined up here are things that we're in agreement with.

So we've laundry listed -- and I won't be repetitive, because we can always go back to the transcript of all the things that you've agreed to add should all this be approved. And I'll stress that if everything is approved, your first order of business is that drainage for the folks.

MR. YOVANOVICH: As soon as I get a non-appealable Corps permit --

COMMISSIONER LoCASTRO: Absolutely.

MR. YOVANOVICH: -- we will give them a drainage

easement so they can install their pipe.

COMMISSIONER LoCASTRO: Right, yeah, so -- and all the other things that we talked about.

But unless there's any other comments, you know, I'll make a motion to approve with all the changes that we've made to allow you to move forward and continue to see if you can get the proper approvals that you need and, if not -- and citizens should still be part of that process if they take exception to what we've approved today, if we do approve it. But my motion would be to approve with all the changes and improvements that we've added following the discussion today.

CHAIRMAN HALL: I'll second it.

COMMISSIONER McDANIEL: Did somebody second?

CHAIRMAN HALL: I did, yes.

COMMISSIONER McDANIEL: Oh, okay.

CHAIRMAN HALL: So we have a motion to approve and a second. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

CHAIRMAN HALL: Motion passes.

MR. YOVANOVICH: Thank you. Happy Holidays.

COMMISSIONER McDANIEL: Merry Christmas.

MS. PATTERSON: Commissioners, we're fairly close to a court reporter break.

How are you? Yeah. Okay. Before we start our no-sooner-than-1-o'clock time-certain.

CHAIRMAN HALL: Let's come back at 4:50.

(A brief recess was had from 4:37 p.m. to 4:50 p.m.)

MS. PATTERSON: Chair, you have a live mic.

CHAIRMAN HALL: All right. What's next, County Manager?

Item #11A

AN UPDATE ON THE COLLIER COUNTY BEHAVIORAL HEALTH CENTER (CCBHC) PROJECT INFRASTRUCTURE SURTAX FUND (3018), PROJECT NO. 50239 (COMPANION TO ITEM #11B) (BRIAN DELONY, SUPERVISOR - PROJECT MANAGEMENT (LICENSED) - MOTION TO ACCEPT THE UPDATE BY COMMISSIONER KOWAL; SECONDED BY COMMISSIONER MCDANIEL – APPROVED

MS. PATTERSON: We are now to our two companion items, our no-sooner-than-1-pm time-certains.

Item 11A is a recommendation to accept an update on the Collier County Behavioral Health Center project Infrastructure Surtax Fund Project No. 50239 and its companion item, which is a recommendation to approve a naming rights agreement with the David Lawrence Mental Health Center, Inc., relative to the Collier County Behavioral Health Center to generate donations to be restricted specifically for use within the behavioral health center.

So we are going to start this out with the update portions. So Mr. DeLony is going to kick it off, and at some point during this presentation he's going to have the David Lawrence folks join us.

So with that, Mr. DeLony.

MR. DeLONY: Good afternoon, Commissioners. Brian DeLony, Facilities Director. I'm here to provide you an update on

the project associated with Collier County Behavioral Health.

As shown here, the planning team for the behavioral health center is pretty extensive. Some of the key personnel or key stakeholders is Collier County, of course, Collier County Sheriff's Office, the David Lawrence Center, DeAngelis Diamond, RG Architectures, and HuntonBraden [sic].

The behavioral health center is a priority project that was endorsed by voters in 2018. It was identified as a priority by the Collier Coalition for Healthy Minds. Prominently funded through surtax. The facility will serve as a central receiving center for individuals requiring services under the Baker and Marchman Acts. The project will enhance the mental health crises support while reducing the burden on law enforcement.

Today I will provide an update focusing on the design, permitting, and preparations to bring the guaranteed maximum price amendment to you in January. David Lawrence Center will also be available to discuss operational considerations which tie to the upcoming discussion on the naming rights opportunity.

Here is a rendering of the facility's exterior. The view highlights the north and west elevations, with Golden Gate Parkway situated behind the facility.

Here is the project timeline, you know, just showing how long the project's gone on. It outlines some key milestones from 2021 to 2023 covering the approval of the design and construction contracts and accumulating [sic] in the delivery of the guaranteed maximum price to Collier County in November.

We anticipate receiving final Collier County permits and presenting the GMP, the guaranteed maximum price, to you-all in January 2025 and then having construction start shortly thereafter.

This goes over the permit status. We've received the permits for both the water use and the Environmental Resource Permits for South

DRAFT

Florida Water Management District. We are still pending the Site Development Plan and building permits with Collier County. We expect to get those by the end of January.

The Florida Agency for Healthcare and Administration, AHCA, is expected to be received in Q2 2025.

Here shows the construction timelines. Again, as I stated, you know, we expect to start shortly after the guaranteed maximum price amendment is approved. You'll have the foundation and shell of the building going up in Q2 2025, and substantial completion and move-in and final completion all in Q4 2026.

(Cell phone sounding.)

COMMISSIONER LoCASTRO: Come on, Dan. You work for us. Come on.

COMMISSIONER McDANIEL: Somebody dock his pay.

MR. DeLONY: The contract relationship between Collier County and David Lawrence Center associated with this project began in 2021 with amendments in 2022, 2023, and 2024.

The lease agreement will take effect upon closing, which is contingent upon the approval of the land entitlements. Basically, you know, the SDP and the building permit.

Lease commencement date is tied to the certification of occupancy and extends for 30 years.

At the end of this term, the lease can either be terminated, renewed for an additional five years, or David Lawrence Center may purchase the facility under predefined terms in the contract.

As far as maintenance, repair, and replacement responsibilities in the lease, David Lawrence Center will manage the routine facility maintenance ensuring the property's kept in good order. Major system replacements, including HVAC and structural components, will be the Collier County's responsibility.

David Lawrence Center will cover the project-related costs not

funded by the surtax, which is estimated to be approximately five million -- it's shown in the table and the slide -- along with the annual operating costs, which is estimated currently at four million.

These include maintenance, insurance, and licensing, and Scott Burgess with David Lawrence Center can provide more details on that after I finish this deck.

The next several slides here is renderings and illustrations of the building. This particular one presents the facility's overall floor plan and patient safety risk assessment. The assessment identifies and evaluates potential hazards to ensure patient safety, showcasing the planning behind this facility. Basically, you know, we're just showing this is not our standard operations that we do here typically at the county. It is very complex.

This is the west elevation which faces the parking lot, and, you know, Golden Gate Parkway would be on the right side of this rendering.

This shows the south and east elevation as viewed from the northwest, kind of like a drone shot over -- like we're over Golden Gate Boulevard.

Here is another view from the south and the east elevations at this time looking north from Golden Gate Parkway.

This is a -- this slide provides a south and west elevation perspective, looking east from Golden Gate Parkway.

This, again, is from the parking lot looking at the west elevation. This shows the main entrance to the facility.

Here we move into the interior of the facility, showing you a rendering of what the lobby would look like.

This depicts the interior, showing the nursing stations and common area.

And, finally, this slide shows the rendering of the interior bedrooms for the patients.

DRAFT

Recommendation is to accept the project update on the Collier County Behavioral Health Center.

COMMISSIONER LoCASTRO: Motion to approve. Do we have to vote or just -- I'm sorry. Do you have a question?

CHAIRMAN HALL: Go ahead.

COMMISSIONER McDANIEL: I do. And accepting the presentation is one thing, but there are -- and I think I read that there is -- the construction deficit between the cost of the facility, reduction in the beds to bring down the cost, and the spread between the 25 million of surtax money and the actual cost, purportedly about 50 million, is being now made up out of excess surtax money; is that correct?

MR. DeLONY: Correct. I mean, there was surtax money that was collected, you know, additional.

COMMISSIONER McDANIEL: Yes.

MR. DeLONY: -- to the stated amount, and interest.

COMMISSIONER McDANIEL: And so that's been approved by the -- that's been approved by the surtax committee?

MR. DeLONY: Yes, sir.

COMMISSIONER McDANIEL: So we've taken care of that. What about the O&M and the FF&E?

MR. DeLONY: Going back to --

COMMISSIONER McDANIEL: I know there's a slide in there that said that David Lawrence was going to pick up the O&M, but there was a -- there was a time when that burden was going to be the county's.

MR. DeLONY: Yes. So the day-to-day O&M is going to be on the David Lawrence Center, and you can see the FF&E is laid out in part of that five million that I also stated would be covered by David Lawrence Center. The expense to the county would be the capital replacement of items, like repaving the parking lot, replacing

the roof, replacing the generator.

COMMISSIONER McDANIEL: The delineated expenses.

MR. DeLONY: Yes, sir.

COMMISSIONER McDANIEL: Okay. And maybe my question needs to be to David Lawrence, then, as to whether or not they're prepared to bear the burden of the O&M, because that's been my largest concern -- one of my largest concerns. I've had several -- but one of my largest concerns since this came forward.

We deviated from the consultant's original recommendations as to where this facility needed to go. It ended up over here on this piece of property next to the existing David Lawrence Center, and cost overruns, expenses have exceeded, continually risen, and there wasn't -- I didn't feel that there was sufficient warrant to justify those additional expenses. So am I -- am I hearing here, then, that those -- those burdens have now been lifted off of the county?

MS. PATTERSON: Commissioners, when we move on to the companion item, we'll have an opportunity to talk with the David Lawrence folks about the naming rights, which is one of the ways that they are suggesting we may achieve some of these costs, so --

COMMISSIONER McDANIEL: There is another item here. I'm asking the wrong time.

MS. PATTERSON: That's right.

COMMISSIONER McDANIEL: Sorry.

CHAIRMAN HALL: Let's move on to it.

MS. PATTERSON: We're going to go on to -- so these are companion items. If you want to accept our update, because we'll be back seeing you again in January with the GMP. We'll move on to the second part of this, and we can get into these questions.

COMMISSIONER McDANIEL: Do you want a motion?

COMMISSIONER KOWAL: Make a motion to accept the update.

COMMISSIONER McDANIEL: Second.
CHAIRMAN HALL: All in favor, say aye.
COMMISSIONER McDANIEL: Aye.
COMMISSIONER LoCASTRO: Aye.
CHAIRMAN HALL: Aye.
COMMISSIONER SAUNDERS: Aye.
COMMISSIONER KOWAL: Aye.
CHAIRMAN HALL: Opposed?
(No response.)
CHAIRMAN HALL: Update accepted.
MR. DeLONY: Thank you.
CHAIRMAN HALL: Exceptional.
MS. PATTERSON: Thank you.

Item #11B

A NAMING RIGHTS AGREEMENT WITH THE DAVID LAWRENCE MENTAL HEALTH CENTER, INC., RELATIVE TO THE COLLIER COUNTY BEHAVIORAL HEALTH CENTER TO GENERATE DONATIONS TO BE RESTRICTED SPECIFICALLY FOR USE WITHIN THE BEHAVIORAL HEALTH CENTER. (COMPANION TO ITEM #11A) (JOHN DUNNUCK, DIVISION DIRECTOR) - MOTION TO APPROVE BY COMMISSIONER SAUNDERS; SECONDED BY COMMISSIONER MCDANIEL – APPROVED

I already read the title, but this moves us to Item 11B, and this is relative to the naming rights and will be the appropriate time for us to answer those questions, Commissioner McDaniel, that you have as well as anyone else. And so we'll invite Mr. Burgess to the podium now to kick this off.

COMMISSIONER McDANIEL: Okay.

MR. BURGESS: Good afternoon. For the record, Scott Burgess, CEO of the David Lawrence Center. Thank you so much for allowing me to have a couple of minutes here to speak to the operations of this -- of this facility as well as the proposal that we are putting before you related to naming right opportunities.

I wanted to start out just really quickly with an overview. Most of you are highly aware that we've been a trusted resource here in Collier County since 1968. We are the only comprehensive behavioral healthcare provider in the community. And importantly -- and we're going to come back to this and circle around this multiple times in this presentation -- is that we're available to all in need in Collier County, and that does come at a pretty significant cost, and I'll share that with you in this presentation.

Obviously, we know, according to what we've already presented through the behavioral workshops, through what the Collier Coalition for Healthy Minds has prepared and presented to you-all, that we are in a growing community. We have to ensure that there's access to care for all that are struggling with these conditions, behavioral health conditions, mental health, substance-use disorders, and that there's growing prevalence. In addition to the growing community that we live in, there's growing prevalence around these conditions that we have to attend to, so it's critical that we work together to do that.

And as such, you know, DLC has proven, and we want to continue to prove to this community, that we're an integral partner in the health, the well-being, and the overall safety to our community.

Commissioner Solis, who was very active with us for many, many years, had been a participant -- a regular participant in our strategic planning process. One of the things that he had asked to try to come -- to wrap his brain and mind around what happens with behavioral health in Collier County -- he came up with a graphic that

looked very similar to this. We kind of spruced it up just a little bit. But what you see is DLC is really the hub in the wheel. Whether it's the Sheriff's Office, whether it's the specialty treatment courts, whether it's emergency transitional housing, veterans services, the schools, hospitals, healthcare providers, DLC really is that trusted, relied-upon conduit to assisting everybody with these needs.

This is a graphic that demonstrates the great growth. This is just the Baker Acts that are transported to DLC by the Sheriff's Office by those referrals. I think the graphic really speaks for itself as you see the continual growth in the demand and the need and those referrals coming to DLC. Without DLC, we don't know where those referrals would actually go.

So here is another graphic related to the population growth in Collier County. You'll see that that's the orange line across time, and you'll see the DLC service growth across time. Again, during that period of time, about 12 years, about a 26 percent population growth. Our services have had to grow almost 138 percent to meet the demand of this community.

Related to what I had said before, that we have a challenge in providing care to all in our community, I really thought it was critically important for you to see, when it comes to an operational challenge that we will have in almost tripling the capacity of service available, very high-cost services available in Collier County, what the payor mix looks like of the folks that come to DLC. This is are -- these are by services at DLC, and you'll see that our payor mix, 61 percent have no insurance; 22 percent have Medicaid insurance, which actuarial studies would demonstrate pay about 50 percent of the cost; Medicare, about 4 percent, which also -- actuarial studies will say don't cover the actual cost; and commercial insurance, 13 percent.

So when we come forward and continually share with you that we need to be looking at every possible resource to help us with this

mission of care that's critically necessary, vital for Collier residents, this is the backdrop of the challenge that we face each and every day at DLC in not only trying to maintain what we're doing with costs going up year over year, but to grow what we're doing.

There was a question, if I could bring a slide that would represent our current revenues across DLC against our expenses. So you'll see on the left side, this is our revenue stream for our 55-plus years at DLC. We have had to use a diverse comprehensive funding stream, a braided funding stream to be able to meet these needs in our community.

And as you'll see, state funding, grant funding -- and just as a reminder, Florida's 49th out of 50 in state funding for mental health and substance-use disorder. So that is 39 percent of our funding.

Insurance, as I mentioned, we have about 13 percent of individuals come to us with insurance, but it represents about 26 percent in total of our revenue; federal funding, 10 percent; county GR funding, 6 percent; CCPS/CCSO about 2 percent; and our fundraising, to point out -- and you also take a look at the expense side of things -- about 4 percent of our revenues are spent on fundraising efforts, and about 12 percent of our -- of our revenues come in through fundraising efforts demonstrating, obviously, a really important element to fundraising for DLC to advance our mission of care.

There was a question in regards to our current operations for these services, and I'll remind you that currently we have -- we operate, really, the behavioral health emergency room for all of Collier County over at our main campus currently. That's three beds for all of Collier County. And we have 33 adult inpatient beds. So that's 33 beds in total for these services. And in Fiscal Year '24, the revenues were about 7.7 million. Our expenses for those services were about 10.1 million, so we have a deficit already for those

services.

I've listed some of the primary sources of revenue there, and I've listed the fact that a good portion of what we're raising money for right now at DLC is in support of these services that obviously are already losing money.

As we look at the forecast for what it will look like when we're into the Collier County Behavioral Health Center, Fiscal Year '32, which would represent the fifth full year of the operations, which would represent about -- we're anticipating about a 90 percent capacity at that point in time.

Again, we're talking about almost tripling those beds. So we have almost a tripling of the revenue, and we have almost a tripling of the expenses, so you'll see that the annual costs are going up, and that will mean that our revenues are going to struggle there as well. We'll have a little bit more of a loss.

So what I have pretty consistently said is we were -- we were thinking that the operational delta, meaning the amount of money that we're going to bring in versus the amount of money that is going to cost us to provide this is -- we'll probably come in about $4 million of an increased delta or an increased loss, if you will, in that fifth full year of operating.

So that -- and I listed also the revenue streams. One of the things that you will note there is we do believe that because we'll have additional uncompensated care in this -- in this new building with the new supports and the new beds we have that increased online, that we should be eligible for some increased federal low-income pool funds that's specifically for organizations like ours and these operations to assist with -- with uncompensated care for -- you know, when you're working with so many people that are uninsured.

And then we also -- I've listed Medicare on this slide because part of the new facility will have a license to be able to provide

Medicare supports.

So as we have indicated before, we are very open and interested in trying to do everything we possibly can do to make sure that we continue to meet the needs of Collier County residents with the backdrop of having that significant financial challenge to do that.

I have listed here that we have agreed that we are going to take on the burden of the $5 million worth of FF&E that was listed before.

The operational budget is -- the projections that we put together, I think it's important to keep in mind that we're talking about a 24/7/365 operation. We never close. We didn't close during any of the hurricanes. We had 60 individuals that were there during the most recent hurricane providing that level of support. So, obviously, these are expensive services to provide to our community.

We know that it's going to require a tremendous amount of increased clinical personnel. I've listed some of the positions that will be represented -- that already are represented at DLC currently, but obviously, when you have almost a tripling of your beds, you're going to have a much greater increase in your need for staff.

And we know that we'll also have an increase in our operational expenses that are outside of the clinical side, including our IT technology quality and compliance, human resources, clinical records, accounting, finance. Of course, almost a tripling of individuals is going to mean more food, more psychiatric medications, which are not cheap.

And we are going to be bearing the burden of a lot of increased -- significant and material cost increases in scaling this operation as well, meaning the security insurance that we'll have to carry and the ongoing maintenance that we've talked about.

Which leads to the item that we're here to talk about. That's a bit of the backdrop of what we're -- what we anticipate and what we believe that we're going to see from an operations finance standpoint.

We heard very clearly what you had shared with us before when we came before you, which is that the county does not want to bear the full burden of additional costs and that it would be wonderful if we could figure out a way to secure support from our local community to help with some of these items, some of increased costs in the FF&E, some of the increased costs in the operations, some of the increased costs with maintenance. And what we have done is prepared a naming rights opportunity that will hopefully inspire and engage our philanthropic community here to support this initiative.

We have built out a whole -- a grid of potential naming opportunities, and I have a slide that will show you some of those. The naming right opportunities in the facility come to about $13 million that we've identified, and we'll all hope and pray and work really hard to try to secure as much money as we possibly can through naming rights. And if we were so fortunate to be able to raise that $13 million from fellow, you know, Collier residents that want to link arms with us to see this happen, good things happen for the people that are in need in our community, that would be amazing.

We also have a $15 million potential that we would like to put forward for the naming of the building and the campus. Between those two things, that's a significant amount of money that could go a long way in helping us with those -- those items that have been listed.

We have proposed -- and what we would be putting in place and executing would be that this would be in a segregated fund. It would be designated specifically for the Collier County Behavioral Health Clinic -- or Center. It would be just for these items. It would be audited. It would be accountable to the Clerk that could -- that could audit those books at any -- at any time.

And we believe that that could satisfy anybody's obvious interest in accountability around those funds, and we would certainly be very open to that.

These are a list of some of the naming right opportunities that we have -- that we've put forward, things like the lobby, unit wings, cafeterias, event rooms, meditation room that will be in there, suicide prevention office. We hold court -- Baker Act court. We will have Baker Act and Marchman Act court in this facility, so there will be an opportunity for that courtroom to be named. Staff wellness rooms, study, outdoor holistic rooms, and patient wellness rooms.

In addition to what we're putting forward here -- and we're very much hopeful that you will support that -- I'm listing other funding sources that we will be working towards securing related to that continued operational delta between revenues that are coming in and expenses that need to go out in order to operate this facility. We will be looking at state funding, private grants, additional federal grants, and I mentioned before federal potential through the LIP program.

Other sources of local support -- and we believe that there are several other areas that we can still continue to look in for local support.

And then heaven forbid, this is -- this is the life that I've lived for 33 years operating these types of services and opportunities -- and operations for those that struggle in these conditions as well as in a funding system that struggles to keep up with the demand is that at the end of the day, if we end up having to curb operations to the level of resources that we have, that's what we have to do. That's how you have to, unfortunately, operate a not-for-profit organization under these types of circumstances.

I will say I've been very blessed to work with incredible people, to work with incredible communities and leaders, that -- for my entire career, I've only seen increase in services that have been able to be provided because people have always risen to the occasion to assist.

So with that, I believe that's my last slide.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chairman.

Good evening, Mr. Burgess. How you doing?

MR. BURGESS: I'm doing great. How are you?

COMMISSIONER KOWAL: Could you go back to the screen that has the two doughnuts on it?

MR. BURGESS: Sure.

COMMISSIONER KOWAL: I'm a cop. I always will be.

MR. BURGESS: Let me see here. I'm going to go here.

MR. MILLER: Use the back arrow.

MR. BURGESS: I was going to do that, but then I know it's back a bit.

COMMISSIONER KOWAL: There you go.

CHAIRMAN HALL: I see the doughnuts.

MR. BURGESS: We've got a doughnut.

COMMISSIONER KOWAL: When you had showed this slide before, I was looking at the -- was it the uninsured?

MR. BURGESS: Oh, the one that was right before this.

COMMISSIONER KOWAL: Yeah.

MR. BURGESS: It's the one before this, then.

I'm sorry. That was the pre-doughnut slide.

CHAIRMAN HALL: Previous, at the top.

MR. BURGESS: Previous. There we go.

COMMISSIONER KOWAL: Okay. So that number, the uninsured, 60 percent. Now, on the doughnut, it's 61 percent. On that -- I guess on the doughnut -- I'm trying to figure out -- because you made the comment that when we get the new facility, you'll be certificated to be able to accept Medicare.

MR. BURGESS: Yep. Medicare, correct.

COMMISSIONER KOWAL: So is Medicare not captured in this statistic even though you provide the treatment, or is there a way to figure out these people had Medicare but you -- didn't foot the bill?

MR. BURGESS: No, that's a great question, and it's a little bit tricky. The Medicare that we have right now, that 4 percent, is for services that we can provide outpatient services that we are credentialed to be able to provide. So right now we're only able to get reimbursed by Medicare for outpatient-related services. In the new facility, we will have it built to the specifications that are required for Medicare. We'll have the Medicare license, so then we will also be able to bill Medicare for inpatient support.

COMMISSIONER KOWAL: Okay.

MR. BURGESS: So right now folks that have an inpatient need that have Medicare insurance are having to go out of county in order to receive that service. So they're going --

COMMISSIONER KOWAL: So it's not part of the 61 percent. It's just not capturing as noninsured.

MR. BURGESS: It's not -- the vast majority of the folks that have Medicare are going out of our community right now.

COMMISSIONER KOWAL: Okay.

MR. BURGESS: There are still some that end up staying with us, and then it becomes likely uncompensated care, because a lot of them can't afford --

COMMISSIONER KOWAL: That will just basically add to the in-patient number?

MR. BURGESS: Correct, correct.

COMMISSIONER KOWAL: Not so much has anything to do with captured and un-captured in the uninsured.

MR. BURGESS: Exactly.

COMMISSIONER KOWAL: You answered my question.

MR. BURGESS: Yep, exactly.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chairman.

Scott, when it comes to the naming rights -- and obviously we've

talked about this before. Before I was a commissioner, when I was doing some consulting over at Avow, you know, they missed some great opportunities with some really large buildings and rooms that were named, and they gave it away in perpetuity for $500, you know, and so they missed out on some opportunities. But then, you know, with the new building they had built, we didn't make that same mistake. But that's a private organization, so it was all controlled in-house.

Ms. Patterson and I were talking yesterday in my office to just make sure that if we all agree that that's a way to raise revenue, man, it really has to be a lot cleaner, because if you, as David Lawrence Center, are, you know, shaking a tin cup around town for naming rights of a building you don't own that the taxpayers paid for, it starts to become a little bit sloppy.

So we were just sort of brainstorming. And I would just say I don't know the answer, but before we do this, we've got to make sure it's tight, and that's where you, County Manager, County Attorney, Ms. Kinzel have to really, you know, assure us that something's going to be -- it's going to be in a nice tight bow.

And one of the things we were brainstorming -- and then it was just -- these are the experts that will make sure it happens. But when Amy and I were talking in the office, it was, would it be smarter for them to find people or anybody that wants to, you know, invest, you know, in naming something, but then that money goes directly to the county first, not to you, and then there's some -- you know, so alls I would say is I don't have the answer, and all the people I just mentioned are extremely smart.

I don't think anybody here is against the naming rights, but we've got to measure twice and cut once on this one because it could come back and bite us that you're out there raising money for David Lawrence Center or to benefit David Lawrence Center or even to

benefit us, but you're sort of selling our rooms. You're selling our building. And so, you know, if we approve it today, I would expect that -- unless you've already shaken out those details. Have you?

MR. BURGESS: We've already put together a --

COMMISSIONER LoCASTRO: So how do we -- how are we going to do it?

MR. BURGESS: So the plan would be that the dollars donated would be specifically for exactly what's identified that would be specifically identified for the potential donor. They would know that this is for a county -- a Collier County building, CCBHC, Collier County Behavioral Health Center, but that it would go in support of only services --

COMMISSIONER LoCASTRO: But who would they give the money to?

MR. BURGESS: They would give --

COMMISSIONER LoCASTRO: They'd write the check to who?

MR. BURGESS: They'd write the check to DLC, and then --

COMMISSIONER LoCASTRO: They do.

MR. BURGESS: -- and then that way that becomes a charitable tax donation.

COMMISSIONER LoCASTRO: Right. Well, and that's what we talked about is when I initially said, "Wow, they would have to write the check to the county, or it would be really sloppy."

And then Amy said, "Yeah, but then they don't get the tax write-off."

And I was like, "Okay." But if they write the check to you, do we still, you know, perceive an issue that, you know, you're basically selling stuff that we own and the money goes directly to DLC.

MR. BURGESS: We don't believe so because it's specifically identified. Everybody that is going to be contributing is going to

well be aware of exactly what they're contributing to. It's going to go into a segregated account specifically for that, which everything -- every in and every out is only going to be for that account, and that account is going to be -- is going to be audited on an annual basis. It will be --

COMMISSIONER LoCASTRO: And supporting the county -- and it would be specifically supporting the county building.

MR. BURGESS: Absolutely.

COMMISSIONER LoCASTRO: Okay. I just wanted to make sure that we had this conversation here, so if we just said, "Approved," we didn't get 300 e-mails -- or one e-mail from somebody that said, you know, they had an issue with it.

MR. BURGESS: And we did put together a document that -- it says naming right agreement that specifically codifies all that information for the person who would be -- who would be agreeing.

COMMISSIONER LoCASTRO: Okay. Well, the main auditor, who would drop the hammer if it's done wrong, is walking to the podium. So if she comes to the podium, we probably don't need a long speech. We just need to hear Crystal say, yeah, you know -- and I guess she's talking with Amy, so...

COMMISSIONER SAUNDERS: I think she's just going to point out that a contribution to the county is tax deductible as well.

MS. KINZEL: That's one.

COMMISSIONER LoCASTRO: Okay. So if it is, you know -- and maybe it doesn't need to be solved here. I think nobody here is going to have an issue with the naming rights, but -- and like I said, we'll hear from Crystal here. There's -- there's a correct way to do it, there's a sloppy way to do it, and then there's a perfect way to do it, and we want to do it the perfect way. You know, there's a way that would be, like, kind of okay, and I think we sort of tossed it around here. I don't think that's the cleanest way. Just me. But,

you know, I defer to Crystal, because she'll be the one auditing. I just think that we could get in a little bit of trouble if we don't do this perfectly.

CHAIRMAN HALL: Go ahead.

MS. KINZEL: Thank you, Commissioner. For the record, Crystal Kinzel, Clerk of the Circuit Court and Comptroller.

You have hit the nail on the head of my concerns on the naming rights to date. We have the opportunity to take that, and there are certain deductions, because we're county government, that people still can take. A lot of people still want to be very comfortable with a 501(c)3.

One of the other concerns I had -- and we can work through these details, but I'm very glad that you put that on the record, because that's been an ongoing concern in my discussions with David Lawrence.

Auditing once a year for our office, a little bit difficult. The money's going. The money's spent. David Lawrence collects money from a lot of revenue sources and expends it in a lot of ways.

So specific identification, which we haven't seen yet other than a list similar to this, yes, those are all things I think we need to clean up.

The other concern that I had is that when you said the money would all go towards the building, well, it will go towards the names on the building, but the revenue would be used to offset the portion of David Lawrence's obligation. In the current way it's constructed, my understanding is none of that naming rights revenue will come to offset the cost of the building which has doubled from the 25 million to the $56 million. And that's kind of concerning that, once again, it's the taxpayers with the majority of money and the -- all the revenue would be offsetting their costs for the future. Those are topics I'd like to work out with them.

COMMISSIONER LoCASTRO: Yeah. So I guess maybe when you work it out -- maybe we're going to vote on the naming

rights but not necessarily on the packaging, on the process of it, but we definitely need that.

I wouldn't want to scare off any donors who say, "Oh, I'd write it to the county. Oh, it's a tax write-off, but maybe it's" -- and I'm not an expert on this, but if it's to the county, maybe it's not as big of a write-off as it would be if it's to a 501(c)3. If it's the same, then great. But I do know there are some philanthropic people out there that would like to put DLC on the check, not Collier County.

And then, just like Ms. Kinzel said, when the money comes in, you know -- and I guess we'll wait to hear your proposal. I, for one, would like to see that it save the county some money, especially when we're putting the name on a building that we built, even though we're doing this as a team effort.

So there's a few things to work out. I think the way it's written here in the agenda, we're just voting on the idea of naming rights, or maybe we table it and say, "Come back here with the process and everything," but I think there's still some things to work out, you know, before I feel comfortable just saying, you know, yes.

If we needed a yes to the idea of naming rights, I don't think anybody's got a problem with that, but we definitely need the process. So maybe that comes back to us.

MR. BURGESS: Yeah. I would certainly say that we would come back to present to you all the buttoned-up details on it. And I don't think there's anybody in the room that works for DLC or our board chair that's here that doesn't want it to be perfect. We will have a process that everybody is -- is okay with, and we'll -- we'll agree it's a perfect process.

One thing that I can say -- and I don't think I'm coming up here and saying that without any history of credibility. I think the Clerk could come up here and let you know that for 55 years we've not had a problem as a great partner with Collier County. We get audited by

Collier County. We have multiple grants and programs that we operate with Collier County year over year, decade after decade. So I think we've got a pretty good track record that we can --

COMMISSIONER LoCASTRO: Is that true, Crystal?

MR. BURGESS: -- button things up.

MS. KINZEL: Thirty-six, not 50.

COMMISSIONER LoCASTRO: FGCU used to say that, and then -- FGCU used to say that, and then Crystal caught them in a whole bunch of things.

MR. BURGESS: So just 36 years, I guess, has been the time that we've officially partnered on with grants.

COMMISSIONER LoCASTRO: And I'll just final -- the final thing I'll just say is all five of us are going to be working hard, too, to steer people who are interested, philanthropic people or whatnot. You know we're all out and about in the county, so that's why we've got to make sure we're all reading from the same sheet of music, so --

MR. BURGESS: We appreciate that.

COMMISSIONER LoCASTRO: -- but great work.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Yeah. And, you know, I hope you know and understand, all of you, there is no reflection of credibility whatsoever. There is no reflection of warrant of good DLC has done for our community for a millennia; 36, 51 years, whatever. My concern with your presentation today is you're going to do what you can do with the available amount of money and/or you're going to cut services, and that concerns me.

MR. BURGESS: That concerns me every night.

COMMISSIONER McDANIEL: It hasn't been -- there hasn't been a soul that's ever came before us that hasn't known or been able to typify the actual need. The need is here within our community. There's no argument about that.

My question to my -- to my colleagues is: We don't want to get a little bit pregnant with this and have a 50-plus-million dollar building sitting over there and then not be successful in the naming rights, not be successful in the philanthropic efforts that are necessary to offset these expenses. I have huge concerns with regard to that.

Up until today, and necessarily even today, I have concerns with the capacity to be able to raise the money to be able to offset these overages or these deltas, as you referred to them, so that it doesn't come back to the taxpayers, doesn't come back on the community.

And I have to say it out loud, at some particular stage, we, the Board, need to pull the trigger, make a decision as to whether to go forward with this development as is, in fact, proposed or do something different that is more cost effective, that it is more attainable.

I know there were recommendations that were made to this board years and years and years ago with regard to the locations of the facility. There were -- there were issues that were talked about siting of this particular facility. And so I'm -- I concur with my colleagues with regard to the naming rights. It's a wonderful idea.

What are we going to do, gentlemen, when the naming rights and the fundraising isn't sufficient? When do we say, "Time out. We need to have a different plan"? That's my question. And I've said that.

CHAIRMAN HALL: On day one.

COMMISSIONER McDANIEL: Well, today's past day one. We're moving down a path here now where we were able and fortunate enough to have excess sales tax revenue to be able to offset the expense, cut this -- we've cut the size of the facility down in order to bring that overhead expense down from a capital standpoint.

When do we say -- when do we say -- because I approved Brian's construction plan and update on the facility which set out timelines, and I saw construction dates starting next year. Did I see that in his

slide?

MS. PATTERSON: Commissioners, we'll be back with the GMP, the guaranteed maximum price, in January.

COMMISSIONER McDANIEL: Okay.

MS. PATTERSON: So sometime between now and January would be the decision point, because once you pull the trigger and start construction, obviously, we're not pulling it back then.

COMMISSIONER McDANIEL: We're a lot pregnant at that stage.

MS. PATTERSON: The other thing is is the naming rights. Conceptually, if the Board is okay with the naming rights, then David Lawrence can definitely put out better feelers into the community with the naming rights with the -- then bring back the buttoned-up agreement with the concurrence of the Clerk and the County Attorney's Office.

But up until this point, we had been before you once before where we reversed course a little bit on kind of that thought process, even of the money coming into the county.

So now they've gone and taken this idea, they need -- if the Board is okay with the idea of the naming rights, they can now talk about it a little bit more openly while we finalize those details. But we're now at the hard decision point. There's -- if we're -- if we're changing course, we're well into this, and we're now to construction contract.

COMMISSIONER McDANIEL: I understand.

MR. BURGESS: Can I interject one item?

COMMISSIONER McDANIEL: Sure. Go ahead, Scott. And, you know -- you know this is coming with love, this is. This is just me --

MR. BURGESS: I can feel it.

COMMISSIONER McDANIEL: Okay. You can feel it?

Good.

MR. BURGESS: Maybe it's just the holidays, I don't know.

COMMISSIONER McDANIEL: It's Christmastime.

MR. BURGESS: I know -- I really know where all your hearts are related to this.

One thing that I think it's critically important to amplify and reinforce is that this new facility is also going to take on Marchman Act. We don't have a Marchman Act receiving facility. Marchman Act is the equivalent of the Baker Act but for folks that are in imminent danger to themselves or others because of their substance-use disorder. Those folks are, right now, still utilizing jail for those supports.

So I know -- I see the Sheriff actually is up here.

But I just -- I just want to encourage that we think about it as a community from a more macro perspective, because I understand -- and trust me, I would prefer never to be in a situation where you're having to try to figure out how to operate something that's so critically important in a community without the appropriate resources to do it.

But if we are not operating this facility, that does not mean these issues go away. It just means they get moved somewhere else. And wherever they get moved elsewhere is likely going to cost more money, and it's likely not going to be as effective, or it's completely unattended to, and we've got much more problem -- much bigger problems than that in our community.

So for that reason, I'm just encouraging you -- for our whole entire existence at DLC, we have had to figure out a way in a state that's 49th out of 50 in funding, how are we going to continue to grow the needed services? And we've been able to do that. We've been able to do that in partnership and support with our community and with our community partners, so we're committed to doing that.

COMMISSIONER McDANIEL: One of the things -- and I'm -- Kevin -- Sheriff, you can come on up.

I just -- you know, one of the things is -- to move us out of that 49th out of 50 states is to ratchet up on the reduction of our recidivism, ratchet up on our productivity, ratchet up on our -- you know, you hear us talk -- you were here for part of today's discussion.

But, you know, we're into transparency and accountability, and the easiest way to do that is to be -- have efficacy that isn't questionable. I mean, you don't have a rate of recidivism with a revolving door and people coming back and back and back.

MR. BURGESS: Yeah. And I would just say to that, it's one of the reasons why we are a national model for our drug court here, our mental health court in the nation, because we do what we do so well here.

COMMISSIONER McDANIEL: Yes.

MR. BURGESS: So there are people coming from all over the country to learn how we do it here in partnership with our law enforcement, our judiciary, and our treatment providers. So it definitely has a -- has an impact.

COMMISSIONER LoCASTRO: Quit bragging. No, I'm just kidding.

CHAIRMAN HALL: Before the Sheriff goes --

COMMISSIONER LoCASTRO: I really want to hear from the Sheriff but -- Chairman.

CHAIRMAN HALL: Before the Sheriff goes, if I got this presentation and I was a banker, I'd already have slammed the door. I would have slammed the no deal because, you know, it didn't -- it doesn't stand on its own. But since for -- since 1968 you've taken the risk and you've made it work.

I'm not convinced that this is the right model. Like Commissioner McDaniel said, we don't know what the recidivism rate

is. We don't know what the success rate of your program is. I can call other people, and they can say, "We're 65 percent. The people that come into our program and are drinking and leave our program never drink again; 65 percent of those people." We don't know that with DLC.

The naming rights I look at like if I had a house and I had a room and I wanted to rent my room out and somebody wanted to call it "the blue room," and they could pay for it, I'll take their money and let it be the blue room. If I ever sell the house, the blue room goes away. But -- so I don't have any problem with the naming rights.

But I am questioning the program, the efficiency of it. You know, the Sheriff may stand up here and say, "Well, the county's going to save X amount dollars by taking our, you know, patients from the jail and putting them in the DLC," but I don't want to take the savings from the Sheriff and apply them back to here. I don't want to do that. I just want to take the savings from the Sheriff and live happily ever after.

So with that, Sheriff, go ahead.

COMMISSIONER KOWAL: It's all public safety.

SHERIFF RAMBOSK: Good afternoon, everyone, or maybe good evening. Kevin Rambosk, Collier County Sheriff.

I was going to talk a lot more about the need in Collier County for the center, but you know we've -- you've talked about it today. We've been talking about it for more than eight years. We put together an advisory committee which then led into the development of a strategic plan and with a lot of data in there.

And I don't want to go back through all of that right now, for two reasons. One is, you're all familiar with it. Number two is, it's five years old already, or close to it. So our growth and need has gone up fairly substantially during that time.

I mean, if you look back to a couple of different points in time,

2006 we were doing 377 Baker Acts in Collier County. If we went to 2010, we were doing just shy of 800. When you fast forward to 2022 and 2023, we are fifteen hundred and -- no, 1,650 to 1,750. So that's a pretty significant increase.

If I think back to when I started, the David Lawrence Center was really -- not had been in operation that long. They were building. NCH really ran the majority of mental health services. Fifth floor NCH, that's where I transported people. We couldn't house them here in Collier County at that time and, in fact, I personally drove patients from NCH to Arcadia to house them, which virtually took me off the road for the entire night.

So I give you that background because one of the reasons for us, in this concept of building an enhanced center, certainly it's for getting people to the right place for the right expert treatment, because jails are the largest mental health facility in a community. We are. If you look at where we are today, our average daily population is about 750, give or take.

Of those, 63 percent are receiving mental health or behavioral services. So we are there. And you say, "Well, then why is this important if you're already doing it?" Because if you look back 10 years ago or 15 years ago, we had more than 1,150, pushing 1,200 people average daily population in the jail. We were going to have to come back to you and ask to build a new facility and, in fact, if I'm correct -- if I remember it correctly, we were starting to put together plans and costs to come back to build an additional jail to house all of the people that we were getting.

So let me -- so physically, we need assistance. From a crime and safety perspective, during that same period of time, the last decade, we've trained over 1,500 law enforcement officers not only from our county, but the City of Naples, Marco Island in crisis intervention where we're trying to intervene before a crime occurs and

get those people transported to our facility and resource, and that is the David Lawrence Center, because NCH doesn't exist anymore.

There are one or two private entities out there, but they're not supporting what we're doing, so -- and, you know, we're saying, "Well, why is that important?" Well, again, going back to one of the reasons, a facility as we're talking about gives us the opportunity to drive in, drop off, go back on the road within 30 minutes. That's important. If you look at those 1,500 times, if you put four to six hours on each one of those, that's a lot of time that we're not available.

Number two, keeping your deputies and consumers safe and safer. With all the training we've got, and we've gotten it, to reduce the potential for liability, to make the community safer -- and, you know, there's a lot of studies -- and I can provide them to you and the cites for this information.

But if you're involved in substance abuse and/or certain mental health crisis involving violence, you know, there is an increase in crime. Think about where we have gotten over the last 10 years with everything that we have been doing.

Certainly, our crisis intervention training program is one of many elements, because we have the best proactive law enforcement deputies in the nation right here. We have the best support from our community for taking professional law enforcement action, and that includes crisis intervention and what we do with consumers in need: Getting them to the right place.

So we're right now treating a hundred and -- take for example -- and all these snapshots are one day, because they change. A hundred and sixteen people in our jail today are being detoxed. Now, they could be there for 30 days, they could be there for six months, but they're not here for years.

So predominantly, get people detoxed. Well, we open the door when they finish their sentence. Do we let them walk out the back

door? No. We try and do a warm handoff to the David Lawrence Center. Since now they are detoxed, get them to professional care that can keep them on that road. And not everybody takes it. But when they don't take it, back into the community, look for drugs, and look for a way to pay drugs.

Burglarize your car, burglarize your house, burglarize your business. And there are stats for all that.

So I give you, and, more importantly, the community that's listening -- the bases for why Collier County is the safest community in the nation. It's all of the programs we do. It is essential and critical for the support that you give us, because we would not be able to operate without the dollars and the resources that you provide to us to make it work, and you always have.

So as we look forward -- you know, I was listening to Scott. I've not heard his presentation. But if I were to stand here and tell you what my budget projection was for nine years from now, you're probably not going to like it. So I know that's what he has to do.

So set that aside for one minute. So I'll go into an area that I really probably wasn't going to go into.

CHAIRMAN HALL: Before you get going -- before you get going, Sheriff, I just want to remind us all -- I don't want to lose our focus here. We're not talking about the need for what we're -- DLC. Our focus is naming rights, whether we want to do that or not, and we're going to come back with -- so I just -- I want to -- I want to kind of focus there.

COMMISSIONER KOWAL: I think the conversation went in this direction because we had two people on the Board here that were talking about pulling the carpet out from under something before --

CHAIRMAN HALL: I made some comments about that, but that's not -- I just want to remind us all what our focus is. Our focus is on naming rights today, and that's what we need to decide on.

SHERIFF RAMBOSK: Okay. I'm not here to talk about naming rights, so if you're all good, I am good. Be happy to come back and talk about some other things. But two things: One is, whatever the Clerk says, lawfully and legally; that's No. 1. The second thing is I am no longer on the board of the David Lawrence Center, have not been for years. Have no authority, have no responsibility, have no anything other than they bestowed a nice retirement title when I left the board.

But what Scott -- and they have a tremendous chairman and board of directors, as they have had -- actually a number of them throughout the years.

But I think to support, Commissioner Hall, what you were saying in referencing Scott, they have done a great job with regard to fulfilling the need and the responsibility no matter what the challenge was, and I think they will continue to do that because people in this community will support them, and now I'll go sit down.

COMMISSIONER McDANIEL: I have a question.

CHAIRMAN HALL: Go ahead.

COMMISSIONER McDANIEL: If I may. You mentioned a population of our jail today. Could you tell me that number again?

SHERIFF RAMBOSK: I believe today was 754. Average daily population right now is 754.

COMMISSIONER McDANIEL: Because I -- and, Sheriff, you know, you and I have been friends for a long time, and one of the first things you said to me when I became a commissioner was that the largest mental institution in Collier County was our jail, and that resonated with me.

How many beds total do we have in the jail here on campus?

SHERIFF RAMBOSK: Well, let's see. I think there's 200 up in Immokalee.

COMMISSIONER McDANIEL: No. On campus here.

SHERIFF RAMBOSK: Yeah, so it would be, like, 800.

COMMISSIONER McDANIEL: Eight hundred on campus and another two over in Immokalee?

SHERIFF RAMBOSK: Right.

COMMISSIONER McDANIEL: Okay.

SHERIFF RAMBOSK: Maybe a little bit more, because we were able to house 1,152.

COMMISSIONER McDANIEL: That's close enough. Round numbers. That was a number that I didn't have.

SHERIFF RAMBOSK: And I'm not here trying to argue with you. I'm --

COMMISSIONER McDANIEL: Nope.

SHERIFF RAMBOSK: -- here trying to support you in making your decision --

COMMISSIONER McDANIEL: Yes, sir.

SHERIFF RAMBOSK: -- to let you know what I think.

COMMISSIONER McDANIEL: And I hope no one's taking what I'm saying as argumentative. I just want to have an open, honest discussion about how we're going to manage this monster. There's no argument that there's a monster.

SHERIFF RAMBOSK: Completely agree.

COMMISSIONER McDANIEL: There's no argument that there's a monster. How we're going to manage the monster is my -- is my rationale for having that discussion.

SHERIFF RAMBOSK: Completely agree.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Thank you, Mr. Chairman.

I'd like to kind of keep it simple in terms of how we're dealing with the naming rights. I like the proposal that the David Lawrence Center has made in that they would handle the naming and collecting of the dollars, but there would be an accounting for the Clerk to make

sure that those dollars are used in a way that this commission is in agreement with David Lawrence Center.

So I think that we may be overcomplicating things because there's an 800-pound gorilla in the room, and that's the $4 million a year in operating expenses, and we're trying to merge the two, and we're trying to -- I don't know that we would admit this individually, but I think we're trying to kind of negotiate here as to how we're going to handle operating expenses along with the naming rights. And this is not a very good way to kind of negotiate that.

So I think I'd like to break these into two pieces. As the Chairman said, let's go ahead and resolve the naming rights issue. And my view is let's go along the way David Lawrence Center has suggested. But we would also -- I think the Commission needs to say to David Lawrence Center how we want those dollars to be used. For example, there's going to be 4 or $5 million in FF&E. You're going to have, what, 13 to 15 million dollars in revenue for the naming rights. There are going to be capital costs down the road for this building. Perhaps we use those dollars for capital and for FF&E and have that trust fund set aside for that purpose. That's easy to account for. The Clerk would be able to make sure those dollars are being used properly.

And then on the operational expenses, we know there's going to be a $4-million-plus operational cost to this facility. Some of us thought at the beginning that David Lawrence Center was going to pay for all of that. I think what David Lawrence Center is saying today is they can't pay for all of that.

And so there needs to be some agreement between David Lawrence Center and Collier County on how we're going to divide up that $4-million-plus operating expenses, and perhaps we need somebody from our staff to sit down and negotiate some sort of a deal with David Lawrence Center not in front of a board of five

commissioners, because we -- you know, we're all kind of dancing around this, and I don't think anybody wants to be the bad guy to say, you know, we don't want to pay any of it, and nobody wants to be the good guy saying we're going to pay all of it.

And so I think that somebody from staff needs to sit down, and maybe with the commissioner in tow, to get the numbers from the Sheriff on how much savings there are in these operations, get some real numbers from David Lawrence Center in terms of what is anticipated, and try to come back to this board with some sort of a recommendation. But we can stay here all night and dance around this, but I don't think we're going to get to a solution.

But I would suggest as -- and I would make a motion at some point to strike a deal in terms of the naming that is similar to what David Lawrence Center has proposed but that we advise David Lawrence Center as to how those funds are going to be used and make sure that the Clerk can audit this -- those transactions.

COMMISSIONER McDANIEL: Second that.

CHAIRMAN HALL: Okay. Just as a comment. Going forward, if we have $4 million of operational expense and you get some money in, once you reach 125, 130 percent of your operation money, then the money kicks forward to the county in capital reserves or some other portion or back to the taxpayers to make the deficit up for the 27 million in addition, and once that's -- over the years, once that's satisfied, then you get all of it. That's just a thought I had.

COMMISSIONER SAUNDERS: Mr. Chairman, I think you get your cake and eat it too because you had said you'd like for some of those dollars to come back to the taxpayers. Well, I think if we are able to establish that the Sheriff is going to save dollars in his operations, those are dollars that are coming back to us. It's the same thing. It's just a different source.

COMMISSIONER McDANIEL: And in the -- in the -- it's an

ancillary savings at the same time. But if, in fact, the successes are achieved that we're all wanting to have achieved, we have an ultimate reduction in crime and exposure for our Sheriff's Department to be -- to be dealing with the mental health issues of the folks that they're having to deal with every single day. So I'm -- I seconded his motion for the naming rights.

CHAIRMAN HALL: All right. For the naming rights, all in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Opposed?

(No response.)

MR. BURGESS: Okay. Thank you.

COMMISSIONER SAUNDERS: Then, Mr. Chairman, in terms of -- I know this is early on. We're not going to have a building to operate for at least two years from now. But perhaps it would be appropriate to begin a process to negotiate with David Lawrence Center on how we're going to handle the operating expenses going forward, because it's going to take some time to ferret that out.

CHAIRMAN HALL: Sure.

COMMISSIONER McDANIEL: My personal -- my personal one is to have that done before we put a shovel in the ground to build the building. I mean, I think that discussion needs to happen before we put a shovel in the ground to, in fact, build the building. That needs to be -- that needs to be ironed out.

CHAIRMAN HALL: I'd like to see it as part of our maximum price deal.

MS. PATTERSON: Commissioners, Mr. Dunnuck and I will sit

down with David Lawrence and work through this between now and when we bring the GMP back, and we'll continue to work on the rest of the details on the naming rights in accordance with your direction.

COMMISSIONER McDANIEL: Okay.

Merry Christmas.

MR. BURGESS: Merry Christmas. Thank you.

MS. PATTERSON: All right. Commissioners --

Terri, how you doing? You good? We've got two more items.

THE COURT REPORTER: (Nods head.)

Item #9D

ORDINANCE 2024-53: AMENDMENT TO ORDINANCE 2023-71 TO REMOVE ROADWAYS THAT ARE NO LONGER UNPAVED, ADD UNPAVED PRIVATE ROADWAYS AND ESTABLISH AN OPT OUT PROVISION - MOTION TO APPROVE BY COMMISSIONER MCDANIEL; SECONDED BY COMMISSIONER HALL – ADOPTED

MS. PATTERSON: All right. Commissioners, that brings us to Item 9D. This item was continued from the November 12th, 2024, BCC meeting. This is a recommendation to approve an amendment to Ordinance No. 2023-71 to remove roadways that are no longer unpaved, add unpaved private roadways, and establish an opt-out provision.

Ms. Trinity Scott, your department head for Transportation Management Services, is here to present.

MS. SCOTT: I've been waiting all day for this. I thought I was going to sneak in this morning.

COMMISSIONER SAUNDERS: I'm wondering if it would be appropriate for a commissioner to opt out about this time.

COMMISSIONER McDANIEL: Quit.

MS. SCOTT: Two more agenda items, sir.

COMMISSIONER SAUNDERS: I'll see you guys.

COMMISSIONER McDANIEL: Where you going?

COMMISSIONER SAUNDERS: Just kidding, just kidding. I don't want to miss this.

MS. SCOTT: Brief history or questions, however you would like to approach this agenda item. This hasn't changed since the last time it was presented to you back in, I believe, October for advertisement. As Amy, County Manager, discussed, this is removing a few roads from the unpaved roadway ordinance, adding all unpaved private roadways that are not in a gated community or HOA, and also establishing an opt-out provision.

This is the roadways that are encompassed by the Unpaved Roads MSTU, or what would be based on the amendment. And just -- there is a little bit of new information. The total mileage is 75.783 miles.

The first revenue to be collected, if this MSTU is amended, would be for the 2025 tax year. The taxable value of the properties all benefiting is just over 203 million, and a millage of one mil would generate approximately $203,000 annually.

So our next steps, if approved today, would be to finalize the properties and transmit those to the Property Appraiser prior to the December 31st, 2024, deadline. Publish our opt-out application on our website. We would have our advisory committee of first responders who would review those opt-out applications. We would prepare a bid for the first 16 miles of roadway that we know have been deemed unpassable by those first responders.

Our future year process is the advisory committee will present a list of roads needing maintenance to remain passable to the MSTU project manager. The advisory committee will rank the roadways

worst first, and then we would develop a budget to be presented to you annually each year through your budget process.

So we're asking for your approval today on the amendment of Ordinance 2023-71.

CHAIRMAN HAL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chair.

Question with the opt-out. I know that's been in and out and in and out, the opt-out. Now it's in. And we hold the premise on the first responders to make a determination if the roads are impassable or not through their process, however they come to that conclusion. So if somebody opts out, let's just -- I'm spitballing. You opt out, the road's fine. Five, six years down the road, they don't do their own maintenance on the road, and then now they're put in that category of the impassable. Do we retroactively go after them because they didn't do anything -- they opted out when the road was good, but then they didn't do anything to maintain that road, and now we have to deal with it. Can we retroactively go back and collect that percent over the years they didn't maintain the road?

MS. SCOTT: I would defer to the county attorney if I could retroactively but do not believe so. I believe the way it's written is is that they would just be included into the MSTU in perpetuity then.

COMMISSIONER KOWAL: Because I just don't like the fact that they might have a good road now because whoever was taking care of it before took care of it, and now that person's not there anymore. They opt out, they get the benefit of that person that took care of the road. Five, six years down the road they got it fixed again, and they never paid a dime into the program.

MS. SCOTT: The opt-out provision does require that they provide us a maintenance plan. But you're correct, somebody -- you know, somebody could move off the road that had a grader that was doing it for them. But the way it is currently written is if at a point in

the future the road becomes impassable to emergency vehicles, those previously opted-out homes shall become subjected to the tax levy herein beginning the next fiscal year and continuing the following years. That's how the existing ordinance is written.

COMMISSIONER KOWAL: I don't know. It's kind of --

COMMISSIONER LoCASTRO: Yeah.

COMMISSIONER KOWAL: It's kind of -- they can play the system and kind of get a freebie out of it for five, six years. So I don't know.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: You know, there's a way to scam any system. This circumstance has been prevalent in our community forever, 25 years. Commissioner Coletta formed a homeowners association in 2000 called the Corkscrew Island Neighborhood Association, and if you all aren't doing anything, we're having a Christmas party at Bill's cabin in the woods next week, next Tuesday, for the CINA, Corkscrew Island Neighborhood Association.

The rationale back in those days was each individual road had to do a referenda, 50 percent plus one, on the road to opt in to do -- create their own individual MSTUs. Well, you can't get two of us that live in the woods to agree on what color the sky is let alone whether or not we're going to pay any extra money to take care of a road.

This is a way -- I'm going to admit it's not the only way to address a systematic failure that our community has had ever since I've lived there.

There are people who -- and again -- and I've lobbied for this and lobbied for this. I'm not saying that this is all perfect. I'm not saying that there isn't a way to beat the system. I'm not saying that -- I don't believe -- I think what Trinity shared with you, Commissioner Kowal, is correct; I don't think we can retroactively go back on somebody.

But I know that --

COMMISSIONER KOWAL: I don't think she said that. She said we didn't have that in there. I was just asking if we could.

COMMISSIONER McDANIEL: I don't think we can.

COMMISSIONER KOWAL: Okay.

COMMISSIONER McDANIEL: And so someone could technically opt out today. But in order to opt out, they have to provide us with a maintenance plan and adhere to that maintenance plan. So it's not necessarily going to be five, six years down the road. It could be, necessarily.

But Mitch Penner lives out in North Belle Meade. He's Mitchell & Stark. He takes care of his own roads. So he can opt out. He can supply a maintenance plan and support it. I technically on my road, with Redhawk Lane -- and now that USA Grading's moved in on the corner, we could, if we choose to, opt out if we wanted to, supply a maintenance plan, and take care of that.

There's no -- there's no perfect position or perfect system that can accomplish what needs to be done. We have to declare a state of emergency when we enact these repairs. That's something that the County Attorney and I have worked on extensively. We just came through one of the worst -- and right now nobody's chirping about the roads because it's been dry for a month, month and a half. But we went through the data, the analysis, sent staff out, sent the emergency services folks out.

We now know that there's 15, 16 miles of unpassable roads. We have an obligation to take care of that. And the first shot over the bow was to just enact the MSTU on those roads. Well, as soon as we started moving on that, it rained, and then there was another nine miles down in 6L Farms area that went under water and weren't traversable any longer.

So my suggestion is, let's do this -- this is the beginning of a

process -- and make the necessary adjustments. We're not going to just enact this and then walk away from it. It's going to be an ongoing process that we manage and monitor. We're going to track the front-end expense. We're going to track the ongoing maintenance that transpires after so that these roads don't become impassable again and then manage the tax over a period of time to be able to hopefully develop enough in reserves so that if a -- if a large storm event comes along, we've got the reserves in order to take care of those roads. And have enough money in there to do the ongoing maintenance that's necessary to do this.

I don't want to regurgitate all of the reasons why this is necessary. Our number one job as a local government is health, safety, and welfare; take care of our people.

And this is a path that has never been tried before, I'll be the first to admit that. And we as a community don't like to be the guinea pig, but this is a path I think that can -- that we as a community can travel to take care of a systemic failure that we have going on in this community. Some of these private roads that have gone into disrepair since I became a County Commissioner have cost eight and 10 times the amount of money that it normally would have cost had it been done and done properly and then cared for after the fact.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Just -- and I have no issues in going forward with this, but I do have a question and maybe an alternative just for discussion purposes.

But assuming that we adopt this with the opt-out, are you going to need any additional staff to manage this? You've got people that are coming in with maintenance programs because they're opting out. Do you have the ability to handle this -- whatever that additional workload would be?

MS. SCOTT: We will monitor that. Right now I have two

MSTU project managers who have a lot of MSTUs on their plate. What we would most likely do, because those staff times are charged back to the MSTUs, if we needed to bring in additional assistance, we would start with, through our temporary service, our key staff, and bring in a temporary employee if we needed one until we can get through the ebbs and flows of this. I think in the beginning with the opt-out we're probably going to have a little more, and there'll be some more administrative work, so bringing in some assistance.

But then if this goes as the commissioner has kind of laid out, we're hoping that it's, you know, more of a streamlined process. We're meeting with that advisory committee. They're giving us their priorities for the year. We're setting that -- we're setting those priorities. No different than kind of how I do a paving plan, you know, where we're assessing the roads, we're building the plan. Okay. The next fiscal year, bam, we're getting out there. We're getting those things done. As soon as these are done, we're starting to assess everything again, so...

COMMISSIONER SAUNDERS: So it would be interesting just to know if you're going to incur expenses, because I think this will generate $203,000 a year; is that the --

MS. SCOTT: Correct.

COMMISSIONER SAUNDERS: Yeah. So, you know, if there's an offset from that because of increased staff time, we're not dealing with a big number to begin with. So that would be something that I think we would need to know.

But I think I'd ask the County Attorney a question. We can't spend our ad valorem tax dollars on a private road; that's why we're going through this exercise?

MR. KLATZKOW: Yes, sir.

COMMISSIONER SAUNDERS: So -- but we can determine that there's an emergency situation, and we can spend tax dollars to

correct an emergency situation, and we can go back and assess the property owners along that roadway for those costs?

MR. KLATZKOW: Which we've been doing.

COMMISSIONER SAUNDERS: Which is what we've been doing.

MR. KLATZKOW: Yes.

COMMISSIONER SAUNDERS: Okay. Has that not been effective? I mean --

COMMISSIONER McDANIEL: Absolutely ineffective.

COMMISSIONER SAUNDERS: Well, is that because we're not declaring enough emergencies in enough locations or -- and there's no one to monitor it? Why would that not be effective? It seems to me that that would be the easiest way to deal with it.

COMMISSIONER McDANIEL: It's a -- what I've experienced since I became a commissioner and even before I became a commissioner, Commissioner Saunders, was the after-the-fact expense associated with reparations of the road were extraordinary, and then the burden was put upon -- put upon those folks just specifically on that road. This rationale here is to -- it's a big wagon -- have everybody tote a little bit on the wagon and then not just a few are carrying and pulling on the wagon.

COMMISSIONER SAUNDERS: Okay.

COMMISSIONER McDANIEL: And, again, just to cite an example, I had a friend pass away of a heart attack out in the sanctuary because we couldn't get an ambulance to him. That's one too many.

COMMISSIONER SAUNDERS: Okay.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chairman.

My wife's going to kill me. It's my anniversary today.

COMMISSIONER McDANIEL: Hey, Happy Anniversary.

COMMISSIONER LoCASTRO: Isn't it great to spend it with us?

COMMISSIONER KOWAL: Yeah, I know.

All right. I've just got to ask a couple questions.

Commissioner Saunders quoted a $203,000, supposedly, collection. What do we base that on?

MS. SCOTT: That's based on the property values of the properties that would -- without anyone opting out at this point.

COMMISSIONER KOWAL: That's with nobody opting out?

MS. SCOTT: Right, because I don't know who's going to opt out at this point.

COMMISSIONER KOWAL: That's right. Now you're getting to -- we're getting to what I'm getting to here. I know when we started it was 110 miles of roads or something. Now I think you quoted something like 97, 96 miles.

COMMISSIONER McDANIEL: Seventy-five.

MS. SCOTT: Seventy-five.

COMMISSIONER KOWAL: Seventy-five. So it's really shrunk, 75. And so far our professional opinion with our first responders and our Road and Bridge people, we've deemed 16 miles impassable.

MS. SCOTT: Yes.

COMMISSIONER KOWAL: So is there a possibility that -- subtract 16 from 75, whatever that number is, that will be the number that will opt out? And what are we collecting then?

MS. SCOTT: Certainly that's a possibility, and we did not look at that number.

COMMISSIONER KOWAL: What are we collecting then?

MS. SCOTT: We did not look at with the -- I might have it with me.

COMMISSIONER KOWAL: Somebody's good at math.

MS. SCOTT: It's not, because it's based on the value of the properties along the --

COMMISSIONER KOWAL: I know, but I guess what I'm trying to say is we could get to the point where, at the end of this meeting and we agree on this, that we could possibly only be collecting for 16 miles of people in this county with our one millage.

MS. SCOTT: It's a possibility that everyone would opt out. I don't think it's likely.

COMMISSIONER KOWAL: It won't be everyone. It won't be everyone, because the 16 miles won't be allowed.

MS. SCOTT: Right. But I don't think it's likely that every individual property owner is going to opt out. But there is a possibility that they all could. But is it likely? No.

COMMISSIONER KOWAL: I'm just trying to put some eyes on this, because if our system we had before didn't work and this might be the answer to fix that, I don't know if this is the real answer. And I'm going to keep saying this, that there's a chance that we could only be collecting from 16 miles of roads moving forward. And I don't know where you're getting this big purse we're going to have this collection of money so -- when we have to do more mileage down the road, bring these people on board when they don't do their maintenance plans or where they don't keep up with it.

I -- I like going in there. You got 16 miles of bad road, guess what? We're fixing your road, and you're getting taxed for it because you failed, because you made a decision to live on a private road. You wanted to live there. That's your responsibility. It's not the taxpayers' responsibility. Now, we've got to fix it because you made it unsafe for your neighbors. And now you'll pay for it.

And it's not that we neglected -- or that program don't work. We just weren't paying attention. We weren't out on a regular basis driving these roads and determining if they were passable or not.

And now it just caught up to us.

And I hate to say it, but the only -- I think the best system we have is the one we already have. We just have to imply [sic] it. We haven't implied [sic] it. We haven't had a task force go out once a year, every six months, drive these 75 miles, which when I was a patrolman I drove way more than 75 miles a night in a patrol car, and I'm pretty sure we can do it on a regular repeating basis to determine which are the bad roads and which are not the bad roads.

I don't know. I don't want to create a whole 'nother bureaucracy that's never been created in the state of Florida from what I understand. This will be the first time this was ever done in all 67 counties.

I just don't -- I'm sorry. I'm just trying to bring some common sense, shed some light on it. And, God, I don't want to belittle anything that ever happened to any person, to anyone we ever loved in our lives, because of a bad road, but that's on us, and that's on the people that chose to live there that we weren't keeping an eye on our roads and we weren't -- didn't have a plan in place to make sure they were passable.

That's the problem. And I don't know -- if we get there, we get there. But I know I've been talking about this for two years at this point. I'm sorry. You're my friend, and I just --

COMMISSIONER McDANIEL: You don't have to be sorry.

COMMISSIONER KOWAL: You're my friend.

COMMISSIONER McDANIEL: No, no -- can I speak? Is it my turn?

COMMISSIONER KOWAL: Go ahead.

CHAIRMAN HALL: It's your turn.

COMMISSIONER McDANIEL: You don't have to be sorry. I'm going to be the first to admit that there is -- that there is no perfect way. What we do know now is that we have 75 miles of road, that

we have 16, 17 miles that are absolutely impassable that we are obligated to fix. That's a fact.

COMMISSIONER KOWAL: Agreed.

COMMISSIONER McDANIEL: Period. This way is the proposition that I've brought forward that I've been trying to implement for eight years.

Commercial Coletta tried it for 20 years before that. Nance was online with it as well. This circumstance, Commissioner Kowal, has been going on forever.

My rationale is --

COMMISSIONER KOWAL: And that's on us.

COMMISSIONER McDANIEL: Well, I don't disagree. I mean --

COMMISSIONER KOWAL: We failed these people by not paying attention to their roads.

COMMISSIONER McDANIEL: I could tell you stories. And again, there are not a lot of these private unpaved roads in District 4. The majority of them are in District 1 and District 5.

And so I'm the one -- I'm -- my constituency is the one that's been dealing with this -- with this circumstance. Our not taking care of that responsibility has -- has caused enormous expense increase. This is a path to get to that point where that expense is manageable and the wagon is toted by many people.

Is it -- is it a creation of -- and I'll tell you -- I will share this to you -- two things. I'm going to be on top of this like it's -- like it's those buckeyes that Terri made tonight, or today. That candy that's in the back there. That was amazing stuff. I'm going to be on top of this every single day.

I'll bring you a report as often as you want from a timeline as to the -- for transparency and, in fact, accountability. I'll give this board a list of those who have opted out, what the -- because it's impossible.

You can't just do simple math, and 17 -- or, you know, 16 miles have to opt in and the others opt out. We can't -- that's not simple math because you've got different valuations of the assets that are along those private roads. It's not that simple of a math equation.

My ask is let's do this, give it a whirl. If it isn't, let's tweak it. We'll make adjustments along the way in order to effectuate something different.

What has been going on -- again, we were all set to go forth and persevere on the original 13 miles, and it rained, and nine more miles wanted to come into the MSTU. So this is -- this is a systemic issue that Collier County has had since time immemorial, and this is a way to cure that.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Does anybody else have an issue with the opt-out option? Am I hearing that more than just me has the opt-out issue? I mean, and the reason I don't like the opt-out issue is -- so I opt out. Commissioner Kowal, I thought -- I don't know if he supported the opt-out or not, but the part he talked about is, hey, I could game the system. So I opt out, and my road in front of my house is okay, but I get to enjoy a beautiful road, you know, all the way out to the main area because everybody else is paying. Then my road starts to deteriorate a little bit, and then I get lazy or -- I mean, I just think that you're either all in or you're all out. If your road's beautiful and great and wonderful, you're still getting taxed because you're enjoying a whole stretch of road, and we're trying to keep it cohesive.

I just think with this opt-out option, we're not going to have cohesive stretches of road, especially roads that right now are not passable even if they have little patches that are being maintained. I mean, I just think this is the cost of living in these type of neighborhoods. But I know that we -- we went back and forth on the

opt-out provision, but, you know, in Commissioner Kowal's conversation, I mean, I agreed almost word for word when you were saying, hey, there's a lot of loopholes here with the opt-out, if I was hearing you correctly.

And, you know, I mean, that's the only part I don't love about this. I think it creates a lot of -- a lot of options for people to say, "Oh, my road's fine. You know, don't worry. I'll take care of it," and then we're chasing down maybe the handful or more than a handful of people that opted out and then didn't maintain their road, or their road's not as good as their neighbor who opted in and their road's perfect.

But, you know, I think what we need are cohesive roads. And when you choose to live in this type of neighborhood and you've let it, you know, go, this is -- you know, establishing the MSTU is a way to put it all back into a more cohesive, you know, road system.

COMMISSIONER McDANIEL: One little clarification on the opt-out. It's not per house. It's the whole road. If you opt out, you're opting out your road, not just your 200-foot and 30-foot-wide --

COMMISSIONER LoCASTRO: Even worse.

COMMISSIONER McDANIEL: -- portion of the easement. You're opting out the -- you're opting out the whole road.

And so it's -- I don't look for the opt-out provision to be as large of an obstacle as what it's being made out to be. I didn't -- I trooped in a lot of people way back in the day before -- before Commissioner Hall and Commissioner Kowal came onto this board who spoke in favor of this adventure way back when who live on these private dirt roads who were in favor of this unified path to get us to where we're going.

To share an example for you, I shared one example of my friend, Mitch Penner. Collier Enterprises owns, I don't know, five, six miles of dirt road between Oil Well Road and Immokalee Road on Oil

Grade. They own sides of the road. It's their own private dirt road. They need to be able to opt out of that.

It's not -- it's not a traversable -- there's a gate on both ends of that road. So there are -- there are people who should be able to opt out. Are we going to have somebody game the system? Probably. What system isn't gamed?

COMMISSIONER SAUNDERS: Could we -- all right. You've got some roads that need to be opted out.

COMMISSIONER McDANIEL: A couple.

COMMISSIONER SAUNDERS: Okay. There are a couple. Why don't you just identify those and keep them out of the -- do the MSTU the way we've got it and just eliminate those roadways? I mean, you're identifying roadways to be included in the MSTU. Let's opt them out for ourselves so we don't open up an opt-out for everybody. If you're only talking about a few roads that need to come out of this, let's just take them out.

COMMISSIONER McDANIEL: I don't know.

COMMISSIONER LoCASTRO: Trinity's head just exploded.

COMMISSIONER McDANIEL: Yeah, I'm --

COMMISSIONER LoCASTRO: What did the Planning Commission say about this? Oh, I'm just kidding.

MS. SCOTT: They had three days of testimony about it.

COMMISSIONER LoCASTRO: I just wanted to throw some levity in there for Dan, because he's going to get divorced at the end of tonight because he's missing his anniversary.

COMMISSIONER KOWAL: I'm good.

COMMISSIONER McDANIEL: I'm just -- and --

COMMISSIONER KOWAL: People's work.

COMMISSIONER McDANIEL: -- again, if you want my personal opinion, we're making a mountain out of a molehill on this opt-out provision. I think the way that this is written is as fair as it

can possibly get. If the consequences of the opt-out provision end up being not conducive for the greater good to be served, then we'll enact something else.

CHAIRMAN HALL: My thoughts are: Number one, I think it's our obligation to maintain public roads. I don't think it's our obligation at all to maintain a private road. That's arguable. Set that aside.

We have an emergency repair place -- an emergency repair process in place, and now we have targeted roads so that we don't fail as a county to have those things. We have targeted roads now that we can force the issue. So that's one way that we can go that we have in place now.

If we go with the private -- if we go with this MSTU, I don't think that there's any incentive at all for people to add one mil for them to maintain their road or want to opt out or not be a burden on the taxpayer or not be a burden on themselves, which is a burden on the taxpayer, because we're going to front the money for the repair and the maintenance going forward in hope that we collect enough money to pay for it. And there's just way too many holes in this system for me to be comfortable.

If we could raise the millage rate, double it, and only do a portion of the most critical ones until we got enough money in the kitty to maintain them all, I'd be comfortable with that going, but I'm not comfortable with establishing it and hoping that the opt-outs aren't so great that we have such a great need to fix immediately and just skosh amount of money to do it with. So there's my thoughts.

COMMISSIONER SAUNDERS: This is rather unusual. No one's saying anything.

COMMISSIONER McDANIEL: Yeah, well, I'm cyphering. I mean, I'm over here looking at it, and this circumstance is not going to get fixed year one. It's not going to get fixed year two. It may take

five years for this tax at one mil to accomplish what we want to have accomplished.

COMMISSIONER SAUNDERS: So why don't you go ahead and make a motion, let's see if it passes. If it doesn't, then we'll move on to some other way to solve the problem.

COMMISSIONER McDANIEL: Then I'll make a motion to -- I'll make a motion that we accept and pass what's been presented to us in Agenda Item 9D.

COMMISSIONER SAUNDERS: For purposes of getting this on the floor for a vote so we can make a resolution one way or the other, I'll second the motion. That is not a guarantee I'll vote for it. It's just it gives us all an opportunity to vote on it.

COMMISSIONER McDANIEL: So the Chairman's going to call for the vote because we've wore out the discussion.

CHAIRMAN HALL: Well, I would be in -- I didn't -- I made a note here, and I didn't say it. If we pass this, I would be comfortable at 2 percent on the millage rate and to do this for two years and monitor it and see how we're going. And if it's going south, I say we kill it.

COMMISSIONER McDANIEL: I'll amend the motion to what he just said.

COMMISSIONER LoCASTRO: Is it 2 percent?

COMMISSIONER McDANIEL: Two mills.

MS. SCOTT: Two mills.

COMMISSIONER SAUNDERS: Now, just so we -- I mean, that's a fairly substantial increase.

COMMISSIONER McDANIEL: Right.

COMMISSIONER SAUNDERS: You're going from -- this would be --

CHAIRMAN HALL: From one to two.

COMMISSIONER SAUNDERS: To two mils.

COMMISSIONER McDANIEL: Why can't we just leave it at one mil and monitor it for two years and then kill it?

COMMISSIONER SAUNDERS: Yeah. Because, I mean, if you go to two mils, you're increasing their taxes 50 percent.

COMMISSIONER KOWAL: Why don't you give me a tank of gas. I'll drive around and look at these roads. When I find bad ones, we'll fix them. And I'll tax the people that live on them with their mill, one mil, two mil, whatever it is.

(Simultaneous crosstalk.)

COMMISSIONER McDANIEL: I have sold this at the one mil, Chairman Hall, since the beginning of time, and so I'd be happy to leave it at the one mil, monitor it for two years. Heck, I'd be happy to monitor it for a year and kill it if it's not working.

CHAIRMAN HALL: I'll go with that. I'll compromise on the millage.

COMMISSIONER KOWAL: All right. You're my friend. I'm going to give you one year.

COMMISSIONER McDANIEL: Are we friends now?

COMMISSIONER KOWAL: You've always been my friend.

COMMISSIONER LoCASTRO: And didn't he say he would give us a report? I'd like a report every day, every day.

COMMISSIONER KOWAL: Oh, I want a report every day.

(Simultaneous crosstalk.)

MS. SCOTT: Commissioner LoCastro, please don't do that, because he's going to ask me for the report.

COMMISSIONER LoCASTRO: Oh, that's true. Yeah, that's right. He'll delegate that immediately.

COMMISSIONER McDANIEL: Yes, he will.

CHAIRMAN HALL: Just get your notes from Jaime back there. She has rock crusher notes that you can just duplicate.

COMMISSIONER LoCASTRO: Lauren Maxwell just sent me

a text, and she said, "Where the hell is my husband?"

CHAIRMAN HALL: All right. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: So done.

MS. SCOTT: Oh, my gosh. I almost retired on that one.

MS. PATTERSON: Way to go, Trinity.

COMMISSIONER KOWAL: You've got one year, buddy.

COMMISSIONER McDANIEL: Yeah, I know. Thank you. The happiest part of that whole thing is you admitted being my friend.

COMMISSIONER SAUNDERS: You know he's a politician, so I wouldn't go to the bank on that one.

MS. PATTERSON: Terri, you good for one more?

THE COURT REPORTER: (Nods head.)

MS. PATTERSON: All right. Okay. We've got one more item.

COMMISSIONER LoCASTRO: I thought we have two, 11E and 12B. No? Did I miss one?

MS. PATTERSON: What?

COMMISSIONER LoCASTRO: I don't know. I'm sort of checking them off.

CHAIRMAN HALL: How fast can we do the AUIR report?

(Simultaneous crosstalk.)

MS. PATTERSON: We're not. It's continued to the 28th of January.

Item #12B

A SETTLEMENT AGREEMENT WHICH WILL DISMISS WITH PREJUDICE ALL CLAIMS BROUGHT BY NAPLES GOLF DEVELOPMENT, LLC, AGAINST COLLIER COUNTY AND COMMISSIONER MCDANIEL (CASE NOS. 2023-CA-001795 AND 2023-CA-2995), RELATED TO A BERT HARRIS CLAIM FILED PURSUANT TO FLORIDA STATUTES §70.001 REGARDING APPLICATION OF THE COUNTY'S GOLF COURSE CONVERSION ORDINANCE ON THE LINKS OF NAPLES GOLF COURSE, AND APPROVE ALL NECESSARY BUDGET AMENDMENTS. (COUNTY MANAGER'S REQUEST) - MOTION TO APPROVE BY COMMISSIONER SAUNDERS; SECONDED BY COMMISSIONER HALL (COMMISSIONER MCDANIEL ABSTAINED) – APPROVED

So all we have -- all we have left is Item 16K12 that is now 12B. This is a recommendation to approve and authorize the chairman to execute a settlement agreement which will dismiss with prejudice all claims brought by Naples Golf Development, LLC, against Collier County and Commissioner McDaniel related to a Bert Harris claim filed pursuant to Florida Statutes 70.001 regarding application of the county's golf course conversion ordinance on the Links of Naples Golf Course and approve all necessary budget amendments.

This was moved to the regular agenda by me. And County Attorney Klatzkow has some comments. I'll hand it to Commissioner LoCastro or County Attorney Klatzkow, whoever is going to take the ball.

COMMISSIONER LoCASTRO: I'll hear from the County Attorney.

MS. PATTERSON: All right. County Attorney Klatzkow.

MR. KLATZKOW: The first slide is an overview of where the Naples Golf Course is located. That is a summary of what happened.

It's just factual in nature. I don't need to repeat it.

COMMISSIONER LoCASTRO: Just go back for one second.

MR. KLATZKOW: Yeah.

COMMISSIONER LoCASTRO: Okay.

MR. KLATZKOW: We're involved in litigation in this matter. My strong recommendation -- strong recommendation is that we dispose of it with this settlement agreement.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Does this take care of the public records lawsuit as well?

MR. KLATZKOW: Yes, sir.

COMMISSIONER LoCASTRO: And then this allows the golf course owner to move forward with some sort of residential project or to sell the property to somebody who moves forward, correct?

MR. KLATZKOW: He'll probably flip it.

COMMISSIONER LoCASTRO: Yeah.

COMMISSIONER SAUNDERS: I'll make a motion to approve if there are -- it doesn't look like there are any speakers.

MR. MILLER: No.

CHAIRMAN HALL: I'll second it. All in favor, say aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: All opposed?

COMMISSIONER McDANIEL: I have to abstain. He didn't announce that, but I'm --

CHAIRMAN HALL: No worries. We passed you.

MS. PATTERSON: Commissioners, that brings us to Item 15, staff and commission general communications.

Item #15A

PUBLIC COMMENTS ON GENERAL TOPICS NOT ON THE CURRENT OR FUTURE AGENDA BY INDIVIDUALS NOT ALREADY HEARD DURING PREVIOUS PUBLIC COMMENTS IN THIS MEETING.

Item 15A, public comments on general topics not on the current or future agenda by individuals not already heard during the previous public comments in this meeting.

MR. MILLER: Oh, there is none.

MS. PATTERSON: Item 15B, project updates. There are none.

Item #15C

STAFF AND COMMISSION GENERAL COMMUNICATIONS

Which brings us to Item 15C, staff and commission general communication. I do have one housekeeping matter. We do need to schedule a mental health workshop to talk about the mental health strategic plan, which was actually mentioned when we were doing the David Lawrence item, as well as I won't take --

COMMISSIONER KOWAL: That's all right. You're just talking about --

MS. PATTERSON: Landfill.

COMMISSIONER KOWAL: -- referring to us having a part of-- work that day to talk about the future of the landfill. I wanted to bring that up, so...

MS. PATTERSON: We had planned to schedule, basically, a three-quarter day-ish workshop with mental health in the morning.

Commissioner Kowal has some comments about land -- a workshop topic on the landfill and all things solid waste, and it would be the appropriate time for us, then, to touch on our update to our strategic plan and budget.

Originally looked at a February workshop date, but based on schedules, it looks like March 6th -- 4th, 6th -- let me check again -- is going to be the date. We'll -- if this is okay with all of you, then we'll check with your aides and make sure everybody's held that date. We typically hold that first -- March 4th, I'm sorry. March 4th. We typically hold that first Tuesday of the month as a workshop date anyway, but we would utilize a good part of the day for these topics, if it's --

CHAIRMAN HALL: What'd we talk about this morning that we needed to talk about. We said we need to do that, and we thought about "we need to do it sooner than later."

COMMISSIONER McDANIEL: Landfill.

CHAIRMAN HALL: No. It was something that we talked about this morning.

COMMISSIONER SAUNDERS: That was the bay.

COMMISSIONER KOWAL: Yeah, the Clam Pass. It seemed like so long ago, yeah.

COMMISSIONER McDANIEL: Yeah, Clam Pass.

CHAIRMAN HALL: We probably need to do that sooner.

COMMISSIONER McDANIEL: Clam Bay and that whole thing.

CHAIRMAN HALL: We can get together on that.

COMMISSIONER McDANIEL: We can add that as a subject matter if you want to -- I mean, we can have a brief discussion on it. It's not going to get fixed in one workshop nor necessarily is the landfill, but --

MS. PATTERSON: No, so we --

COMMISSIONER McDANIEL: -- we can certainly have a meeting on it.

MS. PATTERSON: We can add it as a topic based on kind of where we are. I had assumed that we'll be meeting with our coastal zone folks as well as the Pelican Bay folks as well as the other interested parties to try to sort some of this out. But it may be an opportune time just to hold some time for general discussion on that because March is a long way away. So we probably can get some work done on that topic between now and then. So if that is okay with you, we'll hold March 4th for these topics, then we'll get those on your calendars with your aides.

And with that, nothing else. Merry Christmas. Happy Holidays.

County Attorney.

MR. KLATZKOW: Merry Christmas and nothing else.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Same. Merry Christmas, Happy Holidays.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: A couple quick things. As we turn the corner on 2025, let's not forget about ResourceX. I'd love to get another update from them and see what kind of progress they're making and those sort of things.

Along those same lines -- and I really don't need an answer. But I hope we learned some things on the Links Golf Course. You know, that was one that -- you know, we blew through it quickly here, but there should be a lot of learning curves on that one. It was sloppy. And I think we don't need to beat that dead horse, but it's not one of our prouder moments.

You know, in closing, I just want to -- I want to thank my colleagues for spending seven hours on Section 29. I'm sure we're all

going to get hate mail from folks that think, you know, we can just wave a magic wand and make everything perfect. But, you know, sometimes we have to say yes to things that, like, we hate a little less.

I will tell you, with having a conversation with a few powers that be afterwards, to include Mr. Yovanovich, they've got a two year -- probably two years ahead of them going through all the state and federal wickets, so that's going to -- that's going to be a while, and there's no guarantee that that will get approved, but I think we're all comfortable that we had a unanimous vote on our piece.

And then last, I want to thank Commissioner Hall. This is his last meeting as Chair. You know, it's a lot; looks easy from the cheap seats here for the four of us.

And I think Commissioner Saunders, we were talking yesterday, and, you know, he'll be the next Chair. And he was saying, you know, you do have to -- it is a different job than the four. You know, you have to really run the meeting and stay focused. You have to meet with the county staff a little bit more and really understand what's on the agenda.

Really, at any given time, the four of us could walk in here -- and I know we don't -- but could walk in here with very little knowledge of the agenda and listen and vote and, you know, that sort of thing, but the Chair doesn't really have that luxury.

I'm really impressed that all five of us run a professional meeting, and I think the Planning Commission can learn a lot from us.

But, you know, today maybe didn't turn out the way -- you know, we always say, "Somebody's going to leave here upset." And trust me, a whole bunch of people probably did. But I think -- you know, it's a big muscle movement in my district, but I'm proud of the way that we conducted ourselves, and I really appreciate the deep dive that the four of you did asking, you know, difficult questions, understanding the moving parts, and also meeting with citizens and

DRAFT

Mr. Yovanovich, and, you know, we certainly made good use of the extra month.

But, you know, having said that, see you on the flip side, 2025.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: I'd like to wish everybody a Merry Christmas and Happy Holidays, and thank you, Commissioner Hall, for running us through this past year as our chairman.

I'll swing by McDonald's drive-through, Honey, and I'll get us some anniversary food tonight.

CHAIRMAN HALL: Happy Anniversary.

COMMISSIONER McDANIEL: Yeah, Happy Anniversary.

CHAIRMAN HALL: Commissioner Saunders.

COMMISSIONER SAUNDERS: Mr. Chairman, I have 25 different items I want to go through, but in the interest of matrimonial harmony, I will just simply state Happy Anniversary and Happy Holidays to everybody, and also, thank you, Mr. Chairman, for this past year. It's been -- it's been very good, very great. So thank you.

CHAIRMAN HALL: Thank you, all. Merry Christmas to you. Thanks for the kind words. I'm ready to pass the gavel. It will be a welcome little chance.

But I enjoy working with you. I never have left they dais thinking that, oh, man, we blew this decision today or I had regrets. I've spent two years here now, and every decision that we've made, I've been very comfortable with it. And I just wanted you to know I like working with you, and I appreciate everything that everybody puts into this deal, and we got a lot more work to do coming next year.

With that, meeting adjourned.

*****

****Commissioner McDaniel moved, seconded by Commissioner LoCastro and carried that the following items under the consent and summary agendas be approved and/or adopted****

Item #16A1

REESOLUTION 2024-226: A RESOLUTION FOR FINAL ACCEPTANCE OF THE PRIVATE ROADWAY AND DRAINAGE IMPROVEMENTS AND ACCEPTANCE OF THE PLAT DEDICATIONS FOR THE FINAL PLAT OF NATIONAL GOLF AND COUNTRY CLUB AT AVE MARIA, PHASE 2, APPLICATION NUMBER PL20200001505, AND AUTHORIZE THE RELEASE OF THE MAINTENANCE SECURITIES IN THE AMOUNT OF $263,991.88

PROCLAMATION

WHEREAS, on the steps of the Lincoln Memorial, Rev. Dr. Martin Luther King Jr. spoke passionately of his dream of an America where all citizens would be judged by the content of their character and not by the color of their skin; where all Americans would enjoy the riches of freedom and the security of justice; where the doors of opportunity would be open for all; and

WHEREAS, the celebration of Dr. King's birthday is intended as a time for all Americans to reaffirm their commitment to the basic principles that underlie our Declaration of Independence and our Constitution . . . equality and justice for all; and

WHEREAS, on Monday, January 20, 2025, all people of Collier County will remember Dr. King's dream and renew our commitment to bringing forth positive change throughout our nation; and

WHEREAS, the Collier County Branch of the NAACP will help us all to remember Dr. King's dream by presenting the 28th Annual Rev. Dr. Martin Luther King, Jr. Day of Service, themed "We Must Accept Finite Disappointment, But Never Lose Infinite Hope: Dr. King's Legacy of Inclusion and Diversity."

NOW THEREFORE, be it proclaimed by the Board of County Commissioners of Collier County, Florida, that Monday, January 20, 2025, be designated as, a day to remember and celebrate

Rev. Dr. Martin Luther King Jr.'s Dream Day

DONE AND ORDERED THIS 14TH Day of January 2025.

PROCLAMATION

WHEREAS, Trinity Life Foundation, Incorporated – Naples, Florida, is a 501(3) charitable organization, was founded on the principle of making a difference for at-risk youth in Collier County; and

WHEREAS, Trinity Life Foundation acts as a provider between the Juvenile Justice System and local agencies who provide support systems for at-risk children in our community; and

WHEREAS, Collier County honors Rev. Dr. Martin Luther King Jr. Day, the established national holiday in his recognition on the third Monday of January to commemorate the life and achievement of the influential American civil rights leader; and

WHEREAS, Trinity Life Foundation established the Rev. Dr. Martin Luther King Jr. Prayer Breakfast in 2020, the first recognized event of such in Collier County, in further celebration of the works of Rev. Dr. Martin Luther King Jr.; and

WHEREAS, the sixth annual celebration, January 17, 2025, themed, "Bend Towards Justice," commemorates the Rev. Dr. Martin Luther King Jr. Prayer Breakfast as a premier annual event. The proceeds of which will go towards supporting the mission of Trinity Life Foundation; and

WHEREAS, Collier County wishes to congratulate Trinity Life Foundation on its sixth year of recognizing the efforts and advancements of Rev. Dr. Martin Luther King Jr.;

NOW, THEREFORE, be it proclaimed by the Board of County Commissioners of Collier County, Florida, that January 17, 2025, be designated as

Rev. Dr. Martin Luther King Jr. Prayer Breakfast Day

PROCLAMATION

WHEREAS, all men, women, and children residing in the United States of America, both U.S. and foreign born, have the right to individual freedom; and

WHEREAS, human trafficking is a form of modern-day slavery in which individuals experience forced labor, including but not limited to sexual exploitation by traffickers; and

WHEREAS, second only to the illegal drug trade, human trafficking is among the most lucrative crimes worldwide, and Florida has been documented as one of the largest hubs for U.S. human trafficking; and

WHEREAS, the United States Congress passed a resolution declaring that January be recognized as the national month of human trafficking prevention;

NOW THEREFORE, be it proclaimed by the Board of County Commissioners of Collier County, Florida, that January 2025 be designated as

HUMAN TRAFFICKING PREVENTION MONTH IN COLLIER COUNTY

DONE AND ORDERED THIS 14th Day of January 2025.

Executive Summary

Recommendation to adopt an Ordinance amending the Collier County Land Development Code to establish provisions for Permanent Mobile Food Dispensing Vehicles. (First of two hearings)

OBJECTIVE: To conduct the first of two hearings on a Land Development Code (LDC) amendment that establishes provisions for Permanent Mobile Food Dispensing Vehicles (MFDVs).

CONSIDERATIONS: On April 15, 2021, staff received a request for an Official Interpretation of the LDC regarding whether a food truck park is an authorized use in the Commercial Convenience District (C-2), Commercial Intermediate District (C-3), or within any commercial component of a Planned Unit Development (PUD). Staff issued an Official Interpretation (see Attachment 2) and noted that while the Commercial and Industrial zoning districts did not specifically designate food truck parks as a permitted use, the Comparable Use Determination process was established to identify similar uses in a zoning district where a proposed, unlisted use is comparable and compatible to an existing use or uses in the same zoning district. In the Official Interpretation, staff cited Hearing Examiner (HEX) Decision No. 2016-37, which established that food truck parks were comparable and compatible to restaurant use, and used this decision to determine that food trucks should be allowed in all zoning districts where restaurants are permitted. However, FCC Beach & Yacht, LLC appealed the Official Interpretation and the associated Site Development Plan that approved a food truck park on C-3-zoned property located on the Isle of Capri. Grider Revocable Living Trust filed an additional appeal of the Official Interpretation, seeking to clarify that the Official Interpretation was not site-specific.

On October 12, 2021, the Board of County Commissioners (Board) voted to accept, without comment, the four motions filed by Grider Revocable Living Trust and to hear the three aforementioned appeals as items under the Board of Zoning Appeals (BZA). During the hearing, staff opined that the allowance of food truck parks is not site-specific and should include all C-2- and C-3-zoned properties countywide. However, the BZA voted in favor of the two appeals made by FCC Beach & Yacht, LLC and determined that a food truck park is not a permitted use in the C-3 (see Attachment 3) and denied the Site Development Plan (SDP) (see Attachment 4). The BZA also denied the appeal by Grider Revocable Living Trust (see Attachment 5). The BZA was concerned about the impact a food truck park would have on the surrounding residential neighborhoods, particularly the issues of noise (outdoor amplified music) and alcohol consumption occurring at a bar/dance stage area (entertainment), such as at Celebration Park Food Truck Park. Staff was directed to develop a Land Development Code (LDC) amendment supporting the Conditional Use process with respect to food trucks (see Attachment 6).

Because this LDC amendment includes a proposed change to the list of actual permitted and conditional uses of land within a zoning category, LDC section 10.03.06 K requires two Board hearings, with at least one hearing held after 5:00 p.m. on a weekday. On January 23, 2024, staff brought forward a consent agenda item, requesting direction from the Board to waive the nighttime hearing requirement and to instead hold two regularly scheduled daytime hearings and advertise an Ordinance that would amend the LDC. The Board moved the item from the consent agenda to the regular agenda and discussed the item, unanimously voting to waive the nighttime hearing requirement (see Attachment 6). Additionally, the Board directed staff to add a provision to the LDC amendment requiring Board direction on whether the Board or the Hearing Examiner (HEX) would hear a Food Truck Park Conditional Use petition and whether the public hearing would occur during the day, on a case-by-case basis. The proposed provision at the time was as follows:

> G. Procedures for Food Truck Parks Requiring Conditional Use Approval. Prior to advertising the Conditional Use hearing, the Board shall first decide whether the BZA or the HEX will hear the matter and whether the hearing will be during the day.

The Board's first daytime public hearing occurred on February 27, 2024, when it was discussed as an advertised public hearing. Instead of voting to approve the Ordinance, the Board directed staff to rewrite the LDC amendment, and it was staff's understanding that Conditional Use approval would be required for all food trucks but that temporary use permits would also be available to operators for up to 28 days per calendar year (see Attachment 7).

On September 24, 2024, the Board approved the request staff brought forward as a consent agenda item, requesting direction to waive the nighttime hearing requirement, hold two regularly scheduled daytime hearings, and advertise an

Ordinance amending the LDC.

The noteworthy provisions of the proposed Ordinance (see Attachment 1) for food trucks are summarized as follows:

1. Creating new definitions, including a permanent Mobile Food Dispensing Vehicle (MFDV). Permanent MFDVs are not transient in nature and do not stop temporarily at a given location.

2. MFDVs will be permitted by right in the Industrial District (I) and Public Use District (P), provided there are no alcohol sales and/or amplified sound providing outdoor entertainment. If there are alcohol sales and/or amplified sound providing outdoor entertainment, then Conditional Use approval will be necessary. Conditional Use applications require a Neighborhood Information Meeting (NIM) and a public hearing, typically with the Hearing Examiner.

3. MFDVs will require Conditional Use approval in the I and P Districts if they offer alcohol sales and/or amplified sound for outdoor entertainment.

4. MFDVs will require Conditional Use approval in the Commercial Intermediate District (C-3), General Commercial District (C-4), Heavy Commercial District (C-5), and Business Park District (BP).

5. MFDVs will require Conditional Use approval if they are accessory to a regional park, such as North Collier Regional Park.

6. MFDVs are not permitted in a Planned Unit Development (PUD) unless the PUD specifically lists them as a permissible use. Adding a use to a PUD constitutes a PUD amendment, which requires a NIM, a public hearing with the Collier County Planning Commission (CCPC), and two public hearings with the Board, including a supermajority vote for approval.

7. Creating a minimum off-street parking requirement for permanent MFDVs.

8. Creating new development standards (e.g., maximum intensity, trash receptacle, appropriate on-site locations, hours of operation, etc.) for all permanent MFDVs, which shall be shown on a site development plan (SDP). All MFDVs operating in connection with a temporary use permit or temporary event are exempt from this section.

While not explicitly stated within the proposed Ordinance, it should be noted that if adopted, MFDVs will be allowed in connection with temporary use permits and special events, and these types of applications may administratively permit MFDVs on a site for up to 28 calendar days per year, regardless of the zoning district. In addition, Florida Statutes Section 509.102(2), which preempts local law, allows MFDVs to operate on the same premises as and by a separately licensed public food establishment, regardless of zoning district. Finally, staff recognizes the draft ordinance defines permanent MFDVs as those which are not transient in nature or do not stop temporarily at a given location. To offer guidance as to what constitutes transient and temporary, as contemplated, if an operator of an MFDV has consent from the property owner, the operator would be allowed to conduct business on-site for no more than two hours (excluding set up and break down time) without being subject to the proposed Ordinance. This policy for MFDVs shall be independent of any duration used in the administration of roadside stands, which are provided for in Chapter 26, Article I, Sec. 26-1 of the Collier County Code of Laws and Ordinances.

Accompanying this LDC amendment is a companion Resolution amending the Collier County Administrative Code for Land Development, which will be presented as a companion item on the consent agenda when this LDC amendment is heard at the second public hearing.

CCPC Recommendation: An earlier iteration of this LDC amendment was reviewed by the Collier County Planning Commission (CCPC) on Thursday, December 7, 2023, at 5:05 p.m. The CCPC unanimously recommended approval of this LDC amendment with the following changes requested by the Greater Naples Fire Rescue District:

1. In LDC section 5.05.16 D.3.e., include “fire lanes and access roads.”

2. In LDC section 5.05.16. F.1., require connections to propane to occur "with breakaway connections."

There were no members of the public in opposition.

DSAC RECOMMENDATION: An earlier iteration of this LDC amendment was reviewed by the Development Services Advisory Committee (DSAC) on November 1, 2023. The DSAC recommended approval, contingent upon the following changes:

1. In LDC section 5.05.16 D.2, a wall may be higher than 6 feet. Reword the statement "… unless there is at least an intervening 6-foot tall concrete or masonry wall" to read "…unless there is a concrete or masonry wall at least six feet in height."

2. In LDC section 5.06.16 F.2, replace the word " pads" with " designated areas."

3. Stipulate the amendment shall only apply to new food truck parks after the date of the adoption of the Ordinance. With the advice of the CAO, staff has determined this stipulation is unnecessary and that prior approved Food Truck Parks and site plans with MFDVs shall be nonconforming per LDC section 9.03.00.

4. Staff shall review text in LDC section 2.03.06 with the County Attorney's Office prior to the Planning Commission meeting to see if there is an opportunity for MFVD and Food Truck Parks to be a permissible use in commercial PUD districts or make a cross-reference to similar uses. After meeting with the CAO, LDC subsections 5.05.16 E.1. and E.3. have been revised to require a comparable use determination for PUD districts and similar uses.

The Land Development Review Subcommittee of the Development Services Advisory Committee (DSAC) reviewed an earlier iteration of this LDC amendment on October 17, 2023. The Subcommittee recommended approval, contingent upon using the term "full cutoff" as opposed to "fully shielded" as it relates to the use of outdoor lighting fixtures.

FISCAL IMPACT: The costs associated with processing and advertising the proposed LDC amendment are estimated at $2,016. Funds have been allocated within the Unincorporated Area General Fund (1011) and the Comprehensive Planning Cost Center (138317).

GROWTH MANAGEMENT IMPACT: No growth management impact is associated wtih this action.

LEGAL CONSIDERATIONS: This item is approved as to form and legality. An affirmative vote of four is needed for Board approval. -DDP

RECOMMENDATIONS: To adopt the proposed Ordinance amending the Collier County Land Development Code to establish provisions for permanent Mobile Food Dispensing Vehicles (MFDVs).

ORDINANCE NO. 2024 – ____

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 04-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE, WHICH INCLUDES THE COMPREHENSIVE LAND REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, TO ALLOW PERMANENT MOBILE FOOD DISPENSING VEHICLES WITH NO ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT AS PERMITTED BY RIGHT WHEN LISTED AS A PERMISSIBLE USE IN A PLANNED UNIT DEVELOPMENT OR WHERE LOCATED IN THE INDUSTRIAL DISTRICT (I) OR PUBLIC USE DISTRICT (P), AND AS A CONDITIONAL USE IN THE COMMERCIAL INTERMEDIATE DISTRICT (C-3), GENERAL COMMERCIAL DISTRICT (C-4), HEAVY COMMERCIAL DISTRICT (C-5), AND BUSINESS PARK DISTRICT (BP), IN THE INDUSTRIAL DISTRICT (I) AND PUBLIC USE DISTRICT (P) WITH ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT, AND WHEN ACCESSORY TO A REGIONAL PARK, AND ESTABLISHING REGULATIONS FOR PERMANENT MOBILE FOOD DISPENSING VEHICLES, BY PROVIDING FOR: SECTION ONE, RECITALS; SECTION TWO, FINDINGS OF FACT; SECTION THREE, ADOPTION OF AMENDMENTS TO THE LAND DEVELOPMENT CODE, MORE SPECIFICALLY AMENDING THE FOLLOWING: CHAPTER ONE – GENERAL PROVISIONS, INCLUDING SECTION 1.08.02 DEFINITIONS; CHAPTER TWO – ZONING DISTRICTS AND USES, INCLUDING SECTION 2.01.03 ESSENTIAL SERVICES, SECTION 2.03.03 COMMERCIAL ZONING DISTRICTS, SECTION 2.03.04 INDUSTRIAL ZONING DISTRICTS, SECTION 2.03.05 CIVIC AND INSTITUTIONAL ZONING DISTRICTS, AND SECTION 2.03.06 PLANNED UNIT DEVELOPMENT DISTRICTS; CHAPTER FOUR – SITE DESIGN AND DEVELOPMENT STANDARDS, INCLUDING SECTION 4.05.04 PARKING SPACE REQUIREMENTS; AND CHAPTER FIVE – SUPPLEMENTAL STANDARDS, BY ADDING A NEW SECTION 5.05.16 MOBILE FOOD DISPENSING VEHICLES, PERMANENT; SECTION FOUR, CONFLICT AND SEVERABILITY; SECTION FIVE, INCLUSION IN THE COLLIER COUNTY LAND DEVELOPMENT CODE; AND SECTION SIX, EFFECTIVE DATE. [PL20220006373]

Recitals

WHEREAS, on October 30, 1991, the Collier County Board of County Commissioners adopted Ordinance No. 91-102, the Collier County Land Development Code (hereinafter LDC), which was subsequently amended; and

WHEREAS, the Collier County Board of County Commissioners (Board) on June 22, 2004, adopted Ordinance No. 04-41, which repealed and superseded Ordinance No. 91-102, as amended, the Collier County Land Development Code, which had an effective date of October 18, 2004; and

Words ~~struck through~~ are deleted, words underlined are added.

WHEREAS, on March 18, 1997, the Board adopted Resolution 97-177 establishing local requirements and procedures for amending the LDC; and

WHEREAS, all requirements of Resolution 97-177 have been met; and

WHEREAS, the Collier County Planning Commission, sitting as the land planning agency, did hold an advertised public hearing on December 7, 2023, and reviewed the proposed amendments for consistency with the Comprehensive Plan and did recommend approval; and

WHEREAS, the Board of County Commissioners, in a manner prescribed by law, did hold an advertised public hearing on February 27, 2024, and did take action concerning these amendments to the LDC; and

WHEREAS, the subject amendments to the LDC are hereby determined by this Board to be consistent with and to implement the Collier County Growth Management Plan as required by Subsections 163.3194 (1) and 163.3202 (1), Florida Statutes; and

WHEREAS, this ordinance is adopted in compliance with and pursuant to the Community Planning Act (F.S. § 163.3161 *et seq.*), and F.S. § 125.01(1)(t) and (1)(w); and

WHEREAS, this ordinance is adopted pursuant to the constitutional and home rule powers of Fla. Const. Art. VIII, § 1(g); and

WHEREAS, all applicable substantive and procedural requirements of the law have otherwise been met.

NOW, THEREFORE BE IT ORDAINED by the Board of County Commissioners of Collier County, Florida, that:

SECTION ONE: RECITALS

The foregoing Recitals are true and correct and incorporated by reference herein as if fully set forth.

SECTION TWO: FINDINGS OF FACT

The Board of Commissioners of Collier County, Florida, hereby makes the following findings of fact:

1. Collier County, pursuant to § 163.3161, *et seq.,* F.S., the Florida Community Planning Act (herein after the "Act"), is required to prepare and adopt a comprehensive plan.

2. After adoption of the Comprehensive Plan, the Act and in particular § 163.3202(1). F.S., mandates that Collier County adopt land development regulations that are consistent with and implement the adopted comprehensive plan.

3. Section 163.3201, F.S., provides that it is the intent of the Act that the adoption and enforcement by Collier County of land development regulations for the total unincorporated area shall be based on, be related to, and be a means of implementation for, the adopted comprehensive plan.

4. Section 163.3194(1)(b), F.S., requires that all land development regulations enacted or amended by Collier County be consistent with the adopted comprehensive plan, or element or portion thereof, and any land regulations existing at the time of adoption which are not consistent with the adopted comprehensive plan, or element or portion thereof, shall be amended so as to be consistent.

5. Section 163.3202(3), F.S., states that the Act shall be construed to encourage the use of innovative land development regulations.

6. On January 10, 1989, Collier County adopted the Collier County Growth Management Plan (hereinafter the "Growth Management Plan" or "GMP") as its comprehensive plan pursuant to the requirements of § 163.3161 *et seq.,* F.S.

7. Section 163.3194(1)(a), F.S., mandates that after a comprehensive plan, or element or portion thereof, has been adopted in conformity with the Act, all development undertaken by, and all actions taken in regard to development orders by, governmental agencies in regard to land covered by such comprehensive plan or element shall be consistent with such comprehensive plan or element as adopted.

8. Pursuant to § 163.3194(3)(a), F.S., a development order or land development regulation shall be consistent with the comprehensive plan if the land uses, densities or intensities, and other aspects of development are compatible with, and further the objectives, policies, land uses, densities, or intensities in the comprehensive plan and if it meets all other criteria enumerated by the local government.

9. Section 163.3194(3)(b), F.S., states that a development approved or undertaken by a local government shall be consistent with the comprehensive plan if the land uses, densities or intensities, capacity or size, timing, and other aspects of development are compatible with, and further the objectives, policies, land uses, densities, or intensities in the comprehensive plan and if it meets all other criteria enumerated by the local government.

10. On October 30, 1991, Collier County adopted the Collier County Land Development Code, which became effective on November 13, 1991. The Land Development Code adopted in Ordinance 91-102 was recodified and superseded by Ordinance 04-41.

11. Collier County finds that the Land Development Code is intended and necessary to preserve and enhance the present advantages that exist in Collier County; to encourage the

most appropriate use of land, water and resources consistent with the public interest; to overcome present handicaps; and to deal effectively with future problems that may result from the use and development of land within the total unincorporated area of Collier County and it is intended that this Land Development Code preserve, promote, protect and improve the public health, safety, comfort, good order, appearance, convenience and general welfare of Collier County; to prevent the overcrowding of land and avoid the undue concentration of population; to facilitate the adequate and efficient provision of transportation, water, sewerage, schools, parks, recreational facilities, housing and other requirements and services; to conserve, develop, utilize and protect natural resources within the jurisdiction of Collier County; to protect human, environmental, social and economic resources; and to maintain through orderly growth and development, the character and stability of present and future land uses and development in Collier County.

12. It is the intent of the Board of County Commissioners of Collier County to implement the Land Development Code in accordance with the provisions of the Collier County Comprehensive Plan, Chapter 125, Fla. Stat., and Chapter 163, Fla. Stat., and through these amendments to the Code.

SECTION THREE: ADOPTION OF AMENDMENTS TO THE LAND DEVELOPMENT CODE

* * * * * * * * * * * * *

SUBSECTION 3.A. AMENDMENTS TO SECTION 1.08.02 DEFINITIONS

Section 1.08.02 Definitions, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

Section 1.08.02 Definitions

* * * * * * * * * * * * *

Flowway: A natural or manmade swath of land, varying in width and length, providing for the conveyance of water, primarily sheet flow, during seasonally wet periods, generally from north to south, and providing beneficial wildlife habitat and aquifer recharge.

Food truck: A type of mobile food dispensing vehicle. See mobile food dispensing vehicle definition.

* * * * * * * * * * * * *

Mixed use project approval process: A process by which a land owner may petition for approval of a mixed use project — a mix of commercial and residential uses, as provided for in certain zoning overlay districts. If located within certain subdistricts in the Bayshore Zoning

Overlay District or the Gateway Triangle Zoning Overlay District, such a petition may include a request for increased density by use of density bonus pool units.

Mobile food dispensing vehicle (MFDV): Any vehicle that is a public food service establishment and that is self-propelled or otherwise movable from place to place and includes self-contained utilities, including but not limited to gas, water, electricity, or liquid waste disposal, sometimes referred to as a food truck or trailer or food cart licensed by the State of Florida.

Mobile food dispensing vehicle (MFDV), permanent, or permanent mobile food dispensing vehicle (permanent MFDV): An MFDV that is not transient in nature or does not stop temporarily at a given location. Permanent MFDVs are subject to LDC section 5.05.16.

* * * * * * * * * * * * *

SUBSECTION 3.B. AMENDMENTS TO SECTION 2.01.03 ESSENTIAL SERVICES

Section 2.01.03 Essential Services, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

2.01.03 Essential Services

* * * * * * * * * * * * *

G. Conditional uses. The following uses require approval pursuant to LDC section 10.08.00 conditional uses:

* * * * * * * * * * * * *

3. Additional conditional uses in residential, and estate zoned districts, and in RFMU receiving and neutral lands. In residential, agricultural, and estate zoned districts and in RFMU Receiving and neutral lands, in addition to those essential services identified as conditional uses in LDC section 2.01.03 G.1. above, the following essential services shall also be allowed as conditional uses:

   a. Regional parks, including accessory permanent mobile food dispensing vehicles, and community parks;

   b. Public parks and public library facilities;

   c. Safety service facilities;

   d. Other similar facilities, except as otherwise specified herein.

* * * * * * * * * * * * *

SUBSECTION 3.C. AMENDMENTS TO SECTION 2.03.03 COMMERCIAL ZONING DISTRICTS

Section 2.03.03 Commercial Zoning Districts, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

Section 2.03.03 Commercial Zoning Districts

* * * * * * * * * * * * *

C. Commercial Intermediate District (C-3). The purpose and intent of the commercial intermediate district (C-3) is to provide for a wider variety of goods and services intended for areas expected to receive a higher degree of automobile traffic. The type and variety of goods and services are those that provide an opportunity for comparison shopping, have a trade area consisting of several neighborhoods, and are preferably located at the intersection of two-arterial level streets. Most activity centers meet this standard. This district is also intended to allow all of the uses permitted in the C-1 and C-2 zoning districts typically aggregated in planned shopping centers. This district is not intended to permit wholesaling type of uses, or land uses that have associated with them the need for outdoor storage of equipment and merchandise. A mixed-use project containing a residential component is permitted in this district subject to the criteria established herein. The C-3 district is permitted in accordance with the locational criteria for commercial and the goals, objectives, and policies as identified in the future land use element of the Collier County GMP. The maximum density permissible in the C-3 district and the urban mixed use land use designation shall be guided, in part, by the density rating system contained in the future land use element of the Collier County GMP. The maximum density permissible or permitted in the C-3 district shall not exceed the density permissible under the density rating system.

1. The following uses, as identified with a number from the Standard Industrial Classification Manual (1987), or as otherwise provided for within this section are permissible by right, or as accessory or conditional uses within the commercial intermediate district (C-3).

a. **Permitted uses**.

* * * * * * * * * * * * *

c. **Conditional uses**. The following uses are permissible as conditional uses in the commercial intermediate district (C-3), subject to the standards and procedures established in LDC sections 4.02.02 and 10.08.00.

* * * * * * * * * * * * *

17. Mixed residential and commercial uses, subject to design criteria contained in section 4.02.38 except where superseded by the following criteria:

18. Mobile food dispensing vehicle(s), permanent, subject to LDC section 5.05.16.

~~*18.*~~*19.* Motion picture theaters, (7832 - except drive-in).

[Renumber remainder of list]

* * * * * * * * * * * * *

Words ~~struck through~~ are deleted, words underlined are added.

CAO

D. General Commercial District (C-4). The general commercial district (C-4) is intended to provide for those types of land uses that attract large segments of the population at the same time by virtue of scale, coupled with the type of activity. The purpose and intent of the C-4 district is to provide the opportunity for the most diverse types of commercial activities delivering goods and services, including entertainment and recreational attractions, at a larger scale than the C-1 through C-3 districts. As such, all of the uses permitted in the C-1 through C-3 districts are also permitted in the C-4 district. The outside storage of merchandise and equipment is prohibited, except to the extent that it is associated with the commercial activity conducted on-site such as, but not limited to, automobile sales, marine vessels, and the renting and leasing of equipment. Activity centers are suitable locations for the uses permitted by the C-4 district because most activity centers are located at the intersection of arterial roads. Therefore, the uses in the C-4 district can most be sustained by the transportation network of major roads. The C-4 district is permitted in accordance with the locational criteria for uses and the goals, objectives, and policies as identified in the future land use element of the Collier County GMP. The maximum density permissible or permitted in a district shall not exceed the density permissible under the density rating system.

1. The following uses, as defined with a number from the Standard Industrial Classification Manual (1987), or as otherwise provided for within this section are permissible by right, or as accessory or conditional uses within the general commercial district (C-4).

a. ***Permitted uses.***

* * * * * * * * * * * * *

c. ***Conditional uses.*** The following uses are permissible as conditional uses in the general commercial district (C-4), subject to the standards and procedures established in LDC section 10.08.00.

* * * * * * * * * * * * *

17. Local and suburban transit (groups 4111—4121, bus stop and van pool stop only).

18. Mobile food dispensing vehicle(s), permanent, subject to LDC section 5.05.16.

~~*18.*~~*19.* Motion picture theaters, drive-in (7833).

[Renumber remainder of list]

* * * * * * * * * * * *

E. Heavy Commercial District (C-5). In addition to the uses provided in the C-4 zoning district, the heavy commercial district (C-5) allows a range of more intensive commercial uses and services which are generally those uses that tend to utilize outdoor space in the conduct of the business. The C-5 district permits heavy

Words ~~struck through~~ are deleted, words underlined are added.

commercial services such as full-service automotive repair, and establishments primarily engaged in construction and specialized trade activities such as contractor offices, plumbing, heating and air conditioning services, and similar uses that typically have a need to store construction-_associated equipment and supplies within an enclosed structure or have showrooms displaying the building material for which they specialize. Outdoor storage yards are permitted with the requirement that such yards are completely enclosed or opaquely screened. The C-5 district is permitted in accordance with the locational criteria for uses and the goals, objectives, and policies as identified in the future land use element of the Collier County GMP.

1. The following uses, as identified with a number from the Standard Industrial Classification Manual (1987), or as otherwise provided for within this section are permissible by right, or as accessory or conditional uses within the heavy commercial district (C-5).

a. **Permitted uses**.

* * * * * * * * * * * * *

c. **Conditional uses**. The following uses are permissible as conditional uses in the heavy commercial district (C-5), subject to the standards and procedures established in LDC section 10.08.00.

* * * * * * * * * * * * *

12. Local and suburban passenger transportation (4131—4173).

13. Mobile food dispensing vehicle(s), permanent, subject to LDC section 5.05.16.

~~*13.*~~*14.* Motion picture theaters, drive-in (7833).

[Renumber remainder of list]

* * * * * * * * * * * * *

SUBSECTION 3.D. AMENDMENTS TO SECTION 2.03.04 INDUSTRIAL ZONING DISTRICTS

Section 2.03.04 Industrial Zoning Districts, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

2.03.04 Industrial Zoning Districts

A. Industrial District (I). The purpose and intent of the industrial district (I) is to provide lands for manufacturing, processing, storage and warehousing, wholesaling, and distribution. Service and commercial activities that are related to manufacturing, processing, storage and warehousing, wholesaling, and distribution activities, as well as commercial uses relating to automotive repair and heavy equipment sales and repair are also permissible in the I district. The I district corresponds to and implements the industrial land use designation on the future land use map of the Collier County GMP.

1. The following uses, as identified within the Standard Industrial Classification Manual (1987), or as otherwise provided for within this section, are permitted as a right, or as accessory or conditional uses within the industrial district (I).

a. **Permitted uses**.

1. Agricultural services (0711, except that chemical treatment of soil for crops, fertilizer application for crops and lime spreading for crops shall be a minimum of 500 feet from a residential zoning district, 0721, except that aerial dusting and spraying, disease control for crops, spraying crops, dusting crops, and insect control for crops, with or without fertilizing, shall be a minimum of 500 feet from a residential zoning district. 0722-0724, 0761, 0782, 0783).

* * * * * * * * * * * * *

34. Miscellaneous services (8999).

35. Mobile food dispensing vehicle(s), permanent, with no alcohol sales and/or amplified sound providing outdoor entertainment, subject to LDC section 5.05.16.

35~~5~~*6.* Motor freight transportation and warehousing (4212, 4213—4225, 4226 except oil and gas storage, and petroleum and chemical bulk stations).

[Renumber remainder of list]

c. **Conditional uses**. The following uses are permitted as conditional uses in the industrial district (I), subject to the standards and procedures established in LDC section 10.08.00.

* * * * * * * * * * * * *

10. Lumber and wood products (2411, 2421, 2429).

11. Mobile food dispensing vehicle(s), permanent, with alcohol sales and/or amplified sound providing outdoor entertainment, subject to LDC section 5.05.16.

~~*11.*~~*12*. Motor freight transportation and warehousing (4226, oil and gas storage, and petroleum and chemical bulk stations, but not located within 500 feet of a residential zoning district).

[Renumber remainder of list]

* * * * * * * * * * * * *

Words ~~struck through~~ are deleted, words underlined are added.

B. Business Park District (BP). The purpose and intent of the business park district (BP) is to provide a mix of industrial uses, corporate headquarters offices and business/professional offices which complement each other and provide convenience services for the employees within the district; and to attract businesses that create high value-added jobs. It is intended that the BP district be designed in an attractive park-like environment, with low structural density and large landscaped areas for both the functional use of buffering and enjoyment by the employees of the BP district. The BP district is permitted by the urban mixed use, urban commercial, and urban-industrial districts of the future land use element of the Collier County GMP.

1. The following uses, as identified within the latest edition of the Standard Industrial Classification Manual, or as otherwise provided for within this section, are permitted as of right, or as uses accessory to permitted primary or secondary uses, or are conditional uses within the business park district.

a. *Permitted primary uses.* One hundred percent of the total business park district acreage is allowed to be developed with the following uses:

* * * * * * * * * * * * *

d. **Conditional uses**:

1. Ancillary plants.

2. Mobile food dispensing vehicle(s), permanent, subject to LDC section 5.05.16.

~~2.~~*3.* Vehicle racing - applicable to the Immokalee Regional Airport only.

* * * * * * * * * * * * *

SUBSECTION 3.E. AMENDMENTS TO SECTION 2.03.05 CIVIC AND INSTITUTIONAL ZONING DISTRICTS

Section 2.03.05 Civic and Institutional Zoning Districts, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

2.03.05 Civic and Institutional Zoning Districts

A. Public Use District (P). The purpose and intent of public use district (P) is to accommodate only local, state and federally owned or leased and operated government facilities that provide essential public services. The P district is intended to facilitate the coordination of urban services and land uses while minimizing the potential disruption of the uses of nearby properties.

1. Any public facilities that lawfully existed prior to the effective date of this Code and that are not zoned for public use district (P) are determined to be conforming with these zoning regulations.

Words ~~struck through~~ are deleted, words underlined are added.

2. Any future expansion of these public facilities on lands previously reserved for their use shall be required to meet the regulations in effect for the zoning district in which the public facility is located.
3. Government-owned properties rented or leased to nongovernmental entities for purposes not related to providing governmental services or support functions to a primary civic or public institutional use shall not be zoned for the public use district (P), but rather, shall be zoned or rezoned according to the use types or the use characteristics which predominate.
4. The following uses are permitted as of right, or as accessory or conditional uses, in the public use district (P).

a. **Permitted uses**.

* * * * * * * * * * * * *

9. Libraries.

10. Mobile food dispensing vehicle(s), permanent, with no alcohol and/or amplified sound providing outdoor entertainment, subject to LDC section 5.05.16.

~~10.~~11. Museums.

[Renumber remainder of list]

c. **Conditional uses**. The following uses are permissible as conditional uses in the public use district (P), subject to the standards and procedures established in LDC section 10.08.00:

* * * * * * * * * * * * *

9. Mental health and rehabilitative facilities, not for profit.

10. Mobile food dispensing vehicle(s), permanent, with alcohol and/or amplified sound providing outdoor entertainment, subject to LDC section 5.05.16.

11~~10~~. Resource recovery plants.

[Renumber remainder of list]

* * * * * * * * * * * * *

SUBSECTION 3.F. AMENDMENTS TO SECTION 2.03.06 PLANNED UNIT DEVELOPMENT DISTRICTS

Section 2.03.06 Planned Unit Development Districts, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

Section 2.03.06 Planned Unit Development Districts

* * * * * * * * * * * * *

I. Mobile food dispensing vehicle(s) (MFDV), permanent is not an allowed use in a PUD unless the PUD specifically lists it as a permissible use.

* * * * * * * * * * * * *

SUBSECTION 3.G. AMENDMENTS TO SECTION 4.05.04 PARKING SPACE REQUIREMENTS

Section 4.05.04 Parking Space Requirements, of Ordinance 04-41, as amended, the Collier County Land Development Code, is hereby amended to read as follows:

4.05.04 Parking Space Requirements

* * * * * * * * * * * * *

G. Spaces required.

Table 17. Parking Space Requirements.

* * * * * * * * * * * * *

Medical/dental office or clinic (outpatient care facility)	1 per 200 square feet
Mobile food dispensing vehicle(s), permanent and subject to LDC section 5.05.16.	3 per mobile food dispensing vehicle and 1 per 4 outdoor seats.
Motel	12 per 10 guestrooms (this includes the required parking for the motel office and all accessory recreational facilities designed primarily for motel guests). Where accessory uses are designed primarily for motel guests, they shall be computed as follows: 67 percent of normal requirements for restaurants, 1 per 350 square feet for other retail uses, 1 per 100 square feet for meeting rooms, ballrooms and convention rooms and 1 per 75 square feet for lounges, bars and nightclubs.

SUBSECTION 3.H. AMENDMENT TO ADD NEW SECTION 5.05.16 MOBILE FOOD DISPENSING VEHICLES, PERMANENT

Section 5.05.16 Mobile Food Dispensing Vehicles and Food Truck Parks, is hereby added to the Collier County Land Development Code to read as follows:

Words ~~struck through~~ are deleted, words underlined are added.

5.05.16 Mobile Food Dispensing Vehicles, Permanent

A. Purpose and intent. The purpose and intent of these regulations are to establish the allowable operation, proper placement, and permitting for permanent mobile food dispensing vehicles (permanent MFDVs).

B. Applicability. This section shall be applicable to all permanent MFDVs.

C. Exemptions. MFDVs operating in connection with a temporary use permit or temporary event in accordance with LDC section 5.04.01 and LDC section 5.04.05, respectively, shall not be subject to this section.

D. Requirements and standards for all permanent MFDVs.

1. Each MFDV shall operate from within a designated area constructed of material in conformance with LDC section 4.05.02 B.1., shown on the site development plan.

2. A maximum of five MFDV designated areas shall be permitted for each acre of a parcel.

3. One trash receptacle is required for each MFDV.

4. To reduce the potential impact on abutting residential uses, MFDVs shall not operate a generator within 20 feet of a property developed with a residential use, unless there is a concrete or masonry wall at least six feet in height.

5. No MFDV or MFDV designated area shall be placed upon or operate from any of the following:

   a. Required yards, open space, preserves, landscape buffers, or within conservation or drainage easements;

   b. Required parking spaces;

   c. Public or private road rights-of-way or access easements; or

   d. In such a manner as to block accessways, walkways, driveways, loading zones, fire lanes, access roads, or otherwise interfere with vehicular or pedestrian circulation.

6. All MFDV operators and patrons shall have access to on-site, non-portable restrooms.

7. Any MFDV that is operated on the same premises as and by a separately licensed public food establishment may operate during the same hours of operation as the separately licensed public food establishment that operates such MFDV, as permitted by F.S. Section 509.102(2). However, the MFDV shall require Conditional Use approval if the intent is to operate before or after the posted hours of operation of the separately licensed public food establishment.

Words ~~struck through~~ are deleted, words underlined are added.

SECTION FOUR: CONFLICT AND SEVERABILITY

In the event that any provisions of this ordinance should result in an unresolved conflict with the provisions of the Land Development Code (LDC) or Growth Management Plan (GMP), the applicable provisions of the LDC or GMP shall prevail. In the event this Ordinance conflicts with any other Ordinance of Collier County or other applicable law, the more restrictive shall apply. If any phrase or portion of this Ordinance is held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portion.

SECTION FIVE: INCLUSION IN THE COLLIER COUNTY LAND DEVELOPMENT CODE

The provisions of this Ordinance shall become and be made a part of the Land Development Code of Collier County, Florida. The sections of the Ordinance may be renumbered or re-lettered to accomplish such, and the word "ordinance" may be changed to "section," "article," or any other appropriate word.

SECTION SIX: EFFECTIVE DATE

This Ordinance shall become effective upon filing with the Florida Department of State.

PASSED AND DULY ADOPTED by the Board of County Commissioners of Collier County, Florida, this _____ day of _____ 2024.

RE: INTP-2021-PL-0943, FOOD TRUCKS AS PERMITTED USES IN THE C-2 AND C-3 ZONING DISTICT, OFFICIAL INTERPRETATION REQUEST

Dear Mr. Arnold:

Pursuant to Land Development Code (LDC) Section 1.06.01.D, the Planning and Zoning Director has been requested to render an official interpretation of the Collier County Land Development Code (LDC), for FCC Beach & Yacht, LLC, PL20210000943. The official interpretation responds to the below request:

The applicant seeks to confirm that a "Food Truck Park", "Food Truck Court", or "Mobile Food Vending Park", is not a permitted use in the C-2 and C-3 Zoning Districts, or within any commercial component of a Planned Unit Development (PUD), unless the specific use of a "Food Truck Park", "Food Truck Court", or "Mobile Food Vending Site" (hereinafter collectively referred to as "Food Truck Park") is identified as a permitted use within the commercial zoning district or commercial component of a PUD.

This interpretation also seeks to confirm that a "Food Truck Park", may not be deemed a permitted use within the C-2 and C-3 Zoning Districts, or any commercial component of a PUD. The interpretation seeks to confirm that the LDC must be amended to allow Food Truck Parks as an allowed use assuming the Board of County Commissioners agrees such a use should be allowed.

Response

The uses provided for within the C-2 and C-3 zoning districts, as enumerated within LDC sections 2.03.03.B and 2.03.03.C currently do not list food truck park as a permitted use. LDC section 2.03.03.B.1.a.74 (C-2 permitted use) and 2.03.03.C.1.a.96 (C-3 permitted use) provide for the following uses, "*Any other commercial convenience use which is comparable in nature with the list of permitted uses and consistent with the purpose and intent statement of the district, as determined by the Hearing Examiner or CCPC, pursuant to LDC section 10.02.06 K.*" & "*Any other intermediate commercial use which is comparable in nature with the list of permitted uses and consistent with the purpose and intent statement of the district, as determined by the Hearing Examiner or CCPC, pursuant to LDC section 10.02.06 K.*"

As noted within your application LDC section 2.03.00.A states, "*Rules for Interpretation of Uses. In any zoning district, where the list of permitted uses contains the phrase "any other use which is comparable in nature with the foregoing uses and is consistent with the permitted uses and purpose and intent statement of the district" or any similar phrase which provides for a use which is not clearly defined or described in the list of permitted uses, which requires the discretion of the County Manager or designee as to whether or not it is permitted in the district, then the determination of whether or*

not that use is permitted in the district shall be made through the process outlined in LDC section 10.02.06 K."

Further LDC section 10.02.06.K in part reads, "*Comparable Use Determination.1.The following Comparable Use Determination (CUD) shall be used to determine whether a use is comparable in nature with the list of permitted uses, and the purpose and intent statement of the zoning district, overlay, or PUD.2.To be effective, the Comparable Use Determination shall be approved by the Hearing Examiner by decision, or Board of Zoning Appeals by resolution, at an advertised public hearing based on the following standards…*"

Within Hearing Examiner Decision HEX NO. 2016-37 (Attachment "A"), the Hearing Examiner determined that the proposed use of a food truck park is comparable and compatible in nature to other permitted uses in the General Commercial (C-4) zoning district and affirmed staff's determination as stated in the Zoning Verification Letter ZVL(CUD)-PL20160001881, which was an attachment of the decision.

Zoning Verification Letter PL20160001881, which initiates the comparable use determination, requested that staff determine that the use of "food truck park" is comparable with the permitted use in the C-4 district of "eating and drinking establishments" or SIC 5812. The conclusion of that zoning verification letter determined that, "*the requested use is comparable and compatible to other permitted uses in the district and is therefore a permitted use. In order to become valid, this determination requires affirmation by the Hearing Examiner.*" As noted, HEX NO. 2016-37 affirmed the determination of the zoning verification letter PL20160001881. Based upon the determination, food truck parks are treated as permitted uses within zoning districts that permit SIC 5812, subject to whatever size limitations imposed by the respective zoning district. Both the C-2 and C-3 zoning districts permit SIC 5812 with square footage limitations and based upon HEX NO. 2016-37 determination, food truck parks are permitted within those zoning districts subject to the square footage limitations.

Further evidence of the position that food truck parks are permitted within the zoning districts that permitted SIC 5812, eating establishments, ZLTR-PL20190002574 (Attachment "B"), determined that a food truck park was permitted within the Industrial zoning district under Eating Establishment (SIC 5812). ZLTR-PL20200001955 (Attachment "C") provides a second example where the County determined that the C-3 zoning district permits restaurants/food truck establishments (SIC 5812) by right.

While the Commercial and Industrial zoning districts do not specifically designate food trucks as permitted uses, the Comparable Use determination process has been established to identify similar uses to a zoning district when the proposed use has been determined to be comparable and compatible to existing uses in the zoning district. Hearing Examiner Decision No. 2016-37, established food truck parks as comparable and compatible to a restaurant use and based upon that determination, all zoning districts that permit restaurants (SIC 5812) are determined to also permit food trucks subject to whatever restrictions imposed by the zoning district including square footage limitations.

Pursuant to Division 10.02.02.F. of the LDC, this interpretation has been sent to you via certified mail, return receipt requested. As this is a site-specific interpretation, all property owners within 300 feet of the subject property will receive mail notice and a copy of this interpretation and appeal time frames will be placed in the Naples Daily News. Within 30 days of receipt of this letter, or within 30 days of publication of the public notice, any affected property owner or aggrieved or adversely affected party may appeal the interpretation

to the Office of the Hearing Examiner, as directed by Section 2-87 of the Collier County Code of Laws and Ordinances.

A request for an appeal must be filed in writing within 30 days of the date of this Official Interpretation and must state the basis for the appeal and include any pertinent information, exhibits, or other back-up information in support of the appeal. The appeal must be accompanied by a $1,000.00 application and processing fee. If payment is in the form of a check, it should be made out to the Collier County Board of Commissioners. An appeal can be hand delivered or mailed to my attention at the address provided. Please do not hesitate to contact me should you have any further questions on this matter.

Sincerely,

MPB

RESOLUTION NO. 2021 – 216

A RESOLUTION APPROVING AN APPEAL OF OFFICIAL INTERPRETATION INTP-PL20210000943 AND FINDING THAT A FOOD TRUCK PARK IS NOT A PERMITTED USE IN THE C-2 AND C-3 ZONING DISTRICTS. [PL20210002121]

WHEREAS, the Legislature of the State of Florida in Chapter 67–1246, Laws of Florida, and Chapter 125, Florida Statutes, has conferred on all counties in Florida the power to establish, coordinate and enforce zoning and such business regulations as are necessary for the protection of the public; and

WHEREAS, the County pursuant thereto has adopted a Land Development Code (Ordinance No. 2004-41, as amended) which establishes regulations for the zoning of particular geographic divisions of the County; and

WHEREAS, FCC Beach & Yacht, LLC filed a request for an official interpretation of the Land Development Code seeking to confirm that a food truck park is not a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts or any commercial component of a Planned Unit Development; and

WHEREAS, on August 4, 2021, the Zoning Director issued Official Interpretation INTP-PL20210000943 (the "Official Interpretation") finding that a food truck park is a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts; and

WHEREAS, on August 24, 2021, an appeal of the Official Interpretation was submitted by Richard D. Yovanovich, Esq., of Coleman, Yovanovich & Koester, P.A., on behalf of FCC Beach & Yacht, LLC, owners of property within 300 feet of the proposed food truck park; and

WHEREAS, on October 12, 2021, the Board of County Commissioners, acting as the Board of Zoning Appeals (the "Board"), held a properly noticed public hearing to consider Petition ADA-PL20210002121; and

WHEREAS, all interested parties have been given the opportunity to be heard by this Board in public meeting assembled, and the Board has fully considered all matters presented.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF ZONING APPEALS OF COLLIER COUNTY, FLORIDA, that:

1. The Board finds that a food truck park is not a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts.

2. Petition Number ADA-PL20210002121, submitted by Richard D. Yovanovich, Esq., of Coleman, Yovanovich & Koester, P.A., on behalf of FCC Beach & Yacht, LLC, is

hereby APPROVED in accordance with the record of the proceedings of the public hearing held before the Board of County Commissioners, acting as the Board of Zoning Appeals, on October 12, 2021.

BE IT FURTHER RESOLVED that this Resolution be recorded in the minutes of this Board.

This Resolution adopted by the Board after motion, second and majority vote this 12th day of October, 2021.

RESOLUTION NO. 2021 – 217

A RESOLUTION APPROVING AN APPEAL OF, AND DENYING, THE ADMINISTRATIVE APPROVAL OF A FOOD TRUCK PARK SITE DEVELOPMENT PLAN, SDP-PL20200001903. [PL20210001944]

WHEREAS, the Legislature of the State of Florida in Chapter 67–1246, Laws of Florida, and Chapter 125, Florida Statutes, has conferred on all counties in Florida the power to establish, coordinate and enforce zoning and such business regulations as are necessary for the protection of the public; and

WHEREAS, the County pursuant thereto has adopted a Land Development Code (Ordinance No. 2004-41, as amended) which establishes regulations for the zoning of particular geographic divisions of the County; and

WHEREAS, FCC Beach & Yacht, LLC filed a request for an official interpretation of the Land Development Code seeking to confirm that a food truck park is not a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts or any commercial component of a Planned Unit Development; and

WHEREAS, on July 29, 2021, County staff issued a Site Development Plan (SDP) approval letter, PL20200001903, for a food truck park on 2.21 acres located at 300, 320, and 322 Capri Boulevard and 218 Kon Tiki Drive, within the Commercial Intermediate Zoning District, C-3; and

WHEREAS, on August 4, 2021, an appeal of the administrative approval of the SDP was submitted by Richard D. Yovanovich, Esq., of Coleman, Yovanovich & Koester, P.A., on behalf of FCC Beach & Yacht, LLC, owners of property within 300 feet of the proposed food truck park; and

WHEREAS, on October 12, 2021, the Board of County Commissioners, acting as the Board of Zoning Appeals (the "Board"), held a properly noticed public hearing to consider Petition ADA-PL20210001944; and

WHEREAS, all interested parties have been given the opportunity to be heard by this Board in public meeting assembled, and the Board has fully considered all matters presented.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF ZONING APPEALS OF COLLIER COUNTY, FLORIDA, that:

1. Petition Number ADA-PL20210001944, submitted by Richard D. Yovanovich, Esq., of Coleman, Yovanovich & Koester, P.A., on behalf of FCC Beach & Yacht, LLC, is hereby APPROVED for the reasons set forth in the record of the public hearing held before the Board of County Commissioners, acting as the Board of Zoning Appeals, on October 12, 2021.

2. The administrative approval of the food truck park site development plan, SDP-PL20200001903, is reversed and hereby DENIED.

BE IT FURTHER RESOLVED that this Resolution be recorded in the minutes of this Board.

This Resolution adopted by the Board after motion, second and majority vote this 12th day of October, 2021.

RESOLUTION NO. 2021 – 218

A RESOLUTION DENYING AN APPEAL BY THE GRIDER REVOCABLE LIVING TRUST OF OFFICIAL INTERPRETATION INTP-PL20210000943. [PL20210002241]

WHEREAS, the Legislature of the State of Florida in Chapter 67–1246, Laws of Florida, and Chapter 125, Florida Statutes, has conferred on all counties in Florida the power to establish, coordinate and enforce zoning and such business regulations as are necessary for the protection of the public; and

WHEREAS, the County pursuant thereto has adopted a Land Development Code (Ordinance No. 2004-41, as amended) which establishes regulations for the zoning of particular geographic divisions of the County; and

WHEREAS, FCC Beach & Yacht LLC filed a request for an official interpretation of the Land Development Code seeking to confirm that a food truck park is not a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts or any commercial component of a Planned Unit Development; and

WHEREAS, on August 4, 2021, the Zoning Director issued Official Interpretation INTP-PL20210000943 finding that a food truck park is a permitted use in the Commercial Convenience District (C-2) and Commercial Intermediate District (C-3) zoning districts; and

WHEREAS, Robert K. Lincoln, Esq. of the Law Office of Robert K. Lincoln, P.A. and Noel J. Davies, Esq. of Davies Duke, PLLC, representing the Grider Revocable Living Trust, filed Petition ADA-PL20210002241, which appealed the administrative approval of INTP-PL20210000943 to clarify that the official interpretation is not site specific; and

WHEREAS, on October 4, 2021, counsel for Grider Revocable Living Trust provided a conditional withdrawal letter stating the following:

> Regarding the above-referenced matter, based on representations from the County that the subject of the Official Interpretation is not site-specific and Mr. Yovanovich's agreement to same, my client hereby withdraws its above-referenced Appeal of Official Interpretation.

WHEREAS, on October 12, 2021, the Board of County Commissioners, acting as the Board of Zoning Appeals (the Board), held a properly noticed public hearing to consider Petition ADA-PL20210002241; and

WHEREAS, all interested parties have been given the opportunity to be heard by this Board in public meeting assembled, and the Board has fully considered all matters presented.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF ZONING APPEALS OF COLLIER COUNTY, FLORIDA, that:

1. Petition Number ADA-PL20210002241 filed by Robert K. Lincoln, Esq. of the Law Office of Robert K. Lincoln, P.A., and Noel J. Davies, Esq. of Davies Duke, PLLC, representing the Grider Revocable Living Trust, is hereby DENIED for the reasons set forth in the record of the public hearing held before the Board of County Commissioners, acting as the Board of Zoning Appeals, on October 12, 2021.

BE IT FURTHER RESOLVED that this Resolution be recorded in the minutes of this Board.

TRANSCRIPT OF THE MEETING OF THE BOARD OF COUNTY COMMISSIONERS
Naples, Florida, January 23, 2024

LET IT BE REMEMBERED that the Board of County Commissioners, in and for the County of Collier, and also acting as the Board of Zoning Appeals and as the governing board(s) of such special districts as have been created according to law and having conducted business herein, met on this date at 9:00 a.m., in REGULAR SESSION in Building "F" of the Government Complex, East Naples, Florida, with the following Board members present:

Chairman: Chris Hall
Rick LoCastro
Dan Kowal
William L. McDaniel, Jr.
Burt L. Saunders

ALSO PRESENT:
Amy Patterson, County Manager
Daniel Rodriguez, Deputy County Manager
Jeffrey A. Klatzkow, County Attorney
Crystal K. Kinzel, Clerk
Troy Miller, Communications & Customer Relations

the ground and make something pencil today. Jamie will probably back me up on that one. It just doesn't work. And so that's all going to stop. And we don't believe we're going to have the labor problems that we had before, and we've learned our lessons related to subs and contractors, et cetera, and we've already got a plan in place to make this much quicker.

CHAIRMAN HALL: Great. Thank you, Pat.

So we have a motion and a second. All in favor, say aye.

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: Moving forward.

MR. SHEAR: Thank you.

Item #11C

WAIVING THE NIGHTTIME HEARING REQUIREMENT AND HEAR A LAND DEVELOPMENT CODE AMENDMENT REGARDING FOOD TRUCKS AND FOOD TRUCK PARKS AT TWO REGULARLY SCHEDULED DAYTIME BOARD OF COUNTY COMMISSIONER MEETINGS AND APPROVE A REQUEST TO ADVERTISE THE LAND DEVELOPMENT CODE AMENDMENT – MOTION TO APPROVE WITH MODIFICATIONS BY COMMISSIONER SAUNDERS; SECONDED BY COMMISSIONER KOWAL – APPROVED

MS. PATTERSON: Commissioners, that brings us to Item 16A7, now Item 11C. This is a recommendation to waive the nighttime hearing requirement and hear a Land Development Code

amendment regarding food trucks and food truck parks at two regularly scheduled daytime Board of County Commissioners meetings and approve a request to advertise Land Development Code amendment.

This is being brought to the agenda at Commissioner Saunders' request, and Mr. Mike Bosi, your Director of Planning and Zoning, is here to answer questions or present.

COMMISSIONER SAUNDERS: Mr. Chairman, I can be very quick. Obviously, food truck parks can have a rather significant impact on a community. And I know that there was a public hearing and I guess a neighborhood information meeting.

And my question is for the Board, because this can be such an impactful type of a project, should we have at least one nighttime hearing? I'm not a fan of nighttime hearings even though we've got one this evening. But I'm just wondering, in terms of this particular issue whether or not that should be given some consideration. I'm okay with having both hearings during the day, but I wanted to at least have a little bit of discussion as to whether we should open this up a little bit more. So that's my question.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Yeah. Thank you, Chairman.

I like the idea of at least testing it, you know. We're hearing from a lot of citizens who they would like to see this meeting in the evening, which is not realistic. You know, we get those emails all the time. You know, we're all at work and we can't participate. And it's like, okay, we're at work, too, and this is where our work happens.

You know, if you remember back to the conversation of the Isles of Capri food truck park, and then we talked a bit about Celebration Park, I think when it comes to the food trucks, it's still a really new

and unique, you know, type of thing that we don't have our arms fully around. So one of the things I've said generically is night, day, evening, morning, whenever, I'm all for, you know, not squelching citizen comment or flushing out as much back -- feedback as we can get.

So it doesn't mean we're passing something that says from here on out in perpetuity we'll have all nighttime meetings, but I didn't know if there was something in the middle that showed we were trying to be positive, and then if it didn't have a positive result, then, okay, we tried it. And so -- I don't know. That was just my initial thought. I might not know every single detail that you're trying to kind of cover, but my initial thought was it doesn't hurt, and we see what happens, but...

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Yeah. And I agree. I mean, if it's -- I think in this digital age that we have with hybrid meetings -- I know we all do town halls and have them with multiple, multiple options for folks to attend. You know, I'm not opposed to having an evening meeting, at least one of these hearings in the evening, but I'm -- you know, if -- on the same token, I don't really see the need for it either. It's conducting business.

And I take -- I know myself, and I know most of us do as well -- personally, I take emails and phone calls and comments from people whether they're standing at the podium and wearing a red shirt -- in the room as most important as the folks that are standing at the podium and wearing a red shirt [sic].

So, I mean, what was your intent, Commissioner Saunders? I mean, I think the intent was to waive the hearings, the nighttime hearings, and hear these -- hear these food truck amendments during the day.

COMMISSIONER SAUNDERS: Well, that's what the request

is of staff, and I understand it, and there was a public hearing in the evening on this early on. But people don't really get energized over issues until they see something in the paper or they know something's coming up for us to vote on.

Now, this is not site specific, and so it may not generate any interest, but if there was a food truck park, for example, going into Isle of Capri, as an example, the one we had, there would be tremendous interest in that because it's site specific.

So there may not even be anybody that would show up for this. But these are very controversial, and that's just a thought.

But as I said, I have no issues with having two daytime hearings, but I just thought it was worth a discussion on an issue like this.

COMMISSIONER McDANIEL: When I was reviewing this, I was -- this is more of an adoption of the Land Development Code criterium to -- because the way I understand it, we're going to be hearing every single one of these. It's going to become a conditional use when one of these proposed already existent zoning classifications qualifies for a food truck park. That's still not going to be a by-right process. They still have to come to us, and that would be -- those would be the ones that I would prefer, when the site-specific ones are coming to us, that maybe we move those to a nighttime hearing. But this one is -- this is just Land Development Code adjustments to facilitate those site-specific and move them to -- my understanding is move them to a conditional-use process.

COMMISSIONER SAUNDERS: Well, that convinces me that we don't need to have a night hearing on this as long as we are flexible to having a night hearing when an application comes before us.

COMMISSIONER McDANIEL: I'm looking at him making sure he's shaking his head positively, because I don't want to misquote what his intent is.

MR. BOSI: And, Mike Bosi, zoning director.

As it's proposed, there's not a requirement. And the conditional use is triggered when you have any proposed outdoor amplified sound or alcohol being associated with these food trucks. One food truck at a commercial center that doesn't have amplified sound or alcohol does not require a Board approval. That could be straight -- a Site Development Plan amendment. But it's if they have alcohol involved or if they have alcohol and it is amplified sound, those are the ones that require conditional uses.

COMMISSIONER SAUNDERS: Well, what I was looking at was there's two things here. It's regarding food trucks and food truck parks, and it was the food truck parks --

MR. BOSI: Parks.

COMMISSIONER SAUNDERS: -- that's got my attention. We certainly don't need a nighttime hearing on an application for putting a food truck at a bazaar, at a park, or something like that. But if we're going to develop a food truck park similar to what was discussed on Isles of Capri, then I think something like that probably should come back at night.

So I'll make the motion to approve waiving the nighttime hearing for this purpose. But if we do have a food truck park -- it's not part of the motion. But if we do have a food truck park, I think consideration should be given to having something like that in the evening.

MR. BOSI: And staff can modify the proposed language to put verbiage that we will poll the Board of County Commissioners as to whether you would like to see that conditional-use hearing moved to a nighttime hearing.

COMMISSIONER SAUNDERS: That would be perfect.

MR. BOSI: We can put that within the proposed ordinance. We'll make some modifications.

Just to let you know, we did have a nighttime hearing with the Planning Commission on the 7th of December. There were no public who attended. And I think you're right, unless it's a site-specific location, it's hard to get the public to get excited about the proposal of an LDC amendment.

COMMISSIONER SAUNDERS: So I'll make that motion to approve this with the understanding that if there is a food truck park, that the Board will be presented with the opportunity to have a night hearing if the Board so chooses at that time.

COMMISSIONER McDANIEL: Second.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chair.

Yeah, I mean, I was on the same lines with Commissioner McDaniel on the way I looked at this. And now Mr. Bosi's kind of confirmed it, that, you know, if it's specific and we're looking at a particular park and somebody wants to develop -- designate their food trucks -- and, I mean, you could see we've already exercised our time-certain. We're going to do that today at 5 o'clock.

And I think, you know, we get the temperature of our constituents on a particular item like this, if there is a food truck, that we're going to hear it, and, you know, a park, we're going to hear it in the future regardless, that, you know, we can always exercise the time-certain, you know, and not have to create a whole, you know, 'nother ordinance or something just on those lines. So I feel comfortable with the motion the way it is, so I'll second it.

CHAIRMAN HALL: So just to follow up my comments, you know, I don't want to get into the habit of every hot issue that comes up that we need to feel obligated to do it in the evening meeting.

I know, like Commissioner McDaniel, I've got the best interest of my constituents. It may not be what I personally want to do, but I'm going to back them. That's what they elected me to do.

And whether they're in the room at 7 o'clock at night or whether they're -- they've made their emails plain, their phone calls plain, I don't take any -- no one's more important here than they are on my email. And I want to say that because I don't mind doing -- I'm not a -- let's see. I'm not opposed to making the extra effort, but I don't want to get into the habit of feeling like we need to pacify people that just can make it in the evenings when they have every ample opportunity to let us know and to communicate in times advanced.

So with that comment, we have a motion and we have a second to waive this. All in favor?

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

MS. PATTERSON: Commissioners, that is the end of our regular agenda items except for public comment on general topics not on the current or future agenda that weren't addressed previously. It may be something -- do we have one now?

MR. MILLER: Well, that's just it. I have a Zoom person that was mislabeled. Actually, we probably should have heard them at 7. With your indulgence, can we hear them now?

CHAIRMAN HALL: Yes.

MR. MILLER: Jackie Keay is joining us on Zoom.

Jackie, you're being prompted to unmute yourself. I know you're there, Jackie. There you go. You have three minutes.

MS. KEAY: Can you hear me?

MR. MILLER: Yes, we can.

MS. KEAY: Oh, I'm here for sure.

MR. MILLER: Go ahead, Jackie.

MS. KEAY: So good afternoon. My name is Jackie Keay. I

TRANSCRIPT OF THE MEETING OF THE BOARD OF COUNTY COMMISSIONERS
Naples, Florida February 27, 2024

LET IT BE REMEMBERED that the Board of County Commissioners, in and for the County of Collier, and also acting as the Board of Zoning Appeals and as the governing board(s) of such special districts as have been created according to law and having conducted business herein, met on this date at 9:00 a.m., in REGULAR SESSION in Building "F" of the Government Complex, East Naples, Florida, with the following Board members present:

Chairman: Chris Hall
Rick LoCastro
Dan Kowal
William L. McDaniel, Jr.
Burt L. Saunders

ALSO PRESENT:
Amy Patterson, County Manager
Daniel Rodriguez, Deputy County Manager
Jeffrey A. Klatzkow, County Attorney
Crystal K. Kinzel, Clerk
Troy Miller, Communications & Customer Relations

MR. YOVANOVICH: I think that's all you are limited to do.

COMMISSIONER KOWAL: I'll amend my motion then, if I can do so.

CHAIRMAN HALL: Sure.

COMMISSIONER KOWAL: All right. Make a motion to reject the original interpretation as not being based on competent substantial evidence.

CHAIRMAN HALL: Second.

All in favor?

Aye.

COMMISSIONER SAUNDERS: Aye.

COMMISSIONER KOWAL: Aye.

CHAIRMAN HALL: All opposed?

COMMISSIONER McDANIEL: Aye.

COMMISSIONER LoCASTRO: Aye.

CHAIRMAN HALL: Same motion carries, just different words.

MR. PIRES: Thank you, Mr. Chairman.

COMMISSIONER McDANIEL: Coordinated adjectives.

Item #9D

ORDINANCE AMENDING THE COLLIER COUNTY LAND DEVELOPMENT CODE TO ESTABLISH PROVISIONS FOR FOOD TRUCK PARKS AND MOBILE FOOD DISPENSING VEHICLES. [PL20220006373] (FIRST OF TWO HEARINGS) (ALL DISTRICTS) - DIRECTION FOR STAFF TO BRING BACK A REPORT AT A FUTURE BCC MEETING

MS. PATTERSON: Commissioners, that brings us to Item 17C, now Item 9D. This is a recommendation to adopt an ordinance

amending the Collier County Land Development Code to establish provisions for food truck parks and mobile food dispensing vehicles. This is being moved to the regular agenda by each commissioner's separate request, and Mr. Bosi is here to present.

MR. BOSI: Good afternoon. Mike Bosi, Planning and Zoning director.

Before you today we have the proposed LDC amendments related to how the county will handle food truck and food truck parks moving forward.

We had a recommendation, some modifications that were provided by the DSAC, a recommendation of approval and site modifications related to fire lanes that came from the Planning Commission.

We had no public opposition to the proposal, and we placed it on your summary agenda.

A couple days ago, Mr. Yovanovich and Mr. Wayne Arnold submitted some material asking for some changes to the -- to the proposed ordinance and want to provide the Board the opportunity to weigh in on those proposed changes to get some direction.

The way that we've had it proposed, right now in the C-2 -- C-3, C-4, and C-5 zoning district, if the Board -- if the food truck did not contain alcohol sales and amplified sound permit, it would be a permitted use. If it contained alcohol and/or the amplified sound, it would be a conditional use. It's been suggested by Mr. Yovanovich that that -- in the C-3, C-4, and C-5, that all of them should be proposed as conditional uses to provide for an extra layer of protection an extra analysis of compatibility to make sure that nothing will crop up from the development of these food trucks.

We also have a provision that within the C-1, C-2, or C-3 categories -- or, I'm sorry, C-3, C-4, or C-5 categories, that two or less trucks could go in as a matter of right, not as a food truck, but

just as stand-alone trucks as well. Not sure if the Board of County Commissioners had any issue with that, but I don't think that has been addressed by Mr. Yovanovich's letter. I wanted to see what the appetite of the Board of County Commissioners was regarding those individual changes.

CHAIRMAN HALL: Say that again. So two trucks could go in by right?

MR. BOSI: Two trucks or less could go in by right within the C-3, C-4, or C-5 zoning district as an accessory use to the primary use on the property.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chair.

I actually sent a note immediately to Ms. Patterson to pull this, and I'm glad to see the other commissioners thought so. I hadn't seen Mr. Yovanovich's letter yet, but then when I saw it, there was -- most of what was in the letter I agreed with, and it made me think back to the last time we talked about food trucks and what we all sort of collectively said, which was, we want to have closer oversight that a food truck park, whether it's two trucks or five trucks or eight trucks, they're all a bit different.

I remember us talking about we don't really have our hands around, you know, what a food truck park could turn into, and we referenced Celebration Park. I always say the people that love Celebration Park are usually the people that don't live near it.

And so I didn't want -- I didn't want to see anything on the summary agenda that made looser approval of food truck parks. And I don't think 10 of them are going to come to us every meeting. And maybe in a year, we could write something that maybe -- once we get a little bit more knowledge and we feel more comfortable that we haven't just let these things plop around.

And when I met with the staff hearing that there are single food

trucks all over one particular district which, you know, I won't name here, but that commissioner probably knows that have popped up with minimal to no approvals, but, you know, they're kind of in an okay spot and it's not a big deal, and that's not the way the county should work.

So to me, if it's -- you know, if we want to have something that allows one truck, there should be some verbiage. To me, two trucks or more is a park, or could be. And then when we spoke, you know, privately in my office, you know, Mr. Bosi and, you know, Mr. French and Ms. Scott were there. You know, my concern is these things -- you know, two food trucks park in a parking lot seems like no big deal, but then somebody has a birthday party there, you know, on a Friday night, and so then they hire a band, and then we get a million e-mails that the noise is too much even though, you know, it's written in there, no music, no nothing.

And so my thought was these things are still pretty fresh. I don't think we -- you know, we -- it costs us too much to have these things be vetted a little bit until we really get a better feel for it. And then I also think the ones that were brought to my attention that are just sort of parking outside of restaurants and sitting there until somebody says something, we need to take a look at those because when we send a signal to the restaurateurs that, hey, Bob parked his food truck there, it's been there for six months, and nobody said anything; that's how these things pop up, and then they start to grow. You know, you talk to citizens around Celebration Park; they never thought it would turn into what some people tell me, and I agree, is sort of like an outdoor Seed to Table.

And I'm not saying they're breaking any laws or anything, but, boy, we sure do get a lot of pushback. And then we even hear from our own staff when we had this conversation before about food trucks that, wow, it sort of got -- it got bigger than what we kind of thought

it would be.

So I pulled it just because I wanted to have a discussion and maybe that -- and, you know, I said this to you, Mr. Bosi, I'm not -- my position isn't to be directive to you and say, here's what it should say, but I'd like -- I'd feel a lot better if the staff took a look at it a little bit deeper and came back with more detailed verbiage that would give us better oversight for any of these requests that we're sort of bigger than a breadbox, and I think it's most of them. And it's not a big number.

So I remember one time, a commissioner that used to sit here, Commissioner Solis, one time he said at a meeting -- I don't even know if I was elected -- and he says, I don't want to be approving a food truck park, you know, in every single meeting, you know. We should leave that to the staff. We're not going to get that many.

But I think -- I'll just speak for my district, District 1, I'd like to have tighter oversight so I know where they're going. I want to make sure the constituents are pleased with it, and that they're not just -- I'm not going to just drive by one day and go, wow, where did that come from, and then find out from the staff, oh, remember when you thinned out the rules? Well, they're not in violation of anything. It's okay. So that's why I pulled it.

Seeing other names of commissioners there, I'd love to hear from the other commissioners. Maybe they pulled it for a different reason. But I pulled it because I really wanted something more detailed to come back from the staff that would give us more oversight and visibility and tighter control and approval. I'm not saying, you know, we shoot down every food truck park, but that was my reasoning, so...

CHAIRMAN HALL: So before I go to Commissioner McDaniel, and then Commissioner Kowal's on deck, in staff meetings yesterday, you explained it very well about, you know, the

taco truck and when it just shows up and then when a permit's required and then versus the continued use or by right.

MR. BOSI: And we have a provision towards where if it's a food truck park just parking at an establishment for four hours or less, there's no permit that would be required. If there's -- the second stage above that is the accessory food truck -- food truck that's at an establishment that permits food truck parks. Those can be permitted through a Site Development Plan improvement or Site Development Plan insubstantial change for one or two food trucks, and it sounds like there is some concern --

CHAIRMAN HALL: How long? How long would that permit last?

MR. BOSI: Permanently.

COMMISSIONER LoCASTRO: Permanently.

MR. BOSI: Permanently. And then the third tier is your food truck park, and those are the ones that we're proposing in C-3, C-4, and C-5. Like I said, we had a differential. If you had amplified music and alcohol sales, that's a conditional use. If you had just -- if those weren't present, they could be permitted.

It sounds like, at least from -- one commissioner would agree with Mr. Yovanovich, would like to see all of those food truck parks be placed as a conditional use for the Board of County Commissioners to evaluate whether it's an appropriate use or not?

CHAIRMAN HALL: Yes.

Commissioner McDaniel.

COMMISSIONER McDANIEL: One other one would, too. I -- and I also -- I want to be very careful and distinguish between permittable uses and illegal uses. The abuse that happens with food trucks at large is rampant. We've got a commercial -- we've got a lot of -- and, you know, we just had a discussion about neighbors and where the comma is, and what the proper -- what the proper adjective

was, but neighborhood commercial is different than C-3, C-4, C-5, but that doesn't mean that a C-4 -- C-3, C-4, C-5 isn't in a neighborhood.

And we have people -- I have people taking advantage of that. They park a food truck in their parking lot, theoretically by right, and then start consuming parking spaces that are available for a restaurant and then push the parking for other commercial properties that are in close proximity away and start taking up -- taking advantage of other people's property rights for the utilization of their own property by consuming land that's over here because they haven't necessarily done what they needed to do with a proper SDP.

And I think we're not going to get overwhelmed with these things, and if we do, we can make a change at some particular stage. But I would -- individually, this is very -- to me this is, they have the right to ask, but we need to see what those impacts are on the nearby surrounding area to be able to make a determination and put limitations on noise and alcohol and parking and so on and so forth.

CHAIRMAN HALL: Commissioner Kowal.

COMMISSIONER KOWAL: Thank you, Chair.

I definitely know the difference between the roach coach and a mobile one. They show up at the worksites at lunchtime and, you know, you get a hot meal, if you can. And I don't have a problem with that. You know, they're mobile.

And then it comes down again mobile versus nonmobile. I mean, we have mobile homes that have been on blocks for 40 years. They're still called a mobile home.

And sometimes these food trucks find a home in a parking lot somewhere, and they're not truly mobile. You know, they're there permanently. And I know the -- I just want to get more insight; maybe you can help me.

Is the -- let's say Commissioner Saunders' district, for instance,

I'm familiar with, you know, the tiki hut that serves the beer and the wine in the parking lot, you know, in the evening hours. That being a parking lot, being a C-3, I think it is, or whatever that particular plaza is, they would be able to have a food truck come, set up there the way it's written now. But who would watch to make sure they don't get a temporary amplified sound permit for one night or something like that?

Because then it would kind of circumvent the process of saying, well, these are just allowed because they're not going to have amplified sound and not alcohol, but they are catering to a business that serves alcohol and that because they don't provide food. So what safeguard do we have that this is [sic] going to -- a reoccurring thing in a property that's very close to residential property, like in Commissioner Saunders' district?

MR. JOHNSON: Thank you, Mr. Chair.

Eric Johnson, for the record, planning manager.

So I think what you're asking about are mobile food dispensing vehicles that are accessory to an already established principal use.

COMMISSIONER KOWAL: Yes.

MR. JOHNSON: And if -- so one or two wanted to come in, they wouldn't -- there are some standards that are proposed right now, and if they wanted to sell alcohol or have --

COMMISSIONER KOWAL: That's not what I said.

MR. JOHNSON: Oh, sorry.

COMMISSIONER KOWAL: They don't sell alcohol, they don't have amplified sound, but the business that doesn't provide food does serve alcohol. Like I use that example is that tiki hut which doesn't have a restaurant connected to it. It just has a beer and wine license in a parking lot, but then they want food service through a food truck, and then they get an amplified sound permit for the one evening every Friday, temporary, how do we control that?

MR. JOHNSON: Well, the principal use would be allowed to continue to sell their alcohol as they normally would. The accessory use, mobile dispensing vehicle, would be allowed there by right as long as they're not having any amplified sound associated with outdoor entertainment or selling alcohol from that particular unit; however, I think --

COMMISSIONER KOWAL: So we would have a provision in there to say, well, are you a food truck, and you're asking for a temporary sound permit, and we'd deny them?

MR. JOHNSON: If they're a food truck and they want to have amplified sound associated with outdoor entertainment --

COMMISSIONER KOWAL: Temporary. Because people can do that, even for your home.

MR. JOHNSON: We would consider --

COMMISSIONER KOWAL: If you throw a party, you have to get a permit for a temporary amplified sound permit.

MR. JOHNSON: We would consider temporary to be something that would require a comparable-use determination. That would go to the Hearing Examiner.

We also have a temporary-use permit that allows these mobile food dispensing vehicles to be at a particular site for no more than 28 days within a calendar year. There's also exceptions where the Board of County Commissioners would be able to have -- under certain circumstances to be able to increase the number of days beyond that 28 days. I don't know if I answered your question.

COMMISSIONER KOWAL: I think it was just more on the grounds of are we going to be able to have the ability to supervise this in a way that they're not getting this temporary sound permit even though they're a food truck, and they're telling you they don't serve alcohol and they don't have sound, but they're obtaining it for that particular evening, you know, because it's a Friday night, and

they're entertaining. So that's what I'm -- I guess that's where I'm going at with it.

MR. JOHNSON: The language right now just has it where, if they want to have it for one day or more, that would require a comparable-use determination, but we could --

COMMISSIONER KOWAL: Okay. That kind of answered my question.

MR. JOHNSON: Which would go to the Hearing Examiner.

COMMISSIONER KOWAL: Okay.

MR. JOHNSON: Now, we could structure it so that if they want to apply for a temporary-use permit for a day or two days or under -- you know, within the constraints of that, that could also be a means to accomplish that. It depends on what you want. The way we have it structured --

COMMISSIONER KOWAL: What I'm trying to do is -- you're saying it's by right because they don't have music and they don't serve alcohol.

MR. JOHNSON: Yes.

COMMISSIONER KOWAL: But if they circumvent the system by running down and getting a temporary permit for a Friday or Saturday night, now they basically pulled one over you on, and they are having amplified music, and they're by right there. That's all I'm trying to say. Is there any way or mechanism we're going to have in place that this won't happen?

MR. JOHNSON: We would want to -- if they were going to have it just one day or more, that would be a comparable-use determination.

COMMISSIONER KOWAL: Okay.

MR. JOHNSON: That's even above and beyond the temporary-use permit. That's a public hearing.

COMMISSIONER KOWAL: Okay.

CHAIRMAN HALL: Commissioner McDaniel.

COMMISSIONER McDANIEL: Henceforth, conditional use, whether it's one or 10 or two.

I mean, the second -- the second circumstance that's becoming very prevalent as well is containers, shipping containers. They're wrapping them and then dumping them -- dropping them off and calling them food trucks.

We had -- I think over in Immokalee, I have -- now, those aren't legally permitted, but that's what they're doing is they're calling them food trucks and dumping them -- putting them on commercially zoned vacant lots.

Now, they don't have permits. They're not legal. And that's the difference -- distinguishment between the two.

But the concern I have is I just don't -- I just don't want to do a by-right conversion of commercial to an entirely separate use without -- without having -- without having the capacity to say no. If we do that by right, it happens.

MR. JOHNSON: Understood. And we could structure it so that any instance of these things would require a conditional-use approval.

COMMISSIONER McDANIEL: That's a simple answer for me.

MR. BOSI: And what I would say is we do have a provision for a temporary-use permit where we issued the -- at a variety of special events, temporary use for food trucks, but those were only limited to 28 days, and they have to be -- you know, there's a tight window towards where they could -- you know, could operate.

So what I'm hearing from the Board of County Commissioners, bring you something back that any proposed food truck would require a conditional use. And I'm also -- what I'm hearing, do you want that to go to the HEX with the discretion of the Board of County

Commissioners, or do you want that just to come to the Board of County Commissioners?

COMMISSIONER McDANIEL: In my personal opinion, it can go to the HEX. We have the right, if one gets approved by the HEX that there is issues with, we could always pull it and appeal that decision. I mean, it certainly would streamline the process to allow it to go to the HEX. We've already determined that we all have the right to appeal that decision and/or that process even in midstream. I'm okay with it going to the HEX.

CHAIRMAN HALL: Commissioner LoCastro.

COMMISSIONER LoCASTRO: Thank you, Chairman.

I'm okay with it going to the HEX as well because, I mean, as involved commissioners, you have to monitor what's going to the HEX, if it's something like a food truck. And, I mean, I had one in my district that got approved by the HEX, and then I was like, no, not so fast, and then I brought it back here. So I'm good with that.

What I would just like to see -- and I don't know if this is a motion, direction, or I've even got support from my fellow commissioners here. I would like to see what you just said, Mr. Bosi, is take what we've said up here, and I'd like to just see better verbiage.

The reason I pulled this, I just didn't like the verbiage. It seemed very thin and loose, and last we talked about food trucks, we wanted to -- not tighter control, but better oversight. And what I read that was in the agenda, it seemed -- and then I saw Mr. Yovanovich's letter, and I thought, yeah, that's kind of what I was just thinking. He just said it better.

And so I would just like to see something come back to us and then see if we all agree. But, you know, I think most people up here, you know, want to have better oversight of the food trucks, and we're already hearing that some people are already circumventing the

system. Bring us some verbiage that allows that to not happen as much so that we can do something about it.

And like I said in my office is, you said maybe -- it was Mr. Bosi -- you were, like, there's more than a few people circumventing it. Well, then let's get some verbiage in there so that, you know, then our code enforcement folks can do something about it and maybe are supported a little bit more possibly.

MR. BOSI: Well -- and I understand, and we'll bring that back. What I will say is any of those food trucks that haven't been permitted on a temporary basis or if they've been there permanent and they haven't gone through the process, those are illegal. Those aren't endorsed by this code.

So, you know, if a code enforcement officer is alerted towards it, you know, we can most certainly take action.

But we will come back with a process that requires -- a conditional-use process for all food truck -- food trucks, whether food truck or food truck parks. We also allow for the temporary-use permit for that 28 days. But we'll bring it back based upon the contours of what you guys would like and see if we met the mark with that.

COMMISSIONER LoCASTRO: That's what I was looking for.

CHAIRMAN HALL: That's fine with me. Do we need a motion or --

COMMISSIONER LoCASTRO: Do we need a motion for that, or we just give direction?

MR. KLATZKOW: Direction's fine.

CHAIRMAN HALL: That's perfect.

MR. BOSI: Thank you.

MR. MILLER: Mr. Chair, I do have two registered speakers. Richard Yovanovich and Wayne Arnold.

MR. YOVANOVICH: If it's okay, I'll waive.
CHAIRMAN HALL: All right.
MR. ARNOLD: Same here; I'll waive.
CHAIRMAN HALL: Thank you, gentlemen.
COMMISSIONER LoCASTRO: Was there a rumble out in the parking lot? Mr. Bosi's got his jacket off. Did something happen during lunch, you know? Did something happen?
CHAIRMAN HALL: Mr. Yovanovich may want to hear again where you said that he said it better.
COMMISSIONER LoCASTRO: Well, I didn't really mean that. He said it different. As Commissioner McDaniel always says, I'm going to say it different.
COMMISSIONER McDANIEL: Same thing but different.
COMMISSIONER LoCASTRO: Same thing but different.
CHAIRMAN HALL: What's next, Ms. Patterson?

Item #10B

THE MCDOWELL HOUSING PARTNERS - EKOS ON COLLIER PROJECT APPROVAL OF WORKFORCE HOUSING LAND ACQUISITION SURTAX FUNDING, MADE DURING DISCUSSION OF ITEM #11B AT THE JANUARY 23, 2024, BCC MEETING. (ALL DISTRICTS) - MOTION TO MOVE THE PROJECT FORWARD WITH FUNDING BY COMMISSIONER SAUNDERS; SECONDED BY COMMISSIONER LOCASTRO – APPROVED

MS. PATTERSON: That brings us to Item 10B. This is a recommendation to hear the reconsideration of the McDowell Housing Partners Ekos on Collier project approval of workforce housing land acquisition surtax funding made during discussion of

Naples, FL 34112

RE: February 27, 2024, BCC Agenda Item 17.C., LDC amendments related to the establishment of provisions for Food Truck Parks and Mobile Food Dispensing Systems

Dear Chairman Hall:
I am writing to you to request that you remove agenda item 17.C. from the Summary Agenda. This item relates to Food Truck Parks and makes them permitted uses in the C-3 and C-4 zoning districts. I am further requesting that the Board of County Commissioners modify the draft ordinance to make a food truck park, whether having alcohol service or live entertainment a conditional use in the C-3 and C-4 zoning districts.

I have several concerns about making food truck parks permitted uses by right in the C-3 and C-4 zoning districts. First, a food truck park is not comparable to a bricks and mortar restaurant in its operation or site characteristics. The collection of multiple mobile food dispensing vehicles does not require permanent utility connections and will most commonly utilize gasoline generators for the food dispensing vehicle. While the proposed supplementary standards require a 6' high wall where a generator is utilized, the requirement does not consider the physical location of the generator and the proximity to nearby residential dwellings. Permitting the food truck park as a conditional use would review the potential noise impacts associated with the use of a generator.

Second, food truck parks by their nature will have outdoor dining areas and no permanent building as the principal use. There are no standards proposed dealing with the aesthetics of a grouping of mobile food dispensing vehicles on a property. Brick and mortar buildings in Collier County area subject to architectural and site design standards, which does not seem consistent with the County's intent to ensure that Collier County maintains an aesthetically appealing atmosphere for our residents and guests. The proposed amendments also establish standards for mobile food dispensing vehicles to be accessory uses on any property wherein a food truck park is a permitted use. This could greatly increase the number of food truck parks permanently operating in the County. This means that any other C-3 use (retail or office) could have a collection of food trucks operating on their site as a permitted accessory to the principal use. This should be further controlled through the Temporary

Q. Grady Minor & Associates, P.A.

www.gradyminor.com

Use Permit review process whereby the location of improvements, vehicles, seating and the like can be reviewed in the context of proximity to residences and for a limited number of days rather than a permanent use of the property.

Third, and most importantly, making a food truck park a conditional use will provide for public notice and input into a use, that without conditions (whether serving alcohol or having amplified sound), may not be appropriate for a proposed location. The conditional use process will allow staff, the public and the Hearing Examiner the opportunity to evaluate the proposed use and location as to consistency with the LDC, whether ingress/egress and pedestrian safety are adequately addressed, evaluate the impact of noise and odor on adjacent and nearby properties, and whether or not the proposed food truck park will be compatible with surrounding development. Arrangement of the mobile dispensing vehicles, existing and proposed buffers, distance from nearby residences and physical site improvements should all be evaluated in the public forum.

I plan to be in attendance at the February 27, 2024 Board of County Commissioners meeting and look forward to further discussion as to why the food truck park use should be a conditional use rather than a permitted use in Collier County.

Sincerely,

D. Wayne Arnold, AICP

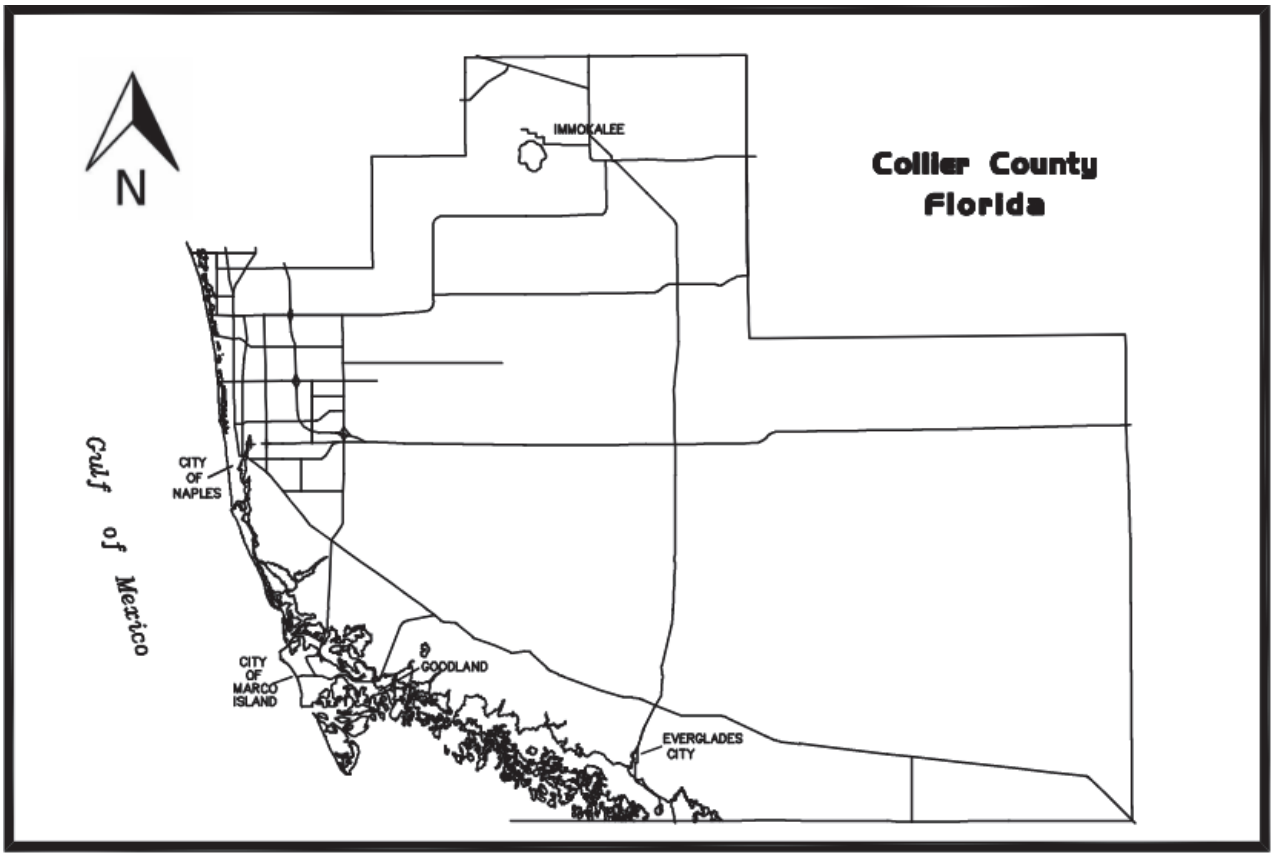
NOTICE OF INTENT TO CONSIDER AN ORDINANCE

Notice is hereby given that a public hearing will be held by the **Collier County Board of County Commissioners (BCC)** at **9:00 A.M.** on **January 14, 2025**, in the Board of County Commissioners meeting room, third floor, Collier Government Center, 3299 East Tamiami Trail, Naples FL to consider:

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 04-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE, WHICH INCLUDES THE COMPREHENSIVE LAND REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, TO ALLOW PERMANENT MOBILE FOOD DISPENSING VEHICLES WITH NO ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT AS PERMITTED BY RIGHT WHEN LISTED AS A PERMISSIBLE USE IN A PLANNED UNIT DEVELOPMENT OR WHERE LOCATED IN THE INDUSTRIAL DISTRICT (I) OR PUBLIC USE DISTRICT (P), AND AS A CONDITIONAL USE IN THE COMMERCIAL INTERMEDIATE DISTRICT (C-3), GENERAL COMMERCIAL DISTRICT (C-4), HEAVY COMMERCIAL DISTRICT (C-5), AND BUSINESS PARK DISTRICT (BP), IN THE INDUSTRIAL DISTRICT (I) AND PUBLIC USE DISTRICT (P) WITH ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT, AND WHEN ACCESSORY TO A REGIONAL PARK, AND ESTABLISHING REGULATIONS FOR PERMANENT MOBILE FOOD DISPENSING VEHICLES, BY PROVIDING FOR: SECTION ONE, RECITALS; SECTION TWO, FINDINGS OF FACT; SECTION THREE, ADOPTION OF AMENDMENTS TO THE LAND DEVELOPMENT CODE, MORE SPECIFICALLY AMENDING THE FOLLOWING: CHAPTER ONE – GENERAL PROVISIONS, INCLUDING SECTION 1.08.02 DEFINITIONS; CHAPTER TWO – ZONING DISTRICTS AND USES, INCLUDING SECTION 2.01.03 ESSENTIAL SERVICES, SECTION 2.03.03 COMMERCIAL ZONING DISTRICTS, SECTION 2.03.04 INDUSTRIAL ZONING DISTRICTS, SECTION 2.03.05 CIVIC AND INSTITUTIONAL ZONING DISTRICTS, AND SECTION 2.03.06 PLANNED UNIT DEVELOPMENT DISTRICTS; CHAPTER FOUR – SITE DESIGN AND DEVELOPMENT STANDARDS, INCLUDING SECTION 4.05.04 PARKING SPACE REQUIREMENTS; AND CHAPTER FIVE – SUPPLEMENTAL STANDARDS, BY ADDING A NEW SECTION 5.05.16 MOBILE FOOD DISPENSING VEHICLES, PERMANENT; SECTION FOUR, CONFLICT AND SEVERABILITY; SECTION FIVE, INCLUSION IN THE COLLIER COUNTY LAND DEVELOPMENT CODE; AND SECTION SIX, EFFECTIVE DATE. [PL20220006373]



A copy of the proposed Ordinance is on file with the Clerk to the Board and is available for inspection. All interested parties are invited to attend and be heard.

All persons wishing to speak on any agenda item must register with the County Manager prior to presentation of the agenda item to be addressed. Individual speakers will be limited to three (3) minutes on any item. The selection of any individual to speak on behalf of an organization or group is encouraged. If recognized by the Chairman, a spokesperson for a group or organization may be allotted ten (10) minutes to speak on an item. Written materials intended to be considered by the Board shall be submitted to the appropriate County staff a minimum of seven (7) days prior to the public hearing. All materials used in presentations before the Board will become a permanent part of the record.

As part of an ongoing initiative to encourage public involvement, the public will have the opportunity to provide public comments remotely, as well as in person, during this proceeding. Individuals who would like to participate remotely should register through the link provided within the specific event/meeting entry on the Calendar of Events on the County website at www.colliercountyfl.gov/our-county/visitors/calendar-of-events after the agenda is posted on the County website. Registration should be done in advance of the public meeting, or any deadline specified within the public meeting notice. Individuals who register will receive an email in advance of the public hearing detailing how they can participate remotely in this meeting. Remote participation is provided as a courtesy and is at the user's risk. The County is not responsible for technical issues. For additional information about the meeting, please call Geoffrey Willig at 252-8369 or email to Geoffrey.Willig@colliercountyfl.gov.

Any person who decides to appeal any decision of the **Board** will need a record of the proceedings pertaining thereto and therefore, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Division, located at 3335 Tamiami Trail East, Suite 101, Naples, FL 34112-5356, (239) 252-8380, at least two (2) days

prior to the meeting. Assisted listening devices for the hearing impaired are available in the Board of County Commissioners Office.

Business Impact Estimate

This form should be included in the agenda packet for the item under which the proposed ordinance is to be considered and must be posted on the County's website by the time notice of the proposed ordinance is published.

Published on County website by: December 26, 2024 [expected legal advertising date]

Proposed ordinance's Short Title:
AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 04-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE, WHICH INCLUDES THE COMPREHENSIVE LAND REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, TO ALLOW PERMANENT MOBILE FOOD DISPENSING VEHICLES WITH NO ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT AS PERMITTED BY RIGHT WHEN LISTED AS A PERMISSIBLE USE IN A PLANNED UNIT DEVELOPMENT OR WHERE LOCATED IN THE INDUSTRIAL DISTRICT (I) OR PUBLIC USE DISTRICT (P), AND AS A CONDITIONAL USE IN THE COMMERCIAL INTERMEDIATE DISTRICT (C-3), GENERAL COMMERCIAL DISTRICT (C-4), HEAVY COMMERCIAL DISTRICT (C-5), BUSINESS PARK DISTRICT (BP), AND IN THE INDUSTRIAL DISTRICT (I) AND PUBLIC USE DISTRICT (P) WITH ALCOHOL SALES AND/OR AMPLIFIED SOUND PROVIDING OUTDOOR ENTERTAINMENT, AND WHEN ACCESSORY TO A REGIONAL PARK, AND ESTABLISHING REGULATIONS FOR PERMANENT MOBILE FOOD DISPENSING VEHICLES, BY PROVIDING FOR: SECTION ONE, RECITALS; SECTION TWO, FINDINGS OF FACT; SECTION THREE, ADOPTION OF AMENDMENTS TO THE LAND DEVELOPMENT CODE, MORE SPECIFICALLY AMENDING THE FOLLOWING: CHAPTER ONE – GENERAL PROVISIONS, INCLUDING SECTION 1.08.02 DEFINITIONS; CHAPTER TWO – ZONING DISTRICTS AND USES, INCLUDING SECTION 2.01.03 ESSENTIAL SERVICES, SECTION 2.03.03 COMMERCIAL ZONING DISTRICTS, SECTION 2.03.04 INDUSTRIAL ZONING DISTRICTS, SECTION 2.03.05 CIVIC AND INSTITUTIONAL ZONING DISTRICTS, AND SECTION 2.03.06 PLANNED UNIT DEVELOPMENT DISTRICTS; CHAPTER FOUR – SITE DESIGN AND DEVELOPMENT STANDARDS, INCLUDING SECTION 4.05.04 PARKING SPACE REQUIREMENTS; AND CHAPTER FIVE – SUPPLEMENTAL STANDARDS, BY ADDING A NEW SECTION 5.05.16 MOBILE FOOD DISPENSING VEHICLES, PERMANENT; SECTION FOUR, CONFLICT AND SEVERABILITY; SECTION FIVE, INCLUSION IN THE COLLIER COUNTY LAND DEVELOPMENT CODE; AND SECTION SIX, EFFECTIVE DATE. [PL20220006373]

This Business Impact Estimate is provided in accordance with section 125.66(3), Florida Statutes. If one or more boxes are checked below, this means the County is of the view

that a business impact estimate is not required by state law[1] for the proposed ordinance, but the County is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

- ☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the county government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☐ The proposed ordinance is enacted to implement the following:
  a. Development orders and development permits, as those terms are defined in Section 163.3164, and development agreements, as authorized by the Florida Local Government Development Agreement Act under Sections 163-3220-163.3243;
  b. Comprehensive Plan amendments and land development regulation amendments initiated by application by a private party other than Collier County;
  c. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
  d. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
  e. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

In accordance with the provisions of controlling law, even notwithstanding the fact that an exemption noted above may apply, the County hereby publishes the following information:

1. Summary of the proposed ordinance (must include a statement of the public purpose, such as serving the public health, safety, morals and welfare):
To provide vendors of permanent mobile food dispensing vehicles the opportunity to lawfully operate within the unincorporated lands of Collier County. The purpose of the proposed Ordinance is to preserve and enhance the present advantages that exist in Collier County; encourage the most appropriate use of land, water, and resources, consistent with the public interest; overcome present handicaps; and deal effectively with future problems that may result from the use and development of land within the total unincorporated area of Collier County. This Ordinance is intended to preserve, promote, protect, and improve the public health, safety, comfort, good order, appearance, convenience, and general welfare of Collier County; and protect human, environmental, social, and economic resources; and maintain through orderly growth and development, the character and stability of present and future land uses and development in Collier County.

[1] See Section 125.66(3)(c), Florida Statutes.

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the County, if any:
(a) An estimate of direct compliance costs that businesses may reasonably incur;
(b) Any new charge or fee imposed by the proposed ordinance or for which businesses will be financially responsible; and
(c) An estimate of the County's regulatory costs, including estimated revenues from any new charges or fees to cover such costs.

Applicants for permanent mobile food dispensing vehicles may be expected to pay up to approximately $10,140 in County fees, which includes the $4000 Conditional Use application when such application is applicable.

3. Good faith estimate of the number of businesses likely to be impacted by the proposed ordinance:

The proposed Ordinance lists mobile food dispensing vehicle(s), permanent, as either a permitted, conditional, or accessory use on over 4,737 parcels, including but not limited to regional parks, and located on lands throughout the County in any of the following zoning districts: Industrial, Business Park, Public Use, Commercial Intermediate, General Commercial, and Heavy Commercial. There are approximately 256 non-residential Zoning Certificates that have been issued.

There is at least one Planned Unit Development that lists mobile food trucks as a permitted use (Emmanuel Lutheran Church CFPUD).

As of October 1, 2024, a total of 17 food truck zoning certificates have been issued.

4. Additional information the governing body deems useful (if any):
[*You may wish to include in this section the methodology or data used to prepare the Business Impact Estimate. For example: County staff solicited comments from businesses in the County as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail or direct email, posting on County website, public workshop, etc. You may also wish to include efforts made to reduce the potential fiscal impact on businesses. You may also wish to state here that the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals as well as businesses) and, therefore, the proposed ordinance does not affect only businesses*.]
The Florida Statutes, which preempt local laws, currently allows mobile food dispensing vehicles to operate on the same premises as and by a separately licensed public food establishment. There are a total of 728 restaurants located throughout the County.

Executive Summary

Recommendation to approve an Ordinance of The Board Of County Commissioners amending Ordinance 89-05, as amended, of the Collier County Growth Management Plan, specifically amending the Future Land Use Element and Maps to change the land use designation of the property from Urban, Mixed Use District, Urban Coastal Fringe Subdistrict to Urban Commercial District, 5396 Myrtle Lane Commercial Subdistrict to allow the development of up to 200,000 square feet of gross floor area of indoor self-storage/warehouse and up to 3,000 square feet of gross floor area of other commercial uses, and furthermore directing transmittal of the adoption amendment to The Florida Department of Commerce. The subject property is located on the southwest quadrant of Tamiami Trail East and Myrtle Lane, In Section 29, Township 50 South, Range 26 East, Collier County, Florida, consisting of ±8.24 Acres. [GMPA - PL20230016211] (Companion to items 9C and 9D)

OBJECTIVE:
To have the Board of County Commissioners (Board) approve (adopt) the proposed small-scale Growth Management Plan (GMP) amendment to create a new subdistrict called the 5396 Myrtle Lane Commercial Subdistrict that will provide lands for a maximum of 200,000 square feet of gross leasable area of self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of other commercial uses intended for the operation of a U-Haul Smart Mobility Center.

CONSIDERATIONS: The subject petition is submitted as a small-scale comprehensive plan amendment (a/k/a Growth Management Plan Amendment - GMPA). As such, per Florida Statutes, the request is heard only once by the Collier County Planning Commission (CCPC) and the Board. If the Board approves, the petition's proposed ordinance is adopted and transmitted to the Florida Department of Commerce.

The GMP amendment requested is approximately ±8.24 acres and is located on the southwest quadrant of Tamiami Trail East (U.S. 41) and Myrtle Lane in Township 50, Section 29, and Range 29, Collier County, Florida. This petition seeks to amend the Future Land Use Element (FLUE) and Map. The proposed Subdistrict text, as recommended for approval by the Collier County Planning Commission (CCPC), is found in the proposed Ordinance's Exhibit "A."

The process for adoption of a small-scale comprehensive plan amendment requires (in part) the following statutory standards be met [followed by staff analysis in bracketed and italicized text].

(1) A small-scale development amendment may be adopted under the following conditions:

(a) The proposed amendment involves a use of 50 acres or fewer. [*The proposed amendment pertains to an 8.24-acre property.*]

(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan but only proposes a land-use change to the future land-use map for a site-specific small-scale development activity. However, text changes that relate directly to and are adopted simultaneously with the small-scale future land use map amendment shall be permissible under this section. [*This amendment is for a site-specific Future Land Use Map change and directly related text changes.]*

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004 (3) and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1). [*The subject property is not within an Area of Critical* State Concern.]

4) Comprehensive plans may only be amended in such a way as to preserve the internal consistency of the plan pursuant to s. 163.3177. [*Internal consistency will be maintained between and among elements if the amendment is approved.]*

Based on the review of this small-scale GMP amendment petition, including the supporting data and analysis, staff makes the following findings and conclusions: The purpose of this GMPA and companion PUDZ zoning petition is for a maximum of 200,000 square feet of gross leasable area of self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of other commercial uses intended for the operation of a U-Haul Smart Mobility Center.

- There are no adverse environmental impacts
- No historical or archaeological sites are affected by this amendment.
- There are no concerns about impacts on other public infrastructure.
- The use is generally compatible with surrounding development based upon the high-level review conducted for a GMP amendment.

The documents provided for the amendment support the proposed changes to the FLUE and map. The CCPC Staff Report provides a complete staff analysis of this petition.

THE COLLIER COUNTY PLANNING COMMISSION (CCPC): The CCPC heard Petition PL20230016211, the 5396 Myrtle Lane Commercial Subdistrict, on November 21, 2024, and voted 6-1 to forward this petition to the Board with a recommendation of approval. The dissenting CCPC position was due to the concerns of the residents, doubt that the project is an asset to the area, and concern with the unchecked spread of storage facilities.

FISCAL IMPACT: The cost to process, review, and advertise this petition was borne by the petitioner via application and advertisement fees. Therefore, there are no fiscal impacts to Collier County as a result of the adoption of this amendment.

GROWTH MANAGEMENT IMPACT: Adoption of the proposed amendment by the Board for transmittal to the Florida Department of Commerce (Florida Commerce) will commence the thirty-day (30) challenge period for any affected person. Provided the small-scale development amendment is not challenged, it shall become effective thirty-one (31) days after receipt by Florida Commerce.

LEGAL CONSIDERATIONS: This Growth Management Plan (GMP) amendment is authorized and subject to the procedures established in Chapter 163, Part II, Florida Statutes, The Community Planning Act, and Collier County Resolution No. 12-234, as amended. The Board should consider the following criteria in making its decision: "Plan amendments shall be based on relevant and appropriate data and an analysis by the local government that may include but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue." Section 163.3177(1)(f), Florida Statutes. In addition, Section 163.3177(6)(a)2, Florida Statutes, provides that FLUE plan amendments shall be based on surveys, studies, and data regarding the area, as applicable, including:

a. The amount of land required to accommodate anticipated growth.
b. The projected permanent and seasonal population of the area.
c. The character of undeveloped land.
d. The availability of water supplies, public facilities, and services.
e. The need for redevelopment, including the renewal of blighted areas and the elimination of non-conforming uses, is inconsistent with the community's character.
f. The compatibility of uses on lands adjacent to or closely proximate to military installations.
g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.
h. The need to modify land uses and development patterns with antiquated subdivisions.
i. The discouragement of urban sprawl.
j. The need for job creation, capital investment, and economic development that will strengthen and diversify

the community's economy.

FLUE map amendments shall also be based upon the following analysis per Section 163.3177(6)(a)8.:

a. An analysis of the availability of facilities and services.
b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.
c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section. This item is approved as to form and legality. It requires an affirmative vote of four for approval because this is an adoption hearing. -HFAC

RECOMMENDATIONS:
To approve Petition GMPA - PL20230016211, creating a new subdistrict to be named the 5396 Myrtle Lane Commercial Subdistrict.

ORDINANCE NO. 2025- _____

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS AMENDING ORDINANCE 89-05, AS AMENDED, THE COLLIER COUNTY GROWTH MANAGEMENT PLAN, SPECIFICALLY AMENDING THE FUTURE LAND USE ELEMENT AND MAPS TO CHANGE THE LAND USE DESIGNATION OF PROPERTY FROM URBAN, MIXED USE DISTRICT, URBAN COASTAL FRINGE SUBDISTRICT TO URBAN COMMERCIAL DISTRICT, 5396 MYRTLE LANE COMMERCIAL SUBDISTRICT TO ALLOW DEVELOPMENT OF UP TO 200,000 SQUARE FEET OF GROSS FLOOR AREA OF INDOOR SELF-STORAGE/WAREHOUSE AND UP TO 3,000 SQUARE FEET OF GROSS FLOOR AREA OF OTHER COMMERCIAL USES, AND FURTHERMORE DIRECTING TRANSMITTAL OF THE ADOPTION AMENDMENT TO THE FLORIDA DEPARTMENT OF COMMERCE. THE SUBJECT PROPERTY IS LOCATED ON THE SOUTHWEST QUADRANT OF TAMIAMI TRAIL EAST AND MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA, CONSISTING OF 8.24± ACRES. [PL20230016211]

WHEREAS, Collier County, pursuant to Section 163.3161, et. seq., Florida Statutes, the Community Planning Act, formerly the Florida Local Government Comprehensive Planning and Land Development Regulation Act, was required to prepare and adopt a comprehensive plan; and

WHEREAS, the Collier County Board of County Commissioners adopted the Collier County Growth Management Plan on January 10, 1989; and

WHEREAS, the Community Planning Act of 2011 provides authority for local governments to amend their respective comprehensive plans and outlines certain procedures to amend adopted comprehensive plans; and

WHEREAS, Metropolitan Naples, LLC requested an amendment to the Future Land Use Element; and

WHEREAS, pursuant to Subsection 163.3187(1), Florida Statutes, this amendment is considered a Small-Scale Amendment; and

WHEREAS, the Subdistrict property is not located in an area of critical state concern or a rural area of opportunity; and

WHEREAS, the Collier County Planning Commission (CCPC) on _____ considered the proposed amendment to the Growth Management Plan and recommended approval of said amendment to the Board of County Commissioners; and

WHEREAS, the Board of County Commissioners of Collier County did take action in the manner prescribed by law and held public hearings concerning the proposed adoption of the amendment to the Future Land Use Element of the Growth Management Plan on _____; and

WHEREAS, all applicable substantive and procedural requirements of the law have been met.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA that:

SECTION ONE: ADOPTION OF AMENDMENTS TO THE GROWTH MANAGEMENT PLAN

The Board of County Commissioners hereby adopts this small-scale amendment to the Future Land Use Element in accordance with Section 163.3184, Florida Statutes. The text and map amendment are attached hereto as Exhibit "A" and incorporated herein by reference.

SECTION TWO: SEVERABILITY.

If any phrase or portion of this Ordinance is held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portion.

SECTION THREE: EFFECTIVE DATE.

The effective date of this plan amendment, if the amendment is not timely challenged, shall be 31 days after Board adoption. If timely challenged, this amendment shall become effective on the date the state land planning agency or the Administration Commission enters a final order determining this adopted amendment to be in compliance. No development orders, development permits, or land uses dependent on this amendment may be issued or commenced before it has become effective.

PASSED AND DULY ADOPTED by the Board of County Commissioners of Collier County, Florida this _____ day of _____ 2025.

EXECUTIVE SUMMARY

This item requires ex parte disclosure to be provided by the Commission members. Should a hearing be held on this item, all participants are required to be sworn in. Recommendation to approve an amending the Collier County Growth Management Plan to create the 5396 Myrtle Lane Commercial Subdistrict to allow development of up to 200,000 square feet of gross floor area of indoor self-storage/warehouse and up to 3,000 square feet of gross floor area of other commercial uses The subject property is located on the southwest quadrant of Tamiami Trail East and Myrtle Lane, in Section 29, Township 50 South, Range 26 East, Collier County, Florida, consisting of ±8.24 Acres. (Companion to PUDZ- PL20230016212 and Vacation petition PL20240005670) [PL20230016211]

OBJECTIVE: To have the Board of County Commissioners (Board) approve (adopt) the proposed small-scale Growth Management Plan (GMP) amendment to create a new subdistrict called the 5396 Myrtle Lane Commercial Subdistrict that will provide lands for a maximum of 200,000 square feet of gross leasable area of self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of other commercial uses intended for the operation of a U-Haul Smart Mobility Center.

CONSIDERATIONS: The subject petition is submitted as a small-scale comprehensive plan amendment (a/k/a Growth Management Plan Amendment - GMPA). As such, per Florida Statutes, the request is heard once only by the Collier County Planning Commission (CCPC) and the Board. If approved by the Board, the petition's proposed ordinance is adopted and transmitted to the Florida Department of Commerce.

The GMP amendment requested is approximately ±8.24 acres and is located on the southwest quadrant of Tamiami Trail East (U.S. 41) and Myrtle Lane in Township 50, Section 29, and Range 29, Collier County, Florida. This petition seeks to amend the Future Land Use Element (FLUE) and Map. The proposed Subdistrict text, as recommended for approval by the Collier County Planning Commission (CCPC), is in found in the proposed Ordinance's Exhibit "A."

The process for adoption of a small-scale comprehensive plan amendment requires (in part) the following statutory standards be met [followed by staff analysis in bracketed and italicized text].

(1) A small-scale development amendment may be adopted under the following conditions:

(a) The proposed amendment involves a use of 50 acres or fewer. *[The proposed amendment pertains to a 8.24-acre property.]*

(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan but only proposes a land-use change to the future land-use map for a site-specific small-scale development activity. However, text changes that relate directly to and are adopted simultaneously with the small-scale future land use map amendment shall be permissible under this section. *[This amendment is for a site-specific Future Land Use Map change and directly related text changes.]*

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004 (3) and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1). [*The subject property is not within an Area of Critical State Concern.*]

(4) Comprehensive plans may only be amended in such a way as to preserve the internal consistency of the plan pursuant to s. 163.3177. *[Internal consistency will be maintained between and among elements if the amendment is approved.]*

Based on the review of this small-scale GMP amendment petition, including the supporting data and analysis, staff makes the following findings and conclusions:

- The purpose of this GMPA and companion PUDZ zoning petition for a maximum of 200,000 square feet of gross leasable area of self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of other commercial uses intended for the operation of a U-Haul Smart Mobility Center.
- There are no adverse environmental impacts
- No historical or archaeological sites are affected by this amendment.
- There are no concerns about impacts on other public infrastructure.
- The use is generally compatible with surrounding development based upon the high-level review conducted for a GMP amendment.

The documents provided for the amendment support the proposed changes to the FLUE and map. The complete staff analysis of this petition is provided in the CCPC Staff Report.

FISCAL IMPACT: The cost to process, review, and advertise this petition was borne by the petitioner via application and advertisement fees. Therefore, there are no fiscal impacts to Collier County as a result of the adoption of this amendment.

GROWTH MANAGEMENT IMPACT: Adoption of the proposed amendment by the Board for transmittal to the Florida Department of Commerce (Florida Commerce) will commence the thirty-day (30) challenge period for any affected person. Provided the small-scale development amendment is not challenged, it shall become effective thirty-one (31) days after receipt by Florida Commerce.

LEGAL CONSIDERATIONS: This Growth Management Plan (GMP) amendment is authorized and subject to the procedures established in Chapter 163, Part II, Florida Statutes, The Community Planning Act, and Collier County Resolution No. 12-234, as amended. The Board should consider the following criteria in making its decision: "Plan amendments shall be based on relevant and appropriate data and an analysis by the local government that may include but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue." Section 163.3177(1)(f), Florida Statutes. In addition, Section 163.3177(6)(a)2, Florida Statutes, provides that FLUE plan amendments shall be based on surveys, studies, and data regarding the area, as applicable, including:

a. The amount of land required to accommodate anticipated growth.

b. The projected permanent and seasonal population of the area.

c. The character of undeveloped land.

d. The availability of water supplies, public facilities, and services.

e. The need for redevelopment, including the renewal of blighted areas and the elimination of non-conforming uses inconsistent with the community's character.

f. The compatibility of uses on lands adjacent to or closely proximate to military installations.

g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.

h. The need to modify land uses and development patterns with antiquated subdivisions.

i. The discouragement of urban sprawl.

j. The need for job creation, capital investment, and economic development that will strengthen and diversify the community's economy.

FLUE map amendments shall also be based upon the following analysis per Section 163.3177(6)(a)8.:

a. An analysis of the availability of facilities and services.

b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.

c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

This item is approved as to form and legality. It requires an affirmative vote of four for approval because this is an adoption hearing. -HFAC

STAFF RECOMMENDATION TO THE COLLIER COUNTY PLANNING COMMISSION: Have CCPC forward petition PL20230016211 to the Board with a recommendation of approval.

COLLIER COUNTY PLANNING COMMISSION RECOMMENDATION: The CCPC heard Petition PL20230016211, the 5396 Myrtle Lane Commercial Subdistrict, on November 21, 2024, and voted 6-1 to forward this petition to the Board with a recommendation of approval. The dissenting CCPC position was due to the concerns of the residents, doubt that the project is an asset to the area, and concern with the unchecked spread of storage facilities.

RECOMMENDATION: To approve and adopt the proposed ordinance and its transmittal to the Florida Department of Commerce and other statutorily required agencies.

Prepared by: Parker Klopf, Planner III, Zoning Division

Zoning Map

Location Map

Petition Number: PL20230016211

REQUESTED ACTION:

The applicant proposes a small-scale Comprehensive Plan amendment to the Future Land Use Element (FLUE), specifically to create a new subdistrict called the 5396 Myrtle Lane Commercial Subdistrict that will provide lands for a maximum of 200,000 square feet of gross leasable area of self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of other commercial uses intended for the operation of a U-Haul Smart Mobility Center.

EXISTING CONDITIONS:

Subject Property: The ±8.24-acre subject site is currently vacant and designated on the Future Land Use Map (FLUM) as Urban, Urban Mixed-Use District, Urban Coastal Fringe Subdistrict. The purpose of this Subdistrict is to provide transitional densities between the Conservation designated area (primarily located to the south of the Subdistrict) and the remainder of the Urban designated area (primarily located to the north of the Subdistrict). The subject property consists of the entirety of the Myrtle Woods PUD which was originally approved back in 1981 and amended to its current allowances by Ord. 08-09 but never developed and approximately 1.2 acres of residential multi-family (RMF-6) zoned property.

Surrounding Lands:

North: Future Land Use Designation; Urban Coastal Fringe. Zoned; Residential Multi-Family (RMF-6)/ General Commercial District (C-4). Land Use; Single-family Residential/ vacant commercial.

East: Future Land Use Designation; Urban Coastal Fringe. Zoned; Tree Tops MPUD. Land Use; Self Storage.

South: Future Land Use Designation; Urban Coastal Fringe. Zoned; Tree Tops MPUD. Land Use; Multi-family Residential

West: Future Land Use Designation; Urban Coastal Fringe. Zoned; Residential Multi-Family (RMF-6). Land Use; Single Family Residential

In summary, the existing and planned land uses in the larger surrounding area are primarily multi-family and low-density single-family residences.

BACKGROUND AND ANALYSIS:

U-Haul currently has its main Naples location at just east of the City of Naples jurisdictional boundary at 2001 Tamiami Trail E. (US-41). This property was developed in the 1980's on ±0.56-acre lot to serve the residents of the City of Naples and greater Collier County. As stated in the needs analysis U-Haul has outgrown there existing location on US 41 and does not have the ability to redevelop the existing site to fit the needs of the growing community or their needs thus U-Haul has the need to find a new location to be able to provide the community with better access to their services.

The proposed subdistrict is ±8.24-acre and is located at the southeastern corner of US-41 and Myrtle Ln. According to the Future Land Use Map this property is located within the Urban Coastal Fringe subdistrict as well as Community Center #3 of the US 41 East Overlay as established by the East Naples Community Development Plan (ENCDP). According to the current zoning map this is the location of the Myrtle Woods PUD which was originally approved back in 1981 and amended to its current allowances by Ord. 08-09 to allow Commercial Professional and General Office uses (C-1) to Commercial Intermediate uses (C-3). The proposed Growth Management Plan Amendment also includes ±1.2 acres of residential multifamily (RMF-6) zoned property on the western edge of the property. Both of these properties were determined to be Consistent by Policy through the Zoning Reevaluation Ordinance No. 90-23. This section of the Future Land Use Element (FLUE) states that where such properties were determined, through implementation of that Ordinance, to be "improved property", as defined in that Ordinance, the zoning on said

properties shall be deemed consistent with the Future Land Use Element and those properties have been identified on the Future Land Use Map Series as Properties Consistent by Policy.

The purpose of the Urban Coastal Fringe Subdistrict is to provide transitional residential densities between the Conservation designated area (primarily located to the south of the Subdistrict) and the remainder of the Urban designated area (primarily located to the north of the Subdistrict) except where properties have been deemed "consistent by policy". The ENCDP was developed by the community through a series of public meetings and surveys and reflects the overall vision of the community; the Board of County Commissioners accepted the ENCDP in October 2020. The ENCDP promotes the strategic placement of land uses to enhance the community's sense of place and provides guidance for future development and redevelopment for employment, leisure, dining, and shopping opportunities to meet the growing needs of the community. The community worked with County staff and a consultant to develop a FLUE overlay and a zoning overlay for the US 41 East corridor to implement the ENCDP for that area. The FLUE overlay allows moderate to low intensity mixed use development, commercial development, residential development, hotel/motel uses at a maximum density of 26 units per acre, and certain economic development uses; the Board of County Commissioners adopted the FLUE overlay in November 2023. The proposed *draft* zoning overlay establishes development standards, design standards, and spacing criteria for commercial uses. The *draft* zoning overlay has not yet been reviewed or adopted by the BCC due to a State legislative preemption that prohibits a county or municipality from adopting more restrictive regulations in their comprehensive plan and land development code (LDC) until Oct. 1, 2026. However, applicants that submit certain land use petitions (rezone, conditional use, GMP amendment) are encouraged to incorporate, where practicable, the proposed standards and spacing criteria contained in the *draft* zoning overlay.

The ENCDP identifies self-storage warehousing and outdoor storage uses – including equipment, boat storage, etc. – as undesirable uses, and discourages the development of these heavy commercial uses along the US 41 East corridor. However, the proposed *draft* US 41 EZO recognizes private property rights and the desire of property owners to develop their commercial property. Therefore, the *draft* zoning overlay includes specific criteria for developing these commercial land uses, including a distance separation from a like use (1/4 mile), providing enhanced buffering with native canopy trees along the roadway frontage and adjacent lots, increasing setbacks from adjacent property lines, limiting parking in front of the buildings to a maximum of one double loaded drive aisle, and, limiting the height and location of outdoor storage to the rear and side yards of the property.

It is the opinion of staff that U-Haul is considered to be an integral part of most communities as they provide anyone the ability to rent vehicles/trailers to move most anything needed as well as providing storage options and other moving related items. The location of the proposed new development will consist of what U-Haul designates as a one stop shop "smart Mobility Center" that is intended to provide more services than the existing undersized facility as well as better access to the community. In their search for a more appropriate location to handle the proposed "Smart Mobility Center" U-Haul has identified this property as the most appropriate for them to be able to provide their services to the residents of Naples and greater Collier County. This request to change the Future Land Use designation and zoning was made specifically to allow the rental of trucks/trailers, Mini warehousing self-storage, propane sales, electric vehicle charging and related retail sales of moving supplies.

The applicant provided a needs analysis for their proposed use which includes population growth demographics for a 1-to-5-mile radius from the subject property as well as Collier County as a whole. Within this analysis the applicant identified a need for additional self-storage space as well as increased need for truck and trailer rental by identifying a 12.5% increase in population within a 3-mile radius area and an overall county wide population increase of 7.3% by 2027. Furthermore, the applicant identified the other existing and approved but unconstructed facilities within the study area. The applicant also identified the Market Area Propensity (MAP) for the

proposed self-storage use within the 3-mile market area. Two storage competitors are of a newer type storage with 100% climate- controlled storage facility and the other two competitors include older model storage with climate and non-climate storage. This shows that trend in the industry that that storage has changed from a drive- up industrial use to climate controlled commercial use. Based on the information provided a MAP of 10.90 indicates U-Haul is underserving the community based on the number of locations, storage NRSF available, and population within the area. The car condos identified in the need analysis have the same zoning classification as self-storage however are not considered to be a limiting factor for new self-storage as their use is limited to storage of vehicles not personal possessions.

5396 Myrtle Lane, Naples FL Competitors 3 Miles
Marketing Area Propensity Calculation

Storage Facility	Approximate Sq Foot		
	Climate	None Climate	Total Sq ft
Cube Smart 11400 Tamiami Trail E Naples FL 34113	56,000	24,000	80,000
Public Storage 13191 Tamiami Trail E Naples FL 34114	105,000	0	105,000
Midgard Self Storage 6810 Collier Blvd Naples FL 34114 (formaly known as Storesmart)	35,000	15,000	50000
Extra Space Storage 7391 Rattlesnake Hammock RD Naples FL 34113	70,000	0	70,000
Proposed U-Haul Myrtle Lane Naples FL 34113	102,000	0	102,000
Total	333,000	39,000	372,000

305,000 Sq Ft of Competitor Storage plus 102,000 Proposed U-Haul = 407,000 Sq Ft of storage in 3 miles
Population in 3 miles = 41,000
Storage Facilities in 3 miles = 4
Ave Sq Ft of 4 Storage Facilities=76,250
4x76,250= 305,000 + 102,000 = 407,000 Divided by 41,000 population = 10.90 MAP

Comprehensive Planning Staff believe that the petitioner has provided appropriate and relevant data and analysis to address the statutory requirements for a Plan Amendment identified below. Though the inclusion of heavier commercial uses within the proposed subdistrict is inconsistent with the urban coastal fringe subdistrict as well as the US 41 East Overlay, staff agrees that there is a need for self-storage and truck rental uses within Collier County to serve existing and future residents of Collier County. Furthermore, the proposed facility is compatible with the adjacent and entitled self-storage/commercial uses and appropriate buffers have been provided to nearby residentially zoned properties. Comprehensive Planning Staff finds that the creation of the proposed subdistrict on the property to allow the uses identified within the subdistrict language to be consistent with the goals and policies of the Growth Management Plan as well as the Florida state statues listed below.

CRITERIA FOR GMP AMENDMENTS FLORIDA STATUTES:

Data and analysis requirements for comprehensive plans and plan amendments are noted in Chapter 163, F.S., specifically as listed below.

Section 163.3177(1)(f), Florida Statutes:

(f) All mandatory and optional elements of the comprehensive plan and plan amendments shall be based upon relevant and appropriate data and an analysis by the local government that may include, but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the comprehensive plan or plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue.

1. Surveys, studies, and data utilized in the preparation of the comprehensive plan may not be deemed a part of the comprehensive plan unless adopted as a part of it. Copies of such studies, surveys, data, and supporting documents for proposed plans and plan amendments shall be made available for public inspection, and copies of such plans shall be made available to the public upon payment of reasonable charges for reproduction. Support data or summaries are not subject to the compliance review process, but the

comprehensive plan must be clearly based on appropriate data. Support data or summaries may be used to aid in the determination of compliance and consistency.

2. Data must be taken from professionally accepted sources. The application of a methodology utilized in data collection or whether a particular methodology is professionally accepted may be evaluated. However, the evaluation may not include whether one accepted methodology is better than another. Original data collection by local governments is not required. However, local governments may use original data so long as methodologies are professionally accepted.

3. The comprehensive plan shall be based upon permanent and seasonal population estimates and projections, which shall either be those published by the Office of Economic and Demographic Research or generated by the local government based upon a professionally acceptable methodology. The plan must be based on at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period unless otherwise limited under s. 380.05, including related rules of the Administration Commission. Absent physical limitations on population growth, population projections for each municipality, and the unincorporated area within a county must, at a minimum, be reflective of each area's proportional share of the total county population and the total county population growth.

Section 163.3177(6)(a)2. Florida Statutes:

2. The future land use plan and *plan amendments* shall be based upon surveys, studies, and data regarding the area, as applicable, including:

   a. The amount of land required to accommodate anticipated growth.

   b. The projected permanent and seasonal population of the area.

   c. The character of undeveloped land.

   d. The availability of water supplies, public facilities, and services.

   e. The need for redevelopment, including the renewal of blighted areas and the elimination of nonconforming uses which are inconsistent with the character of the community.

   f. The compatibility of uses on lands adjacent to or closely proximate to military installations.

   g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.

   h. The discouragement of urban sprawl.

   i. The need for job creation, capital investment, and economic development that will strengthen and diversify the community's economy.

   j. The need to modify land uses and development patterns within antiquated subdivisions.

Section 163.3177(6)(a)8. Florida Statutes:

(a) A future land use plan element designating proposed future general distribution, location, and extent of the uses of land for residential uses, commercial uses, industry, agriculture, recreation, conservation, education, public facilities, and other categories of the public and private uses of land. The approximate acreage and the general range of density or intensity of use shall be provided for the gross land area included in each existing land use category.

The element shall establish the long-term end toward which land use programs and activities are ultimately directed.

8. Future land use map amendments shall be based upon the following analyses:
   a. An analysis of the availability of facilities and services.
   b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.
   c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

Section 163.3187 Florida Statutes: [qualifications to follow the small-scale GMPA process] Process for adoption of small-scale comprehensive plan amendment.

(1) A small-scale development amendment may be adopted under the following conditions:

(a) The proposed amendment involves a use of 50 acres or fewer. *[The subject site comprises 8.24± acres.]*

(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan but only proposes a land use change to the future land use map for a site-specific small-scale development activity. However, text changes that relate directly to and are adopted simultaneously with the small-scale future land use map amendment shall be permissible under this section. *[This amendment does include a text change to the Comprehensive Plan and those text changes are directly related to the proposed future land use map amendment.]*

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004(3) and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1). *[The subject property is not located within an Area of Critical State Concern.]*

(4) Comprehensive plans may only be amended in such a way as to preserve the internal consistency of the plan pursuant to s. 163.3177. Corrections, updates, or modifications of current costs which were set out as part of the comprehensive plan shall not, for the purposes of this act, be deemed to be amendments. *[This amendment preserves the internal consistency of the plan and is not a correction, update, or modification of current costs that were set out as part of the comprehensive plan.]*

NEIGHBORHOOD INFORMATION MEETING (NIM) NOTES:

The Applicant conducted a NIM on May 6, 2024, at the South Regional Library Meeting Room, 8065 Lely Cultural Parkway, Naples, FL. The meeting commenced at approximately 5:30 p.m. and ended at 6:04 p.m. Approximately 15-20 people were in attendance and approximately 2 participants via ZOOM.

The applicant's agent explained the request for the proposed PUD Rezone and companion Growth Management Plan amendment to allow for the proposed uses. Concerns were raised about existing flooding conditions, traffic on Myrtle Lane, access to the signalized intersection on Tamiami Trail, and comments that the project is out of scale with the needs of the community. A copy of the NIM materials is included in attachments.

FINDINGS AND CONCLUSIONS:

- There is need for rental trucks/trailers within all residential markets, storage of residential goods, propane sales, and related business services that will strengthen and diversify the community's economy in this area.
- The proposed use is comparable and compatible with surrounding uses.
- County water and wastewater service is available to the site.
- Transportation system impacts have not been identified with this petition.

Environmental Findings:

The subject property is 8.24 acres. This property has been historically cleared and was field verified by staff. This is the location of the Myrtle Woods PUD which was originally approved back in 1981 and amended to its current allowances by Ord. 08-09 to allow Commercial Professional and General Office uses (C-1) to Commercial Intermediate uses (C-3) as well as 1.2 acres of residential multifamily (RMF-6) zoned property on the western edge of the property.

The proposed GMP amendment will not affect the requirements of the Conservation and Coastal Management Element (CCME) of the GMP. There is no preservation required native vegetation or listed species present on-site; therefore, the petition meets the requirements of CCME Policy 6.1.1, Policy 7.1.1, and section 3.05.07 of the LDC. Environmental Services staff recommends approval.

LEGAL CONSIDERATIONS:

This Staff Report was reviewed by the County Attorney's Office on December 13, 2023. The criteria for GMP amendments to the Future Land Use Element are in Sections 163.3177(1)(f) and 163.3177(6)(a)2, Florida Statutes. The criteria for changes to the Future Land Use Map is in Section 163.3177(6)(a)8, Florida Statutes

STAFF RECOMMENDATION:

Staff recommends approval of the subdistrict as proposed and suggests that the Collier County Planning Commission forward petition PL20230016211 5396 Myrtle Commercial Subdistrict GMPA to the Board of County Commissioners with a recommendation to approve and adopt and transmit to the Florida Department of Commerce and other statutorily required agencies.

NOTE: This petition has been tentatively scheduled for the January 14th, 2025, BCC meeting.

February 28, 2024

Ms. Katherine Eastley
Collier County Growth Management Department
Comprehensive Planning Section
2800 North Horseshoe Drive

RE: 5396 Myrtle Lane Commercial Subdistrict (PL20230016211), Submittal 1

Dear Ms. Eastley:

Enclosed, please find the application for a proposed small-scale comprehensive plan amendment for an 8.24± acre project located at the southwest corner of Tamiami Trail East (U.S. 41) and Myrtle Lane. The GMPA proposes to modify the FLUE map to add a new subdistrict to allow development of up to of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses.

A companion PUD Rezone application, 5396 Myrtle Lane CPUD (PL20230016212), is being filed along with this petition.

Documents filed with submittal 1 include the following:

1. Cover letter
2. Application
3. Professional Consultants
4. Exhibit B Amended Text
5. Exhibit C Proposed Future Land Use Designation
6. Land Use
7. Future Land Use Designation
8. Environmental

TO: 5396 Myrtle Lane Commercial Subdistrict (Exhibit C, Future Land Use - Proposed)

D. AMEND OTHER MAP(S) AND EXHIBITS AS FOLLOWS: (Name & Page #)

E. DESCRIBE ADDITINAL CHANGES REQUESTED:

Create Subdistrict Map (Exhibit D, Proposed Subdistrict Map)

REQUIRED INFORMATION

NOTE: ALL AERIALS MUST BE AT A SCALE OF NO SMALLER THAN I"=400'. At least one copy reduced to 8-1/2 x 11 shall be provided of all aerials and/or maps.

LAND USE

☑ Provide general location map showing surrounding developments (PUD, DRI's, existing zoning) with subject property outlined.

☑ Provide most recent aerial of site showing subject boundaries, source, and date.

☑ Provide a map and summary table of existing land use and zoning within a radius of 300 feet from boundaries of subject property.

FUTURE LAND USE DESIGNATION:

☑ Provide map of existing Future Land Use Designation(s) of subject property and adjacent lands, with acreage totals for each land use designation on the subject property.

ENVIRONMENTAL

☑ Provide most recent aerial and summary table of acreage of native habitats and soils occurring on site. HABITAT IDENTIFICATION MUST BE CONSISTENT WITH THE FDOT-FLORIDA LAND USE, COVER AND FORMS CLASSIFICATION SYSTEM (FLUCCS CODE). NOTE: THIS MAY BE INDICATED ON SAME AERIAL AS THE LAND USE AERIAL IN "A" ABOVE.

☑ Provide a summary table of Federal (US Fish & Wildlife Service) and State (Florida Game & Freshwater Fish Commission) listed plant and animal species known to occur on the site and/or known to inhabit biological communities similar to the site (e.g. panther or black bear range, avian rookery, bird migratory route, etc.) Identify historic and/or archaeological sites on the subject property.

GROWTH MANAGEMENT

INSERT "Y" FOR YES OR "N" FOR NO IN RESPONSE TO THE FOLLOWING:

N ____ Is the proposed amendment located in an Area of Critical State Concern? (Reference ____, F.A.C.). IF so, identify area located in ACSC.

N ____ Is the proposed amendment directly related to a proposed Development of Regional Impact pursuant to Chapter 380 F.S.? (Reference____, F.A.C.)

Y/N ____ Is the proposed amendment directly related to a proposed Small Scale Development Activity pursuant to Subsection 163.3187 (1)(c), F.S.? Does the proposed amendment create a significant impact in population which is defined as a potential increase in County-wide population by than 5% of population projections? (Reference Capital Improvement Element Policy 1.1.2). If yes, indicate mitigation measures being proposed in conjunction with the proposed amendment.

Y/N ____ Does the proposed land use cause an increase in density and/or intensity to the uses permitted in a specific land use designation and district identified (commercial, industrial, etc.) or is the proposed land use a new land use designation or district? (Reference____F.A.C.). If so, provide data and analysis to support the suitability of land for the proposed use, and of environmentally sensitive land, ground water and natural resources. (Reference____, F.A.C.)
Provide map of existing Future Land Use Designation(s) of subject property and adjacent lands, with acreage totals for each land use designation on the subject property.

PUBLIC FACILITIES

Provide the existing Level of Service Standard (LOS) and document the impact the proposed change will have on the following public facilities:

☑ Potable Water

☑ Sanitary Sewer

☑ Arterial & Collector Roads; Name specific road and LOS

Tamiami Trail East (U.S. 41) - see Traffic Impact Statement prepared by JMB Transportation Engineering, Inc.

☑ Drainage

☑ Solid Waste

☑ Parks: Community and Regional

If the proposed amendment involves an increase in residential density, or an increase in intensity for commercial and/or industrial development that would cause the LOS for public facilities to fall below the adopted LOS, indicate mitigation measures being proposed in conjunction with the proposed amendment.

(Reference Capital Improvement Element Objective 1 and Policies):

N — Provide a map showing the location of existing services and public facilities that will serve the subject property (i.e. water, sewer, fire protection, police protection, schools and emergency.

X — Document proposed services and public facilities, identify provider, and describe the effect the proposed change will have on schools, fire protection and emergency medical services.

F. OTHER

Identify the following areas relating to the subject property:

AE-6' & 7' Flood zone based on Flood Insurance Rate Map data (FIRM).

N.A. Location of wellfields and cones of influence, if applicable. (Identified on Collier County Zoning Maps)

X Coastal High Hazard Area, if applicable

N.A. High Noise Contours (65 LDN or higher) surrounding the Naples Airport, if applicable (identified on Collier County Zoning Maps).

SUPPLEMENTAL INFORMATION

☐ $16,700.00 non-refundable filing fee made payable to the Board of County Commissioners due at time of submittal. (Plus, proportionate share of advertising costs)

☑ $9,000.00 non-refundable filing fee for a Small-Scale Amendment made payable to the Board of County Commissioners due at time of submittal. (Plus, proportionate share of advertising costs)

☑ Proof of ownership (copy of deed)

☑ Notarized Letter of Authorization if Agent is not the Owner (See attached form)

** If you have held a pre-application meeting within 9 months prior to submitted date and paid the pre-application fee of $500.00 at the meeting, deduct that amount from the above application fee amount when submitting your application. All pre-application fees are included in the total application submittal fee if petition submitted within 9 months of pre-application meeting date. Otherwise the overage will be applied to future proportionate share advertising costs.*

** Maps shall include: North arrow, name and location of principal roadways and shall be at a scale of 1"=400' or at a scale as determined during the pre-application meeting.*

** All attachments should be consistently referenced as attachments or exhibits, and should be labeled to correlate to the application form, e.g. "Exhibit I.D."*

** Planning Community, TAZ map, Traffic Analysis Zone map, Zoning maps, and Future Land Use Maps. Some maps are available on the Zoning Division website depicting information herein:*

RESOLUTION 12-234

A RESOLUTION ESTABLISHING GENERAL REQUIREMENTS AND PROCEDURES FOR AMENDING THE COLLIER COUNTY GROWTH MANAGEMENT PLAN.

WHEREAS, Chapter 163, Florida Statutes, requires local governments to prepare and adopt a Comprehensive Plan; and

WHEREAS, the Board of County Commissioners adopted the Collier County Growth Management Plan on January 10, 1989; and

WHEREAS, the Community Planning Act of 2011 (Section 163.3161, et seq., Florida Statutes) mandates certain procedures to amend adopted Growth Management Plans (Section 163.3184 and Section 163.3187, Florida Statutes); and

WHEREAS, in order to provide adequate notice, it is necessary to set forth the requirements and procedures to be followed by petitioners, the general public and Collier County in processing amendments to the Collier County Growth Management Plan consistent with the requirements of the Florida Statutes.

NOW, THEREFORE BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

1. Subject to prior Board approval, staff will implement three amendment cycles during which applications for amendments to the Collier County Growth Management Plan or one of its elements ("GMP") will be processed. Additional GMP amendment cycles can only be implemented by approval of the Board. Such approval shall be by majority vote.

2. All amendments must strictly conform with the Florida Growth Management Act, including, but not limited to, Section 163.3184, Florida Statutes, for amendments in general, and Section 163.3187, Florida Statutes, for adoption of a small-scale comprehensive plan amendments.

3. An amendment may be proposed by the Board of County Commissioners, the Collier County Planning Commission (CCPC), any department or agency of the County, or any private person, provided, however, that no such person shall propose an

amendment for a land use designation change for property which he or she does not own, except as an agent or attorney for the owner.

4. All required copies of the application to amend the Collier County Growth Management Plan and supporting documentation along with the required filing fee must be submitted to the County Manager or his designee prior to the deadline established by the Board for each adoption cycle. Following the requisite submission:

A. Prior to submittal, a pre-application conference shall occur between the petitioner and appropriate County staff to ensure that the amendment procedure is understood and adhered to.

B. Staff shall perform an initial review of the proposed amendment application to determine whether additional information is necessary to enable staff to conduct a formal review and whether other amendments of the Growth Management Plan will be necessary to preserve the internal consistency of the Plan. Within 30 calendar days following the filing deadline, the staff shall notify the petitioner in writing, that:

(i) staff has determined that the petition is adequate for formal review; or

(ii) the application is inadequate for formal review and the notice shall set forth in detail the additional information deemed necessary for formal review of the petition.

C. If the application is deemed insufficient, the petitioner shall have 30 calendar days from the date of receipt of staff's letter of insufficiency to supplement the application in response to the initial review. A second 30 day time period to respond to the insufficiency may be requested by the petitioner.

D. County staff shall review the application and may consult with other County Departments or agencies as it deems necessary to evaluate the proposed amendment and shall prepare a report with a recommendation.

E. The Public Hearings schedule and State Agency review time frames will be those as established by Section 163.3184, Florida Statutes, "Process for adoption of comprehensive plan or plan amendment.", or Section 163.3187, Florida Statute, "Process for adoption of small-scale comprehensive plan amendment," as amended from time-to-time. Adoption of an amendment to the Growth Management Plan must be by Ordinance and shall require four affirmative votes of the Board of County Commissioners.

5. This Resolution supersedes and repeals Resolution 97-431, as amended by Resolution 98-18, relating to prior Growth Management Plan Amendment procedures.

THIS RESOLUTION ADOPTED after motion, second and majority vote favoring same, this 13th day of November, 2012.

22. 5396 Myrtle Lane Commercial Subdistrict [page 77]

This Subdistrict is approximately 8.24 acres in size and is located on the southwest quadrant of Tamiami Trail East (U.S. 41) and Myrtle Lane as depicted on the 5396 Myrtle Lane Subdistrict Map. The purpose of this Subdistrict is to provide commercial land uses. Development within the Subdistrict shall be subject to the following:

a. All development within this Subdistrict shall be rezoned to a Planned Unit Development (PUD).

b. The PUD Ordinance must include development standards and buffers to ensure compatibility with surrounding properties.

c. Allowable uses shall be limited to:

1. A maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses shall be permitted within the CPD. No building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the uses permitted by right in the C-1 through C-3 Zoning District and the following uses.

2. Automotive rental and leasing (7513 and 7519)

3. Outdoor equipment rental and leasing (7359)

4. Indoor storage, including cube storage and moving supplies sales (4225 and 4226)

5. Propane gas dealers, including grilling and propane accessories (5984)

6. Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

d. Development is limited to a maximum intensity of 200,000 square feet of gross floor area for indoor self-storage/warehouse and a maximum of 3,000 square feet of gross floor area for retail uses.

Marco A. Espinar- Biologist

Environmental Data. The following shall be submitted where applicable to evaluate projects.

A) Wetlands

i) Identify on Current Aerial / the location of all Collier County / SFWMD Jurisdictional wetlands according to the Florida Land Use Cover and Forms Classification System FLUCFCS

A FLUCFCS map and vegetation inventory has been included. The site consists of approximately 8.24 acres. This parcel is located on the south side of Myrtle Lane and US 41 (Tamiami Trail). The parcel is in Section 29 Township 50 Range 26. The parcel is heavily infested with exotics such as Melaleuca, Brazilian pepper, and ear leaf acacia. At the north east corner is a lower area primary vegetated with Melaleuca, Laurel ok sawgraas and swamp fern. This area may be considered Jurisdictional wetlands. The reaming areas are either cleared or heavily infested with exotic and a Slash pine canopy.

The applicant is proposing to rezone the 8.24+/- acre property from the Myrtle Woods CPUD and RFM-6 Zoning Districts to a Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. The site is proposed to be developed with a U-Haul smart mobility center that will be a modern facility designed to meet the indoor storage and moving needs for the growing Collier

County market. This will be a replacement facility for the existing U-Haul facility that has operated 5 miles to the west in the Mini-triangle redevelopment area. U-Haul has outgrown the existing smaller site and the 8.4 acre site at Myrtle Lane and U.S. 41 is of sufficient size to build a modern indoor self-storage facility, with an area of sufficient size to allow for their rental fleet of vehicles as well as retail sales for moving supplies.

B) Listed Species and Bald Eagle Nests and Nest Protection Zones

i) Provide a wildlife survey for the nests of bald eagle and for listed species known to inhabit biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the FFWCC and the USFWS. Survey times may be reduced or waived where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low as determined by the FFWCC and USFWS. Where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, the survey time may be reduced or waived by the County Manager or designee.

Wildlife Listed Species Study
(LDC10.02.3.A.2.m)

A brief examination of the parcel found no listed animals on site. The site does provide some limited habitat for small, mammals and birds. The site shows past signs of greater functional capability. The site is surrounded by either development or roadway. In addition, the density of exotics is extremely limiting. A listed species study was conducted and attached.

This project site is not in the consultation panther zone and there are no known eagle nests nearby. This wildlife survey found no listed animal species.

Black bears are known to inhabit the neighboring areas. During the Site Development Plan process a Black Bear Management Plan may be required. This management plan would focus on lowering Black bear interaction.

This project meets the Objective of CCME Objective 7.1.

The area proposed to be impacted consists of lower grade habitat. Brazilian pepper dominates the midstory. No listed species should be impacted by this development.

CCME OBJECTIVE 7.1: Direct incompatible land uses away from listed animal species and their habitats. (The County relies on the listing process of State and Federal agencies to identify species that require special protection because of their endangered, threatened, or species of special concern status. Listed animal species are those species that the Florida Fish and Wildlife Conservation Commission has designated as endangered,

ii) Provide Listed Plants identified in LDC Section 3.04.03

See Attached Vegetation List / FLUCCS Code Map

iii) Wildlife Management Plans in accordance with LDC Section 3.04.00

See Attached Listed Species Study, Black bear management plan may be required at the time of SDP.

C) Native Vegetation Preservation

i) For Sites or Portions of Sites Cleared of Native Vegetation or in Agricultural Use:

Not Applicable

ii) Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the FLUCFCS system and provide a legend foe each of the FLUCFS codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of native vegetation required to be retained on site. Include the above referenced calculations and aerials on the SDP or PPL. In a separate report, demonstrate how the preserve criteria pursuant to LDC section 3.05.07 have been meet.

Location Maps / Aerials
(LDC10.02.3.A.2.m)
Aerials and location maps have been provided.

The entire parcel consists of approximately 8.24 acres.
The parcel is in Section 29, Township 50, Range 26; in Collier County, Florida. The parcel is located at the intersection of Myrtle Lane and US 41 (Tamiami Trail). The dominant forest type on this project site consists of 424H Hydric Melaleuca, 438 E4 Mixed Hardwoods with an exotic level of (76% 100%), 740 Disturbed Areas, 832 FPL easement.

424 H – Hydric Melaleuca	0.95 acres
438E4 – Mixed Hardwoods exotic level (76 – 100%)	3.93 acres
740 - Disturbed	3.01 acres
832 – FPL	0.35 acres
TOTAL	8.24 acres

See Attached Location Maps, Vegetation Maps / FLUCCS Maps

Native Vegetation Calculation
(LDC3.05.07.A.)

3.05.07 Preservation Standards

Based on the LDC a required preservation of 15 % of Native vegetation preservation would be required for this size parcel. However, this site has NO native habitat. The site is entirely vegetated with exotics such as Melaleuca, Java plum, ear leaf acacia and Brazilian pepper. A few native trees can be seen scattered throughout. These include a few Slash pines and Cabbage palms. Some scattered palmettos are also readily visible.

This will be consistent with Goal 6 of Collier County GMP's Objective 6.1 Protect native communities through the application of minimum preservation requirements.

Clearly identify the location of all preserves:

The preserve area has been identified on the Exhibit Master plan.

Soil Ground Water Sampling

Natural Site

LISTED SPECIES SURVEY

Collier County, Florida

January 2023

Prepared By:

Collier Environmental Consultants, Inc.
3211 68th Street SW
Naples, Florida 34105
(239) 263 – 2687
marcoe@prodigy.net

I Introduction / Purpose

This report is an account of a Listed Species survey recently performed on a 8.24 acre tract called 5396 Myrtle Lane CPUD. Required to meet county review requirements its purpose is to identify and describe key habitats and report any listed species using the site that would be at risk due to possible future development actions on the site. This examination took place during November 21 - 24, 2023.

II Site Description

The entire parcel consists of approximately 8.24 acres. The parcel is in Section 29, Township 50, Range 26; in Collier County, Florida. The parcel is located at the intersection of Myrtle Lane and US 41 (Tamiami Trail). The dominant forest type on this project site consists of 424H Hydric Melaleuca, 438 E4 Mixed Hardwoods with an exotic level of (76% - 100%), 740 Disturbed Areas, 832 FPL easement.

See Item # 1 - Location Map

In total the site consists of approximately 8.24 acres. The following is how the acreage figures breakdown.

424 H – Hydric Melaleuca	0.95 acres
438E4 – Mixed Hardwoods exotic level (76 – 100%)	3.93 acres
740 - Disturbed	3.01 acres
832 – FPL	0.35 acres
TOTAL	8.24 acres

See Item #2 - FLUCCS Map

The entire site is dominated by exotics. The site does have some native vegetation such as Cabbage palms, Slash pine, cypress and scattered palmetto. However, exotics dominate. Melaleuca, Brazilian pepper, ear leaf acacia and Downy rose myrtle dominate the entire site.

III Listed Species Survey

The required survey for a Listed Species Survey calls for a survey covering 100 % of the site, at prescribed transect distances per site acreage. Such a survey was attempted in November 21 - 24, 2023. Established transects oriented north - south and east - west and superimposed on an aerial map.

Both meandering and linear transects and stationary observations were conducted. Early morning (0730 - 1000), mid-day (1100 - 1500) and late-day (1500 - 1800) time periods were chosen to survey these transects. All possible species of plants and animals listed by state and federal agencies were noted. Concurrently, notes for FLUCCS mapping purposes were kept.

IV Results & Discussions

Listed Flora

See Item # 3 - FLUCCS Plant List

Listed Fauna

See Item # 4 - Wildlife Species Observed

Key Species Discussion

Florida Black Bear

No individuals were observed during this survey even though Black bears are known to inhabit the general area. Special attention was given for signs such as scraps, tracks and scat. This mammal has a large home range and is known to inhabit the area. Black bear nuisance calls do show up in this area. An exhibit has been provided.

Bonneted Bat

The Florida bonneted bat is the largest species of bat in Florida. Previously known as the Florida (Wagner's) mastiff bats these bats were reclassified as a separate species unique to Florida. The species can grow to a length of 6.5 inches with a wingspan of 20 inches. This is a flying mammal free to traverse great distances.

Examination of all trees with potential cavities was conducted. The density of Brazilian pepper and other midstory plants may impede flight patterns. No individuals and/or guano were found. This project is not anticipated to negatively impact the species.

Florida Panther

This parcel would be considered in the urban area. The site is not in the Panther Consultation Area.

Conclusions

Focused searches were conducted over several days.

This parcel is dominated by a variety of exotic vegetation. The site does have a few scattered native Slash pines. However, the entire site is dominated with Brazilian pepper, java plum, ear leaf acacia and Melaleuca. Old world climbing fern was also identified onsite. This site is very limited as viable habitat for any vertebrates. The site is also bordered by US 41 and commercial buildings and is located on what would be considered urban lands. If utilized by any vertebrates, they would be birds traversing the site and/or small mammals commonly found in urban areas. This study found no listed vertebrates on site.

Threatened, Endangered and Species of Special Concern

5396 Myrtle Lane Commercial Subdistrict
Exhibit D - Proposed New Inset Map

LEGEND

5396 Myrtle Lane Commercial Subdistrict

GradyMinor

Civil Engineers • Land Surveyors • Planners • Landscape Architects

950 475 0 950 Feet

5396 Myrtle Lane Commercial Subdistrict (PL20230011318)

Growth Management

The small-scale growth management plan amendment proposes to establish a new subdistrict which would permit up to a maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses consistent with uses permitted in the C-3 commercial Zoning District of the Collier County Land Development Code (LDC) on the 8.24+/- acre property. The subdistrict will permit a U-Haul smart mobility center that will provide for indoor mini self-storage, warehousing, moving truck rental/leasing, propane gas sales and electric vehicle charging stations, with associated retail sales of moving/packing supplies. This would be a replacement facility for the existing U-Haul facility that has operated within the Mini-triangle redevelopment area for decades. The proposed site will allow for development of a modern facility in a location that is of sufficient size allow for a facility to meet the growing demand in Collier County.

Under, Chapter 163 of the Florida Statutes, local governments may adopt small-scale amendments to their Growth Management Plans if the amendment impacts fewer than 50 acres. The proposed new sub-district consists of approximately 8.24 +/- acres and is; therefore, eligible to seek the proposed small-scale amendment. A companion PUD rezoning application has been filed with Collier County.

Chapter 163.3167 Scope of act.—
(9) Each local government shall address in its comprehensive plan, as enumerated in this chapter, the water supply sources necessary to meet and achieve the existing and projected water use demand for the established planning period, considering the applicable plan developed pursuant to s. 373.709.

The project currently has potable water and sewer service by Collier County Water Sewer District. No capacity issues exist or are anticipated in the service area.

Chapter 163.3177
(6) (a) 2. The future land use plan and plan amendments shall be based upon surveys, studies, and data regarding the area, as applicable, including:

a. The amount of land required to accommodate anticipated growth.
b. The projected permanent and seasonal population of the area.
c. The character of undeveloped land.
d. The availability of water supplies, public facilities, and services.
e. The need for redevelopment, including the renewal of blighted areas and the elimination of nonconforming uses which are inconsistent with the character of the community.
f. The compatibility of uses on lands adjacent to or closely proximate to military installations.
g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.
h. The discouragement of urban sprawl.
i. The need for job creation, capital investment, and economic development that will strengthen and diversify the community's economy.
j. The need to modify land uses and development patterns within antiquated subdivisions.

GradyMinor
Civil Engineers • Land Surveyors • Planners • Landscape Architects
Q. Grady Minor & Associates, P.A.
3800 Via Del Rey, Bonita Springs, FL 34134 • 239-947-1144 • engineering@gradyminor.com • www.gradyminor.com

The applicant has prepared a market demand analysis that demonstrates the need for the new and modernized U-Haul facility in this location of Collier County. The property is presently zoned for commercial and multi-family residential development and is of sufficient size to accommodate the proposed indoor storage, truck rental and moving facility. The property represents an infill opportunity along the Tamiami Trail East area, which is within the urban area and has access to water, sewer and a signalized intersection. Properties to the south, west and north are zoned commercial, making the proposed infill development appropriate for the proposed U-Haul facility.

Chapter 163.3177

8. Future land use map amendments shall be based upon the following analyses:
   a. An analysis of the availability of facilities and services.
   b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.
   c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

The 5396 Myrtle Lane Commercial Subdistrict is consistent with Chapter 163.3177, F.S. The applicant has prepared a market demand analysis which discusses the need for U-Haul to relocate from its existing facility due in order to expand to serve the growing demand for moving and storage facilities in Collier County.

The subdistrict includes all available land of a size adequate to support a commercial project.

163.3184 Process for adoption of comprehensive plan or plan amendment.

The proposed amendment is consistent with Chapter 163.3184, F.S which establishes the criteria for small-scale comprehensive plan amendments to a growth management plan.

163.3187 Process for adoption of small scale comprehensive plan amendment.—

(1) A small scale development amendment may be adopted under the following conditions:

(a) The proposed amendment involves a use of 50 acres or fewer and:

(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan, but only proposes a land use change to the future land use map for a site-specific small scale development activity. However, text changes that relate directly to, and are adopted simultaneously with, the small scale future land use map amendment shall be permissible under this section.

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern, unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004(3), and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1).

The proposed amendment involves the use of less than 50 acres, the proposed amendment includes a map amendment and associated text relating directly to the map amendment, and the property is not located within an area of critical state concern. No State or regional impacts are associated with the proposed amendment.

Project Justification

Future Land Use Element:

The 8.4± acre project is designated Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict on the Future Land Use Map. The small-scale growth management plan amendment proposes to establish a new subdistrict which would permit the new modern U-Haul facility in a location that will better serve the growing population of Collier County.

Policy 5.6:
New developments shall be compatible with, and complementary to, the surrounding land uses, as set forth in the Land Development Code.

The site has been previously zoned for commercial and multi-family residential uses. The companion PUD provides for a mix of uses that are appropriate for the site and outlines development standard that will allow for the multi-story indoor self-storage facilities and moving truck rental facility. Where the property abuts the RMF-6 zoned property to the west, a landscape buffer consistent with that required by the LDC will be provided.

Objective 7 and related policies:

The property abuts both U.S. 41 and Myrtle Lane. Primary access will be provided on U.S. 41 and a secondary access is proposed to Myrtle Lane. A full interconnection to Myrtle Road is not proposed due to the nature of the proposed U-Haul facility that requires a secure storage area for the rental vehicles. No interconnection to the adjacent vacant residential zoned property is proposed as that parcel has direct frontage on Myrtle Lane.

Transportation Element:

Policy 5.1 requires that all projects are evaluated to determine their effect on the overall countywide density or intensity of permissible development, with consideration of their impact on the overall County transportation system and shall not approve any petition or application that would directly access a deficient roadway segment as identified in the current AUIR or if it impacts an adjacent roadway segment that is deficient as identified in the current AUIR. The TIS prepared in support of this small-scale amendment application concludes that no level of service issues will arise from development of the proposed.

Public Facilities Element:

The property is served by potable water and sanitary sewer services. Water and sewer service will be provided by Collier County Water Sewer District. No capacity issues have been identified or are anticipated in the future.

Conservation and Coastal Management Element:

Policy 6.1.2 requires that developments in the Urban area must retain a minimum of 25% of existing native vegetation on-site. The site is infested with invasive exotic species and no preserve area is required on the property.

Proposed Location: US Hwy 41 and Myrtle Lane, Naples FL 34113

Needs Analysis

Needs Analysis

Findings Summary

Objective:

The Needs Analysis illustrates the growth in Collier County in relation to the proposed location and how the proposed storage location will meet the new demand and benefit the County.

U-Haul is proposing a new center at US Hwy 41 and Myrtle Lane in Collier County. The facility would replace the existing U-Haul center at 2001 Tamiami Trail East, Naples FL. Our current location has reached capacity and offers limited number of services. Redevelopment of the current location is not feasible. For this reason, U-Haul Company has found a better location to relocate this operation in order to continue its business. It will act as a "One Stop Shop" Smart Mobility location, which offers variety of services which include self-storage, U-Haul truck and trailer share, propane, hitch and towing needs, charging stations and related retail sales (see next page).

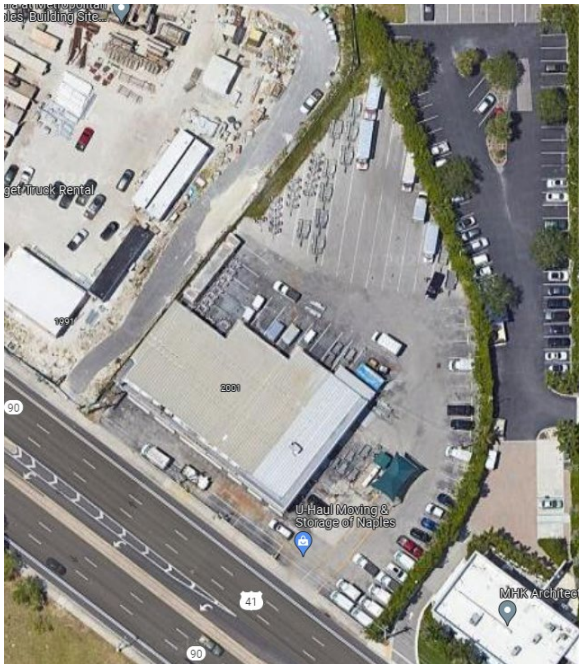
Collier County is experiencing significant growth along Hwy 41. The growth is due to multiple new construction projects in the area and additional planned developments forthcoming.

The proposed location will serve 16,452 households within 3- mile radius trade area. This infill development will allow U-Haul to better serve the storage needs of the community and activate a property that is currently vacant.

The proposed development requires a PUD amendment and a small- scale Growth Management Plan amendment.

Current location

Land Area: 1.02 acres
Building Gross: 11,909 SF , One- story



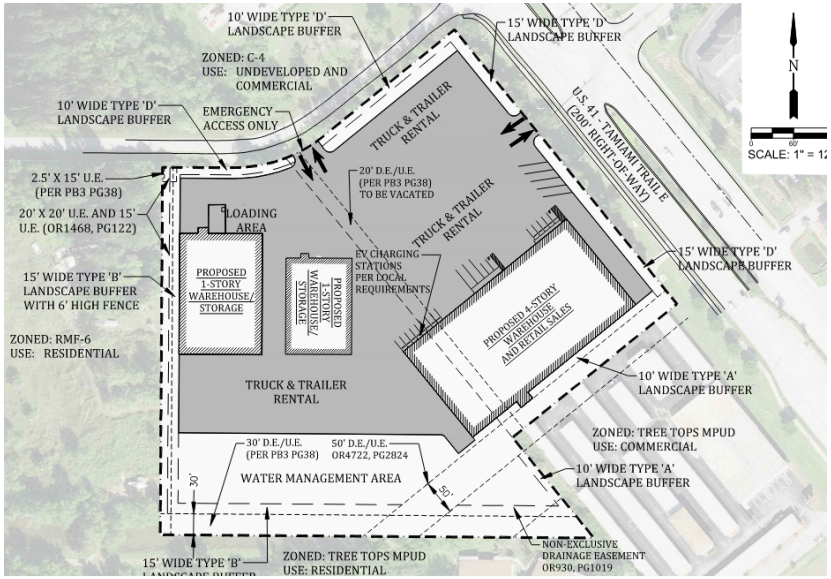
Because of the of the property size , the existing U-Haul location offers only limited services.

Offered services (limited):

- Self-storage (limited)
- Truck and trailed share
- Moving supplies
- Hitches and propane
- U- box storage (limited)

“One Stop Shop” Smart Mobility Proposed location

Land Area: 8.24 acres
Building Gross: 102,000 SF ,Three- story

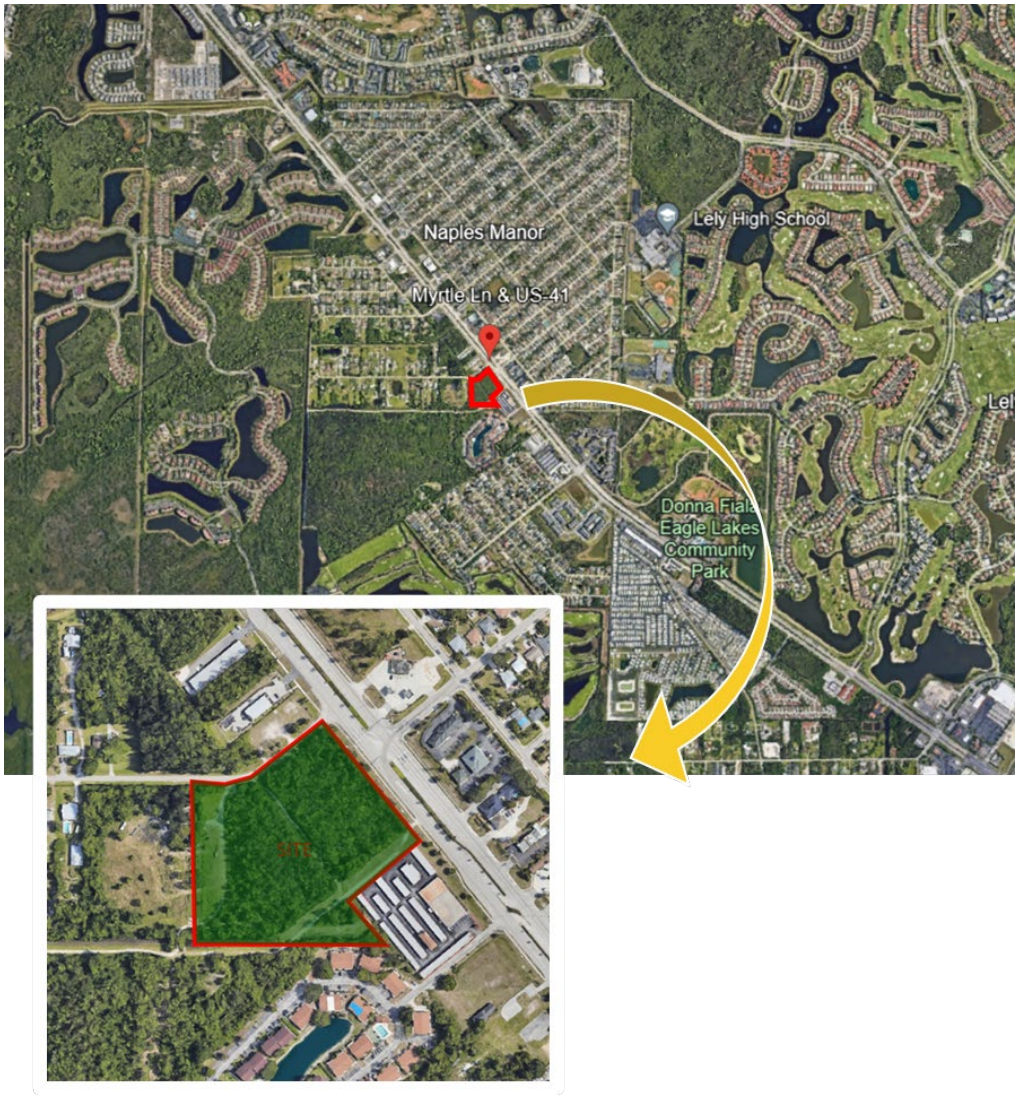


The U-Haul proposed site campus location will provide multiple products and services on the 8.24-acre site.

Offered services:

- Self-storage
- Truck and trailer share
- Moving supplies
- U- Box storage
- Hitches and towing needs
- Propane, accessories
- Moving labor
- College moving
- Military moving
- International moving
- Charging stations

Proposed Location/ Site Accessibility

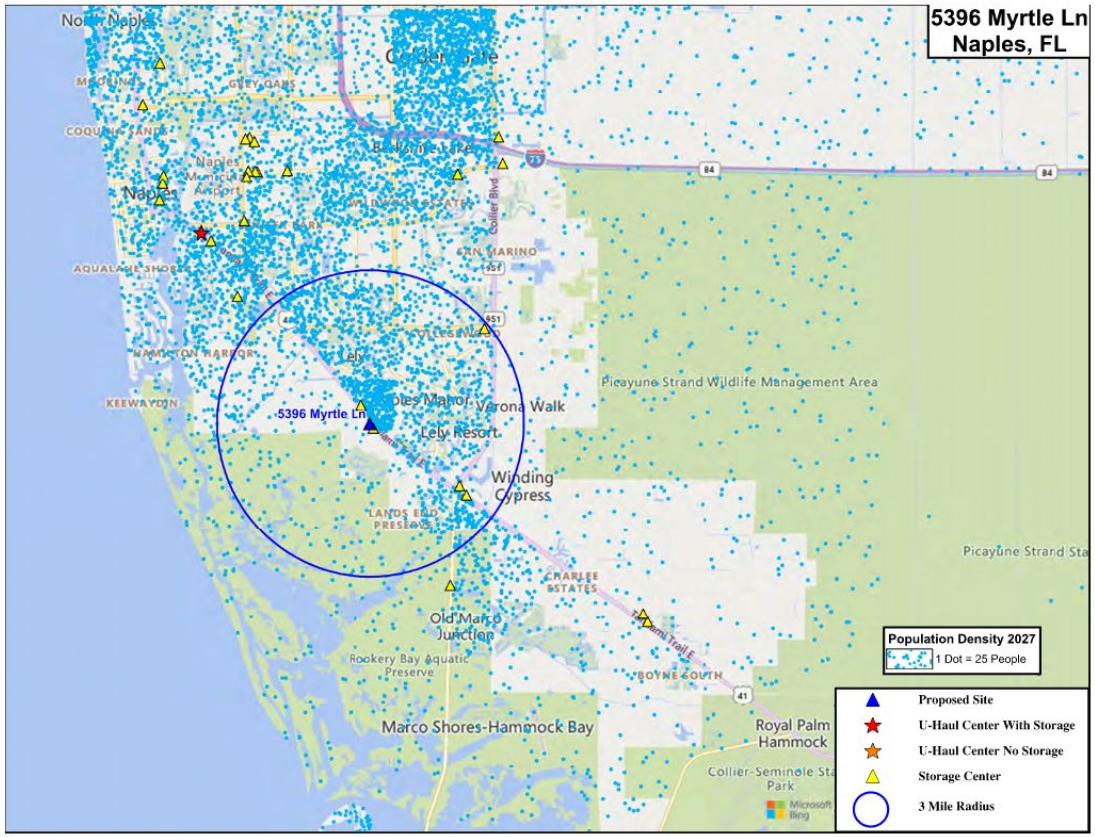


The property is currently vacant parcel. It is surrounded by residential properties, vacant lots and some commercial properties along US Hwy 41.

The site location along US Hwy 41 would make the proposed development ideal location to serve the residential community on both sides of the US Hwy 41. US Hwy 41/ Tamiami Trail E is currently a 6-lane major arterial road connecting Naples Florida with the rest of the Collier County.

U-Haul Moving and Storage is a convenience business. Our philosophy is to place U-Haul stores in high growth residential areas, where we fill a need for our products and services. Customers are made aware of the U-Haul store, primarily via drive-by awareness, much like that of a convenience store, restaurant or hardware store.
The proposed location will have approximately 25-30 employees.

Current Population & Projected Population Growth over 5 years



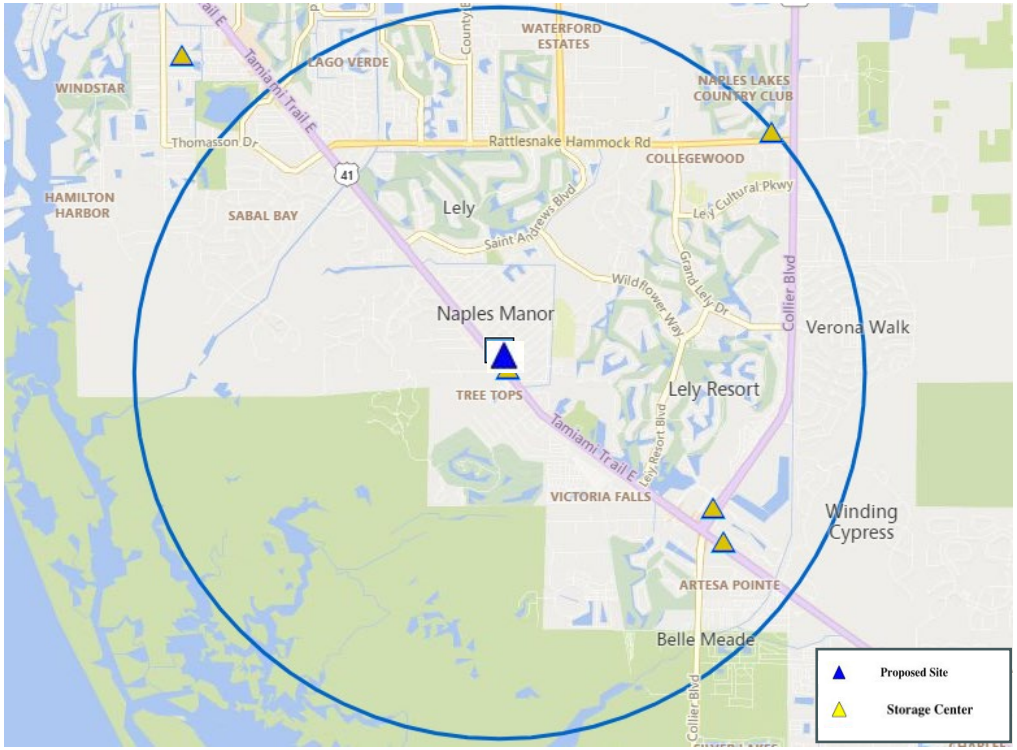
The map illustrates the location and intensity of the population growth that is expected to occur over the next five years. The growth is expected to contribute to a significant increase in the demand for storage that cannot be met by the current available storage locations.

Below is the estimated population data for the projected growth in the different trade areas and the county as a whole.

The current estimated population in the trade area is 39,204 residents, 16,452 households within a 3- mile radius. Collier County's estimated current population is 387,712 residents. The projected population growth over five years in the 3-mile radius trade areas is 12.5 %, which is a conservative number due to all new development coming in the area.

Trade Area	2022 Estimated Population	2027 Projected Population	5 Year Pop Increase	Total Pop Growth
1 Mile Radius	11,551	13,393	1,842	15.9%
3 Mile Radius	39,683	44,662	4,979	12.5%
5 Mile Radius	82,204	89,149	6,945	8.4%
Collier County	387,712	416,113	28,401	7.3%

Storage Saturation -3 miles



The map illustrates the proposed location of the U- Haul center and storage competitors within 3-mile radius trade area. Several of the competitors are old model drive up mini-storage facilities. The proposed U-Haul storage location with interior access climate-controlled storage is a modern storage center. Its campus will provide multiple products and services. It is referred to as " One Stop Shop"- self storage , U Box storage , truck and trailer share and related retail, EV charging stations, hitches, propane, etc.

Location Type	Entity#	MCO#	Entity name	Street	City	State
Storage Community	Naples	830	Cubesmart Self Storage	11400 Tamiami Trl E	Naples	FL
Storage Community	Naples	830	Storesmart	6810 Collier Blvd	Naples	FL
Storage Community	Naples	830	Public Storage	13191 Tamiami Trl E	Naples	FL
Storage Community	Naples	830	Extra Space Storage	7391 Rattlesnake Hammock Rd	Naples	FL

5396 Myrtle Lane, Naples FL Competitors - 3 miles Marketing Area Propensity (MAP)

The table provides information regarding the type of facilities the competitor sites include within 3-mile radius.
Two storage competitors are of a newer type storage with 100% climate- controlled storage facility. The other two competitors include older model storage with climate and non climate storage.
This shows that trend in the industry that that storage has changed from a drive- up industrial use to climate controlled commercial use.

The additional sites provided for future development include two, which are Car Condos and the third was already included in our analysis, which is Public storage.

MAP - (Market Area Propensity) - 10.90 MAP indicates we are underserving the community based on the number of locations, storage NRSF available, and population within the area.

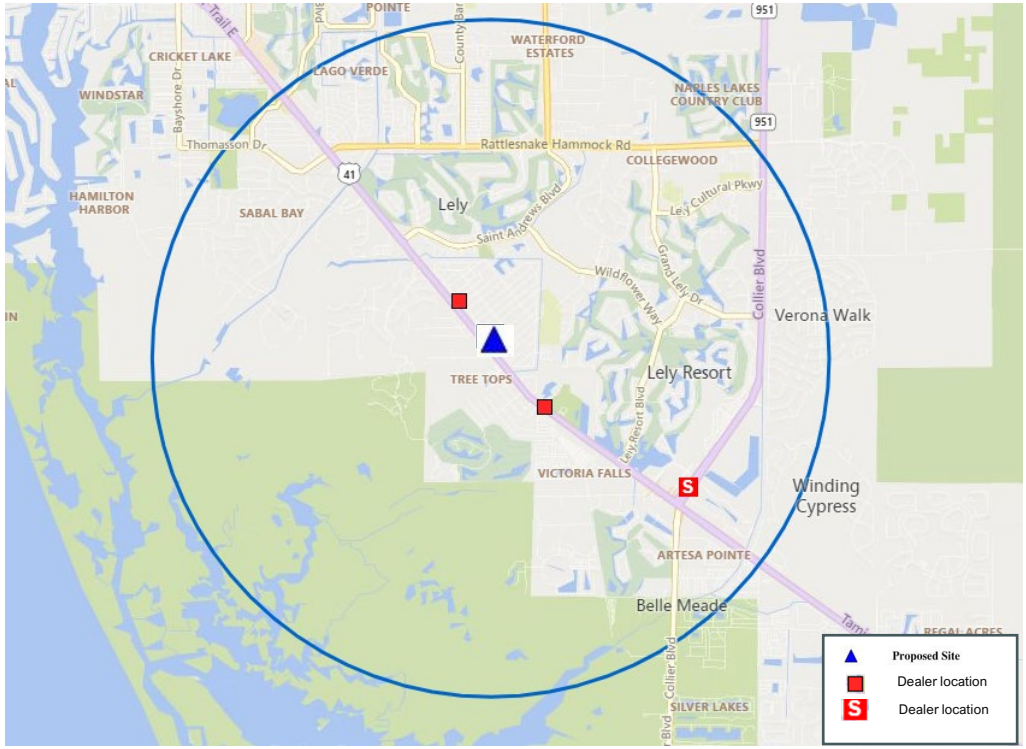
MAP of 20 or below is an indicator for us to be in the community and shows us that the community is underserved.

5396 Myrtle Lane, Naples FL Competitors 3 Miles
Marketing Area Propensity Calculation

Storage Facility	Approximate Sq Foot		
	Climate	None Climate	Total Sq ft
Cube Smart 11400 Tamiami Trail E Naples FL 34113	56,000	24,000	80,000
Public Storage 13191 Tamiami Trail E Naples FL 34114	105,000	0	105,000
Midgard Self Storage 6810 Collier Blvd Naples FL 34114 (formaly known as Storesmart)	35,000	15,000	50000
Extra Space Storage 7391 Rattlesnake Hammock RD Naples FL 34113	70,000	0	70,000
Proposed U-Haul Myrtle Lane Naples FL 34113	102,000	0	102,000
Total	333,000	39,000	372,000

305,000 Sq Ft of Competitor Storage plus 102,000 Proposed U-Haul = 407,000 Sq Ft of storage in 3 miles
Population in 3 miles = 41,000
Storage Facilities in 3 miles = 4
Ave Sq Ft of 4 Storage Facilities=76,250
4x76,250= 305,000 + 102,000 = 407,000 Divided by 41,000 population = 10.90 MAP

Storage Dealers- 3 miles



The map illustrates the location U- Haul dealers within 3-mile radius trade area. The dealers typically would only have a few rental trucks on their lots. Our dealers are local area residents who understand the goals and challenges of the community in which they live and work. They strive to provide quality products and services to ensure their own success, and in turn, support neighboring commerce. Through expanding economies, the U-Haul business model allows local dealers the ability to serve and support the community while improving their own chances of sustainable business outcomes.

Location Type	Entity#	MCO#	Entity name	Street	City	State
Dealer	035051	830	Exxon Gas Station	11163 Tamiami Trail E	Naples	FL
Dealer	029610	830	Global Mail & Ship	11522 Tamiami Trail E	Naples	FL
Dealer	008784	830	Midgard Naples 1	6810 Collier Blvd	Naples	FL

Demographic Data Source

The demographic data used in this analysis was licensed by Alteryx from Experian US. The vintage used was from their 2022 Q3 release. This data is available at several geographic levels: County, ZIP Code, Census Tract, and Block Group. It contains a wide range of demographic variables, including, but not limited to housing counts, population counts, income variables, home ownership, housing types, age characteristics, occupation, and seasonality metrics. Furthermore, Experian US also provides 5-year housing, population, and income projections.

Additional Considerations and benefit to Collier County

- U-Haul strives to locate stores within high demand communities to increase convenience and access for DYI moving customers while reducing traffic congestion and emissions. U-Haul centers generate less traffic than other retail or commercial uses.
- U-Haul and The Conservation Fund have worked together since 2007 to raise both money and awareness to address climate change by planting trees and restoring forests.
- The partnership has grown to include urban conservation and green economy opportunities which are creating green jobs, reducing neighborhood flooding, and providing safe places to play in underserved communities.
- It is our desire to improve the quality of the existing property by implementing sustainability features, such as energy efficient LED lighting , energy efficient windows and HVAC units, local building materials, sustainable site design features.
- The proposed U-Haul center would add to the property value and increase the tax base, which strengthens the economic base of the community.
- U-Haul also promotes social and economic sustainability, more than 18 million customers rented U- Haul trucks and trailers in 2021 nationwide. U-Haul provides positive economic support to a community by attracting customers from different regions.

Additional Consideration and benefit to Collier County

- This added customer base, increases awareness of other nearby merchants and fosters relationships that may bring new business to the city, ensuring a viable, expanding local economy.
- Increased business traffic may require hiring additional employees, improving the quality of life for residents needing work to support themselves and/or their families.
- U-Haul has a successful and reliable track record of stability and reliability and, is a devoted neighbor in over 1,000 communities in North America. Strengthened with 77 years of DYI moving and storage expertise, U-Haul is a reliable anchor business attracting customers from within and around Collier County community.
- This proposed U- Haul storage location will increase exposure and support many neighboring small businesses, adding to the County's economic success and resilience.

Image courtesy of Google Earth

Conclusion

The Needs Analysis illustrates the growth in Collier County and justifies the need to relocate U-Haul to this location, where we can provide all the amenities and services that our business offers.

The proposed location offers numerous advantages due to the “One Stop Shop” Smart Mobility operation, part of U-Haul’s business model and is contributing positively to the local community. Collier County is known for its affluent population and robust economy, making it an ideal location for a U-Haul facility. The county’s steady population growth, combined with high number of seasonal residents, indicates a consistent demand for self-storage solutions and truck rental services.

Significant population growth is projected in the area served by the proposed U- Haul storage center along US Hwy 41. The proposed center aligns with Collier County's economic, demographic, and environmental dynamics. The venture is poised to contribute positively to the County's development, offering valuable services that cater to the needs of both residents and businesses while adhering to the local environmental and community standards.

5396 Myrtle Lane Commercial Subdistrict (PL20230011318)

Public Facilities

Provide the existing Level of Service Standard (LOS) and document the impact the proposed change will have on the following public facilities:

The subject 8.24± acre property proposes to create a new subdistrict which would permit up to a maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses consistent with uses permitted in the C-3 commercial Zoning District of the Collier County Land Development Code (LDC).

The public facilities analysis evaluates the project impacts on Class A public facilities including potable water, wastewater, drainage, parks, schools, roadways, fire/EMS and solid waste. The source for the LOS information is the Collier County 2021 AUIR, unless otherwise noted.

Potable Water

The property is located within the Collier County potable water service area. The LOS for potable water is based on residential population; therefore, the proposed project will not cause any LOS issues in the 5-year planning horizon.

Sanitary Sewer

The property is located within the Collier County sanitary sewer service area. The LOS for sanitary sewer is based on residential population; therefore, the proposed project will not cause any LOS issues in the 5-year planning horizon.

Arterial and Collector Roads

Please refer to the Traffic Impact Statement for discussion of the project's impact on the LOS for arterial and collector roadways within the project's radius of development influence.

Drainage

The County has adopted a LOS standard for private developments which requires development to occur consistent with water quantity and quality standards established in Ordinances 74-50, 90-10, 2001-2 and LDC Ordinance 2004-41, as may be amended.

The property will be issued an Environmental Resource Permit (ERP) by the Florida Department of Environmental Protection (FDEP), which has established requirements for water quality treatment, storm water runoff attenuation and controlled off-site discharge of storm water runoff.

The proposed development is consistent with Collier County LOS standards.

Solid Waste

The property is located within the Collier County solid waste service area. The LOS for solid waste is based on residential population; therefore, the proposed project will not cause any LOS issues in the 5-year planning horizon.

Parks: Community and Regional

The increased commercial use has no impacts on this public facility.

No adverse impacts to Community or Regional Parks result from the amendment of this subdistrict.

Schools

The increased commercial use has no impacts on this public facility.

No adverse impacts to Community or Regional Parks result from the amendment of this subdistrict.

Fire Control, Sheriff and EMS

The proposed project lies within the Greater Naples Fire and Rescue District. The Greater Naples Fire Control and Rescue District - Station #21, located at 11121 Tamiami Trail E, Naples, FL 34113, which is approximately 3.3 miles from the property. No significant impacts to Fire Control level of service are anticipated due to the proposed project. Estimated impact fees for EMS and fire would be determined at time of SDP based on the size or type of development.

Sheriff, Fire Protection and EMS Services location/address of facilities intended to serve the project are;

Greater Naples Fire Control and Rescue District - Station #21
11121 Tamiami Trail E, Naples, FL 34113

Collier County Sheriff's Office - District 5
13245 Tamiami Trail E, Naples, FL 34114

Project Description

The applicant is proposing to rezone property from the Myrtle Woods CPUD and RFM-6 Zoning Districts to a Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. This will be a replacement facility for the existing U-Haul facility 5 miles to the west in the Mini-triangle redevelopment area. The property is within Section 29, Township 50S, Range 26E and consists of ±8.24 acres. Refer to **Figure 1 – Project Location Map** and **Appendix A: Project Master Site Plan**.

Figure 1 – Project Location Map

The project will consist of a truck rental operation and 200,000 square feet (SF) of self-storage.

A methodology memorandum was transmitted via email to the Collier County Transportation Planning staff on January 24, 2024 (ref. **Appendix B: Initial Meeting Checklist (Methodology Meeting)**).

The project access connection to the surrounding roadway network is proposed as direct connections onto US 41 East and Myrtle Ln (emergency only). A detailed evaluation will be performed at the time of site development permitting.

The analysis year is 2029.

Trip Generation

The PUD is treated for trip generation purposes as 3,000 SF of truck rental office space represented by Institute of Transportation Engineers (ITE) land use code (LUC) 812, 200,000 SF of self-storage (LUC 151), and the three-day average peak hour trips counted at the existing site (daily not available) factored to peak season using the FDOT 2023 Countywide peak season conversion factor (all in **Appendix E)**.

The ITE rates or equations are used for the trip generation calculations, as applicable. The ITE 11th edition data pages are provided in **Appendix C**. The trip generation associated with the proposed build-out condition is summarized in **Table 1.**

Under the existing zoning, a typical development scenario could be 61,000 SF of shopping center. Its net new trip generation (excluding pass-by trips) is shown in **Table 1** for comparison (see **Appendix C** for details). The proposed development is projected to generate significantly less traffic.

Table 1 - Trip Generation

Trip Generation Rates from ITE *Trip Generation Manual* 11th Ed.

U-Haul Existing Site Traffic Counts in Appendix E - Existing Daily traffic not available.

In agreement with the Collier County TIS guidelines, significantly impacted roadways are identified based on the proposed project highest peak hour trip generation (net new total trips) and consistent with the peak hour of the adjacent street traffic. Based on the information contained in the Collier County 2023 Annual Update and Inventory Report (AUIR), the peak hour for the adjacent roadway network is PM peak hour.

The estimated effect on external trips at project buildout condition is a reduction of 176 PM peak hour two-way trips (adjusted).

The maximum total daily trip generation for the PUD shall not exceed 62 two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval.

Trip Distribution and Assignment

The distribution of project traffic was estimated by adding a new traffic analysis zone (TAZ# 2986) to the District 1 Regional Planning Model (D1RPM) containing 40 commercial employees consistent with the expected employment for the truck rental operation and the self-storage unit. **Figure 2** shows the distribution percentages produced by the adopted model in the immediate vicinity of the project.

Figure 2 - Trip Distribution

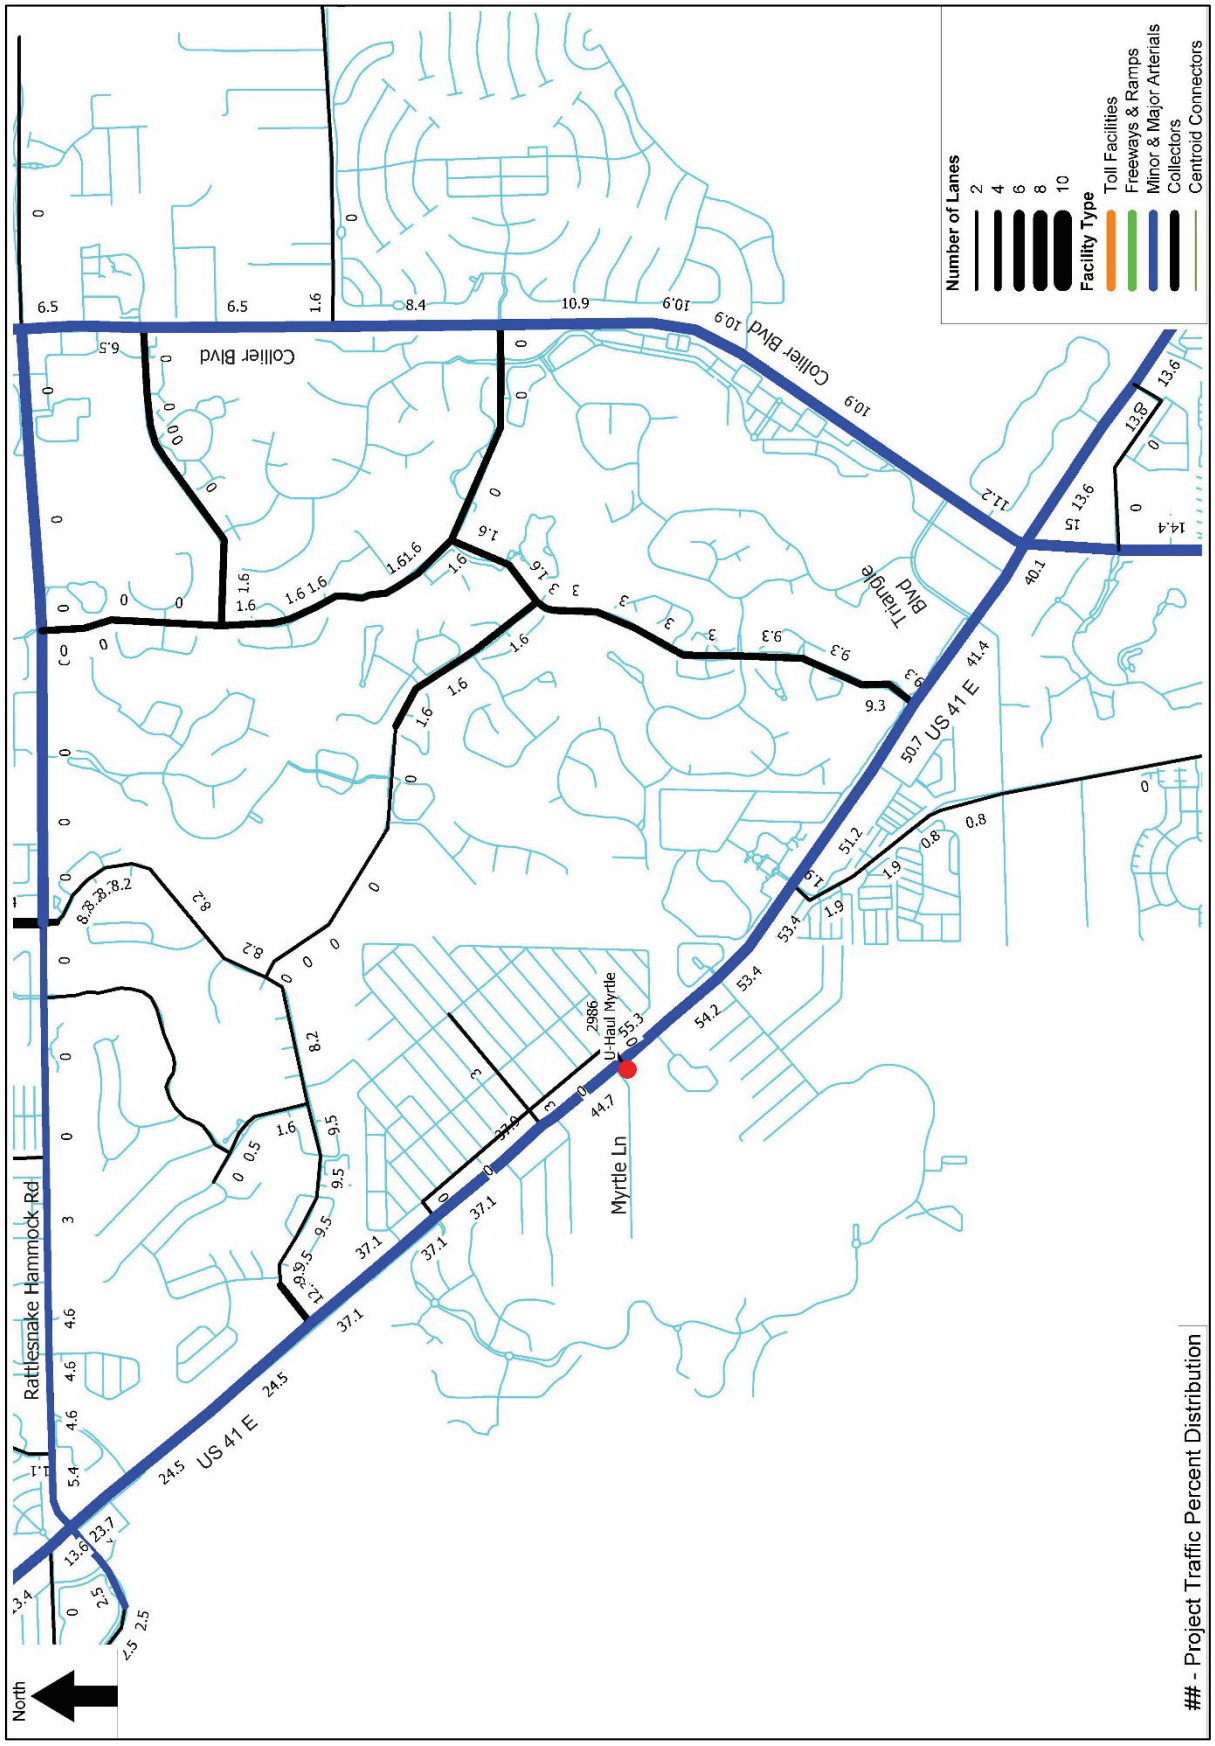

Table 2 contains the arterial and collector road segments on which the project has a significant impact or were reviewed to confirm the limit of significant impact. The distribution percentages are the averages of those at the segment endpoints in **Figure 2**. The traffic volume distributed is the project's estimated impact (62 peak hour two-way).

The calculations that **Table 2** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 2 –Project Traffic Distribution and PM Peak Hour Impact

AUIR ID #	Roadway Link	From	To	Percent of Total Project Traffic (1)	PM Peak Hour Project Traffic N/E (2)	PM Peak Hour Project Traffic S/W (2)	Existing Configuration (3)	LOS Minimum Standard	Peak Hour Peak Direction Service Volume (3)	Significance Threshold (%) (4)	Peak Direction Project Traffic as Percentage of Service Volume	Significant Impact Y/N
93.0	Tamiami Trail East	Rattlesnake Hammock Road	Myrtle Ln	34.2	10	11	6D	E	3000	2	0.4	No
93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	48.4	15	15	6D	E	3000	2	0.5	No

Notes: 1) Figure 2, average of segment endpoints.
2) Percentage times PM peak hour net new external directional project traffic totals Table 1
3) 2023 AUIR
4) Collier County TIS Guidelines

Future Background Traffic Volumes

Tables 3 through 5 contain the road segments to which the project connects.

The existing roadway conditions for arterials and collectors are from the Collier County 2023 AUIR.

In **Table 3**, the annual growth rate listed for arterials and collectors is the one used in the 2023 AUIR to predict future deficiencies and is used to inflate the existing year peak hour peak direction volume from the 2023 AUIR for the first five years (two percent thereafter).

For arterials and collectors, the growth rate derived result is compared with the 2023 AUIR volume plus the trip bank volume. The higher of the two results is used as the future background traffic volume. The calculations that **Table 3** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 3 – Future Background Traffic

AUIR ID #	Roadway Link	From	To	Existing Year	Existing Year Peak Hour Peak Direction Volume (1)	Peak Direction (1)	AUIR Annual Percent Growth Rate for First 5 years (1)	Growth Factor (2)	Trip Bank Volume (1)	2029 Growth Rate Based Peak Hour Peak Direction Background Traffic Volume	AUIR + Trip Bank Volume	2029 Peak Hour Peak Direction Background Traffic Volume (3)
93.0	Tamiami Trail East	Rattlesnake Hammock Road	Myrtle Ln	2023	2290	E	2.0%	1.126	403	2579	2693	2693
93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	2023	2290	E	2.0%	1.126	403	2579	2693	2693

Notes: 1) 2023 AUIR

2) Growth Factor assumes 2% annual growth after the first 5 years.

3) Greater of Growth based estimate or Existing + Trip Bank

Existing and Future Roadway Conditions Without Project

For arterials and collectors, the future roadway conditions are based on the current Collier County 5-Year Work Program. Roadway improvements that are currently under construction, scheduled to be constructed within the five-year Transportation Improvement Plan (TIP) or Capital Improvement Program (CIP) are considered committed improvements. There are no scheduled improvements to analyzed roadway segments.

Existing and future roadway conditions are illustrated in **Table 4**. The analyzed segments are operating at acceptable level of service in existing conditions. Due to future background traffic all segments are projected to operate at acceptable level of service.

The calculations that **Table 4** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 4 – Existing and Future Roadway Conditions

AUIR ID #	Roadway Link	From	To	Existing Configuration (1)	Existing Peak Hour Peak Direction Service Volume (1)	Existing Year Peak Hour Peak Direction Volume (1)	Existing Year V/C	Level of Service Deficiency Yes/ No	2029 Future Configuration (2)	Improved	2029 Peak Hour Peak Direction Service Volume (2)	2029 Peak Hour Peak Direction Background Traffic Volume (3)	2029 Background Traffic V/C	2029 Level of Service Deficiency Yes/ No
93.0	Tamiami Trail East	Rattlesnake Hammock Road	Myrtle Ln	6D	3000	2290	0.76	No	6D	No	3000	2693	0.90	No
93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	6D	3000	2290	0.76	No	6D	No	3000	2693	0.90	No

Notes: 1) 2023 AUIR

2) 2023 AUIR or funded improvements

3) Table 3

Future Conditions With Project

Table 5 adds the project traffic volumes developed in **Table 2** to the 2029 background traffic volumes developed in **Table 3.** In cases where the peak direction of project traffic aligns with the peak direction of background traffic, the background traffic portion of the total traffic is the peak hour peak direction volume from **Table 3**.

In the cases where the two peak directions (background and project) are opposed, a D factor of 0.56 is assumed for the background traffic, the average of the values used for interrupted flow facilities in the FDOT Generalized Service Volume Table for Urbanized Areas (see **Appendix D**). This factor is used to estimate the background two-way volume, and hence to establish the two directional components of that two-way volume. Directional project traffic volumes from **Table 2** are added and the maximum of the resulting two total traffic directional volumes is used as the basis of analysis.

All of the analyzed segments are projected to operate at acceptable level of service when project traffic is added to future background traffic.

The calculations that the table contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

The analyzed roadway segments are not located within Collier County's Transportation Concurrency Exception Area (TCEA). In addition, the proposed development is not situated within a County designated Transportation Concurrency Management Area (TCMA). The TCEA's and TCMA's designations are provided in Policy 5.4 and 5.6 of the Transportation Element – Collier County Growth Management Plan (GMP).

Table 5 -Future Roadway Total Traffic Conditions

Notes: 1) Table 3
2) Table 2
3) Appendix D
4) Table 4

Site Access Management

The site connection to US 41 East will be analyzed at the site development approval stage.

The posted speed is 50 mph. Left and right turn lanes are recommended based on travel speed.

The recommended deceleration length including taper is 290 feet.

Expected westbound Left Turn = 30 * 55.3% = 17 vehicles.

Expected eastbound Right turn = 30* 44.7% = 13 vehicles.

Improvement Analysis

Based on the results illustrated within this traffic analysis, the proposed project would have a de-minimis impact on the segments of US 41 E to which the project connects. Those segments are currently operating at acceptable level of service and all will operate at acceptable level of service in 2029 with or without project traffic.

The maximum total daily trip generation for the CPUD shall not exceed **62** two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval.

Mitigation of Impact

The developer proposes to pay the appropriate Collier County Road Impact Fee as building permits are issued for the project, as applicable.

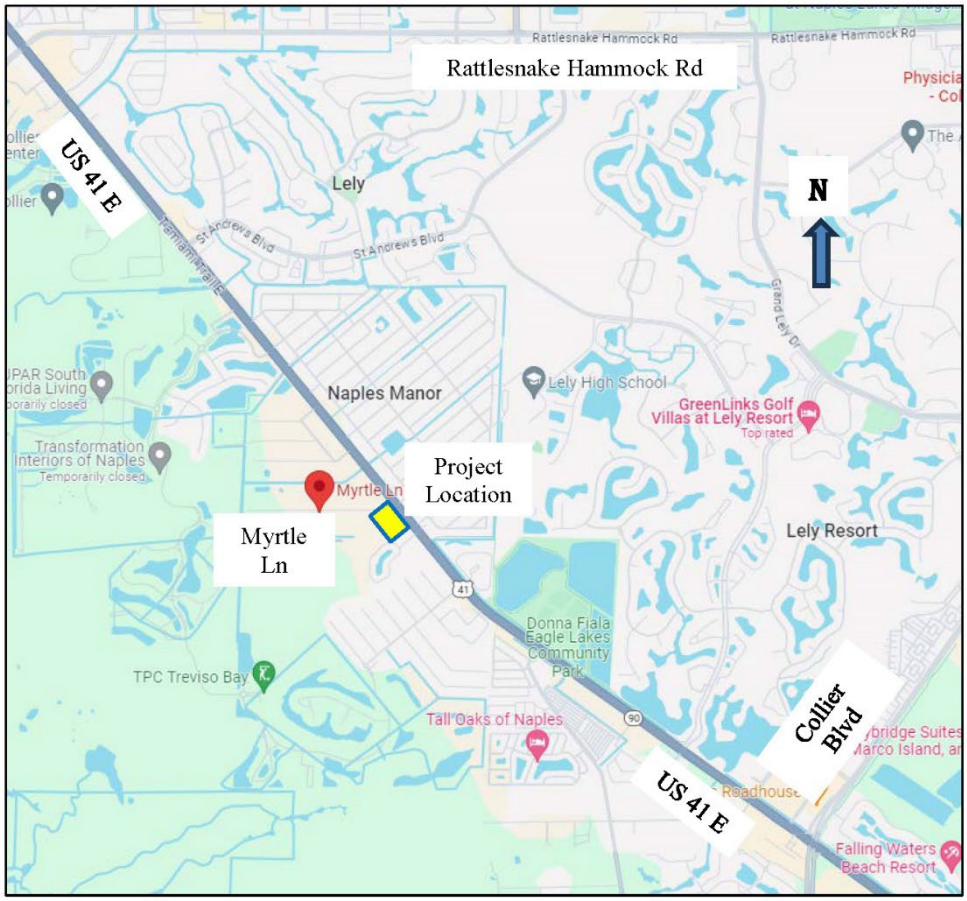
Proposed Development:
Name: U-Haul Relocation
Location: on the south side of Tamiami Trail E at the intersection of Myrtle Ln. (refer to **Figure 1**).

Page **1** of **7**

Figure 1 – Project Location Map



Land Use Type: Mix of truck rental and self-storage.

ITE Code#s:

ITE has no land use code (LUC) for truck rental. LUC 812 Building Material and Lumber Store is proposed as a comparable use and possible replacement for Custom.

Custom – Driveway volume counts at existing location of the truck rental and moving related retail sales.

LUC 151 – Mini-Warehouse.

Description: The application seeks to allow the relocated U-Haul truck rental operation moving from its current location (US 41 E east of its intersection with Davis Blvd.), and add self-storage uses.

Zoning
Existing: Commercial Planned Unit Development (CPUD)
Comprehensive plan recommendation: Urban Fringe.
Requested: PUD Amendment.

Findings of the Preliminary Study:
Study type: Since projected net external AM or PM 2-way peak hour project traffic are expected to be less than 100, this study is expected to qualify as a Minor Study TIS.
Proposed TIS will include trip generation, traffic distribution and assignments, significance test (based on 2%/2%/3% criterion), and operational site access analysis.
The report will provide existing LOS and document the impact the proposed project will have on designated arterial and collector roads.
Roadway concurrency analysis – based on estimated net external PM peak hour traffic.
The TIS shall be consistent with Collier County TIS Guidelines and Procedures.
Site access is via direct access from US 41 East and Myrtle Ln. Access operations will be evaluated at the time of development order application.
No intersection analysis will be provided with the initial report and there will be a follow up operations analysis coordinated with the FDOT.

Study Type: (if not net increase, operational study)

Collier County
Traffic Impact Study Review Fee Schedule

Fees will be paid incrementally as the development proceeds: Methodology Review, Analysis Review, and Sufficiency Reviews. Fees for additional meetings or other optional services are also provided below.

Methodology Review - $500 Fee
Methodology Review includes review of a submitted methodology statement, including review of submitted trip generation estimate(s), distribution, assignment, and review of a "Small Scale Study" determination, written approval/comments on a proposed methodology statement, and written confirmation of a re-submitted, amended methodology statement, and one meeting in Collier County, if needed.

"Small Scale Study" Review - No Additional Fee (Includes one sufficiency review)
Upon approval of the methodology review, the applicant may submit the study. The review includes: a concurrency determination, site access inspection and confirmation of the study compliance with trip generation, distribution and maximum threshold compliance.

"Minor Study Review" - $750 Fee (Includes one sufficiency review)
Review of the submitted traffic analysis includes: optional field visit to site, confirmation of trip generation, distribution, and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of off-site improvements within the right-of-way, review of site access and circulation, and preparation and review of "sufficiency" comments/questions.

"Major Study Review" - $1,500 Fee (Includes two intersection analysis and two sufficiency reviews)
Review of the submitted traffic analysis includes: field visit to site, confirmation of trip generation, special trip generation and/or trip length study, distribution and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of traffic growth analysis, review of off-site roadway operations and capacity analysis, review of site access and circulation, neighborhood traffic intrusion issues, any necessary improvement proposals and associated cost estimates, and preparation and review of up to two rounds of "sufficiency" comments/questions and/or recommended conditions of approval.

"Additional intersection Review" - $500 Fee
The review of additional intersections shall include the same parameters as outlined in the "Major Study Review" and shall apply to each intersection above the first two intersections included in the "Major Study Review"

"Additional Sufficiency Reviews" - $500 Fee
Additional sufficiency reviews beyond those initially included in the appropriate study shall require the additional Fee prior to the completion of the review.

Land Use: 151
Mini-Warehouse

Description

A mini-warehouse is a building in which a number of storage units or vaults are rented for the storage of goods. They are typically referred to as "self-storage" facilities. Each unit is physically separated from other units, and access is usually provided through an overhead door or other common access point.

Additional Data

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s, the 1990s, the 2000s, and the 2010s in California, Colorado, Massachusetts, Minnesota, Nevada, New Jersey, Texas, and Utah.

Land Use: 812
Building Materials and Lumber Store

Description

A building materials and lumber store is a free-standing building that sells hardware, building materials, and lumber. The lumber may be stored in the main building, yard, or storage shed. Hardware/paint store (Land Use 816) and home improvement superstore (Land Use 862) are related uses.

Additional Data

An outside storage area is not included in the overall gross floor area measurements. However, if the storage area is located within the principal outside faces of the exterior walls, it is included in the overall gross floor area of the building.

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s and the 2010s in California, New York, Texas, and Washington.

Land Use: 821
Shopping Plaza (40-150k)

Description

A shopping plaza is an integrated group of commercial establishments that is planned, developed, owned, and managed as a unit. Each study site in this land use has between 40,000 and 150,000 square feet of gross leasable area (GLA). The term "plaza" in the land use name rather than "center" is simply a means of distinction between the different shopping center size ranges. Various other names are commonly used to categorize a shopping plaza within this size range, depending on its specific size and tenants, such as neighborhood center, community center, and fashion center.

Its major tenant is often a supermarket but many sites are anchored by home improvement, discount, or other stores. A shopping plaza typically contains more than retail merchandising facilities. Office space, a movie theater, restaurants, a post office, banks, a health club, and recreational facilities are common tenants. A shopping plaza is almost always open-air and the GLA is the same as the gross floor area of the building.

The 150,000 square feet GLA threshold value between shopping plaza and shopping center (Land Use 820) is based on an examination of trip generation data. For a shopping plaza that is smaller than the threshold value, the presence or absence of a supermarket within the plaza has a measurable effect on site trip generation. For a shopping center that is larger than the threshold value, the trips generated by its other major tenants mask any effects of the presence or absence of an on-site supermarket.

The 40,000 square feet GFA threshold between shopping plaza and strip retail plaza (Land Use 822) was selected based on an examination of the overall shopping center/plaza database. No shopping plaza with a supermarket as its anchor is smaller than 40,000 square feet GLA.

Shopping center (>150k) (Land Use 820), strip retail plaza (<40k) (Land Use 822), and factory outlet center (Land Use 823) are related uses.

Land Use Subcategory

The presence or absence of a supermarket in a shopping plaza has been determined to have a measurable effect on site trip generation. Therefore, data are presented for two subcategories for this land use: sites with a supermarket anchor and sites without a supermarket.

Additional Data

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s, the 1990s, the 2000s, and the 2010s in Alberta (CAN), British Columbia (CAN), California, Connecticut, District of Columbia, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Nevada, New Jersey, New York, Ontario (CAN), Oregon, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Washington, and Wisconsin.

Source Numbers

105, 110, 156, 159, 186, 198, 204, 211, 213, 239, 259, 260, 295, 301, 304, 305, 307, 317, 319, 358, 376, 390, 400, 404, 437, 444, 446, 507, 580, 598, 658, 728, 908, 926, 944, 946, 960, 973, 974, 1004, 1009, 1025, 1069

Shopping Plaza (40-150k) - Supermarket - No (821)

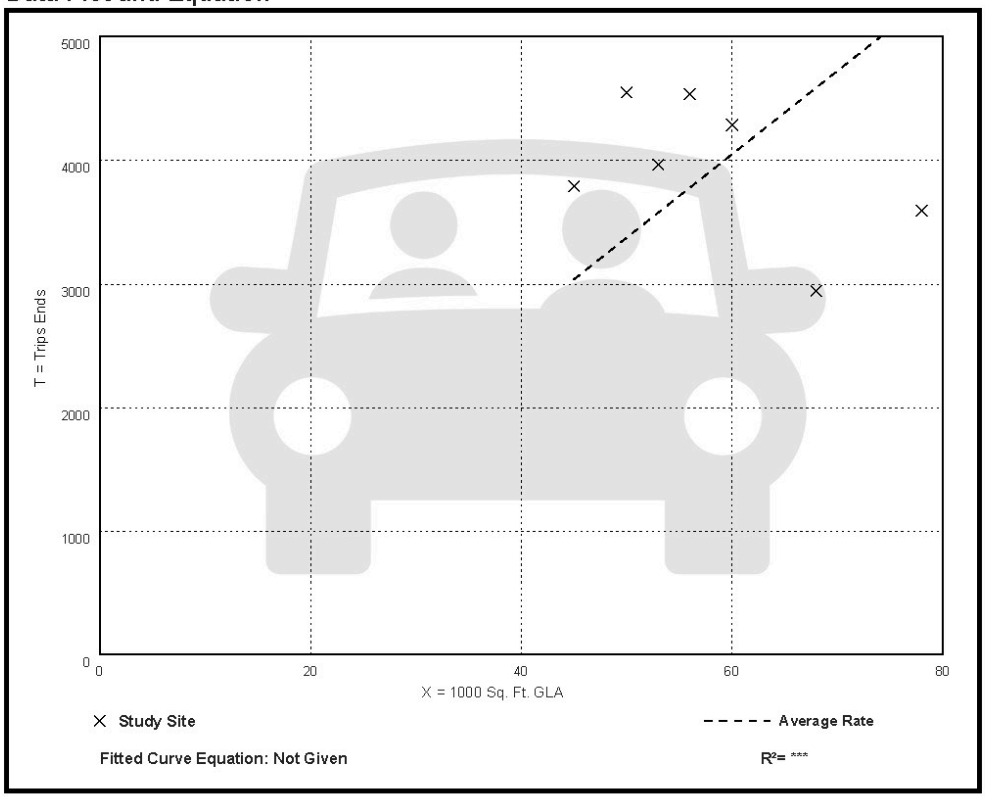
Vehicle Trip Ends vs: 1000 Sq. Ft. GLA
On a: Weekday

Setting/Location: General Urban/Suburban
Number of Studies: 7
Avg. 1000 Sq. Ft. GLA: 59
Directional Distribution: 50% entering, 50% exiting

Vehicle Trip Generation per 1000 Sq. Ft. GLA

Average Rate	Range of Rates	Standard Deviation
67.52	43.29 - 91.06	19.25

Data Plot and Equation



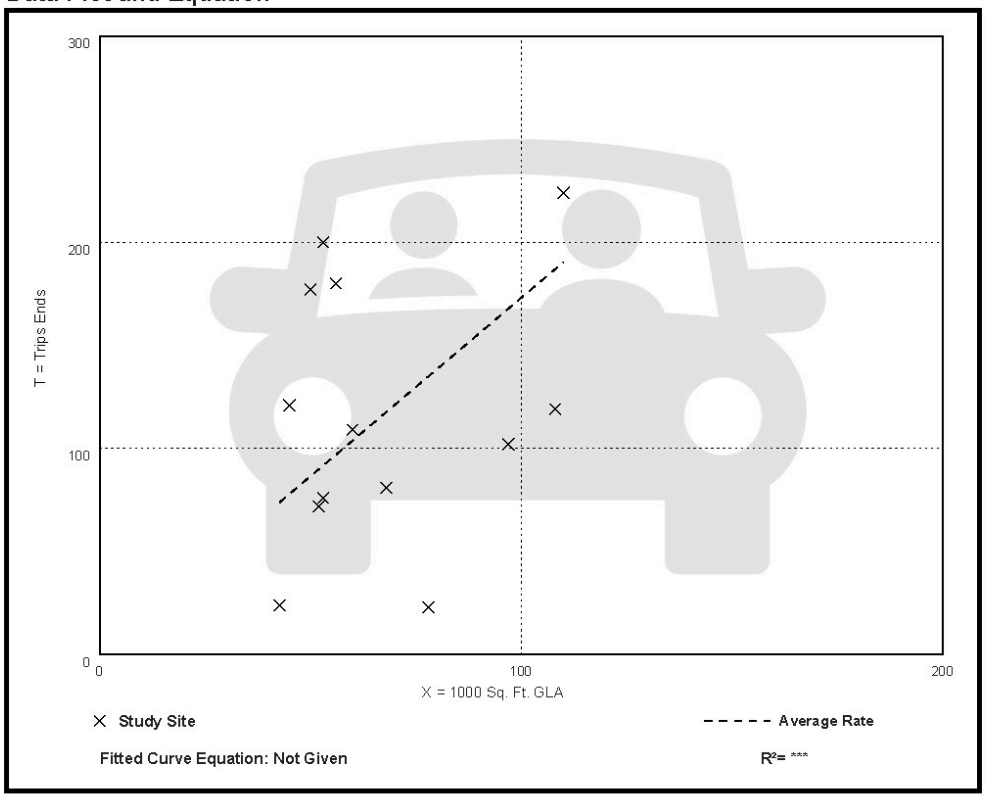
Shopping Plaza (40-150k) - Supermarket - No (821)

Vehicle Trip Ends vs: 1000 Sq. Ft. GLA
On a: Weekday,
Peak Hour of Adjacent Street Traffic,
One Hour Between 7 and 9 a.m.
Setting/Location: General Urban/Suburban
Number of Studies: 13
Avg. 1000 Sq. Ft. GLA: 67
Directional Distribution: 62% entering, 38% exiting

Vehicle Trip Generation per 1000 Sq. Ft. GLA

Average Rate	Range of Rates	Standard Deviation
1.73	0.29 - 3.77	1.06

Data Plot and Equation



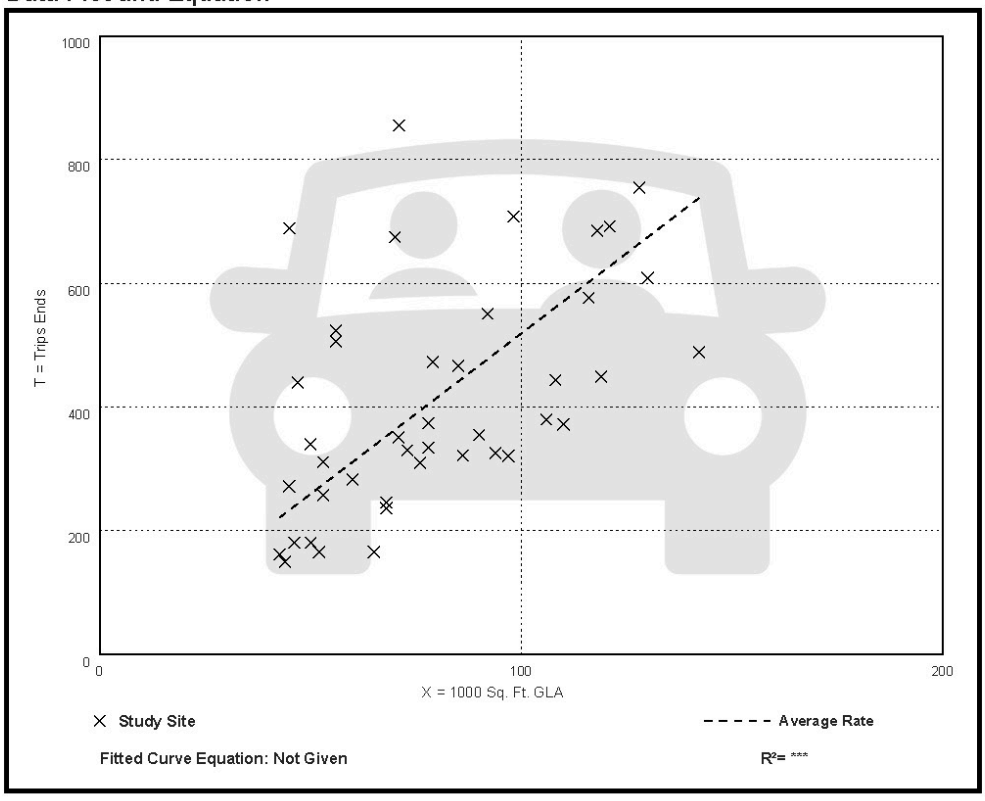
Shopping Plaza (40-150k) - Supermarket - No (821)

Vehicle Trip Ends vs: 1000 Sq. Ft. GLA
On a: Weekday,
Peak Hour of Adjacent Street Traffic,
One Hour Between 4 and 6 p.m.
Setting/Location: General Urban/Suburban
Number of Studies: 42
Avg. 1000 Sq. Ft. GLA: 79
Directional Distribution: 49% entering, 51% exiting

Vehicle Trip Generation per 1000 Sq. Ft. GLA

Average Rate	Range of Rates	Standard Deviation
5.19	2.55 - 15.31	2.28

Data Plot and Equation



Appendix D:

FDOT Generalized Level of Service Tables

TABLE 7 Generalized **Peak Hour Directional** Volumes for Florida's Urbanized Areas

January 2020

INTERRUPTED FLOW FACILITIES

STATE SIGNALIZED ARTERIALS

Class I (40 mph or higher posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	830	880	**
2	Divided	*	1,910	2,000	**
3	Divided	*	2,940	3,020	**
4	Divided	*	3,970	4,040	**

Class II (35 mph or slower posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	370	750	800
2	Divided	*	730	1,630	1,700
3	Divided	*	1,170	2,520	2,560
4	Divided	*	1,610	3,390	3,420

Non-State Signalized Roadway Adjustments

(Alter corresponding state volumes by the indicated percent.)

Non-State Signalized Roadways -10%

Median & Turn Lane Adjustments

Lanes	Median	Exclusive Left Lanes	Exclusive Right Lanes	Adjustment Factors
1	Divided	Yes	No	+5%
1	Undivided	No	No	-20%
Multi	Undivided	Yes	No	-5%
Multi	Undivided	No	No	-25%
–	–	–	Yes	+5%

One-Way Facility Adjustment

Multiply the corresponding directional volumes in this table by 1.2

BICYCLE MODE[2]

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes.)

Paved Shoulder/Bicycle Lane Coverage	B	C	D	E
0-49%	*	150	390	1,000
50-84%	110	340	1,000	>1,000
85-100%	470	1,000	>1,000	**

PEDESTRIAN MODE[2]

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes.)

Sidewalk Coverage	B	C	D	E
0-49%	*	*	140	480
50-84%	*	80	440	800
85-100%	200	540	880	>1,000

BUS MODE (Scheduled Fixed Route)[3]

(Buses in peak hour in peak direction)

Sidewalk Coverage	B	C	D	E
0-84%	> 5	≥ 4	≥ 3	≥ 2
85-100%	> 4	≥ 3	≥ 2	≥ 1

UNINTERRUPTED FLOW FACILITIES

FREEWAYS

Core Urbanized

Lanes	B	C	D	E
2	2,230	3,100	3,740	4,080
3	3,280	4,570	5,620	6,130
4	4,310	6,030	7,490	8,170
5	5,390	7,430	9,370	10,220
6	6,380	8,990	11,510	12,760

Urbanized

Lanes	B	C	D	E
2	2,270	3,100	3,890	4,230
3	3,410	4,650	5,780	6,340
4	4,550	6,200	7,680	8,460
5	5,690	7,760	9,520	10,570

Freeway Adjustments

Auxiliary Lane	Ramp Metering
+1,000	+5%

UNINTERRUPTED FLOW HIGHWAYS

Lanes	Median	B	C	D	E
1	Undivided	580	890	1,200	1,610
2	Divided	1,800	2,600	3,280	3,730
3	Divided	2,700	3,900	4,920	5,600

Uninterrupted Flow Highway Adjustments

Lanes	Median	Exclusive left lanes	Adjustment factors
1	Divided	Yes	+5%
Multi	Undivided	Yes	-5%
Multi	Undivided	No	-25%

[1]Values shown are presented as peak hour directional volumes for levels of service and are for the automobile/truck modes unless specifically stated. This table does not constitute a standard and should be used only for general planning applications. The computer models from which this table is derived should be used for more specific planning applications. The table and deriving computer models should not be used for corridor or intersection design, where more refined techniques exist. Calculations are based on planning applications of the HCM and the Transit Capacity and Quality of Service Manual.

[2]Level of service for the bicycle and pedestrian modes in this table is based on number of vehicles, not number of bicyclists or pedestrians using the facility.

[3]Buses per hour shown are only for the peak hour in the single direction of the higher traffic flow.

* Cannot be achieved using table input value defaults.

** Not applicable for that level of service letter grade. For the automobile mode, volumes greater than level of service D become F because intersection capacities have been reached. For the bicycle mode, the level of service letter grade (including F) is not achievable because there is no maximum vehicle volume threshold using table input value defaults.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED is made this 19 day of December, 2012, by CRE PROPERTIES, INC., a Florida corporation ("**Grantor**"), whose mailing address is 7765 NW 148 Street, Miami Lakes, Florida 33016, in favor of KC NAPLES TAMIAMI, LLC, a Florida limited liability company ("**Grantee**"), whose mailing address is 30 South Wacker Drive, Suite 1710, Chicago, IL 60606.

WITNESSETH:

THAT Grantor, for and in consideration of the sum of Ten Dollars ($10.00) and other valuable consideration, the receipt and adequacy of which is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto Grantee, certain real property located in Collier County, Florida which is more particularly described as follows ("**Property**"):

> Lots 23, 24, 25, 26, 27 and 28, Block A, MYRTLE COVE ACRES, Unit One, according to the Plat thereof, recorded in Plat Book 3, Page 38, of the Public Records of Collier County, Florida.

TOGETHER with all the easements, tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining; and

TO HAVE AND TO HOLD, the same in fee simple forever.

AND Grantor hereby covenants with Grantee that Grantor will warrant and defend the Property against the lawful claims and demands of all persons claiming by, through, or under Grantor, but against none other, and that the Property is free of all encumbrances, except real estate taxes for the year 2013 and subsequent years which are not yet due and payable, assessments and special district levies, zoning and other regulatory laws and ordinances affecting the Property, and easements, reservations, charges, covenants, restrictions, rights of way, and other matters of record (which is not deemed to reimpose same).

Warranty Deed

This Warranty Deed made this 26 day of **February, 2018,** between **Omaida Rives, aka Omalda Rives, a single woman,** whose post office address is **18 Santa Fe Trail, Naples, FL 34113**, grantor, and **KC Naples Tamiami, LLC, A Florida limited liability company**, whose post office address is **30 South Wacker Drive, Suite 1710, Chicago, IL 60606**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Collier County, Florida** to-wit:

Lot 22 of Block "A" in Myrtle Cove Acres (Unit 1), according to the Plat thereof recorded in Plat Book 3 at Page 38, Public Records of Collier County, Florida.

Parcel Identification Number: 60780880001

Also known as: **5396 Myrtle Lane, Naples, FL 34113.**

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2017.**

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

AFFIDAVIT OF AUTHORIZATION

FOR PETITION NUMBERS(S) PL20230016211 and PL20230016212

I, Kevin M. Cahill (print name), as Manager (title, if applicable) of KC Naples Tamiami, LLC (company, If applicable), swear or affirm under oath, that I am the (choose one) owner [✓] applicant [ ] contract purchaser [ ] and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Collier County to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application; and that
4. The property will be transferred, conveyed, sold or subdivided subject to the conditions and restrictions imposed by the approved action.
5. We/I authorize Metropolitan Naples, LLC to act as our/my representative in any matters regarding this petition including 1 through 2 above.

Notes:

- *If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.*
- *If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."*
- *If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.*
- *If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.*
- *If the applicant is a trust, then they must include the trustee's name and the words "as trustee".*
- *In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, and then use the appropriate format for that ownership.*

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

AFFIDAVIT OF AUTHORIZATION

FOR PETITION NUMBERS(S) PL20230016211 and PL20230016212

I, Jerry Starkey (print name), as President of Development Partners International, LLC, Manager (title, if applicable) of Metropolitan Naples, LLC (company, if applicable), swear or affirm under oath, that I am the (choose one) owner ☐ applicant ☑ contract purchaser ☐ and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Collier County to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application; and that
4. The property will be transferred, conveyed, sold or subdivided subject to the conditions and restrictions imposed by the approved action.
5. We/I authorize Q. Grady Minor & Associates, P.A. and Coleman, Yovanovich & Koester, P.A. to act as our/my representative in any matters regarding this petition including 1 through 2 above.

Notes:

- *If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.*
- *If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."*
- *If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.*
- *If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.*
- *If the applicant is a trust, then they must include the trustee's name and the words "as trustee".*
- *In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, and then use the appropriate format for that ownership.*

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

Subject: 5396 Myrtle Lane PUDR Pre-app Notes (PL20230016212)

Thomas, Here are the zoning notes for the referenced PUDR pre-app meeting today:

- Companion site specific GMP Amendment is being proposed.
- Petitioner seeks to develop a U Haul facility based on their smart mobility model as a replacement to the existing U-Haul at 2001 Tamiami Trail E, Naples, FL 34112. This will include a 4-story indoor self storage building and 1-story warehousing (indoor cube). Also outdoor display of trucks & trailers for rent, propane sales to general public, electric charging stations available to general public, and approx. 3,000 s.f. of retail (moving & packing supplies) available to the general public. Other C-3 uses will also be proposed as permitted.
- Site is approx. 8.25 acres, currently zoned CPUD (Ord. 08-09) & RMF-6. PU-89-7 is expired.
- The zoning action will be a PUD rezoning (PUDR).
- To address compatibility within the PUD, identify the specific uses (by SIC) that are anticipated on the site as permitted uses and/or prohibited uses.
- For the PUD Master Plan, include contents outlined in the Administrative Code, section G.1. Include all easements, roads, rights-of-ways, and pedestrian systems on and proximate to the site.
- If deviations from LDC requirements are proposed, provide justifications demonstrating such master plan elements may be waived without detrimental effect on the health, safety and welfare of the community (LDC section 10.02.13.A.3), and/or demonstrating that the deviation is "justified as meeting public purposes to a degree at least equivalent to literal application of such regulations" per 10.02.13.B.5.h.
- Along with development standards, identify operational aspects in the PUD Submittal: hours of operation, outdoor sound control
- Refer to screening requirement in LDC 4.02.12 if outdoor storage is proposed.
- For information purposes, refer to Ordinance 08-09 for past conditions to provide public access, drainage/utility easement, and 60' x 70' well site easement.
- Architectural standards of LDC Section 5.05.08 apply.
- Applicant is required to hold a Neighborhood Information Meeting before the item is heard by the Planning Commission and Board of County Commissioners.
- In the application form where civic associations must be listed, and for purposes of NIM mailings, include East Naples Civic Association – confirm accurate mailing addresses per the Dept. of State Division of Corporations

Comprehensive Planning Pre-App Notes
Myrtle Lane GMPA and Rezone December 19, 2023 – 1:30 p.m.

GMPA PL20230016211 – Kathy Eastley
PUDZ PL20230016212 – Laura DeJohn

Description:

The applicant proposes to rezone four parcels to allow for up to 200,000 square feet of:

- Warehouse and Storage (SIC 4225) (both indoor storage and cube storage).
- Outdoor storage and display for U-Hauls (SIC 7513).
- Limited General Commercial (C-4) uses related to U-haul supplies such as boxes and packing materials, limited to 3,000 square feet.
- LPG Sales.

The property is at the southwest intersection of Myrtle Lane and US 41. Three of the properties are currently zoned Myrtle Woods CPUD and one parcel is zoned RSF-3. All parcels are currently vacant and total approximately 8.25 acres.

Access to the site is proposed at the signalized intersection of Broward Street and US 41, with emergency access proposed on Myrtle Lane. Discuss the potential to provide interconnection from Myrtle Lane to the signalized intersection at Broward.

The site plan indicates a four-story storage facility at the southeast, U-Haul storage and display at the intersection of US 41 and Myrtle Lane, a single-story warehouse at the western end of the property adjacent to the RSF-3 parcels, and a water management facility at the south adjacent to the Tree Tops MPUD.

The Growth Management Plan (GMP) Future Land Use Element (FLUE) and Future Land Use Map (FLUM) and Map Series, designate the property as Urban, Mixed-Use District, Urban Coastal Fringe Subdistrict, and Coastal High Hazard Area. The applicant proposes a Growth Management Plan Amendment (GMPA) to create a subdistrict to allow the requested uses.

The applicant should provide a detailed description of the uses proposed on the property, along with the associated SIC Codes. Justification for the proposed GMPA must be provided including the provision of data and analysis demonstrating the need for the use, **as well as the appropriateness of the use at the proposed location**. Please include a defined market area with to support the location as well as each of the proposed uses. This study should also include an inventory of all approved similar facilities within the defined market area. Please note that this is an existing facility that will be relocating, with current location and specific uses that exist in the current business.

The US 41 Overlay should be reviewed and applied to the site, including the required enhancements and incorporating the development criteria into the plan.

Page 2. B2.

Address the compatibility of the use, the availability of public and/or private infrastructure to serve the use, and impacts, if any, on environmental and cultural resources.

Please include information related to the apparent accesses through the subject properties. Are these easements that serve drainage in the area?

Growth Management Plan Amendments require the applicant to address and demonstrate consistency with the following policies:

- Please address Collier County Growth Management Plan Policy 5.6 regarding compatibility and policies 7.1-7.4. regarding smart growth policies specific to interconnection and access issues. These policies are found in the document at the following link: https://www.colliercountyfl.gov/home/showpublisheddocument/103430/638181213305930000
- List and address applicable provisions of Florida Statues 163.3187 and 163.3177 for amending the Growth Management Plan (GMP).

General Information

- **Public Notice requirements in Subsection 10.03.06.B**
  - Staff suggests communicating with neighbors regarding the proposal.
- **One neighborhood information meeting (NIM)** is required at least 15 days prior to the advertised Planning Commission Hearing. The applicant is eligible for a NIM at the conclusion of the first review.
  - The GMPA and PUDZ can be combined in one NIM
- **Public Hearings**
  - EAC, if required
  - One CCPC
  - Final Decision is made by the BCC following recommendations from EAC and CCPC
- The rezone petition decision is pending decision for the GMPA

Subject: 5396 Myrtle Lane GMPA & PUDZ Pre-app Notes

Everyone,

Please provide the following notes for Transportation Planning:

Transportation Planning: A methodology meeting by email is required and provide a note on the TIS cover sheet that the fee will be collected at the time of PUD submittal. Address all transportation elements of the GMPA & PUD. Provide both ITE and SIC use codes in the TIS for all proposed uses. Provide trip limit/cap Developer Commitment based on TIS using standard language: *"The maximum total daily trip generation for the PUD shall not exceed ____ two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval."*

Respectfully,

Michael Sawyer

Note: The County collects impact fees prior to the issuance of a Certificate of Occupancy to help offset the impacts of each new development on public facilities. These impact fees are used to fund projects identified in the Capital Improvement Element of the Growth Management Plan (GMP) as needed to maintain the adopted Level of Service (LOS) for public facilities. Other fees collected prior to the issuance of a building permit include building permit review fees. Please note that impact fees and taxes collected were not included in the criteria used by staff and the Planning Commission to analyze this petition.

Transportation Planning and PUD Monitoring Pre-App Notes

Developer Commitments:

Transportation Planning

" The maximum total daily trip generation for the PUD shall not exceed ____ two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval."

Use Codes

Provide both ITE and SIC use codes in the TIS.

PUD Monitoring

"One entity (hereinafter the Managing Entity) shall be responsible for PUD monitoring until close-out of the PUD, and this entity shall also be responsible for satisfying all PUD commitments until close-out of the PUD. At the time of this CPUD approval, the Managing Entity is the Insert Company Name Here. Should the Managing Entity desire to transfer the monitoring and commitments to a successor entity, then it must provide a copy of a legally binding document that needs to be approved for legal sufficiency by the County Attorney. After such approval, the Managing Entity will be released of its obligations upon written approval of the transfer by County staff, and the successor entity shall become the Managing Entity. As Owner and Developer sell off tracts, the Managing Entity shall provide written notice to County that includes an acknowledgement of the commitments required by the CPUD by the new owner and the new owner's agreement to comply with the Commitments through the Managing Entity, but the Managing Entity shall not be relieved of its responsibility under this Section. When the PUD is closed-out, then the Managing Entity is no longer responsible for the monitoring and fulfillment of PUD commitments."

Miscellaneous

Pursuant to Section 125.022(5) F.S., issuance of a development permit by a county does not in any way create any rights on the part of the applicant to obtain a permit from a state or federal agency and does not create any liability on the part of the county for issuance of the permit if the applicant fails to obtain requisite approvals or fulfill the obligations imposed by a state or federal agency or undertakes actions that result in a violation of state or federal law.

All other applicable state or federal permits must be obtained before commencement of the development.

Thomas,
There are my notes for this one.

1. Please provide Environmental Data: Please provide FLUCFCS aerial map of the subject property please include the invasive exotic plant percentage amounts and indicate which FLUCFCS are being considered Native Vegetation. Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the Florida Land Use Cover and Forms Classification System (FLUCFCS), and provide a legend for each of the FLUCFCS Codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of **native vegetation** required to be retained on-site. In a separate report, demonstrate how the preserve selection criteria pursuant to 3.05.07 have been met. Where applicable, include in this report an aerial showing the project boundaries along with any undeveloped land, preserves, natural flowways or other natural land features, located on abutting properties.

2. Please provide a current Listed species survey, which should include listed plants for the subject property. Provide supporting exhibits (i.e. Panther zones ect.) be sure to include Black Bear and Florida Bonneted Bat as part of the evaluation. Provide a wildlife survey for the nests of bald eagle and for **listed species known to inhabit** biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the Florida Fish and Wildlife Conservation Commission (FFWCC) and the U.S. Fish and Wildlife Service (USFWS).
   Provide a survey for listed plants identified in 3.04.03.

3. Provide calculations on site plan showing the appropriate acreage of native vegetation to be retained, the max. amount and ratios permitted to be created on-site or mitigated off-site. Exclude vegetation located within utility and drainage easements from the preserve calculations (LDC 3.05.07.B-D; 3.05.07.F; 3.05.07.H.1.d-e). (15 % of native vegetation of the total acreage is required for preservation.) Label the Master plan with a note that the preservation is to be addressed off-site and provide the calculation in the packet submitted.

4. **Please address how the proposed project is consistent with Conservation Coastal Management Element (CCME) Policy 6.1 and Objective 7.1.**

5. Explain how the project meets or exceeds the native vegetation requirements and minimizes impacts to listed species as required in the CCME. (**The preservation Requirement is 15 % of native vegetation).**

6. Indicate how the project design minimizes impacts to listed species. Describe the measures that are proposed as mitigation for impacts to listed species. (**If found onsite).**

7. Demonstrate that the design of the proposed stormwater management system and analysis of water quality and quantity impacts fully incorporate the requirements of the Watershed Management regulations of 3.07.00.

8. Please address any clearing that has occurred when it occurred and provide permit information associated with the clearing (Historic aerials).

https://us02web.zoom.us/j/81962592721?pwd=V2czdUtZUGgzWUllQm5YbmwzZG1PZz09

Page 3.C.2

Environmental PUDZ-PUDA Checklist (non-RFMU)
Project Name 5396 MYRTLE LN (PUDA) + (GMPA)

1. Is the project is in compliance with the overlays, districts and/or zoning on the subject site and/or the surrounding properties? (CON, ST, PUD, RLSA, RFMU, etc.) (LDC 2.03.05-2.03.08; 4.08.00) Not in CV Library

2. Submit a current aerial photograph (available from the Property Appraiser's office) and clearly delineate the subject site boundary lines. If the site is vegetated, provide FLUCFCS overlay and vegetation inventory identifying upland, wetland and exotic vegetation (Admin. Code Ch. 3 G.1. Application Contents #24). FLUCFCS Overlay -P627

3. Clearly identify the location of all preserves and label each as "Preserve" on all plans. (LDC 3.05.07.H.1). Preserve Label- P546

4. Provide calculations on site plan showing the appropriate acreage of native vegetation to be retained, the max. amount and ratios permitted to be created on-site or mitigated off-site. Exclude vegetation located within utility and drainage easements from the preserve calculations (LDC 3.05.07.B-D; 3.05.07.F; 3.05.07.H.1.d-e). Preserve Calculation - P547

5. Created and retained preserve areas shall meet the minimum width requirements per LDC 3.05.07.H.1.b. Preserve Width - P603

6. Retained preservation areas shall be selected based on the criteria defined in LDC 3.05.07.A.3, include all 3 strata, be in the largest contiguous area possible and shall be interconnected within the site and to adjoining off-site preservation areas or wildlife corridors. (LDC 3.05.07.A.1-4) Preserve Selection- P550

7. Principle structures shall be located a minimum of 25' from the boundary of the preserve boundary. No accessory structures and other site alterations, fill placement, grading, plant alteration or removal, or similar activity shall be permitted within 10' of the boundary unless it can be shown that it will not affect the integrity of the preserve (i.e. stem wall or berm around wetland preserve). Provide cross-sections for each preserve boundary identifying all site alterations within 25'. (LDC 3.05.07.H.3; 6.01.02.C.) Preserve Setback – New

8. Wildlife survey required for sites where an EIS is not required, when so warranted. (LDC 10.02.02.A.2.f) Listed Species - P522

9. Provide Environmental Data identifying author credentials, consistency determination with the GMPs, off-site preserves, seasonal and historic high water levels, and analysis of water quality. For land previously used for farm fields or golf course, provide soil sampling/groundwater monitoring reports identifying any site contamination. (LDC 3.08.00) Environmental Data Required – P 522

10. PUD Document and Master Plan shall state the minimum acreage required to be preserved. (LDC 10.02.13.A.2) Master Plan Contents-P626

11. If the PUD includes a Preserve Tract section UP FOR DISCUSSION – DISCUSS WITH CAO

    When listing preserve uses, the following is suggested:
    A. Principal Use: Preserve; B. Accessory Uses: All other uses (list as applicable or refer to the LDC – see 1-3 below as typical uses listed by agents)
    (ensure the text states "subject to LDC section related to Allowable uses within County required preserves"

    Alternate format:
    A. Uses subject to LDC section *Allowable uses within County required preserves*:
        1. Nature trails that do not reduce the amount of required preserve.
        2. Passive Recreation uses, as per LDC requirements.
        3. Stormwater only when in accordance with the LDC.

PUD Commitments and Site Plan notes

Where preserves occur adjacent to development off site and will be used in lieu of landscape buffers, include the following condition in the environmental commitments section of the PUD document or master plan:

> Preserves may be used to satisfy the landscape buffer requirements after exotic vegetation removal in accordance with LDC sections 4.06.02 and 4.06.05.E.1. Supplemental plantings with native plant materials shall be in accordance with LDC section 3.05.07.

12. PUD Document shall identify any listed species found on site and/or describe any unique vegetative features that will be preserved on the site. (LDC 10.02.13.A.2.) Unique Features- P628
    Example: A management plan for the entire project shall be submitted in accordance with the requirements and procedures of the LDC for listed species including but not limited to Black Bear, Gopher Tortoise and listed birds. The management plan shall be submitted prior to development of the first phase of the project.

13. Review cross-sections if provided; they are not required with the PUD. However, sometimes they are provided. Is there any fill proposed in the preserve?

Additional Comments:

Environmental Data Checklist

Project Name 5396 Myrtle Ln (PUD2) & (CMPA)

The Environmental Data requirements can be found in LDC Section 3.08.00

1. Provide the EIS fee if PUD or CU.

2. WHO AND WHAT COMPANY PREPARED THE ENVIRONMENTAL DATA REPORT? Preparation of Environmental Data. Environmental Data Submittal Requirements shall be prepared by an individual with academic credentials and experience in the area of environmental sciences or natural resource management. Academic credentials and experience shall be a bachelor's or higher degree in one of the biological sciences with at least two years of ecological or biological professional experience in the State of Florida. **Please include revision dates on resubmittals.**

3. Identify on a current aerial, the location and acreage of all SFWMD jurisdictional wetlands according to the Florida Land Use Cover and Forms Classification System (FLUCFCS) and include this information on the SDP or final plat construction plans. Wetlands must be verified by the South Florida Water Management District (SFWMD) or Florida Department of Environmental Protection (DEP) prior to SDP or final plat construction plans approval. For sites in the **RFMU district,** provide an assessment in accordance with 3.05.07 F and identify on the FLUCFCS map the location of all high quality wetlands (wetlands having functionality scores of at least 0.65 WRAP or 0.7 UMAM) and their location within the proposed development plan. Sites with high quality wetlands must have their functionality scores verified by the SFWMD or DEP prior to first development order approval. Where functionality scores have not been verified by either the SFWMD or DEP, scores must be reviewed and accepted by County staff, consistent with State regulation.

4. SDP or final plat construction plans with impacts to five (5) or more acres of wetlands shall provide an analysis of potential water quality impacts of the project by evaluating water quality loadings expected from the project (post development conditions considering the proposed land uses and stormwater management controls) compared with water quality loadings of the project area as it exists in its pre-**development** conditions. The analysis shall be performed using methodologies approved by Federal and State water quality agencies, and must demonstrate no increase in nutrients (nitrogen and phosphorous) loadings in the post development scenario.

5. Where treated stormwater is allowed to be directed into preserves, show how the criteria in 3.05.07 H have been met.

6. Where **native vegetation** is retained on site, provide a topographic map to a half foot and, where possible, provide elevations within each of the FLUCFCS Codes identified on site. For SDP or final plat construction plans, include this information on the site plans.

7. Provide a wildlife survey for the nests of bald eagle and for **listed species known to inhabit** biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the Florida Fish and Wildlife Conservation Commission (FFWCC) and the U.S. Fish and Wildlife Service (USFWS). Survey times may be reduced or waived where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, as determined by the FFWCC and USFWS. Where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, the survey time may be reduced or waived by the County Manager or designee, when the project is not reviewed or technical assistance not provided by the FFWCC and USFWS. Additional survey time may be required if listed species are discovered

8. Provide a survey for listed plants identified in 3.04.03

9. Wildlife habitat management and monitoring plans in accordance with 3.04.00 shall be required where listed species are utilizing the site or where wildlife habitat management and monitoring plans are required by the FFWCC or USFWS. These plans shall describe how the project directs incompatible land uses away from listed species and their habitats. Identify the location of listed species nests, burrows, dens, foraging areas, and the

location of any bald eagle nests or nest protection zones on the native vegetation aerial with FLUCFCS overlay for the site. Wildlife habitat management plans shall be included on the SDP or final plat construction plans. Bald eagle management plans are required for sites containing bald eagle nests or nest protection zones, copies of which shall be included on the SDP or final plat construction plans.

10. For sites or portions of sites cleared of native vegetation or in agricultural operation, provide documentation that the parcel(s) were issued a permit to be cleared and are in compliance with the 25 year rezone limitation pursuant to section 10.02.06. For sites permitted to be cleared prior to July 2003, provide documentation that the parcel(s) are in compliance with the 10 year rezone limitation previously identified in the GMP. Criteria defining native vegetation and determining the legality, process and criteria for clearing are found in 3.05.05, 3.05.07 and 10.02.06.

11. Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the Florida Land Use Cover and Forms Classification System (FLUCFCS), and provide a legend for each of the FLUCFCS Codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of **native vegetation** required to be retained on-site. Include the above referenced calculations and aerials on the SDP or final plat construction plans. In a separate report, demonstrate how the preserve selection criteria pursuant to 3.05.07 have been met. Where applicable, include in this report an aerial showing the project boundaries along with any undeveloped land, preserves, natural flowways or other natural land features, located on abutting properties.

12. Include on a separate site plan, the project boundary and the land use designations and overlays for the RLSA, RFMU, ST and ACSC-ST districts. Include this information on the SDP or final plat construction plans.

13. Where off-site preservation of **native vegetation** is proposed in lieu of on-site, demonstrate that the criteria in section 3.05.07 have been met and provide a note on the SDP or final plat construction plans indicating the type of donation (monetary payment or land donation) identified to satisfy the requirement. Include on the SDP or final plat construction plans, a location map(s) and property identification number(s) of the off-site parcel(s) if off-site donation of land is to occur.

14. Provide the results of any Environmental Assessments and/or Audits of the property, along with a narrative of the measures needed to remediate if required by FDEP.

15. Soil and/or ground water sampling shall be required at the time of first development order submittal for sites that occupy farm fields (crop fields, cattle dipping ponds, chemical mixing areas), golf courses, landfill or junkyards or for sites where **hazardous products** exceeding 250 gallons of liquid or 1,000 pounds of solids were stored or processed or where **hazardous wastes** in excess of 220 pounds per month or 110 gallons at any point in time were generated or stored. The amount of sampling and testing shall be determined by a registered professional with experience in the field of Environmental Site Assessment and shall at a minimum test for organochlorine pesticides (U.S. Environmental Protection Agency (EPA) 8081) and Resource Conservation and Recovery Act (RCRA) 8 metals using Florida Department of Environmental Protection (FDEP) soil sampling Standard Operating Procedure (SOP) FS 3000, in areas suspected of being used for mixing and at discharge point of water management system. Sampling should occur randomly if no points of contamination are obvious. Include a background soil analysis from an undeveloped location hydraulically upgradient of the potentially contaminated site. Soil sampling should occur just below the root zone, about 6 to 12 inches below ground surface or as otherwise agreed upon with the registered professional with experience in the field of Environmental Site Assessment. Include in or with the Environmental Site Assessment, the acceptable State and Federal pollutant levels for the types of contamination found on site and indicate in the Assessment, when the contaminants are over these levels. If this analysis has been done as part of an Environmental Audit then the report shall be submitted. The County shall coordinate with the FDEP where contamination exceeding applicable FDEP standards is identified on site or where an Environmental Audit or Environmental Assessment has been submitted.

16. Shoreline development must provide an analysis demonstrating that the project will remain fully functional for its intended use after a six-inch rise in sea level.

17. Provide justification for deviations from environmental LDC provisions pursuant to GMP CCME Policy 6.1.1 (13), if requested.

18. Where applicable, provide evidence of the issuance of all applicable federal and/or state oil and gas permits for proposed oil and gas activities in Collier County. Include all state permits that comply with the requirements of Chapter 62C-25 through 62C-30, F.A.C., as those rules existed on January 13, 2005.

19. Identify any Wellfield Risk Management Special Treatment Overlay Zones (WRM-ST) within the project area and provide an analysis for how the project design avoids the most intensive land uses within the most sensitive WRM-STs and will comply with the WRM-ST pursuant to 3.06.00. Include the location of the Wellfield Risk Management Special Treatment Overlay Zones on the SDP or final plat construction plans. For land use applications such as standard and PUD rezones and CUs, provide a separate site plan or zoning map with the project boundary and Wellfield Risk Management Special Treatment Overlay Zones identified.

20. Demonstrate that the design of the proposed stormwater management system and analysis of water quality and quantity impacts fully incorporate the requirements of the Watershed Management regulations of 3.07.00.

21. For sites located in the Big Cypress Area of Critical State Concern-Special Treatment overlay district (ACSC-ST), show how the project is consistent with the development standards and regulations in 4.02.14.

22. For multi-slip docking facilities with ten slips or more, and for all marina facilities, show how the project is consistent with 5.05.02. Refer to the Manatee Protection Plan for site specific requirements of the Manatee Protection Plan not included in 5.05.02.

23. For development orders within RFMU sending lands, show how the project is consistent with each of the applicable Objectives and Policies of the Conservation and Coastal Management Element of the GMP.

24. The County Manager or designee may require additional data or information necessary to evaluate the project's compliance with LDC and GMP requirements. (LDC 10.02.02.A.3 f)

    The following to be determined at preapplication meeting:
    (Choose those that apply)

    a. Provide overall description of project with respect to environmental and water management issues.
    b. Explain how project is consistent with each of the applicable objectives and policies in the CCME of the GMP.
    c. Explain how the project meets or exceeds the native vegetation preservation requirement in the CCME and LDC.
    d. Indicate wetlands to be impacted and the effects of the impact to their functions and how the project's design compensates for wetland impacts.
    e. Indicate how the project design minimizes impacts to listed species. Describe the measures that are proposed as mitigation for impacts to listed species.

25. PUD zoning and CU petitions. For PUD rezones and CU petitions, applicants shall collate and package applicable Environmental Data Submittal Requirements into a single Environmental Impact Statement (EIS) document, prior to public hearings and after all applicable staff reviews are complete. Copies of the EIS shall be provided to the County Manager or designee prior to public hearings.

26. Is EAC Review (by CCPC) required?

27. PUD master plan or PPL/SDP site plan notes:

    Where preserves occur adjacent to development off site and will be used in lieu of landscape buffers, include the following condition in the environmental commitments section of the PUD document.

    Preserves may be used to satisfy the landscape buffer requirements after exotic vegetation removal in accordance with LDC sections 4.06.02 and 4.06.05.E.1. Supplemental plantings with native plant materials shall be in accordance with LDC section 3.05.07.

PROPERTY OWNERSHIP DISCLOSURE FORM

This is a required form with all land use petitions, except for Appeals and Zoning Verification Letters.

Should any changes of ownership or changes in contracts for purchase occur subsequent to the date of application, but prior to the date of the final public hearing, it is the responsibility of the applicant, or agent on his behalf, to submit a supplemental disclosure of interest form.

Please complete the following, use additional sheets if necessary.

a. If the property is owned fee simple by an INDIVIDUAL, tenancy by the entirety, tenancy in common, or joint tenancy, list all parties with an ownership interest as well as the percentage of such interest:

Name and Address	% of Ownership

b. If the property is owned by a CORPORATION, list the officers and stockholders and the percentage of stock owned by each:

Name and Address	% of Ownership

c. If the property is in the name of a TRUSTEE, list the beneficiaries of the trust with the percentage of interest:

Name and Address	% of Ownership

d. If the property is in the name of a GENERAL or LIMITED PARTNERSHIP, list the name of the general and/or limited partners:

Name and Address	% of Ownership

e. If there is a CONTRACT FOR PURCHASE, with an individual or individuals, a Corporation, Trustee, or a Partnership, list the names of the contract purchasers below, including the officers, stockholders, beneficiaries, or partners:

Name and Address	% of Ownership

Date of Contract: _____

f. If any contingency clause or contract terms involve additional parties, list all individuals or officers, if a corporation, partnership, or trust:

Name and Address

g. Date subject property acquired _____

☐ **Leased: Term of lease _____ years /months**

If, Petitioner has option to buy, indicate the following:

Collier County

Date of option: _____

Date option terminates: _____, or

Anticipated closing date: _____

AFFIRM PROPERTY OWNERSHIP INFORMATION

Any petition required to have Property Ownership Disclosure, will not be accepted without this form. Requirements for petition types are located on the associated application form. Any change in ownership whether individually or with a Trustee, Company or other interest-holding party, must be disclosed to Collier County immediately if such change occurs prior to the petition's final public hearing.

As the authorized agent/applicant for this petition, I attest that all of the information indicated on this checklist is included in this submittal package. I understand that failure to include all necessary submittal information may result in the delay of processing this petition.

***The completed application, all required submittal materials, and fees shall be submitted to:**

Final Submittal Requirement Checklist for:

- ☐ **PUD Rezone- Ch. 3 G.1 of the Administrative Code**
- ☐ **Amendment to PUD- Ch. 3 G.2 of the Administrative Code**
- ☐ **PUD to PUD Rezone- Ch. 3 G.1 of the Administrative Code**

The following submittal requirement checklist is to be utilized during the Pre-Application Meeting and at time of application submittal. At final submittal, the checklist is to be completed and submitted with an up-to-date application. Please upload the submittal items with cover sheets attached to each section via the **GMD Portal**. Incomplete submittals will not be accepted, or processed. **View sample PUD document**.

REQUIREMENTS	REQUIRED	NOT REQUIRED
Cover Letter with narrative statement including a detailed description of why amendment is necessary	☑	☐
Completed application with required attachments (download latest version)	✓

Neighborhood Information Meeting Affidavit of Compliance

I hereby certify that pursuant to Ordinance 2004-41, of the Collier County Land Development Code, I did cause the attached newspaper advertisement to appear and I did give notice by mail to the following property owners and/or condominium and civic associations whose members may be affected by the proposed land use changes of an application request for a rezoning, PUD amendment, or conditional use, at least 15 days prior to the scheduled Neighborhood Information Meeting. *For the purposes of this requirement, the names and addresses of property owners shall be deemed those appearing on the latest tax rolls of Collier County and any other persons or entities who have made a formal request of the County to be notified.* The said notice contained the laymen's description of the site property of proposed change and the date, time, and place of a Neighborhood Information Meeting.

Per the attached letters, property owner's list, and copy of newspaper advertisement which are hereby made a part of this Affidavit of Compliance

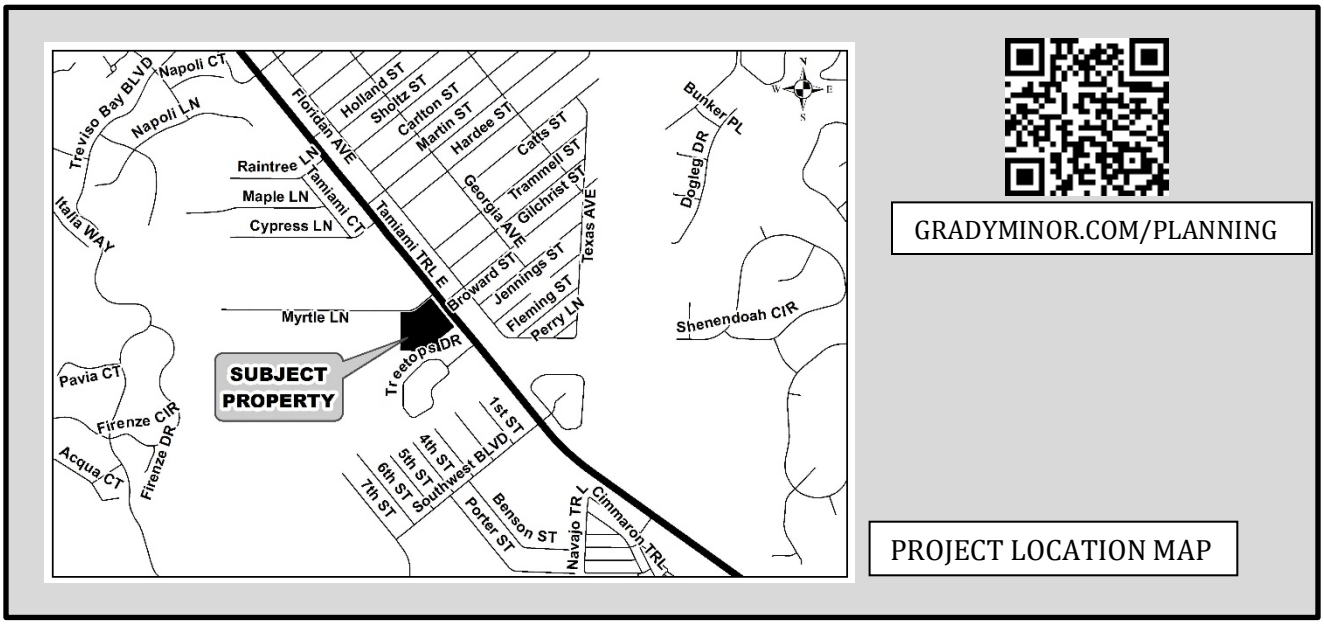
NOTICE OF NEIGHBORHOOD INFORMATION MEETING

PETITION: **PL20230016211 – 5396 Myrtle Lane Commercial Subdistrict**
PL20230016212 – 5396 Myrtle Lane Commercial Planned Unit Development

In compliance with the Collier County Land Development Code (LDC) requirements, a neighborhood Information meeting (NIM) hosted by D. Wayne Arnold, AICP, of Q. Grady Minor and Associates, LLC (GradyMinor), representing Metropolitan Naples, LLC (Applicant) will be held **May 6, 2024, 5:30 pm** at **South Regional Library, Meeting Room A, 8065 Lely Cultural Pkwy, Naples, FL 34113.**

Metropolitan Naples, LLC has submitted formal applications to Collier County, seeking approval of a Small-Scale Growth Management Plan Amendment and Commercial Planned Unit Development (CPUD) Rezone to permit the redevelopment of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse uses, outdoor vehicle leasing and related activities and a maximum of 3,000 square feet of gross leasable area of retail office and service uses.

The subject property is comprised of 8.24± acres and is located at the southwest corner of Myrtle Lane and Tamiami Trail East (U.S. 41) in Section 29, Township 50 South, Range 26 East, Collier County, Florida.



If you have questions, please contact Sharon Umpenhour with GradyMinor by email: sumpenhour@gradyminor.com or phone: 239-947-1144. For project information or to register to participate remotely* go to, GradyMinor.com/Planning. Any information provided is subject to change until final approval by the governing authority.

The purpose and intent of this Neighborhood Information Meeting is to provide the public with notice of an impending zoning application and to foster communication between the applicant and the public. The expectation is that all attendees will conduct themselves in such a manner that their presence will not interfere with the orderly progress of the meeting.

**Remote participation is provided as a courtesy and is at the user's risk. The applicant and GradyMinor are not responsible for technical issues.*

NOTICE OF NEIGHBORHOOD INFORMATION MEETING

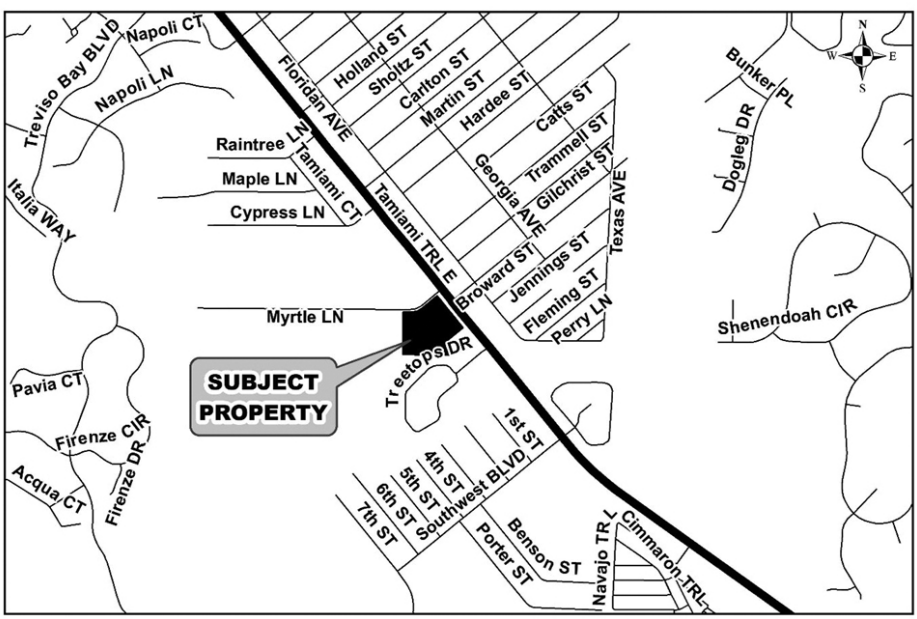
PETITION: **PL20230016211 – 5396 Myrtle Lane Commercial Subdistrict**

PL20230016212 – 5396 Myrtle Lane Commercial Planned Unit Development

In compliance with the Collier County Land Development Code (LDC) requirements, a neighborhood Information meeting (NIM) hosted by D. Wayne Arnold, AICP, of Q. Grady Minor and Associates, LLC (GradyMinor), representing Metropolitan Naples, LLC (Applicant) will be held **May 6, 2024, 5:30 pm at South Regional Library, Meeting Room A, 8065 Lely Cultural Pkwy, Naples, FL 34113.**

Metropolitan Naples, LLC has submitted formal applications to Collier County, seeking approval of a Small-Scale Growth Management Plan Amendment and Commercial Planned Unit Development (CPUD) Rezone to permit the redevelopment of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse uses, outdoor vehicle leasing and related activities and a maximum of 3,000 square feet of gross leasable area of retail office and service uses.

The subject property is comprised of 8.24± acres and is located at the southwest corner of Myrtle Lane and Tamiami Trail East (U.S. 41) in Section 29, Township 50 South, Range 26 East, Collier County, Florida.



If you have questions, please contact Sharon Umpenhour with GradyMinor by email: sumpenhour@gradyminor.com or phone: 239-947-1144. For project information or to register to participate remotely* go to, gradyminor.com/Planning. Any information provided is subject to change until final approval by the governing authority.

The purpose and intent of this Neighborhood Information Meeting is to provide the public with notice of an impending zoning application and to foster communication between the applicant and the public. The expectation is that all attendees will conduct themselves in such a manner that their presence will not interfere with the orderly progress of the meeting.

**Remote participation is provided as a courtesy and is at the user's risk. The applicant and GradyMinor are not responsible for technical issues.*

5396 Myrtle Lane Commercial Subdistrict (GMPA PL20230016211) and Commercial Planned Unit Development (PUDZ PL20230016212)
May 6, 2024 Neighborhood Meeting Summary and Transcript

Wayne Arnold:	00:01	All right, well good evening everybody. My name is Wayne Arnold and I'm with Grady Miners Associates here tonight representing the applicant sitting in the front row, Sharon on the aisle. She's handling the audiovisual equipment tonight we're required by the County to record the meeting and create a transcript, so we are doing that. So the meeting is being taped and I'll make a couple of other introductions. Over here, with us on our team is Rich Yovanovich, Rich is our land use counsel. Next to him is Norm Trebilcock, who's our transportation engineer, and Mike Delate, who's sort of in the back over there. He's our engineer of record for the project. So we've got a short presentation to go through and talk about the two applications that are pending with the county and make two more introductions, we have Laura Dijon and Parker Clough, both work for Collier County, helping review the planning and zoning documents that we're going through the county review right now.
	01:00	So we're here for two applications for the property that is zoned commercial in part on Myrtle Lane and US 41. We have an application pending for what's called a small-scale conference of plan amendment, and we also have a PUD rezoning application, and those two documents are required for us to move forward with the project to eliminate the existing zoning on the property, replace it with a new zoning document that would be PUD zoning, and I'll show you some of the details of that momentarily. As you can see the site, it's been previously zoned for development, but it's undeveloped and we are sitting sort of between undeveloped, commercially zoned property to the north along Tamiami Trail. And then we have the CubeSmart property just to the east. That's part of the Treetops planned development.
	01:53	So as I mentioned, we're here for two projects, but we're in the urban designated area. Right now we're proposing to create a new sub-district that would be for the Myrtle Lane property, and that establishes basic parameters for what development intensity we can have on the site. We're also then rezoning it for the companion item for the planned development zoning. And that zoning and comp plan, we're seeking a maximum of 200,000 square feet for self-storage and warehousing uses. And then 3000 square feet of retail and service commercial type uses that are supporting what's essentially the U-Haul facility that is proposing to be located here.

02:32 These are part of the future land use map. You can see we're having to create a new district map that would go in the comprehensive plan. You can see some sub-district language that's on the page, but we're asking for development that would allow us to have related uses to the indoor self-storage and warehousing that would support U-Haul, and then also the rental leasing of vehicles and trailers that they do. They have this one, if you're familiar with some of the U-Haul facilities, they have a propane gas facility where you can go and get your propane tank or if you have an alternative fuel automobile, you can get fuel in there. So those are the kind of uses we're proposing in addition to all the C-I through C-III uses that are permitted generally on the property today.

03:20 This is the approved master plan. It's really hard to read, back in the day when this was approved, the county's obviously reproduction capabilities were not what they are today, but this is oriented north to your right. So Tamiami Trail is toward the bottom of the page. It showed access to both Myrtle Lane and the US 41. There was a water management and reserve area toward the western part of the project. The site we've had recently evaluated, it's all exotic vegetation that's on the site. It doesn't qualify for any native preservation. So our project proposes a new master plan, and this one north is oriented up. So you can see that on the bottom toward the Woodgate condominiums. We have our water management area, we have to do some drainages when we clean up and we're coordinating with the county on that.

04:11 And then you can see a series of proposed buildings on the site where we're proposing a four-story warehouse building that would be for indoor self-storage. U-Haul also has concept that you're familiar with, the pods and things like that where you can also store and those are more mobile. Those would be stored at a warehouse building on site as well. And then there's some other alternative storage that they have, and they're not certain that it would be located here, but they have some storage that's sort of a drop-in-place storage type thing. So we've reflected probably three types of buildings that are on the site.

04:42 And then as I mentioned, the retail, if you're familiar with U-Haul, they sell moving supplies. They also sell other incidental things, boxes and things of that nature. This one is considered mobility center and some of those have a little bit of alternative things that they also sell. Some are getting into EV charging stations, which we've made allowances for here. There may be

electric bike sales at some point in the future, but those would be typical C-1 through C-3, and they would be conducted within the three-thousand square foot part of that building.

05:11 The one represents a deviation that we're asking for, and we asked for kind of a blanket deviation and we knew we'd be discussing that in greater detail with staff, and that involves the architectural design standards for the building. Rich and I just represented Home Depot on another parcel just south of here that was recently approved, and they had some alternative design standards that were approved by the county. So we're going to be working with the county engineer and staff to come up with some architectural standards that would be for the U-Haul facility.

05:42 This is a conceptual rendering showing two of those three buildings I described. The third building, as I mentioned, is kind of an alternative that they haven't committed to, but you can see just sort of how this starts to orient on the site. We've asked for a four-story building, which is reflected in those exhibits. This is kind of a co-conceptual rendering. We're working, like I said, with the county's architect to help refine what the buildings will look like and what the buffering will be. Those are all part of our review process.

06:11 As I mentioned before, the permitted uses, we define those by SIC code. We've asked for accessory uses that include things that U-Haul typically does. They do minor servicing and repair of their vehicles, and we also have electric charging stations that we've asked for, as well as some of the other accessory uses such as water management, signage and those things.

06:36 We've asked for and we have a series of development standards that are part of the development of the PUD. We've asked for a zone height of 60 feet today. The zone height of the existing PUD is 50 feet. We've asked for the 60 feet so that we have some flexibility in design for the final building for U-Haul. And we're in the review process. We have not resubmitted after our first round of comments from the staff. We're meeting with them later this week to go over some of the comments that we know we have to have more dialogue on. So we don't have any hearing dates established yet, but this is our opportunity to reach out to the community and get some feedback, let you all understand what it is that we're actually asking for. And then if you've got notice for this meeting, you'll receive notice for a

		planning commission hearing that the county will establish when we get to that stage.
	07:26	It's going to be several months off before we get there, but those dates, you'll get a mail notice. Then signage gets posted on the site. I'm sure you've seen those around the area, where you get the four by eight sign that says, "Notice of Hearing," and it briefly describes that and has the hearing dates on it.
	07:41	So with that, we have those and then this is an informational page. You can certainly take a picture of it or if you want to pick up Sharon's card before you leave, you can either email us at the information or you can go to the QR code, it'll take you to our website and that has all of our latest submittal information for both applications with the county, and we update that as, once we make another submittal back to staff, all those documents that we've revised will be freshened and there will be a copy of this presentation there as well.
	08:11	So that's our brief presentation. We're happy to entertain any questions, anything I didn't answer or any questions you have? If we don't have the answer tonight, we'll certainly do our best to get an answer for you. So just so it's clear on the record, the county likes to make sure our planning commissioners can actually hear the dialogue. So the transcript is clear who I am, but when you all speak, it'd be great if you could either give your name or say whether you're a nearby resident, et cetera, just so that it's clear that it's not one of our development team members that are speaking. And we'd ask that you come to a microphone or if you're not capable, we'll get the microphone to you. So anybody has a question, just raise your hand and we'll start from there.
Walter Roshe:	08:52	Yeah.
Wayne Arnold:	08:52	Yes, sir.
Walter Roshe:	08:53	I'll come up. My name is Walter Roshe and I'm a resident. I noticed that on Myrtle Lane you want to have emergency access.
Wayne Arnold:	09:05	Yes, that's-
Walter Roshe:	09:06	I mean, how do you stop that? Because then you went to the rendering and it looks wide open like anybody could just drive

		there. Is there going to be a sign that says no driving unless you're an emergency vehicle?
Wayne Arnold:	09:17	Well, typically where we have those types of access points, they are signed in that manner, that it's for emergency vehicles.
Walter Roshe:	09:24	But that's it. Just a sign?
Wayne Arnold:	09:25	It is often a sign, it can't be a gate, but that is one of the comments that staff came back to us and said, if there's an opportunity that you get a signalized access point at the Broward signal that's there, we want you to maintain that access open to the public. So that's a point that we're dialoguing with the county staff right now.
Walter Roshe:	09:41	So it doesn't sound like it's going to be emergency access?
Wayne Arnold:	09:44	I honestly don't know. I mean, we just don't know.
Walter Roshe:	09:46	Because on the original PUD that was approved, there was no access.
Wayne Arnold:	09:50	There actually was, but there was a condition that said we had to maintain that as a public access point.
Walter Roshe:	09:56	That's what I wanted to know.
Rich Yovanovich:	09:57	Is it, sir?
Wayne Arnold:	09:59	Excuse me, sir.
Rich Yovanovich:	10:00	Is it your preference that we'd be limited to a emergency access only on Myrtle?
Walter Roshe:	10:05	I prefer that you don't use Myrtle because you have commercial trucks on a lane that's a very, it's not a highway, it's not a road. It's a lane. And definitely from the rendering it looks like people are going to drive in their trucks, they're going to go down the street, sweep out their trucks and go back in. That's the problem, sir. And the truck, the street can't handle the traffic, can't handle all the trucks.
Wayne Arnold:	10:25	Okay, thank you. Anybody else have a question, comment. Come on up.

Steve Fuller:	10:37	Thank you, Laura. I'm Steve Fuller. [inaudible 00:10:42]. Hi, I'm Steve Fuller. I live in 5259 Myrtle. This is a real small representation of the neighborhood meeting we had on Thursday night?
Walter Roshe:	10:50	Thursday night.
Steve Fuller:	10:52	At seven o'clock when the majority of the 35 homes on Myrtle Lane were capable of actually attending. So there is a much larger contingency that's not real happy with this, and I respect your position as an engineering firm.
Sharon Umpenhour:	11:08	Sir, can you please speak into the microphone? Thank you.
Steve Fuller:	11:14	But there's a lot of issues and I've come up with a lot more questions. I value Walts. You showed the picture of the four-story buildings. And the city of Naples are capped at 42 and 45 high, and they can get four stories in and we're seeing 60 and 70 feet of height. That could be much more than four stories. That's one thought. Myrtle Lane, as Walter said, is a seventeen-foot wide road. The majority of people on that street drive trucks and trailers, eight and a half foot wide vehicles. You got to pause to let people go down that road. You got to dodge mail boxes.
	11:57	Myrtle Lane hasn't been resurfaced in the 20 years since I've known it. If anybody knows any different, please speak up. So Myrtle Lane is an extremely rural, low density, low volume lane, 17 feet wide. I think if you look at the new standards for roadways and communities, it's 32 to 36 feet. Okay, so let's start with that. I'm one of the belief that if whatever happens on these lots, commercial and the potential rezoning of RMF 6 to commercial, and I got a question, how many designations of commercial zoning are there? I mean, is there just one or is there retail? Is there industrial?
Wayne Arnold:	12:48	Well, we're rezoning to a commercial PUD.
Steve Fuller:	12:51	Commercial PUD.
Wayne Arnold:	12:52	Yes.
Steve Fuller:	12:52	So once that's been rezoned to a commercial PUD, does that create an avenue where other things could be developed in that commercial PUD?

Wayne Arnold:	13:04	Well, today most of the property is zoned as a commercial plan development.
Steve Fuller:	13:07	But you're adding more like two and a half lots. Two and a half acres of RMF 6?
Wayne Arnold:	13:12	Yes sir. We're adding some of the land that's on the west side. Yes, sir.
Steve Fuller:	13:17	You know, you guys talked a lot about the RMF 6 apron around this property, but you really neglected the, excuse me, RMF 6. You really neglected the single family, 35 homes at the end of that street that are going to really carry the burden of traffic. I think the building height is too much. I think the county has come up with some incredible questions of the development study and plan and Laura's got a lot on there. I saw the architectural review has a lot of questions there. Environmental has questions. That community, Myrtle Lane is bound on three sides by South Florida Water Management canals and their major canals, the [inaudible 00:14:05] Drainage Canal and the one by Treviso, they are major canals, flood, and several these people who live at the end of the street will tell you how high the waters come up. Not just in our last flood from Hurricane Ian, but in previous times.
Wayne Arnold:	14:18	Sure.
Steve Fuller:	14:19	That's a lot of concrete. That's a lot of surface area. And we're concerned with water retention, which I don't know, I'm not an engineer, but there's some real unique ways that stats and numbers are managed and a water management area that is supposed to be like, I don't know, whether it's 1.2, 1.4 acres, but it encroaches in to other utility easements and other drainage easements. I was under the impression they're supposed to be kept separate. Please, if you got answers for these. I'd love to hear.
Wayne Arnold:	14:53	Well, you've raised issues that the county staff, that's part of the normal review process that we go through on almost every project. So we are addressing traffic, we're addressing stormwater management. The county staff has questioned because of the East Naples plan that's been in process, some of the design standards for the buildings, those are all things that we'll continue to dialogue with staff about as we go through the process.

Steve Fuller:	15:16	I thought the county commissioners, both Rick LoCastro and Saunders was considering a moratorium on storage facilities. We have eight between Airport Road and which goes down to [inaudible 00:15:32] with 92. We have like eight storage centers already. And there's one more planned, in addition to what you guys are thinking. So I ask the question, this is to the county that has a responsibility to really oversee development in a responsible fashion that's an asset to the community, and an asset to the surrounding neighbors that live within that community.
	15:55	And I'm wondering how this mega U-Haul center is really going to be an asset there when it could be easily located further down on I 51 or further out 41 where there's already agricultural in making land around it and more commercial around it. Here you're going to make a big impact on a small community.
	16:27	I know this is a meeting for the U-Haul, but we also know that there's an application into the county to take the lot right over there on the left-hand side, it's 2.7 acres, which in RMF 6 zoning would yield maybe 16 units. There's already an application in for 44 units. Casey in Naples, who still will own four and a half acres surrounding the west side and kind of south side, he's all zoned with multi [inaudible 00:17:02]. What's he going to do? Is he going to come in and try to pop 12 units per acre now on his property also. We got questions about the height, the amount of concrete, the facility itself. And let me ask you, because you showed in that rendering the building on the right and we were told that you were going for four stories. What's the square footage in that building in four stories?
Wayne Arnold:	17:25	I don't think we know the breakdown yet of any of those building square footage. We just know the total is about 200,000.
Steve Fuller:	17:33	And it's zoned for 20,000. Correct/.
Wayne Arnold:	17:33	I'd have to check the prior zoning, but I think it's more than-
Steve Fuller:	17:34	So you're asking for a major change in the zoning?
Wayne Arnold:	17:39	Yes sir. We're aware of that. But again, indoor self-storage generates a lot of square footage with little impact. Most of those indoor self-storage units-

Steve Fuller:	17:47	You don't live on Myrtle, I'm sorry, Mr. Arnold, we're going to differ on your term of impact.
Wayne Arnold:	17:52	That's okay.
Steve Fuller:	17:54	The other proposed one-story and the other proposed one-story, on your rendering that also is a four-story building.
Wayne Arnold:	18:00	I know I told you that was a conceptual rendering that U-Haul prepared to show you how these buildings were going to be oriented on the site.
Steve Fuller:	18:06	Okay. I've also talked to EMS and the fire station right across the street. This may be a question for you. I know there's been a lot of traffic control, signage, orientation, arrows on roads down at Barefoot Williams. I know they've had a couple of bad wrecks there. I know at our intersection of Broward, at 41, I couldn't get real stats because it's unique how the county doesn't, they're three to five-year data on the fields, but they're changing software and they said there's only been one accident in the last three years. I know that's not the truth. There's two memorials, two memorials at that intersection for people that have died.
	18:47	So I think when you put this structure with the access that you've drawn it, you're going to create more of a nightmare for the residents. Certainly on Myrtle, you're create a nightmare. You're create a nightmare for the manor. If you go back to that 2008 proposed zoning change for the Myrtle Cove Acre commercial put, they connected Myrtle to Broward.
Wayne Arnold:	19:13	Yes, sir.
Steve Fuller:	19:13	A lot of us want that. A few don't. There's concern if you connect it to Broward, then all of a sudden that's going to open the venue for the multifamily, what they could do down the road, that emergency exit, if that was a bona fide, even larger than the Myrtle seventeen-foot wide lane, that was a bona fide pass through to where we could at least use that to access a stoplight for traffic control and accessibility. That might be one perk. I think that would be a benefit. I'm sure you all doesn't want us winding through their lot. My suggestion would be to split that lot and bring Myrtle to the light. Then you've got, is KC Naples here? So the actual landowner's not here. He'd end up with two more valuable corner parcels.

Wayne Arnold:	20:10	Okay. Thanks, Steve.
Steve Fuller:	20:10	Safety responsible.
Wayne Arnold:	20:13	Thanks Steve. Anybody else have a comment? Yes sir. Come on up.
Greg Vilk:	20:26	Hi, I'm Greg Vilk. I'm actually a property owner.
Wayne Arnold:	20:31	Could you repeat your name please?
Greg Vilk:	20:31	Greg Vilk.
Wayne Arnold:	20:31	Greg Vilk, thank you.
Greg Vilk:	20:31	I just had a question if you can flip back Exhibit C. You had mentioned that was an approved plan?
Wayne Arnold:	20:39	This one?
Greg Vilk:	20:40	Yeah.
Wayne Arnold:	20:41	Yes, it is.
Greg Vilk:	20:43	Do you have any history on that approval? What it was approved for, the use?
Wayne Arnold:	20:46	I do.
Greg Vilk:	20:47	And it looks as if it goes right into the intersection, the entries, because I had always thought that that land had to use the intersection.
Wayne Arnold:	21:01	That existing zoning for the commercial for planned development has language in there that would mandate if there's a signalized access point here on Tamiami Trail, that that needs to be opened back to Myrtle Lane.
Greg Vilk:	21:14	Okay. Is it those conditions or first you must use the intersection for access?
Wayne Arnold:	21:21	I can go back and look at the language, but I'm pretty certain that we talked about if we gain that access of the Broward signal, then that's how that is, so that's essentially what staff has asked us to do and that's what we're continuing to discuss with them now.

Greg Vilk:	21:34	Okay. And let me just ask as far as the commercial zoning, as far as the classification. At this time, I'm familiar with, I think it's C3, C4, C5 and so on. Does this fall into as a C3, a C4, a C5, or are they completely different?
Wayne Arnold:	21:51	Well, it's a little different, but most of the uses that we've asked for that we want are not C3 uses because the indoor self-storage is a conditional use in C4. But we're not asking for straight zoning, we're asking for a planned development. So that's why we've indicated those uses. So those would be more traditionally found in C4 type zoning industries.
Greg Vilk:	22:13	Which is what I thought. So the U-Haul facility doesn't comply in a C3, which it's currently zoned at. What it's marketed at?
Wayne Arnold:	22:20	It is not really zoned C3 today. It's primarily zoned commercial plan development and it allows a whole bunch of different uses. It allows 61,000 square feet of commercial uses today.
Greg Vilk:	22:31	Okay.
Wayne Arnold:	22:33	It allows a whole host of things, offices, medical offices, vehicle sales. I mean I've got a list that's got 20-odd uses that are permitted by right in those groups.
Greg Vilk:	22:45	All right, thank you.
Wayne Arnold:	22:45	Yes, sir. Anybody else have a questions, comment? Yes, sir.
Dick Whitesell:	23:00	My name's Dick Whitesell. Now, back here some years ago, the county came in and they widened the canal out behind our houses and I'm getting flooded every time it rains. And the county said they were going to come back and they were going to care of the issue. How much more water are we going to get from this running down my backyard?
Wayne Arnold:	23:26	Well, we're not really in that part of the site design phase yet. This is more the conceptual zonings phase. We have to have a very conceptualized water management plan and you can see on our master plan.
Dick Whitesell:	23:37	Well, the water management came down and they did all that out that night on my backyard and they said they were going to take it away. They never did. Now the water just floods me out every time it rains.

Wayne Arnold:	23:47	Well, I would encourage you to talk to the county stormwater management department. I
Dick Whitesell:	23:50	I did. If it didn't do no good, but you're going to go ahead, you're going to put this in there. Where's all that water going to go?
Wayne Arnold:	23:56	So the water we're required to discharge into that canal system and so we have to treat and store water on the site as well. So we've designed a conceptual area for water management, that's on that south side of the site and of course the Lely improvements come down to this way. So there's part of those Lely, LASIP, canal system that comes through a portion of the property. But yeah, we have not designed the detailed water management system yet. But we will, we definitely-
Dick Whitesell:	24:25	That's the one thing you're going to want to think about because that floods every time, even with the little, when the rains we've been getting and we start getting heavier rains, you're going to put all that black top and cement out there. All that water's got to go somewhere and it's going to be right in my backyard again. It's going to wash out other people too.
Wayne Arnold:	24:39	Understood. Thank you. Anybody else?
Claudia Fuller:	24:53	Hi, Claudia Fuller, 5259 Martin Lane. The existing use of doctor's offices, like retail is much more in character with the community than the Mobility Center and maybe that's why the Mobility Center is not zoned for this area. When I read through the plan and the response that was set up for this, very little reference was made to the residential area beyond the RMF 6. In our neighborhood meeting last week, a lot of people said, why bother rezoning it, leave the RMF 6, leave the zoning as it is, use it to its best ability and if Mobility Center doesn't work there, then it doesn't work there because it's not consistent with the neighborhood character.
	25:57	Ways it's not consistent is that the four-story, 60-foot building really does not fit with our neighborhood. And the density of use seems awfully high because you have the 200,000 square feet of storage plus 3000 square feet of retail. But you're not even talking about how much outdoor storage also, I mean the whole piece of property is going to be used in that sense and talking about drainage, all of that is a lot of junk draining off into our canals.

	26:39	Your executive statement also talks about this being great for urban infill. Well, commercial urban infill is intended to provide beneficial goods and services to the community. It's not this. This is not beneficial to our neighborhood. So the rezone to U-Haul does not benefit our community. Maybe it would be better down by the Home Depot that you guys just worked on. Down at a cross road arterial road like 951 and 41 or even out by the interstate.
	27:13	And then also in your executive summary, you guys talked about how this was such a great location and it meets the needs of the community and this is on point 14, it says whether change suggested is at scale with the needs of the neighborhood or the county. And your response was the scale of the project is in scale with the needs of the community. I disagree. The change is out of scale with the needs of the neighborhood, the needs are already met in the immediate area. In a 2.8 mile stretch from that this, on 41 that this complex encompasses. We already have five constructed storage centers plus another one that's going to be built. So this all represents over 450,000 square feet of storage in 2.8 miles. Maybe this is an overreach and maybe it's too much, too close to the neighborhood and all the other storage units. Thank you.
Wayne Arnold:	28:16	Thank you. Bye.
	28:20	Anybody else have any thoughts? Everybody ready to go home and have dinner?
Claudia Fuller:	28:28	Can I ask a question without coming out again?
Wayne Arnold:	28:29	No, you need to be on the microphone, Steve.
Steve Fuller:	28:32	I would like to know the process. The board is here and Peter's here, but what's the process? Like I said earlier, most of the people on our street are working and they can't be here, so is there going to be another meeting? Is there going to be a meeting that's conducive to the timeframe of the residents that are going to be impacted by this? When would we have a next meeting? How's this going to go on, right?
Wayne Arnold:	29:01	Steve, as I mentioned, we're going to, we'll take one at a time and the answer to your question is we're required to hold one neighborhood information meeting after we get our first round of review comments and before we hold a planning commission hearing. And then the planning commission is the first public

		hearing, that's an advertised public hearing and that occurs on a first or third Thursday of the month at 9:00 A.M. at Collier County Commission chambers and then that's followed, they make a recommendation to Collier County Commission in which those meetings are generally speaking, 9:00 A.M. meetings as well.
Steve Fuller:	29:39	How can a small community that doesn't have a homeowners association like Myrtle Cove that can't get off of work, how can we represent ourselves?
Wayne Arnold:	29:48	Well, it sounds like you already started. One, you've talked to your own residents and two, you've had dialogue with county staff, which is probably the most appropriate way for you to communicate your thoughts to the staff so you can at least have your thoughts represented while they're reviewing the application.
Steve Fuller:	30:02	Thank you.
Wayne Arnold:	30:05	Thanks, Steve. Yes, sir. Come on up.
Greg Vilk:	30:11	I just wanted to make one mention off of what Steve is saying as far as the meetings. Every meeting with the county officials is a public meeting.
Wayne Arnold:	30:21	Correct.
Greg Vilk:	30:22	It's an open meeting to anybody that wants to attack. You may not have the right to talk [inaudible 00:30:31] that you can attack and I think that's probably for the community and for the development and engineers probably have that dialogue. Make sure that the community is present at those.
Wayne Arnold:	30:40	You'll get notice. Like I said, if you receive notice at this meeting, you'll get public notice of those other public hearings.
Greg Vilk:	30:45	I'm talking about all the meetings. I'm talking about any meetings, any at all.
Wayne Arnold:	30:49	Yes. And at those meetings you will be given time. The public is always given time to comment on the projects that are on the-
Greg Vilk:	30:54	Okay, I just wanted, because that's kind of what he asked.
Wayne Arnold:	30:56	Okay, thank you. Anybody else?

Joe Smith:	30:59	I'm going to give it a try.
Wayne Arnold:	30:59	Okay, come on.
Joe Smith:	31:02	I'm not very good at this. My name is Joe Smith. My family's been on the street since 1968. We bought a first piece of property, then we bought a second, then we bought the house. I currently live in the house my family owned since '72, '73. We flood. As Dick says, it's a low-lying area. My house is flat on the ground. It is not elevated. It probably wouldn't meet code at this time. With the new building standards, obviously everything changes over time. If they build this and they do not fix the drainage, I'll flood even worse.
	31:57	Currently, as Steve has stated and other people have stated, our street is very narrow. We should not allow any commercial access to our street. I started a business in '99 and I had to sign a document with the county stating that my business would not create any extra traffic on the street. So this business obviously is going to create extra traffic on the street. It doesn't matter if we connect the street to the stoplight, which I prefer we would not connect the street to the stoplight and that emergency access you have there, if this plan was to go through, would have to be gated to keep all the traffic from the commercial building off of our street. That's pretty much all I got to say.
Wayne Arnold:	32:56	Well, thank you for the comments. Anyone else? Yes sir. Come on up.
Todd:	33:07	Todd Jones. 5315 Merlin, about 20 years. I'd just like to concur with my other neighbors here. This is not concurrent with the feel or the usage of what this area should be. There should definitely not be access, emergency or otherwise onto a street that can barely accommodate two vehicles at this time. I feel that this not only would propose a downside effect to our property value, but also to our quality of living. You have a situation where you're going to have industrial activity. Every U-Haul truck has a backup beeper. How many trucks are going to be there beeping all day long, backing up, moving back and forth. Are you going to have propane fill there? Are you going to have a large propane area? I just don't think this is a proper place for this project. And I share the sentiments of my neighbors.
Wayne Arnold:	34:02	Okay, thank you for coming out. Thanks for the comment. If there's nobody else, we'll close the meeting and I'd like to thank

everybody for coming out tonight and as I mentioned, we go back to that page if you want to take a photo of it or any of the information for our contacts so you can get a copy of the materials. That's where you do it. Thank you, all. Good night.

FUTURE LAND USE (FLU) DESIGNATION:

Existing: Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict

Proposed: 5396 Myrtle Lane Commercial Subdistrict

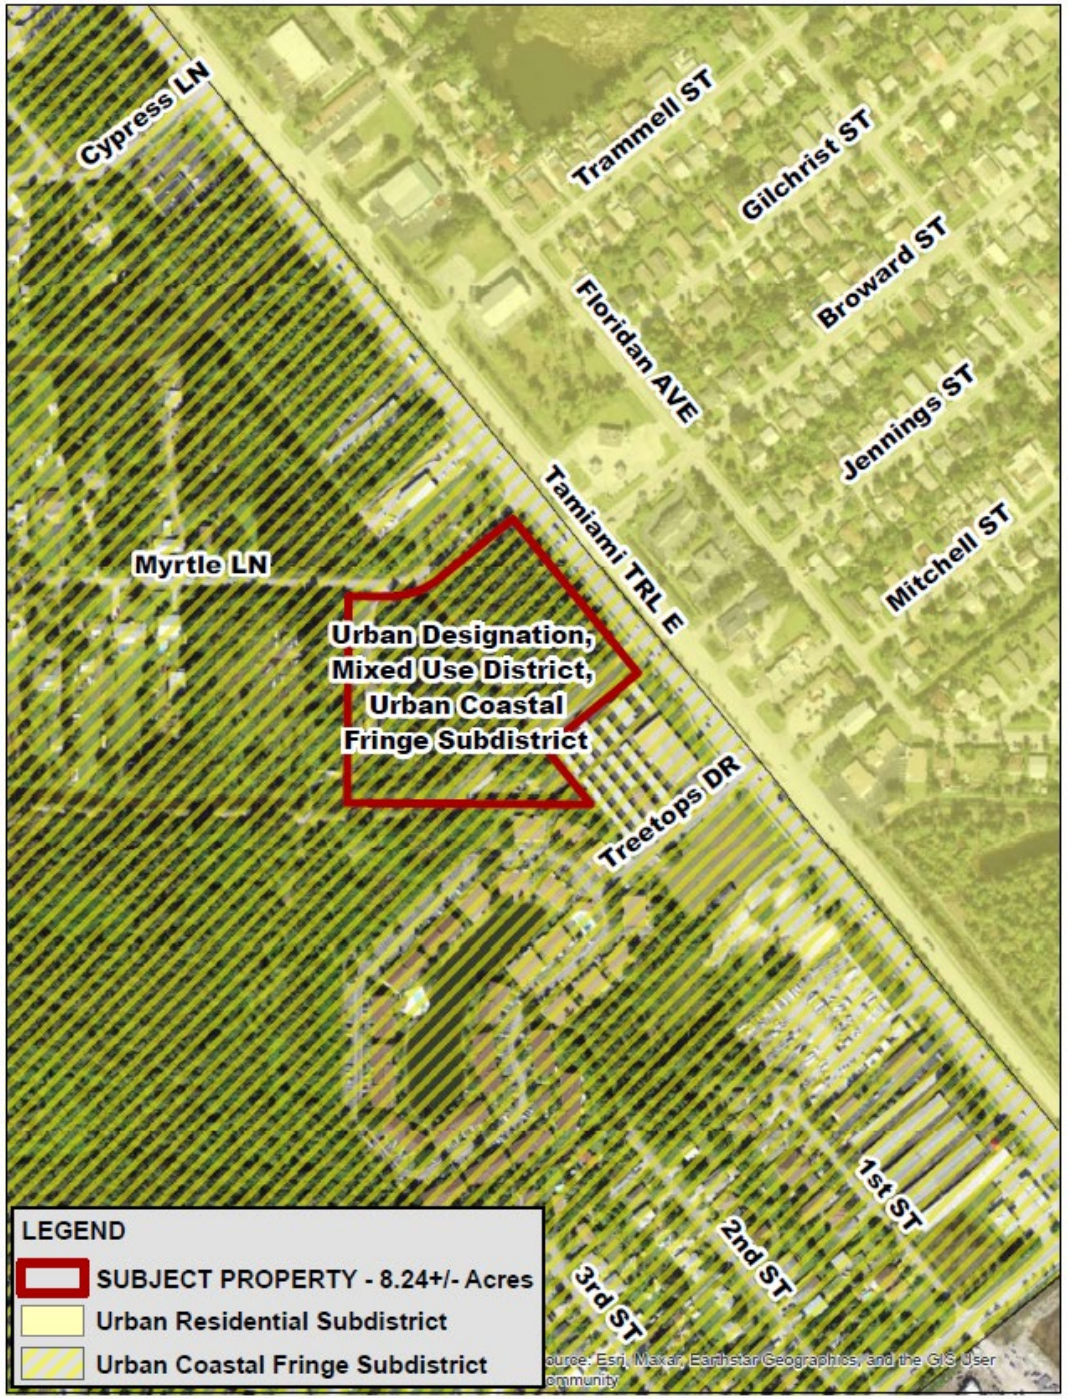
ZONING: **Existing:** Myrtle Woods CPUD and RMF-6

Proposed: 5396 Myrtle Lane Commercial CPUD

PROPOSED REQUEST:

- Modify the FLU map to add the 5396 Myrtle Lane Commercial Subdistrict
- Rezone from the Myrtle Woods CPUD and RMF-6, Zoning Districts to the 5396 Myrtle Lane Commercial PUD
- To allow a maximum of 200,000 square feet of indoor self-storage/warehouse and a maximum of 3,000 square feet of retail and service uses

FUTURE LAND USE MAP - EXISTING



FUTURE LAND USE MAP - PROPOSED

Proposed Subdistrict Language:

22. 5396 Myrtle Lane Commercial Subdistrict [page 77]

This Subdistrict is approximately 8.24 acres in size and is located on the southwest quadrant of Tamiami Trail East (U.S. 41) and Myrtle Lane as depicted on the 5396 Myrtle Lane Subdistrict Map. The purpose of this Subdistrict is to provide commercial land uses. Development within the Subdistrict shall be subject to the following:

a. All development within this Subdistrict shall be rezoned to a Planned Unit Development (PUD).

b. The PUD Ordinance must include development standards and buffers to ensure compatibility with surrounding properties.

c. Allowable uses shall be limited to:

1. A maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses shall be permitted within the CPD. No building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the uses permitted by right in the C-1 through C-3 Zoning District and the following uses.

2. Automotive rental and leasing (7513 and 7519)

3. Outdoor equipment rental and leasing (7359)

4. Indoor storage, including cube storage and moving supplies sales (4225 and 4226)

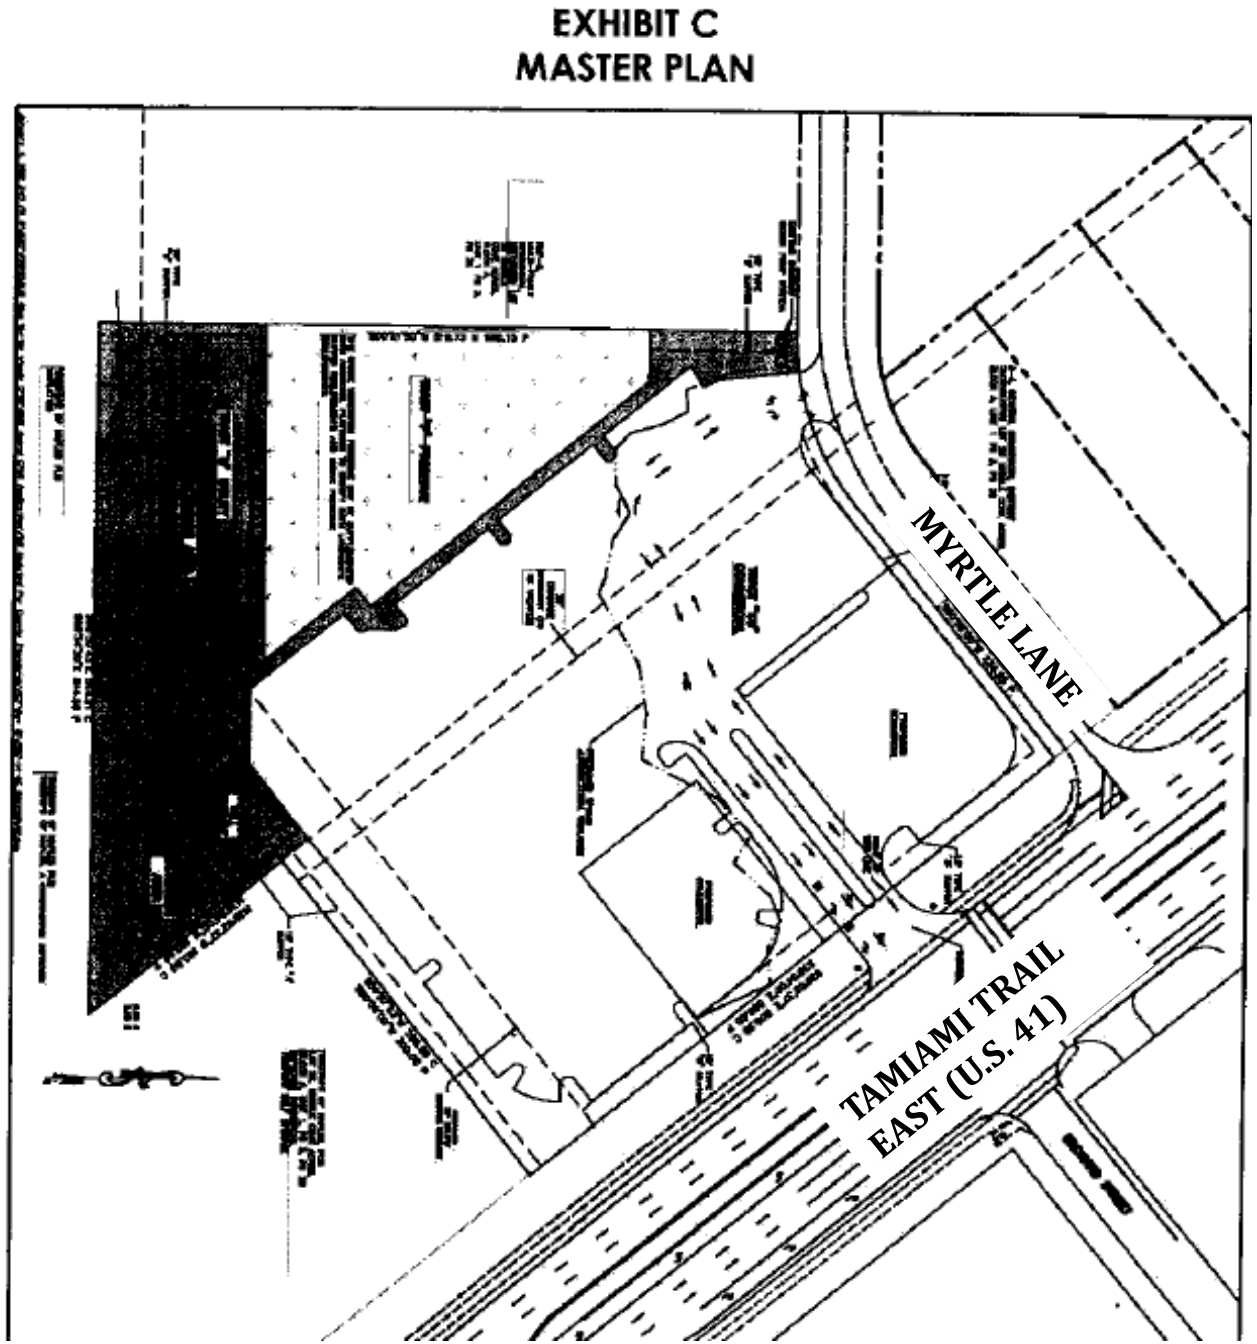
5. Propane gas dealers, including grilling and propane accessories (5984)

6. Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

d. Development is limited to a maximum intensity of 200,000 square feet of gross floor area for indoor self-storage/warehouse and a maximum of 3,000 square feet of gross floor area for retail uses.

APPROVED MASTER PLAN

Ordinance 08-09



PROPOSED MASTER PLAN

SITE SUMMARY

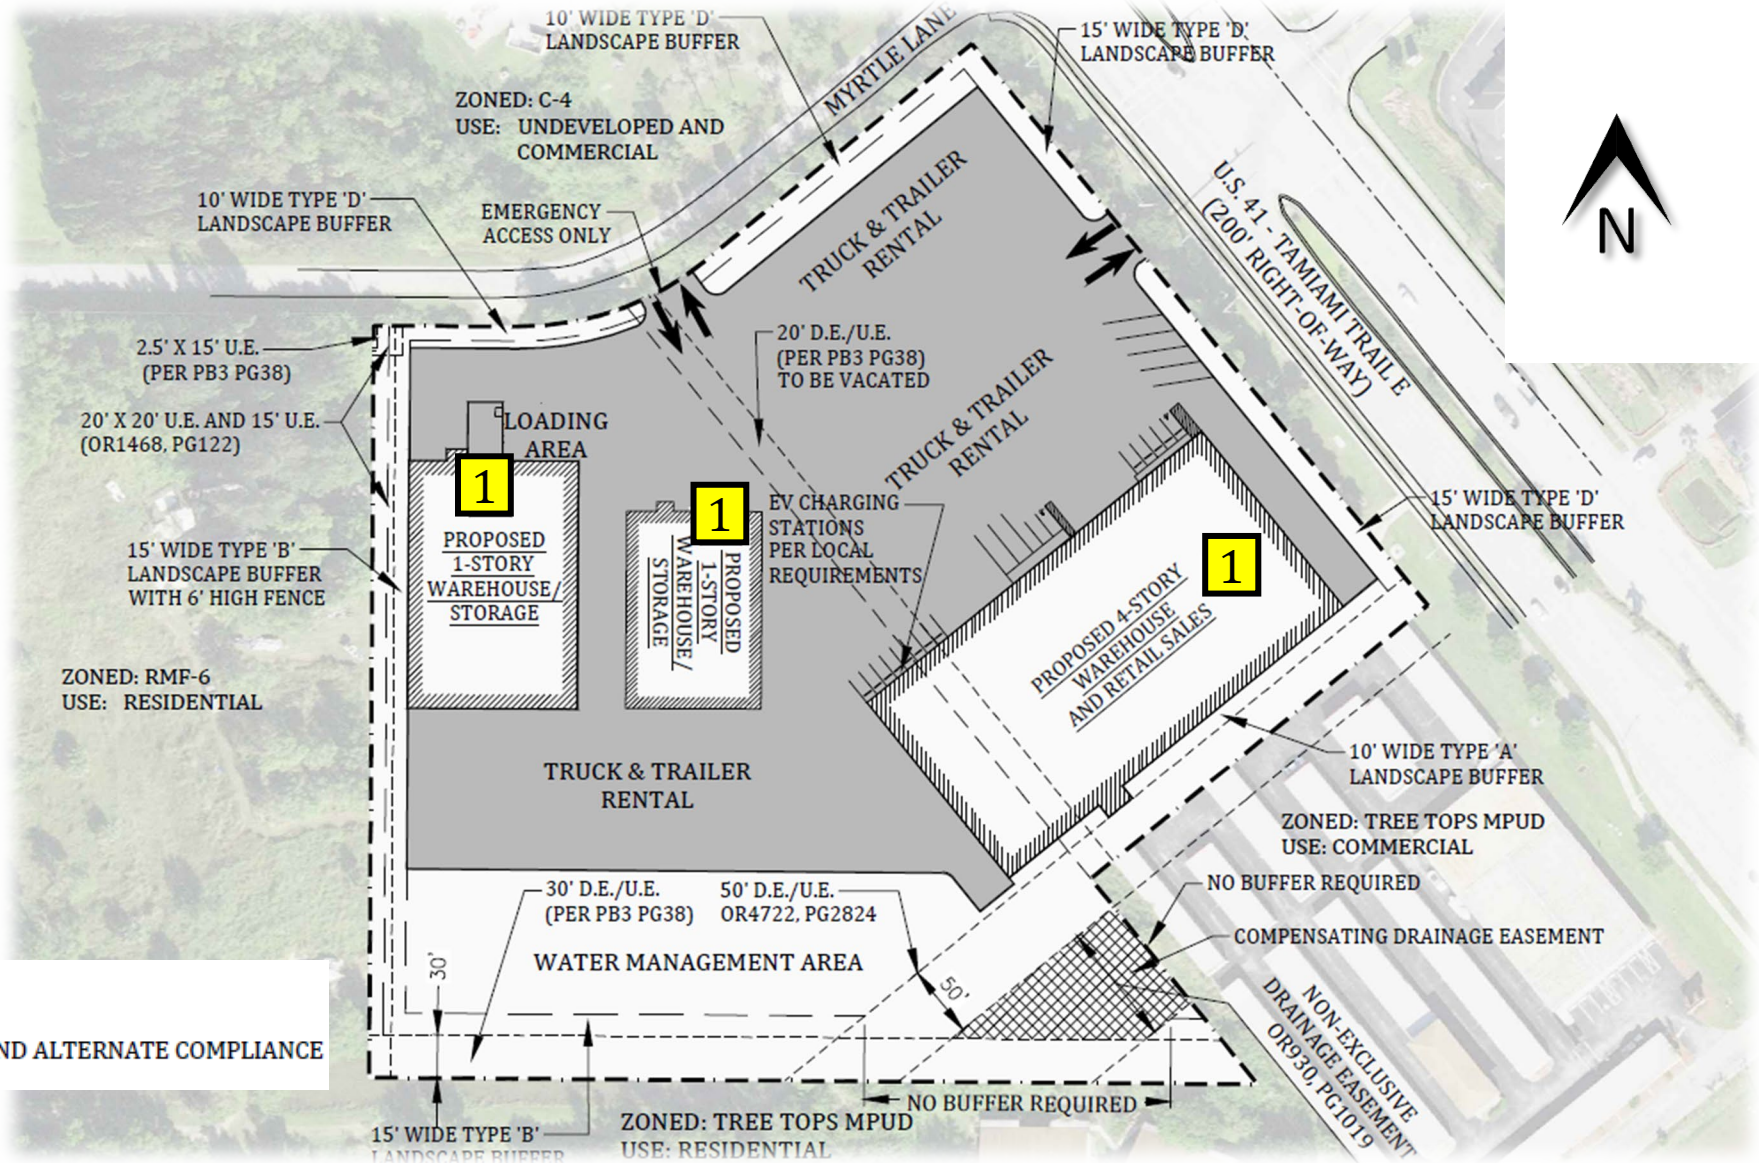
TOTAL SITE AREA: 8.24± ACRE

COMMERCIAL	5.81± AC (71%)
WATER MANAGEMENT	1.94± AC (23%)
LANDSCAPE BUFFERS	0.49± AC (6%)

SELF STORAGE/WAREHOUSE: MAXIMUM 200,000 S.F.
RETAIL: MAXIMUM 3,000 S.F.

OPEN SPACE:
REQUIRED: 30%
PROVIDED: 30% (WITHIN THE OVERALL PUD)

PRESERVE:
REQUIRED: 0± ACRES (0 ACRES NATIVE VEGETATION X 15%)
PROVIDED: 0± ACRES



DEVIATIONS (SEE EXHIBIT E)

1 RELIEF FROM LDC SECTION 5.05.08, DEVIATIONS AND ALTERNATE COMPLIANCE

CONCEPTUAL SITE RENDERING

A&M ASSOCIATES, INC.

PHOENIX, ARIZONA 85004
P: 602.263.6841

PROPOSED PERMITTED USES

A. Principal Uses:

1. A maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses shall be permitted within the CPD. No building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the uses permitted by right in the C-1 through C-3 Zoning District and the following uses.
2. Automotive rental and leasing (7513 and 7519)
3. Outdoor equipment rental and leasing (7359)
4. Indoor storage, including cube storage and moving supplies sales (4225 and 4226)
5. Propane gas dealers, including grilling and propane accessories (5984)
6. Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

B. The following uses are prohibited:

1. Animal specialty services (0752)
2. Automotive Services (7549)
3. Educational plants and public schools
4. Group Care Facilities
5. Membership organizations, miscellaneous (8699)
   a. Farm granges
   b. Humane societies
6. Parking Lots/Structures (7521)
7. Personal services, miscellaneous (7299)
   a. Bartering services
   b. Comfort station operation
   c. Escort service
   d. Turkish baths
8. Public administration (9661)
9. Retail services - miscellaneous (5999)
   a. Monuments/tombstones
   b. Sales barns
10. Valet parking

C. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1. Electric vehicle charging stations
2. Essential services
3. Minor auto service and repair, for rental/leased vehicles only
4. Signage
5. Water management
6. Any other accessory use which is comparable in nature with the foregoing list of permitted accessory uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

PROPOSED DEVELOPMENT STANDARDS

TABLE I
COMMERCIAL DEVELOPMENT STANDARDS

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 SQUARE FEET	N/A
MINIMUM LOT WIDTH	100 FEET	N/A
MINIMUM YARDS (External)		
From Tamiami Trail East ROW (Front)	25 FEET	25 FEET
From Eastern PUD Boundary (Side)	25 FEET	10 FEET
From Western PUD Boundary (Side)	25 FEET	15 FEET
From Southern Boundary (Rear)	25 FEET	15 FEET
MINIMUM YARDS (Internal)		
Internal Drives/ROW	10 FEET	0 FEET
Rear	10 FEET	10 FEET
Side	10 FEET	10 FEET
MINIMUM DISTANCE BETWEEN STRUCTURES	10 FEET	10 FEET
MAXIMUM HEIGHT		
Zoned	60 FEET	25 FEET
Actual	70 FEET	25 FEET
MINIMUM GROSS FLOOR AREA FOR ANY PERMITTED USE	700 SQUARE FEET	N/A
MAXIMUM GROSS FLOOR AREA FOR PUD Indoor Self Storage/warehousing ~~Retail and Service~~Other uses	200,000 SQUARE FEET 3,000 SQUARE FEET	N/A

NEXT STEPS

- **File resubmittal**
- **Hearing Notices mailed to adjacent property owners within 500 feet of the subject property.**
- **Hearing sign posted on property advertising hearing dates.**

- **<u>HEARING DATES:</u>**
  - **CCPC – TBD, 9:00 a.m., Collier County Government Center, 3299 Tamiami Trail East, 3rd floor BCC Chamber, Naples, FL, 34112**
  - **BCC – TBD, 9:00 a.m., Collier County Government Center, 3299 Tamiami Trail East, 3rd floor BCC Chamber, Naples, FL, 34112**

SIGN POSTING INSTRUCTIONS

(CHAPTER 8, COLLIER COUNTY ADMINISTRATIVE CODE FOR LAND DEVELOPMENT)

A zoning sign(s) must be posted by the petitioner or the petitioner's agent on the parcel for a minimum of fifteen (15) calendar days in advance of the first public hearing and said sign(s) must be maintained by the petitioner or the petitioner's agent through the Board of County Commissioners Hearing. Below are general guidelines for signs, however these guidelines should not be construed to supersede any requirement of the LDC. For specific sign requirements, please refer to the Administrative Code, Chapter 8 E.

1. The sign(s) must be erected in full view of the public, not more than five (5) feet from the nearest street right-of-way or easement.
2. The sign(s) must be securely affixed by nails, staples, or other means to a wood frame or to a wood panel and then fastened securely to a post, or other structure. The sign may not be affixed to a tree or other foliage.
3. The petitioner or the petitioner's agent must maintain the sign(s) in place, and readable condition until the requested action has been heard and a final decision rendered. If the sign(s) is destroyed, lost, or rendered unreadable, the petitioner or the petitioner's agent must replace the sign(s

NOTE: AFTER THE SIGN HAS BEEN POSTED, THIS AFFIDAVIT OF POSTING NOTICE SHOULD BE RETURNED NO LATER THAN TEN (10) WORKING DAYS BEFORE THE FIRST HEARING DATE TO THE ASSIGNED PLANNER.

Proposed Location: US Hwy 41 and Myrtle Lane, Naples FL 34113

Needs Analysis

Needs Analysis

Findings Summary

Objective:

The Needs Analysis illustrates the growth in Collier County in relation to the proposed location and how the proposed storage location will meet the new demand and benefit the County.

U-Haul is proposing a new center at US Hwy 41 and Myrtle Lane in Collier County. The facility would replace the existing U-Haul center at 2001 Tamiami Trail East, Naples FL. Our current location has reached capacity and offers limited number of services. Redevelopment of the current location is not feasible. For this reason, U-Haul Company has found a better location to relocate this operation in order to continue its business. It will act as a "One Stop Shop" Smart Mobility location, which offers variety of services which include self-storage, U-Haul truck and trailer share, propane, hitch and towing needs, charging stations and related retail sales (see next page).

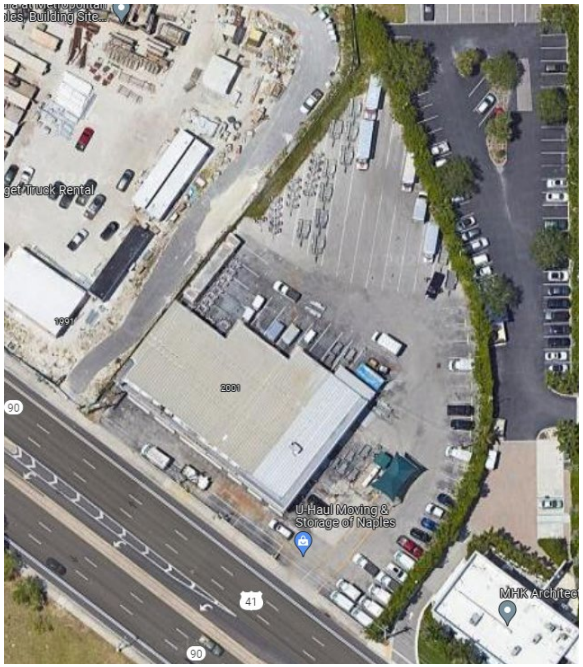
Collier County is experiencing significant growth along Hwy 41. The growth is due to multiple new construction projects in the area and additional planned developments forthcoming.

The proposed location will serve 16,452 households within 3- mile radius trade area. This infill development will allow U-Haul to better serve the storage needs of the community and activate a property that is currently vacant.

The proposed development requires a PUD amendment and a small- scale Growth Management Plan amendment.

Current location

Land Area: 1.02 acres
Building Gross: 11,909 SF , One- story



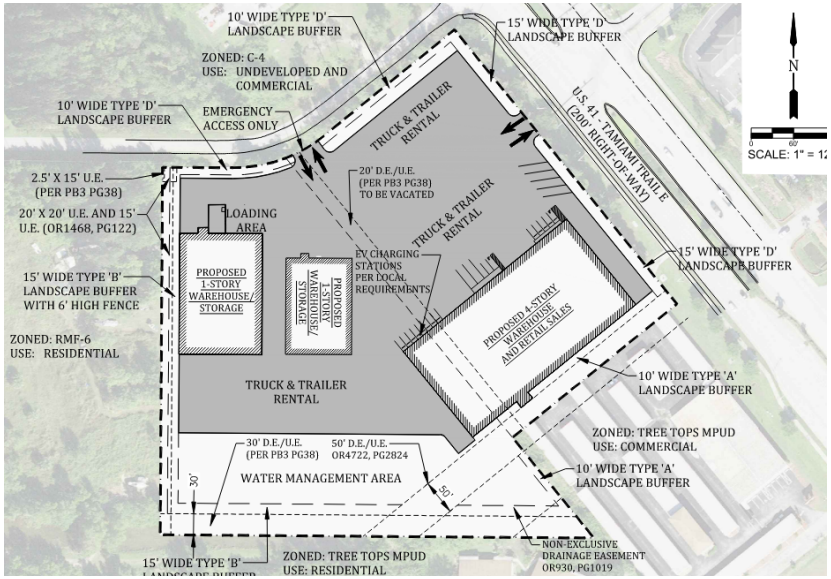
Because of the of the property size , the existing U-Haul location offers only limited services.

Offered services (limited):

- Self-storage (limited)
- Truck and trailed share
- Moving supplies
- Hitches and propane
- U- box storage (limited)

“One Stop Shop” Smart Mobility Proposed location

Land Area: 8.24 acres
Building Gross: 102,000 SF ,Three- story

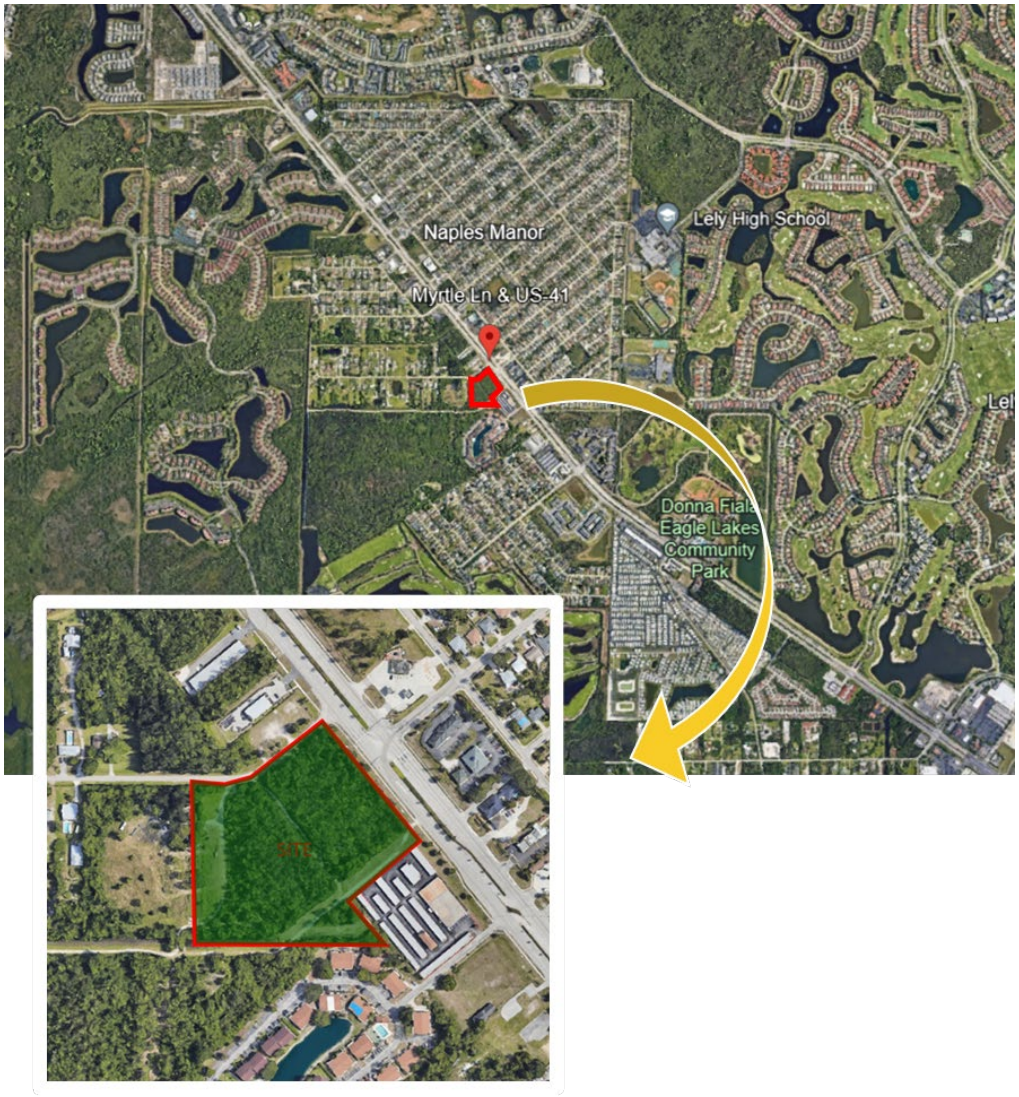


The U-Haul proposed site campus location will provide multiple products and services on the 8.24-acre site.

Offered services:

- Self-storage
- Truck and trailer share
- Moving supplies
- U- Box storage
- Hitches and towing needs
- Propane, accessories
- Moving labor
- College moving
- Military moving
- International moving
- Charging stations

Proposed Location/ Site Accessibility

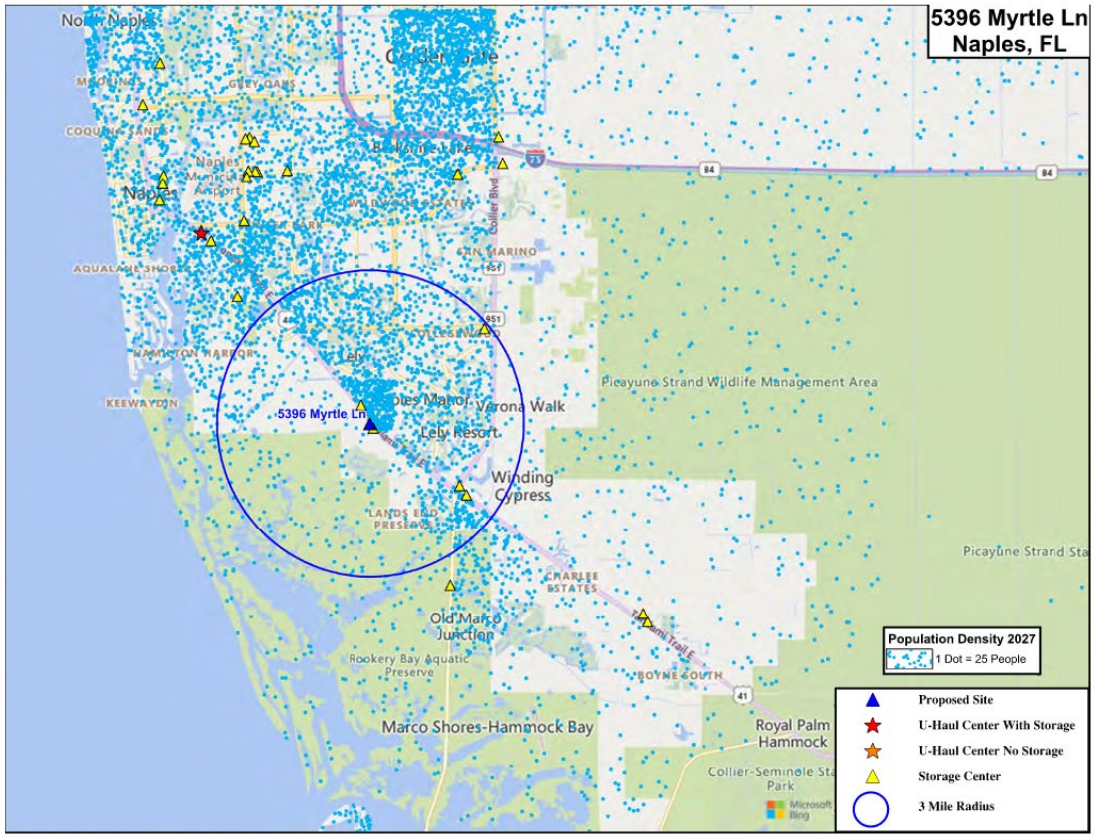


The property is currently vacant parcel. It is surrounded by residential properties, vacant lots and some commercial properties along US Hwy 41.

The site location along US Hwy 41 would make the proposed development ideal location to serve the residential community on both sides of the US Hwy 41. US Hwy 41/ Tamiami Trail E is currently a 6-lane major arterial road connecting Naples Florida with the rest of the Collier County.

U-Haul Moving and Storage is a convenience business. Our philosophy is to place U-Haul stores in high growth residential areas, where we fill a need for our products and services. Customers are made aware of the U-Haul store, primarily via drive-by awareness, much like that of a convenience store, restaurant or hardware store.
The proposed location will have approximately 25-30 employees.

Current Population & Projected Population Growth over 5 years



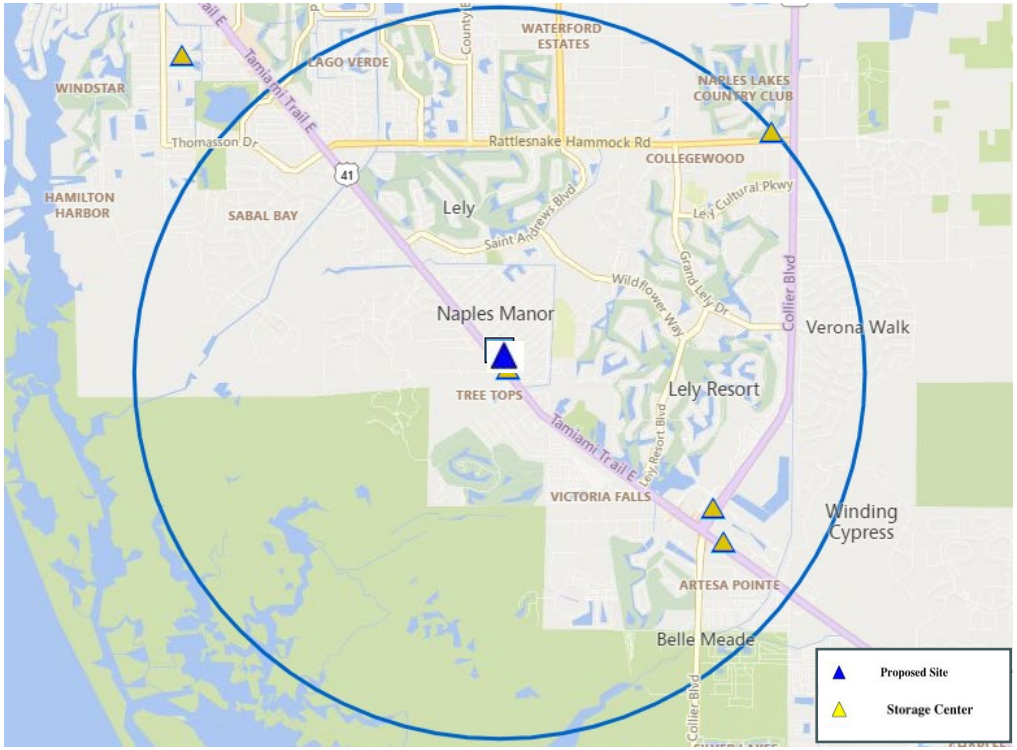
The map illustrates the location and intensity of the population growth that is expected to occur over the next five years. The growth is expected to contribute to a significant increase in the demand for storage that cannot be met by the current available storage locations.

Below is the estimated population data for the projected growth in the different trade areas and the county as a whole.

The current estimated population in the trade area is 39,204 residents, 16,452 households within a 3- mile radius. Collier County's estimated current population is 387,712 residents. The projected population growth over five years in the 3-mile radius trade areas is 12.5 %, which is a conservative number due to all new development coming in the area.

Trade Area	2022 Estimated Population	2027 Projected Population	5 Year Pop Increase	Total Pop Growth
1 Mile Radius	11,551	13,393	1,842	15.9%
3 Mile Radius	39,683	44,662	4,979	12.5%
5 Mile Radius	82,204	89,149	6,945	8.4%
Collier County	387,712	416,113	28,401	7.3%

Storage Saturation -3 miles



The map illustrates the proposed location of the U- Haul center and storage competitors within 3-mile radius trade area. Several of the competitors are old model drive up mini-storage facilities. The proposed U-Haul storage location with interior access climate-controlled storage is a modern storage center. Its campus will provide multiple products and services. It is referred to as " One Stop Shop"- self storage , U Box storage , truck and trailer share and related retail, EV charging stations, hitches, propane, etc.

Location Type	Entity#	MCO#	Entity name	Street	City	State
Storage Community	Naples	830	Cubesmart Self Storage	11400 Tamiami Trl E	Naples	FL
Storage Community	Naples	830	Storesmart	6810 Collier Blvd	Naples	FL
Storage Community	Naples	830	Public Storage	13191 Tamiami Trl E	Naples	FL
Storage Community	Naples	830	Extra Space Storage	7391 Rattlesnake Hammock Rd	Naples	FL

5396 Myrtle Lane, Naples FL Competitors - 3 miles Marketing Area Propensity (MAP)

The table provides information regarding the type of facilities the competitor sites include within 3-mile radius.
Two storage competitors are of a newer type storage with 100% climate- controlled storage facility. The other two competitors include older model storage with climate and non climate storage.
This shows that trend in the industry that that storage has changed from a drive- up industrial use to climate controlled commercial use.

The additional sites provided for future development include two, which are Car Condos and the third was already included in our analysis, which is Public storage.

MAP - (Market Area Propensity) - 10.90 MAP indicates we are underserving the community based on the number of locations, storage NRSF available, and population within the area.

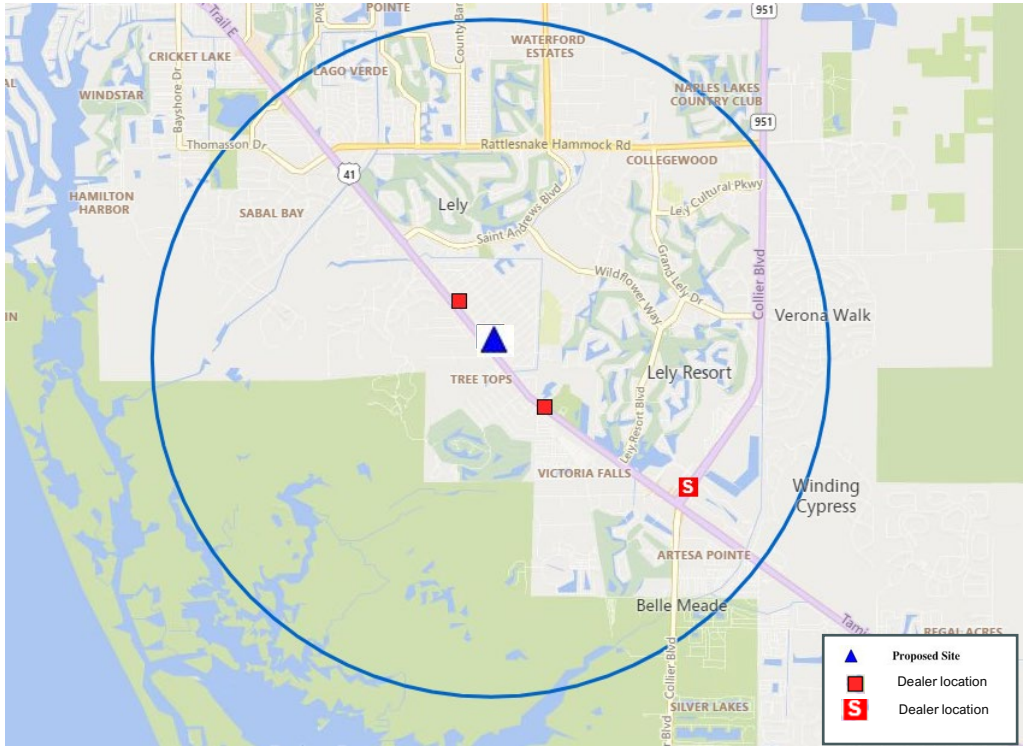
MAP of 20 or below is an indicator for us to be in the community and shows us that the community is underserved.

5396 Myrtle Lane, Naples FL Competitors **3 Miles**
Marketing Area Propensity Calculation

Storage Facility	Approximate Sq Foot		
	Climate	None Climate	Total Sq ft
Cube Smart 11400 Tamiami Trail E Naples FL 34113	56,000	24,000	80,000
Public Storage 13191 Tamiami Trail E Naples FL 34114	105,000	0	105,000
Midgard Self Storage 6810 Collier Blvd Naples FL 34114 (formaly known as Storesmart)	35,000	15,000	50000
Extra Space Storage 7391 Rattlesnake Hammock RD Naples FL 34113	70,000	0	70,000
Proposed U-Haul Myrtle Lane Naples FL 34113	102,000	0	102,000
Total	333,000	39,000	372,000

305,000 Sq Ft of Competitor Storage plus 102,000 Proposed U-Haul = 407,000 Sq Ft of storage in 3 miles
Population in 3 miles = 41,000
Storage Facilities in 3 miles = 4
Ave Sq Ft of 4 Storage Facilities=76,250
4x76,250= 305,000 + 102,000 = 407,000 Divided by 41,000 population = 10.90 MAP

Storage Dealers- 3 miles



The map illustrates the location U- Haul dealers within 3-mile radius trade area. The dealers typically would only have a few rental trucks on their lots. Our dealers are local area residents who understand the goals and challenges of the community in which they live and work. They strive to provide quality products and services to ensure their own success, and in turn, support neighboring commerce. Through expanding economies, the U-Haul business model allows local dealers the ability to serve and support the community while improving their own chances of sustainable business outcomes.

Location Type	Entity#	MCO#	Entity name	Street	City	State
Dealer	035051	830	Exxon Gas Station	11163 Tamiami Trail E	Naples	FL
Dealer	029610	830	Global Mail & Ship	11522 Tamiami Trail E	Naples	FL
Dealer	008784	830	Midgard Naples 1	6810 Collier Blvd	Naples	FL

Demographic Data Source

The demographic data used in this analysis was licensed by Alteryx from Experian US. The vintage used was from their 2022 Q3 release. This data is available at several geographic levels: County, ZIP Code, Census Tract, and Block Group. It contains a wide range of demographic variables, including, but not limited to housing counts, population counts, income variables, home ownership, housing types, age characteristics, occupation, and seasonality metrics. Furthermore, Experian US also provides 5-year housing, population, and income projections.

Additional Considerations and benefit to Collier County

- U-Haul strives to locate stores within high demand communities to increase convenience and access for DYI moving customers while reducing traffic congestion and emissions. U-Haul centers generate less traffic than other retail or commercial uses.
- U-Haul and The Conservation Fund have worked together since 2007 to raise both money and awareness to address climate change by planting trees and restoring forests.
- The partnership has grown to include urban conservation and green economy opportunities which are creating green jobs, reducing neighborhood flooding, and providing safe places to play in underserved communities.
- It is our desire to improve the quality of the existing property by implementing sustainability features, such as energy efficient LED lighting , energy efficient windows and HVAC units, local building materials, sustainable site design features.
- The proposed U-Haul center would add to the property value and increase the tax base, which strengthens the economic base of the community.
- U-Haul also promotes social and economic sustainability, more than 18 million customers rented U- Haul trucks and trailers in 2021 nationwide. U-Haul provides positive economic support to a community by attracting customers from different regions.

Additional Consideration and benefit to Collier County

- This added customer base, increases awareness of other nearby merchants and fosters relationships that may bring new business to the city, ensuring a viable, expanding local economy.
- Increased business traffic may require hiring additional employees, improving the quality of life for residents needing work to support themselves and/or their families.
- U-Haul has a successful and reliable track record of stability and reliability and, is a devoted neighbor in over 1,000 communities in North America. Strengthened with 77 years of DYI moving and storage expertise, U-Haul is a reliable anchor business attracting customers from within and around Collier County community.
- This proposed U- Haul storage location will increase exposure and support many neighboring small businesses, adding to the County's economic success and resilience.

Image courtesy of Google Earth

Conclusion

The Needs Analysis illustrates the growth in Collier County and justifies the need to relocate U-Haul to this location, where we can provide all the amenities and services that our business offers.

The proposed location offers numerous advantages due to the “One Stop Shop” Smart Mobility operation, part of U-Haul’s business model and is contributing positively to the local community. Collier County is known for its affluent population and robust economy, making it an ideal location for a U-Haul facility. The county’s steady population growth, combined with high number of seasonal residents, indicates a consistent demand for self-storage solutions and truck rental services.

Significant population growth is projected in the area served by the proposed U- Haul storage center along US Hwy 41. The proposed center aligns with Collier County's economic, demographic, and environmental dynamics. The venture is poised to contribute positively to the County's development, offering valuable services that cater to the needs of both residents and businesses while adhering to the local environmental and community standards.

Second Submittal: 04/06/2020
Third Submittal: 06/22/2020
Fourth Submittal: 09/24/2020
Hearing Draft: 12/10/2020
City Council Adopted: 03/03/2021

PUD Disclaimer

A Planned Unit Development ("PUD") is intended to be a stand-alone document of zoning regulations for a particular project. Provisions not specifically regulated by the PUD are governed by the zoning ordinance. A PUD may include substantial background information to help illustrate the intent of the development. The purpose and intent statements are not requirements that will be enforced by the City. The PUD only modifies zoning ordinance regulations and does not modify other City Codes or requirements. Additional public hearings may be necessary, such as, but not limited to, right-of-way abandonments.

This PUD provides the regulatory zoning provision designed to guide the implementation of the overall development plan through the City of Phoenix development review and permit process. The provisions provided within this PUD shall apply to all property within the PUD project boundary. The zoning and development standards provided herein amend various provisions provided by the City of Phoenix Zoning Ordinance (as adopted and periodically amended). In the event of a conflict between a use, a development standard, or a described development procedure between the City of Phoenix Zoning Ordinance and the PUD, the PUD shall prevail.

A. Purpose and intent

1.) Executive Summary

Upon being discharged from the Navy in the summer of 1945, after World War II, 29-year-old L.S. “Sam” Shoen and his wife Anna Mary tried to rent a utility trailer to move their possessions from Los Angeles to Portland, Oregon. It couldn't be done. They had to take only what they could fit in the car. During that trip they recognized the widespread need for do-it-yourself moving equipment that would be available on a one-way, nationwide basis. U-Haul International was formed. Their visionary approach spread the cost of ownership among many users, facilitating the mobility of the populations of the U.S. and Canada. The covered wagon of the pioneers morphed into orange U-Haul trailers. In the process, an industry was born.

On July 4, 1967 U-Haul moved its corporate headquarters to the Central Towers on Central Avenue in Phoenix. Since that time U-Haul has grown to a publicly traded company operating over 2,000 moving centers across the US and Canada, as well as 20,000 independent dealers. U-Haul is proud to call the City of Phoenix home, employing over 1,700 people at the Central Avenue Corporate headquarters. As U-Haul continues to grow, the need for expansion and continual modernization of the business has prompted major renovations to the Towers buildings and the surrounding property. This Planned Unit Development is a part of a larger vision to create a true Flagship Store for U-Haul International. Recently, other improvements throughout the U-Haul Center have been proposed for development including a fitness and conference center. This Planned Unit of Development aims to bring a storage and moving center to the Flagship Store that will serve the needs of the Midtown Phoenix residents while at the time showcasing a flagship Smart Mobility Center at the heart of the U-Haul home.

2.) U-Haul Flagship Store Overview

The purpose of the U-Haul Smart Mobility Center Flagship Store Planned Unit Development (PUD) is to create specific standards to guide the development of the approximate 0.81 net acres of property located approximately 250 feet west of the southwest corner of 3rd Street and Thomas Road (the "Property") in the Encanto Village of Phoenix.

This PUD is being utilized to incorporate development standards generally consistent with the City of Phoenix Walkable Urban Code (WU Code) as related to the Transit Overlay District (TOD-1) where the Property is located. While the intention of this PUD is to follow the WU Code guidelines, some standards and land use regulations have been modified to meet the needs of the proposed development. The PUD only modifies zoning ordinance regulations and does not modify other City Codes or requirements

The WU Code is a form-based code intended to encourage multiple modes of transportation through designing the urban environment in a way that brings an appropriate mixture of density, activity, and services to areas identified through the Midtown TOD Policy Plan. The Property is located within the Midtown TOD Policy Plan Area with a recommended transect designation of Transect T5:7, a medium intensity district characterized by a mix of building types adjacent to the light rail corridor. Recently developed, and future planned residential development throughout Midtown, and specifically in close proximity to the Property will expand the density of this area. U-Haul's proposed development at this location will support the vision of the Midtown TOD Policy Plan by providing services to the increasing residential population, reinforcing the mixture of land uses and transit options promoted by the goals of the WU-Code.

The use is a minimal-impact type of development in that it can compatibly be located next to the existing adjacent uses and buildings. It is also a necessary amenity to the many multi-family communities nearby. With the growing number of multi-family residential uses, which are inherently smaller than traditional single-family residential housing there is a great demand for this use.

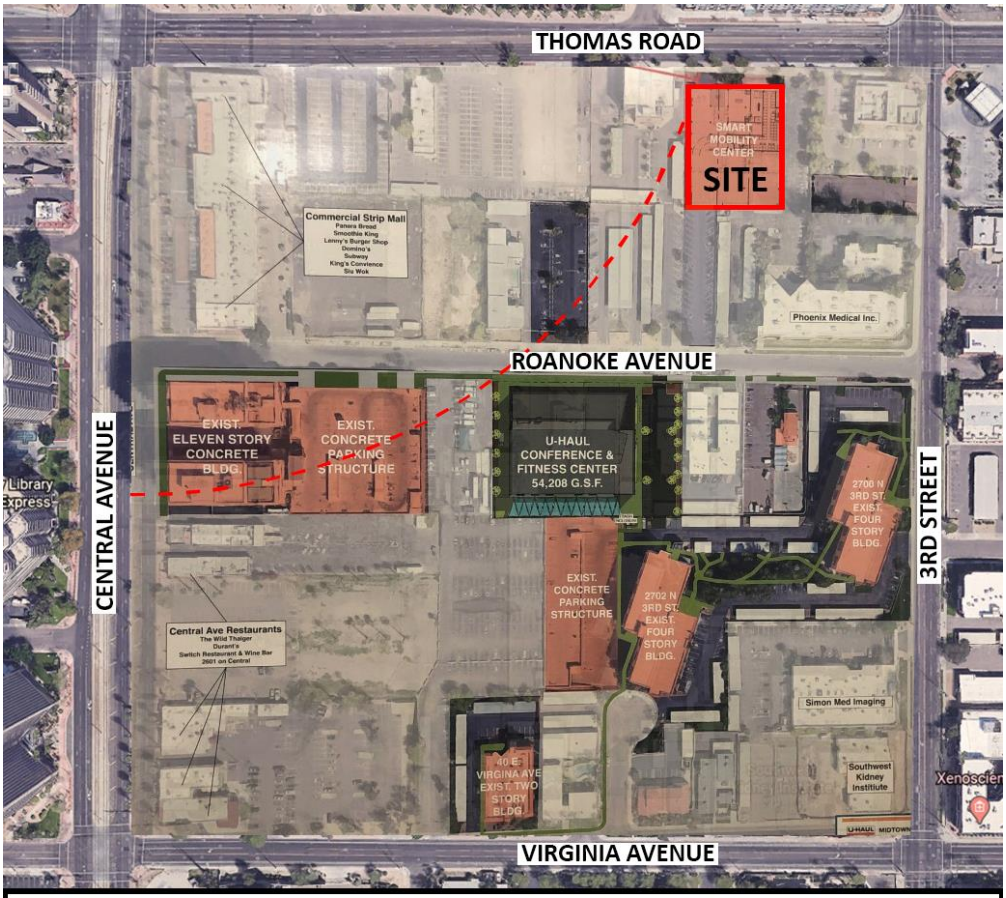
The proposed self-storage facility will offer the best in service, employees, processes, technology, and customer service industry-wide. U-Haul facilities are clean and professionally managed by courteous, knowledgeable and professionally trained customer-oriented managers.

This proposed facility is conveniently located for customers and is equipped with industry-leading security features that are standard at all their developments. Additionally, the facility will be equipped with interior and exterior 24-hour video surveillance equipment. This self-storage facility will be efficiently climate controlled to improve the customer's experience and peace of mind, which is a reflection of the quality standards planned for this development.

When U-Haul first moved to the Central Towers in 1967, they only occupied a portion of the towers, sharing the buildings with other tenants. Today, U-Haul and its affiliate companies not only occupy the towers in their entirety but have accumulated a large portion of the property between Central Avenue and 3rd Street. The operations throughout these five buildings range greatly but are all related to furthering U-Haul's pursuit of being a successful mobility company.

Recently there have been efforts taken to transform the multitudes of properties into a cohesive corporate center. In June 2018, under zoning case number Z-30-18-4, the City of Phoenix approved a rezoning of an existing parking area that will hold a conference center and fitness center. Those improvements to the U-Haul corporate center are currently under construction and expected to be complete by summer 2021.

Efforts are being taken to improve connectivity throughout the campus, including walking and cart paths between buildings and parking areas. A shaded, striped 3' wide pedestrian path will be constructed between the flagship storage center and Roanoke. The proposed Smart Mobility Center Flagship Store will tie the whole U-Haul system together by exhibiting the core substance of the company's purpose in a flagship store where the Corporate Headquarters will be integrated with a working business that provides a much-needed service to the surrounding community.



AERIAL MAP

3.) Smart Mobility

The heart of the U-Haul Smart Mobility Center Flagship Store is the operation of a self-storage facility and vehicle sharing. The Smart Mobility Center is a new concept to U-Haul; the first Smart Mobility Center was created in Tallahassee, Florida while the second was recently approved as an adaptive re-use project on Baseline Road in South Phoenix. A signature component of the Smart Mobility Center is proximity to public transit in an urban setting. We have found that a large portion of U-Haul customers will utilize public transportation when visiting a moving center to obtain the equipment they need. Additionally, the Smart Mobility Center Flagship Store offers car sharing for those rely on public transit and/or bicycling in their everyday lives and only have occasional need for a passenger vehicle. The other dynamic driving the Smart Mobility concept is that many residents in urban areas have down-sized to smaller homes and have a need for self-storage that is easily accessible. These factors all play a synergistic role in siting a suitable location for a Smart Mobility Center, enabling us to support sustainable transportation by providing a hub for car and truck sharing a permitted use, as well as a retail center where customers can arrange for storage space and purchase moving supplies.

4.) Project Design Concept

The Project consists of a six-story building set forward towards Thomas Road. The Property ingress and egress will be from one access point, one on Thomas Road that is aligned to form a single, thru-driveway ensuring safe and convenient movement. The building design itself is reflective of the building design guidelines set forth in the WU-Code. The façade surfaces are broken up into surfaces existing on different planes, creating an aesthetically interesting view from Thomas Road. A mix of colors and building materials are incorporated into the design to avoid monotony of a large building surface mass.

A retail showroom, detached sidewalk, trees, shrubs, benches and colored stamped concrete paths will front Thomas Road creating an active streetscape presence. The frontage entry to the showroom is provided by a storefront style door adjacent to the sliding door. The frontage of the building will be also be shaded as encouraged by the WU-Code landscape guidelines. The ground level portion of the building, is primarily utilized for the vehicle sharing uses and parking. Customer parking is out of view of Thomas Road, providing the pedestrian friendly streetscape that the WU-Code encourages. Floors 2-6 of the building are reserved for self-storage uses.

The self-storage portion of the building interior will contain storage units of varying sizes from 5'x5' units to 10'x15' units. Storage units are filled and emptied by customers who have access to their units during facility operating hours. All U-Haul storage customers are issued a card-swipe style identification card that must be used to gain access to their room. This is but one of many security policies which protect the customer's belongings and decrease the ability of unauthorized access to the facility.

B. Land Use Plan

The Property is located within 1000 feet of the Central and Thomas light rail station and consequently in the Transit Overlay District (TOD-1), it is approximately 0.81 net acres. Additionally, the Property is fronted by Thomas Road, a major arterial street with one of the most active bus routes in the Valley. This area of mid-town is in the process of seeing significant residential growth and a resurgence of commercial activity. The options that the Smart Mobility Center Flagship Store will offer for surrounding residents will be a welcome, and successful addition to the community. This PUD and the accompanying application requests approval to allow self-storage uses on this Property. This proposal generally follows the guidelines and regulations of

the Walkable Urban Code as envisioned by the Midtown Policy Plan for transit-oriented development, while also adding self-service storage as a permitted use.

The development will be accessed from one driveway on Thomas Road. This self-storage use will have little impact on adjacent properties, due to very low vehicular traffic. Furthermore, it is not anticipated that this use will have an adverse effect on peak hour movement. With this low traffic volume, the single driveway is sufficient.

The current property is a parking lot and zoned P-1 see Exhibit C Existing Zoning Map.

The uses described in WU-Code Table 1306.1 (Land Use Matrix) of the Ordinance guide the uses permitted within this PUD. In addition, self-storage warehousing is a permitted use within this PUD. Self-storage and retail sales are the primary uses of the Smart Mobility Center. Truck and trailer leasing and parking shall be located within a building as described in the development standards table.

C. Development Standards

Unless specifically modified herein, the PUD will follow WU-Code standards related to Transect T5:7, as described in Chapter 13 of Zoning Ordinance. Transect T5:7 will govern the site unless deviations are specified. We are proposing the following deviations from the T5:7 transect of the WU-Code development standards.

The table below represents the development standards proposed as part of this PUD and how they compare to that of the standards of the Midtown T5:7 Transect of the WU-Code. The table will apply to self-service storage, car-share, and household moving center only, other T5 uses permitted should defer to WU Code T5:7. No exterior self-storage is proposed.

1. Development Standards Table

Section	Title	Applicability
1301	Code Administration	No Changes. The PUD will meet the requirements of this section.
1302	Transect Districts	No Changes. The PUD shall be developed per Transect T5:7.
1303	Transect Lot Standards	The PUD will meet the requirements of this section aside from three deviations: 1303.2 1.) The 6th floor shall have 0% glazing. 2.) 66-foot maximum height and 0 feet of building stepbacks.
1304	General Site Development Standards	The PUD will meet the requirements of this section aside from one addition: 1304.F.1. 1.) 100% shade over the public sidewalk.
1305	Frontage Standards	No Changes. The PUD will meet the requirements of this section.
1306	Land Use Matrix	No Changes except of household moving center, car sharing, and self-storage by right with at least 8 leasable U-Haul vehicles max.
1307	Parking Standards	The PUD will meet the requirements of this section, as applicable to the T5:7 transect, with three additions. 1307.H.6.c.(1) 1.) A bicycle repair station (Fix-it-Station) shall installed outside the building, in a conspicuous location, and accessible from the public sidewalk. 3.) The development shall include a total of 28 parking spaces. The modified parking standard shall only apply to the new uses added by the PUD.
1308	Signage Standards	The PUD will meet the requirements of this section aside from one deviations and requirements found in Section E. Signs on page 14.
1309	Landscape Standards	The PUD will meet the requirements of this section, as applicable to the T5:7 Transect, with the additional requirement that the Thomas Road frontage be planted with a minimum of seven (7) drought tolerant shade trees with 25 percent four-inch caliper and the remainder being three-inch caliper or greater.
1310	Open Space Standards	No Changes. The PUD will meet the requirements of this section.
1311	Design Development	No Changes. The PUD will meet the requirements of this section.
1312	Character Areas	The PUD will meet the requirements of this section, as applicable to the T5:7 Transect, for the Transit Midtown Character Area, with three additions and clarifications: Section 1312.C.1.b. 1.) Trees as required per the Section 1309 and as modified by the Section 1309 reference in this table, in addition to shrubs to provide 75% groundcover between the sidewalk and the building frontage, excluding vehicular driveways. 2.) The development shall include 4 benches along the arterial street (Thomas Road) as architectural public elements. 3.) 1. Street entrances from the sidewalk shall be designed with stamped colored concrete.

1313	Design & Standards	No Changes. The PUD will meet the requirements of this section.

2. Enhanced streetscape

The proposed site enhancements will help promote pedestrian walkability in the area. The development will feature four benches, bicycle repair station and four bicycle spaces accessible from the public sidewalk along Thomas Road. Additionally, colored stamped concrete on entrances within the public right of way.

3. Shade

This development will incorporate shading elements such as 21 covered parking spaces on the first floor, and the landscape shaded streetscape. Additionally, the entrance awning extending 5' from the building and the 6 story, 66-foot-high building provides 100% shade to the public sidewalk. Shade calculations are based on the Summer Solstice at 12:00 noon.

4. Landscape

Plant types are as outlined below and in the conceptual landscape plan of this PUD. The conceptual landscape plan is at Exhibit K. Trees along Thomas Road will consist of 3" and 4" caliper trees at 20 feet on center. Shrubs and ground cover along Thomas Road will consist of (98) 5-gallon shrubs.

D. Design Guidelines

The development shall be designed with four-sided architecture with a modern appearance so as to offer pleasing views to adjacent property owners, residents, customers, and users of Thomas road. The enhanced landscaping along Thomas will aid in transitioning uses from the building into the pedestrian experience. The design functions have been created to develop this relationship between the building and the pedestrian environment.

The proposed building elevations shall include massing, articulation, and proportion of materials, as seen in the elevations provided at Exhibit F and materials at Exhibit G. Materials and colors have been chosen for a more modern design, which include black anodized metal storefront, integral color CMU block in white, grays, whites and blue tone metal panels, as well as a metal awning with a blue accent color. The design includes varied roof lines on each elevation, window placements along the north, east and west elevations on floors one through five, and building recess along the north elevation. Additionally, tower offsets shall be included along the north, east and west elevations. The exhibits provided depict one 6-story commercial building. Unless modified herein, the design guidelines of Chapter 13 and Section 507 TAB A will apply.

E. SIGNS

Proposed signage for the U-Haul Smart Mobility Center Flagship Store is depicted in Exhibit I.

- To govern signage on the site, the development shall adhere to the following conditions, as approved by the Planning and Development Department:
    - The wall mural (lifestyle graphic) shall not exceed 112 square feet in area and 46 feet from grade to the top of the sign.
    - Prior to the issuance of any sign permits within the PUD, a Comprehensive Sign Plan will be adopted in accordance with the procedures in Section 705.E.2.
    - Signs over 56 feet from grade to the top of the sign shall be incorporated into the approved or amended Comprehensive Sign Plan.
    - In order to reduce lighting impacts to nearby residential uses, the maximum luminance (brightness) for all wall signs shall be 60 nits measured at the sign face. The maximum color temperature for all wall signs shall be 4,000 Kelvin. Sign permit applicants shall provide certification from a qualified registrant of compliance with these lighting standards prior to the issuance of permits for wall signs.

- The high-rise wall signs shall have a dimmer control installed and the signs' luminance shall be dimmed 50% at 10:30 pm.

F. Sustainability

The development is planned as a sustainable development within the community. Energy efficiency in design and long-term operation along with thermal comfort in building and site design provide a better self-storage atmosphere for customers, employees, property owners and residents.

City Enforceable Standards:

- This PUD will regularly adopt the latest energy and building codes that encourage the use of light-colored roofing materials and will minimize heat island effects.
- The proposed drought tolerant vegetation will integrate trees and shade into the design of the development.
- The development will minimize surface parking area and provide an abundance of shade through the building overhang on parking lot.
- Water Efficient Landscaping (drought tolerant) will include 4" and 3" Caliper trees, 5-gallon shrubs to be provided with 2-inch depth of decomposed granite in all landscape areas to significantly reduce water consumption.
- Building entrances and public sidewalks shall be shaded minimum 100% with architectural building elements, building shade cast, 24-inch box trees and awnings.
- The "Heat Island" effect will be reduced by providing a light-colored roof to provide a minimum roof SRI (Solar Reflectance Index) rating of 75% of the roof surface area.

Practices Incorporated by The Developer:

This Smart Mobility Center will incorporate many of the same sustainable construction and business practices that other U-Haul locations take continual pride in.

Sustainable Development

- Regionally manufactured materials.

- Thermal efficient building shell.
- Reducing heat island effect with light colored and energy efficient roofs.
- LED lighting.
- Interior lighting controlled by motion sensors to reduce energy consumption.
- Low "e" Double-pane windows.
- Shade building entrances with architectural building elements.
- Provide a safe, reliable, and efficient stormwater management system that protects both human health and environment.
- Bicycle Facilities and repair station.
- Storage and Collection of Recyclables. Take a box, Leave a box.

  <u>Sustainable Business Practices</u>

- Re-Use Centers. To reduce the amount of used goods being dumped, we provide centers in which our customers can leave their unwanted but re-useable belongings, such as furniture, for others to take.
- Take a box, Leave a box. We designate a place at our center for our customers where they can leave their used moving boxes for future customers to reuse. Our idea is that while recycling is great, reuse should occur first to ensure more efficient use of our resources.
- Biodegradable packing Materials. U-Haul uses packing peanuts made of starch mixture, replacing Styrofoam and reducing landfill waste.

G. INFASTRUCTURE

1.) CIRCULATION

The development will be accessed from one driveway entrance on Thomas Road. This project will provide required parking in the enclosed first floor of the building, all

of the parking shall be screened from Thomas Road within the building. Seven customer parking spaces are located on the south of the property and will not be visible from Thomas Road. The loading area is contained within the building structure itself. See site plan at Exhibit E.

2.) Grading and Drainage

Underground and surface retention will be provided. The retention volume will be the greater of either the increase in runoff volume in the proposed condition compared to the existing condition, or the first flush volume for the 100-year, 2-hour storm event. Grading and Drainage will be submitted as part of the Development Service Department Site Plan Submittal.

3.) Water and Sewer

Water and waste water infrastructure requirements will be determined, designed and constructed in accordance with Phoenix City Code requirements and Water Services Department Design Standards and Policies. The existing water main in Thomas Road will be utilized for service to the project. All retention facilities will be drained within 36-hours of a major storm event as required by the city of Phoenix Drainage Design Manual.

CITY OF PHOENIX GENERAL LANDSCAPE NOTES:

THE CITY OF PHOENIX GENERAL NOTES ARE THE ONLY NOTES APPROVED ON THIS PLAN. ADDITIONAL GENERAL NOTES GENERATED BY THE SEALANT AND PLACED ON THE PLANS ARE NOT APPROVED AS PART OF THIS PLAN AND ARE NOTED AS SUCH ON THE PLANS.

THE DESIGN ON THESE PLANS IS ONLY APPROVED BY THE CITY IN SCOPE AND NOT IN DETAIL. CONSTRUCTION QUANTITIES ON THESE PLANS ARE NOT VERIFIED BY THE CITY. APPROVAL OF THESE PLANS ARE FOR PERMIT PURPOSES ONLY AND SHALL NOT PREVENT THE CITY FROM REQUIRING CORRECTION OF ERRORS IN THE PLANS WHERE SUCH ERRORS ARE SUBSEQUENTLY FOUND TO BE IN VIOLATION OF ANY LAW, ORDINANCE, HEALTH, SAFETY, OR OTHER DESIGN ISSUES.

CONSTRUCTION WITHIN THE RIGHT-OF-WAY SHALL CONFORM TO THE LATEST APPLICABLE MARICOPA ASSOCIATION OF GOVERNMENTS (MAG) UNIFORM STANDARD SPECIFICATIONS AND DETAILS AND THE LATEST CITY OF PHOENIX SUPPLEMENT TO THE MAG UNIFORM STANDARD SPECIFICATIONS AND DETAILS.

FINAL BUILDING PERMIT CANNOT BE OBTAINED UNTIL BONDING AR APPROVED ASSURANCES ARE PROVIDED FOR THE LANDSCAPING WITHIN THE RIGHT-OF-WAY.

NO PLANT SUBSTITUTIONS, TYPE, SIZE, OR QUANTITY, OR DEVIATIONS FROM THE APPROVED LANDSCAPE OR IRRIGATION PLANS ARE ALLOWED WITHOUT PRIOR APPROVAL FROM THE CITY OF PHOENIX LANDSCAPE SECTION AT 602-262-7811.

ALL PLANT MATERIAL AND SPECIFICATIONS SHALL CONFORM TO THE ARIZONA NURSERYMAN ASSOCIATION STANDARDS.

ALL RIGHT-OF-WAY AND CITY-REQUIRED (PERIMETER, RETENTION, AND PARKING) PLANT MATERIAL SHALL BE IN COMPLIANCE WITH THE DEPARTMENT OF WATER RESOURCES LOW WATER USE PLANT LIST.

CONTACT THE PARKS AND RECREATION DEPARTMENT FORESTRY SUPERVISOR AT 602-262-6862 TO VERIFY OWNERSHIP OF ANY PLANT MATERIAL IN THE PUBLIC R.O.W. PRIOR TO ANY PLANT RE-LOCATIONS OR REMOVALS. OBTAIN WRITTEN PERMISSION FROM THE PARKS AND RECREATION DEPARTMENT PRIOR TO THE RE-LOCATION OR REMOVAL OF ANY CITY PLANT MATERIAL OR EQUIPMENT.

CONTACT THE STREET TRANSPORTATION DEPARTMENT HORTICULTURIST AT 602-262-6284 PRIOR TO THE RE-LOCATION OR REMOVAL OF EXISTING PLANT MATERIAL IN THE A.D.O.T. R.O.W. THAT IS ON THE CITY'S SIDE OF THE SOUND WALL. OBTAIN WRITTEN PERMISSION FROM THE STREET TRANSPORTATION DEPARTMENT PRIOR TO THE RE-LOCATION OR REMOVAL OF ANY PLANT MATERIAL OR EQUIPMENT.

ALL EXISTING TREES AND SHRUBS IN RIGHT-OF-WAY DESIGNATED TO REMAIN BUT ARE DAMAGED OR DESTROYED WILL BE REPLACED IN LIKE SIZE AND KIND BY THE CONTRACTOR.

THE PROPOSED IRRIGATION SYSTEM SHALL INCLUDE ANY MODIFICATIONS REQUIRED TO TIE INTO THE EXISTING CITY OF PHOENIX IRRIGATION SYSTEM IN RIGHT-OF-WAY TO THE PROPOSED SYSTEM. ALL THOUGH IRRIGATION SYSTEMS IN THE RIGHT-OF-WAY SHALL BE MAINTAINED, THE CONTRACTOR SHALL BE RESPONSIBLE FOR CAPPING AND/OR ABONDONING EXISTING IRRIGATION TO PLANT MATERIALS AND PROVIDING NEW IRRIGATION TO THE EXISTING PLANT MATERIAL IN THE RIGHT-OF-WAY PER THE APPROVED PLAN.

WALLS ARE NOT APPROVED AS PART OF THE LANDSCAPE PLAN BUT ARE SHOWN FOR REFERENCE ONLY.

TREES ADJACENT TO PEDESTRIAN WALKWAYS SHOULD HAVE A MINIMUM CANOPY CLEARANCE OF SIX FEET EIGHT INCHES (6' 8") PER SECTION 507 TAB A.II.A.3.1.10 OF THE CITY OF PHOENIX ZONING ORDINANCE.

PVC PIPE LATERALS ARE REQUIRED A MAXIMUM OF FIVE FEET (5') OF POLY TUBING OFF OF THE PVC PIPE LATERAL IS ALLOWED. NO POLY TUBING LATERALS ARE ALLOWED.

PLANT QUANTITIES AND CALIPER SIZES PER THE ZONING REQUIREMENTS FOR THIS SITE PROVIDED IN THE LEGEND ON THE APPROVED PLANS ARE REQUIRED TO BE INSTALLED IN THE FIELD. ANY DEVIATIONS FROM THE PLAN WILL REQUIRE A REVISION TO THE APPROVED PLAN.
NOTE: MINIMUM CALIPER SIZE IS A ZONING REQUIREMENT. IF THE MINIMUM CALIPER CANNOT BE MET AT BOX SIZE THAT IS SPECIFIED, THEN THE BOX SIZE MUST BE INCREASED TO MEET CALIPER REQUIREMENTS.

PLAN APPROVAL IS VALID FOR 180 DAYS. PRIOR TO PLAN APPROVAL EXPIRATION ALL ASSOCIATED PERMITS SHALL BE PURCHASED OR THE PLANS SHALL BE RESUBMITTED FOR EXTENSION OF PLAN APPROVAL. THE EXPIRATION, EXTENSION, AND REINSTATEMENT OF LANDSCAPE PLANS AND PERMITS SHALL FOLLOW THE SAME GUIDELINES AS THOSE INDICATED IN THE PHOENIX BUILDING CONSTRUCTION CODE ADMINISTRATIVE PROVISIONS SECTION 105.3 FOR BUILDING PERMITS.

MISC. LANDSCAPE NOTES

THESE NOTES ARE NOT REVIEWED OR APPROVED BY THE CITY OF PHOENIX.

- THE ENTIRE SITE WILL BE MAINTAINED IN ACCORDANCE WITH PHOENIX STANDARDS.
- TREES ADJACENT TO PEDESTRIAN WALKWAYS SHOULD HAVE A MIN. CANOPY OF 6'-8".
- USE PVC LATERALS WITH A MAXIMUM A 5' OF POLY TUBING OFF OF PVC. NO POLY LATERALS WILL BE ACCEPTED.
- PLANT QUANTITIES AND CALIPER SIZES PROVIDED ON THE APPROVED PLAN AND IN THE LEGEND ARE REQUIRED TO BE INSTALLED IN THE FIELD.
- ALL NEW AND DISTURBED LANDSCAPE AREAS WILL RECEIVE A 2" TOP-DRESS OF MATCHING DECOMPOSED GRANITE (MIN. 1/2" MINUS).
- PLANT MATERIAL WITHIN THE CITY OF PHOENIX SIGHT DISTANCE TRIANGLES IF EXISTING WILL BE MAINTAINED AT A MAXIMUM 24" IN HEIGHT, TREES WILL BE MAINTAINED WITH A 7' MINIMUM CLEAR CANOPY.
- NO PLANT SUBSTITUTIONS, TYPE,SIZE OR QUANTITY DEVIATIONS FROM THE APPROVED LANDSCAPE OR IRRIGATION PLANS WITHOUT PRIOR APPROVAL FROM THE CITY OF PHOENIX LANDSCAPE SECTION AT (602) 262-7811
- NO SLOPES ARE GREATER THAN 4:1
- THERE IS NO OVERHEAD POWER LINES ON SITE
- NO SALVAGED PLANT MATERIAL

RE: PL20230016211 and PL20230016212

Regarding the above property, I am against rezoning for a multitude of reasons which our community has brought to your attention: drainage issues due to the street being a low area; additional traffic in an already congested road; numerous mini storage units within a 2 mile range. I am also strongly against any kind of additional access on to Myrtle Lane whether it be general or emergency. The road only has one way in and one way out and the width of the road makes it even more treacherous.

Please add my comments to the file for this property.

Laura and Parker,

We have been reviewing the latest update from the developer of the proposed UHaul site at the corner of Myrtle Lane and Tamiami Trail.

We are also monitoring the Planning Commission Calendar for when this item may go before them.

We appreciate staff comments and questions regarding whether this site is viable for the size and scope of the project. All efforts to minimize the height of this structure still leaves us with an out of place business and facility. The site is inappropriate for propane storage as it is not an industrial location and is immediately adjacent to residential zoning.

Though the attempt to help buffer this mega storage center has merit, it still is merely a Band-Aid on the blight that this mega storage structure will leave in damnably and indefinitely on 41 E which in fact is a major gateway between Naples and Marco and an entrance gateway into the city of Naples from traffic from the Miami and East Coast area. All attempts to minimize the impact of this will still not hide this decision that the Collier County Commissioners will be left with for years to come.

Further it is rather unfortunate that the developer does not feel that they should abide be the East Naples Development Plan because it has not been “enacted”. Although it has not been formally adopted it is obvious from the amount of time, effort and money by many parties and organizations to produce such a plan that this is the “will’ of the community. The Developer is obviously not interested in being a contributor or long term neighbor of East Naples, in fact the whole project is really because U-Haul at it’s current location is a hindrance to Metropolitan Developments Mega Project at the Davis Triangle. So they are trying to find the fastest cheapest piece of land to appease U-Haul without consideration of Myrtle Cove Acres or East Naples as a whole. “Just Push it down the road”

The applicants follow up and modifications reference an amended Master site Plan in Attachment 2 within the portal, we cannot seem to locate that, if you have a copy can you please forward to us.

Thank You,
Steve & Claudia Fuller

Re: 5396 Myrtle Lane
PL 20230016211
PL 20230016212

To the Collier County Planners and County Commissioner;

There was a meeting on May 6th at 5:30pm, a Neighborhood Information Meeting, hosted by GradyMinor and Associates, for the above property. Many neighbors attended this meeting, some could not make it because of the time. We had our own neighborhood meeting on May 2nd, with 33 neighbors in attendance.

We had some discussions this past weekend with neighbors that could not make the May 6th meeting. We all feel that this type of project is not good for our little neighborhood. There are too many storage facilities already in our area, one being right next door to this proposed project (CubeSmart). The type of project they are proposing would be better suited in an industrial park or a highly dense commercial area, not in a small residential neighborhood like ours.

Some of the concerns were about the flooding due to a project this large. The West end of Myrtle sits lower than the East end. The West end floods in the rainy season, with some of the properties having severe flooding during hurricanes and heavy rainstorms.

Another huge concern for all of us is the obvious, the traffic in our neighborhood. This will bring too much traffic and unwanted guests to our neighborhood, during construction and afterwards. Our neighborhood does not have sidewalks and we have many young children/grandchildren that play outside and ride bikes, and residents walking pets.

Many of the residents on Myrtle Lane have been in their homes for several years, some for 25–55 years. Our family purchased two lots in 1968, and our home in 1973. The most impacted resident would be 5371, her husband built their home in 1971 and they raised their four children there. She is now a widow and scared to death what this type of project will bring. Our quiet, peaceful neighborhood will be gone.

We all always knew that something would be built there eventually, but never imagined what is being proposed. We feel that what would be built there should be built according to the current zoning and not be allowed any access to/from Myrtle Lane.

When you make your decision regarding this proposed project, our neighborhood is begging you to take into consideration the impact this will have on the residents. Please leave the current zoning in place and do not allow a project of this size next to our neighborhood.

Sincerely,

Joe R. & Katherine L. Smith

Board of County Commissioners
Collier County Government Center
3299 East Tamiami Trail
Naples, FL 34112
Email: Geoffrey.Willig@colliercountyfl.gov

Re: Objection to Proposed Amendment to Ordinance
Ordinance No. 89-05, Collier County GMP
Barefoot Williams Property – Proposed Car Wash

Dear Collier County Board of County Commissioners,

We write to you on behalf of two local, established car wash businesses serving our local community: (1) Pump & Munch Car Wash located at 9995 Tamiami Trail East, Naples, Florida, and (2) Dolphin Auto Spa Express Car Wash located at 6240 Collier Blvd, Naples, Florida. Both of our car washes are within the very close vicinity of the proposed car wash with our locations being 2.2 miles and 2.4 miles away, respectively. We write this letter to raise our concerns and objections to the proposal.

The Applicant claims that the area is in need of another car wash, but that could not be further from the truth. A simple review of the associated maps would show that there are already five substantial car washes within just a three mile radius of the proposed location. Five car washes in this small vicinity is far more than would reasonable for the population in the area, and this oversaturation of the market is exacerbated when out of season. The insertion of another car wash in this oversaturated market will create unmerited stress on the car washes that already serve the limited market in the area and potentially lead to business closures. The Applicant attempts to distinguish itself in the nature of its car wash business, but the reality is that four of the nearby five car washes are essentially identical. Even the County Staff noted their concerns associated with the "high proportion of car washes . . . ."

The Applicant also attempts to paint the approval of the car wash as somehow serving the needs of the local community, but it is difficult to ascertain what needs are being served when there are so many car washes in the area already providing identical service with almost identical facilities. An oversaturation of the market does not serve the local community. It does, however, create strain on local businesses that can lead to closures of the already existing businesses.

Additionally, the Application appears to rely heavily on the argument that the proposal is permitted on the basis that the Home Depot adjacent property has permitted uses of C-5, pursuant to Ordinance 2024-08.

Docusign Envelope ID: 286F8503-9385-49E3-B18D-19FAD5762B4F

A review of Ordinance 2024-08, however, clearly reflects that the Home Depot has permitted uses of *only* C-3. A reliance on the Home Depot zoning being C-5 to permit the car wash is incorrect.

We look forward to attending the hearing to provide our comments in person, and we reserve the right to raise additional matters at the hearing.

Sincerely,

Pump & Munch

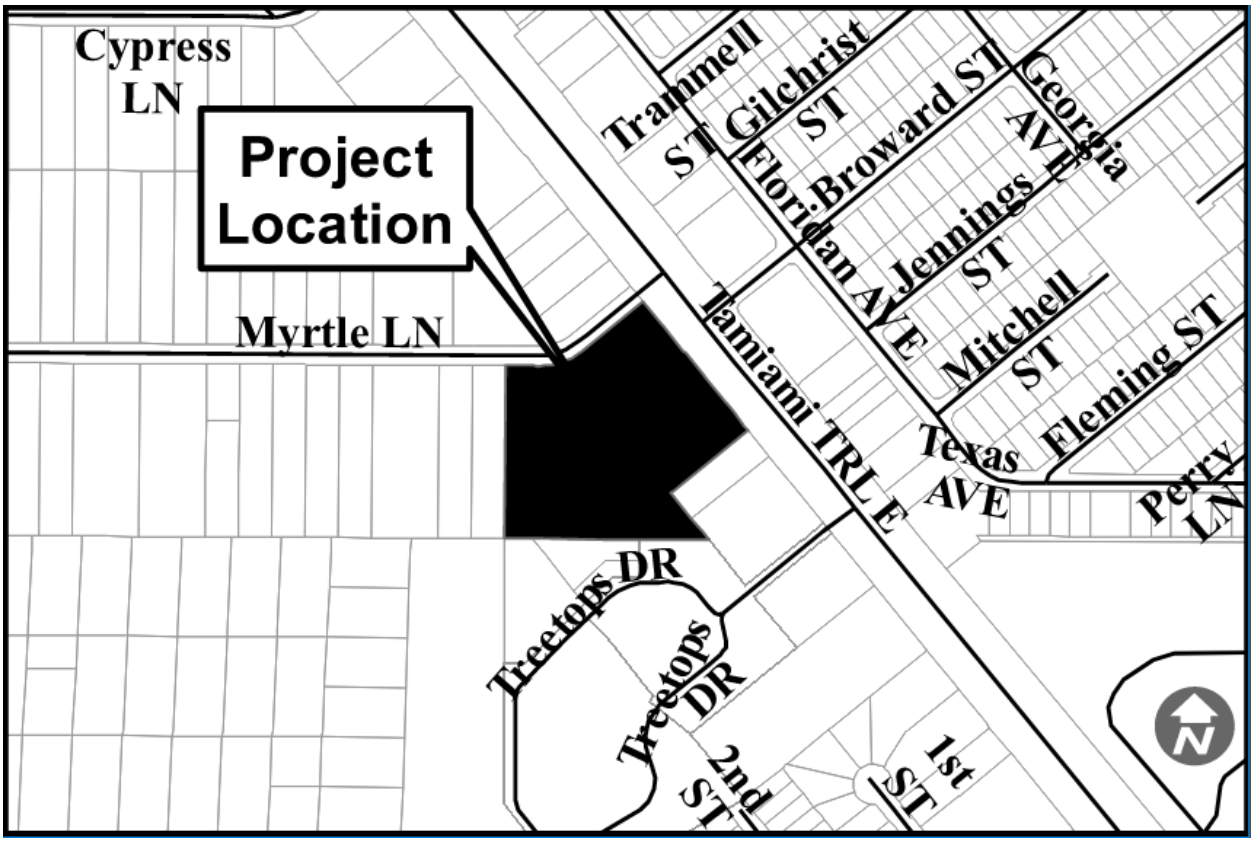
Publication Date: 12/26/2024

Expiration Date: 01/16/2025

Notices.CollierClerk.com



A copy of the proposed Ordinances is on file with the Clerk to the Board and is available for inspection. All interested parties are invited to attend and be heard.

All persons wishing to speak on any agenda item must register with the County Manager prior to presentation of the agenda item to be addressed. Individual speakers will be limited to three (3) minutes on any item. The selection of any individual to speak on behalf of an organization or group is encouraged. If recognized by the Chairman, a spokesperson for a group or organization may be allotted ten (10) minutes to speak on an item. Written materials intended to be considered by the Board shall be submitted to the appropriate County staff a minimum of seven (7) days prior to the public hearing. All materials used in presentations before the Board will become a permanent part of the record.

As part of an ongoing initiative to encourage public involvement, the public will have the opportunity to provide public comments remotely, as well as in person, during this proceeding. Individuals who would like to participate remotely should register through the link provided within the specific event/meeting entry on the Calendar of Events on the County website at www.colliercountyfl.gov/our-county/visitors/calendar-of-events after the agenda is posted on the County website. Registration should be done in advance of the public meeting, or any deadline specified within the public meeting notice. Individuals who register will receive an email in advance of the public hearing detailing how they can participate remotely in this meeting. Remote participation is provided as a courtesy and is at the user's risk. The County is not responsible for technical issues. For additional information about the meeting, please call Geoffrey Willig at 252-8369 or email to Geoffrey.Willig@colliercountyfl.gov.

Any person who decides to appeal any decision of the **Board** will need a record of the proceedings pertaining thereto and therefore, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Division, located at 3335 Tamiami Trail East, Suite 101, Naples, FL 34112-5356, (239) 252-8380, at least two (2) days prior to the meeting. Assisted listening devices for the hearing impaired are available in the Board of County Commissioners Office.

BOARD OF COUNTY COMMISSIONERS
COLLIER COUNTY, FLORIDA

CHAIRMAN

CRYSTAL K. KINZEL,
CLERK OF THE CIRCUIT COURT & COMPTROLLER

By: Jennifer Hansen
Deputy Clerk (SEAL)

Executive Summary

This item requires that ex-parte disclosure be provided by Commission members. Should a hearing be held on this item, all participants are required to be sworn in. Recommendation to approve an Ordinance rezoning property from the Myrtle Woods Commercial Planned Unit Development (CPUD) and RMF-6 zoning districts to a Commercial Planned Unit Development (CPUD) zoning district for a project to be known as 5396 Myrtle Lane Commercial Planned Unit Development (CPUD), to allow development of up to 200,000 square feet of gross floor area of indoor self-storage/warehousing and up to 3,000 square feet of gross floor area of other commercial uses on property located on the southwest quadrant of Tamiami Trail East and Myrtle Lane in Section 29, Township 50 South, Range 26 East, Collier County, Florida consisting of 8.24+/- acres; (Companion to items 9A and 9D)

OBJECTIVE: To have the Board of County Commissioners ("Board") review staff's findings and recommendations along with the recommendations of the Collier County Planning Commission (CCPC) regarding the above referenced petition and render a decision regarding this PUD Rezone (PUDR) petition; and ensure the project is in harmony with all the applicable codes and regulations in order to ensure that the community's interests are maintained.

CONSIDERATIONS: The site consists of four vacant and undeveloped parcels. Three parcels front U.S. 41 (Parcel Nos. 60780920000, 60780960002, and 60781000000) are zoned Myrtle Woods Commercial CPUD by Ordinance 2008-09. The fourth parcel fronts Myrtle Lane (Parcel No. 60780880001) and is zoned Residential Multi-Family – 6 (RMF-6).

The property owner requests to rezone the four parcels totaling ±8.24-acres from Myrtle Woods CPUD and RMF-6 to the 5396 Myrtle Lane CPUD to allow for a U-Haul facility consisting of up to 200,000 square feet of indoor self-storage/warehouse with automotive rental/leasing and outdoor equipment rental/leasing and a maximum of 3,000 square feet of other commercial uses. Exhibit A of the Draft Ordinance (Attachment A) indicates the other proposed commercial uses are those permitted in the C-1, C-2, and C-3 conventional zoning districts.

On February 12, 2008, 7.04 acres of the site were rezoned from Myrtle Woods PUD and C-4 to Myrtle Woods CPUD by Ordinance 2008-09 (provided as Attachment B to this Executive Summary). The 2008 PUD approval permitted the development of 61,000 square feet of commercial uses ranging from retail/office to new vehicle dealers and drive-through restaurants. Warehouse/storage, automotive rental/leasing, and outdoor equipment rental/leasing are not included in the list of currently permitted uses.
Because the proposed uses and intensity are not allowable in the current designation of Urban Coastal Fringe Subdistrict, a companion GMPA petition, PL20230016211, seeks to establish a new subdistrict called 5396 Myrtle Lane Commercial Subdistrict to allow them. An Easement Vacation petition, PL20240005670, is also proposed as a companion item to vacate and relocate a drainage easement on the property.

The subject site is located within the boundaries of the East Naples Community Development Plan (ENCDP), the U.S. 41 East Overlay – Community Center in the Future Land Use Element (FLUE), and on the U.S. 41 East Overlay Map 4 of the Future Land Use Map (FLUM) Series in the Growth Management Plan (GMP). The FLUE overlay allows moderate to low-intensity mixed-use development, commercial development, residential development, hotel/motel uses at a maximum density of 26 units per acre, and certain economic development uses. The Board of County Commissioners (Board) adopted the FLUE overlay in November 2023.

The proposed draft U.S. 41 East Zoning Overlay (U.S. 41 EZO) establishes development standards, design standards, and spacing criteria for commercial uses. The draft zoning overlay has not yet been reviewed or adopted by the Board due to a State legislative preemption prohibiting a county or municipality from adopting more restrictive regulations in their comprehensive plan and Land Development Code (LDC) until October 1, 2026. However, applicants who submit certain land use petitions (rezone, conditional use, GMP amendment) are encouraged to incorporate, where practicable, the proposed standards and spacing criteria contained in the draft zoning overlay.

The ENCDP identifies self-storage warehousing and outdoor storage uses – including equipment storage, etc. – as undesirable uses and discourages the development of these heavy commercial uses along the U.S. 41 East corridor. However, the proposed draft U.S. 41 EZO recognizes private property rights and the desire of property owners to

develop their commercial property. Therefore, the draft zoning overlay includes specific criteria for developing these commercial land uses, including a distance separation from a like use (1/4 mile), providing enhanced buffering with native canopy trees along the roadway frontage and adjacent lots, increasing setbacks from adjacent property lines, limiting parking in front of the buildings to a maximum of one double loaded drive aisle, and, limiting the height and location of outdoor storage to the rear and side yards of the property.

Because the proposed truck and trailer display along the U.S. 41 corridor and residentially oriented Myrtle Lane, is a significant departure from the uses that are contemplated in the U.S. 41 East Overlay – Community Center (moderate to low-intensity mixed-use development, commercial development, residential development, hotel/motel uses at a maximum density of 26 units per acre, and certain economic development uses), and the proposed truck and trailer display and loading zone oriented toward Myrtle Lane warrants measures to protect residents from undesirable views, lighting, noise, or other adverse off-site influences, staff recommended that the trees in the West buffer shall be canopy trees only and understory trees shall not be substituted for canopy trees; and that the buffer along U.S. 41 and Myrtle Lane shall be a Type B buffer and trees shall be hardwoods only. During the CCPC hearing, the petitioner agreed to several conditions recommended by the CCPC, including providing a Type B buffer along Myrtle Lane, which is reflected in the Ordinance attached to this Executive Summary.

No deviations from the Land Development Code (LDC) are proposed.

COLLIER COUNTY PLANNING COMMISSION (CCPC) RECOMMENDATION: The CCPC heard Petition PUDR-PL20230016212, 5396 Myrtle Lane CPUD, on November 21, 2024. Some CCPC members questioned if the proposed changes are an intensification of use and development potential, given the current zoning allows new vehicle dealerships. Staff explained that self-storage is classified as a heavy commercial use because it is only permitted in the C-5 district. However, the change of use is not elevating intensity by other measures, such as the low rate of vehicle trip generation by a self-storage facility. Much discussion centered on the site's proposed access point along Myrtle Lane, and the CCPC consensus was to recommend that the access point be thoroughly evaluated by staff at the time of Site Development Plan permitting and decisions about whether to construct it and how to design it would be determined based on safety considerations at that time.

Seven members of the public spoke in opposition to the PUD Rezone request. Concerns related to safety, increased traffic, inexperienced drivers of U-Haul vehicles accessing Myrtle Lane, incompatibility with single-family residential character, inconsistency with the vision of the East Naples Community Development Plan, propane distribution near the neighborhood, the proliferation of self-storage facilities in the area, noise, diesel odors, the narrowness of Myrtle Lane, and hazardous conditions for school children who walk across the U.S. 41/Broward Street intersection.

The CCPC members voted 6-1 to recommend approval subject to the following conditions:

- Signage indicating "right turn only for trucks" is required at the Myrtle Lane driveway exiting the site, should that driveway be constructed.
- Cost for traffic signal modifications at the U.S. 41 and Broward Street intersection is the responsibility of the petitioner.
- Outdoor amplified sound, including a public address system, is prohibited.
- A Type B Landscape Buffer shall be provided along Myrtle Lane.
- Minor repairs and truck washing are permitted. Otherwise, vehicle maintenance is prohibited.
- County Transportation staff shall evaluate the proposed access point along Myrtle Lane at the time of Site Development Plan permitting, and decisions about whether it should be constructed and how it should be designed will be determined based on safety considerations at that time.

The dissenting CCPC's position was due to the resident's concerns, and doubts that the project is an asset to the area, and concern with the unchecked spread of storage facilities.

The conditions recommended by the CCPC are included in the Ordinance attached to this summary.

ENVIRONMENTAL ADVISORY COUNCIL (EAC) RECOMMENDATION: This project does not require Environmental Advisory Council (EAC) review, as this project did not meet the EAC scope of land development project reviews as identified in Section 2-1193 of the Collier County Codes of Laws and Ordinances.

FISCAL IMPACT: The rezoning by and of itself will have no fiscal impact on Collier County. There is no guarantee that the project, at build-out, will maximize its authorized level of development. However, if the PUD Rezone is approved, a portion of the land could be developed, and the new development will result in an impact on Collier County public facilities.

The County collects impact fees prior to the issuance of a Certificate of Occupancy to help offset the impact of each new development on public facilities. These impact fees are used to fund projects identified in the Capital Improvement Element of the Growth Management Plan as needed to maintain the adopted Level of Service (LOS) for public facilities. Other fees collected prior to the issuance of a building permit include building permit review fees. Finally, additional revenue is generated by the application of ad valorem tax rates, and that revenue is directly related to the value of the improvements. Please note that impact fees and taxes collected were not included in the criteria used by staff and the Planning Commission to analyze this petition.

GROWTH MANAGEMENT IMPACT: The subject site is designated as: Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict on the Future Land Use Map of the Growth Management Plan (GMP) and in the Coastal High Hazard Area. The Urban Coastal Fringe Subdistrict is intended to provide transitional densities between the Conservation designated area (primarily located to the south of the Subdistrict) and the remainder of the Urban designated area (primarily located to the north of the Subdistrict). An amendment to the GMP is needed to increase the intensity on the property. This PUD Rezoning may only be deemed consistent with the Future Land Use Element (FLUE) of the GMP if the companion GMPA-PL20230016211 is approved and goes into effect and the uses and intensities in this PUD align with those in the GMP Amendment.

Based on the Traffic Impact Statement, the 2022 and 2023 AUIR, State Statute 163.3180, and the Transportation Concurrency Exception Area provisions of the GMP, the subject PUD can be found to be consistent with Policy 5.1 of the Transportation Element of the GMP. The TIS indicates that the adjacent roadway network has sufficient capacity to accommodate this project within the 5-year planning period.

No native vegetation preservation is required, and no native vegetation or listed species are present on-site. Therefore, the petition meets the requirements of the Conservation and Coastal Management Element Policy 6.1.1, Policy 7.1.1, and Section 3.05.07 of the Land Development Code.

This petition cannot be approved unless the companion GMP Amendment is adopted and goes into effect. This petition has an effective date linked to the effective date of the companion GMP Amendment.

LEGAL CONSIDERATIONS: This is a site-specific rezone to a Commercial Planned Unit Development (CPUD) Zoning District for a project which will be known as the Pa5396 Myrtle Lane CPUD. The burden falls upon the applicant to prove that the proposed rezone is consistent with all the criteria set forth below. The burden then shifts to the Board of County Commissioners, should it consider denying the rezone, to determine that such denial would not be arbitrary, discriminatory or unreasonable. This would be accomplished by finding that the proposal does not meet one or more of the listed criteria below.

Should this item be denied, Florida Statutes section 125.022(3) requires the County to provide written notice to the applicant citing applicable portions of an ordinance, rule, statute, or other legal authority for the denial.

Criteria for PUD Rezones

Ask yourself the following questions. The answers assist you in making a determination for approval or not.

1. **Consider:** The suitability of the area for the type and pattern of development proposed in relation to physical characteristics of the land, surrounding areas, traffic and access, drainage, sewer, water, and other utilities.

2. Is there an adequacy of evidence of unified control and suitability of agreements, contract, or other instruments or for amendments in those proposed, particularly as they may relate to arrangements or provisions to be made for the continuing operation and maintenance of such areas and facilities that are *not* to be provided or maintained at public expense? *Findings and recommendations of this type shall be made only after consultation with the County Attorney.*

3**.** **Consider:** Conformity of the proposed CPUD with the goals, objectives and policies of the Growth Management Plan.

4**.** **Consider:** The internal and external compatibility of proposed uses, which conditions may include restrictions on location of improvements, restrictions on design, and buffering and screening requirements.

5. Is there an adequacy of usable open space areas in existence and as proposed to serve the development?

6**.** **Consider:** The timing or sequence of development (as proposed) for the purpose of assuring the adequacy of available improvements and facilities, both public and private.

7. **Consider:** The ability of the subject property and of surrounding areas to accommodate expansion.

8**.** **Consider:** Conformity with CPUD regulations, or as to desirable modifications of such regulations in the particular case, based on a determination that such modifications are justified as meeting public purposes to a degree at least equivalent to literal application of such regulations.

9. Will the proposed change be consistent with the goals, objectives, and policies and future land use map and the elements of the Growth Management Plan?

10. Will the proposed CPUD Rezone be appropriate considering the existing land use pattern?

11. Would the requested CPUD Rezone result in the possible creation of an isolated district unrelated to adjacent and nearby districts?

12**.** **Consider:** Whether existing district boundaries are illogically drawn in relation to existing conditions on the property proposed for change.

13**.** **Consider:** Whether changed or changing conditions make the passage of the proposed amendment necessary.

14. Will the proposed change adversely influence living conditions in the neighborhood?

15. Will the proposed change create or excessively increase traffic congestion or create types of traffic deemed incompatible with surrounding land uses because of peak volumes or projected types of vehicular traffic, including activity during construction phases of the development, *or otherwise affect public safety*?

16. Will the proposed change create a drainage problem?

17. Will the proposed change seriously reduce light and air to adjacent areas?

18. Will the proposed change adversely affect property values in the adjacent area?

19. Will the proposed change be a deterrent to the improvement or development of adjacent property in accordance with existing regulations?

20**.** **Consider:** Whether the proposed change will constitute *a grant of special privilege* to an individual owner as contrasted with the public's welfare.

21. Are there substantial reasons why the property cannot ("reasonably") be used in accordance with existing zoning? (a "core" question…)

22. Is the change suggested out of scale with the needs of the neighborhood or the county?

23. **Consider:** Whether it is impossible to find other adequate sites in the county for the proposed use in districts already permitting such use.

24. **Consider:** The physical characteristics of the property and the degree of site alteration which would be required to make the property usable for any of the range of potential uses under the proposed zoning classification.

25. **Consider:** The impact of development resulting from the proposed CPUD rezone *on the availability of adequate public facilities and services* consistent with the levels of service adopted in the Collier County Growth Management Plan and as defined and implemented through the Collier County Adequate Public Facilities Ordinance [Code ch.106, art.II], as amended.

26. Are there other factors, standards, or criteria relating to the CPUD rezone request that the Board of County Commissioners shall deem important in the protection of public health, safety, and welfare?

The Board must base its decision upon the competent, substantial evidence presented by the written materials supplied to it, including but not limited to the Staff Report, Executive Summary, maps, studies, letters from interested persons, and the oral testimony presented at the BCC hearing as these items relate to these criteria. The proposed Ordinance was prepared by the County Attorney's Office. This item has been approved as to form and legality, and requires an affirmative vote of four for Board approval. – HFAC

RECOMMENDATIONS: To approve Petition PUDR-PL20230016212, subject to approval of the companion GMPA with an effective date linked to the effective date of the companion GMPA petition.

Collier County

STAFF REPORT

TO: COLLIER COUNTY PLANNING COMMISSION

FROM: ZONING DIVISION – ZONING SERVICES SECTION
GROWTH MANAGEMENT COMMUNITY DEVELOPMENT DEPARTMENT

HEARING DATE: NOVEMBER 21, 2024

SUBJECT: PL20230016212; 5396 MYRTLE LANE CPUD
(Companion to GMPA-PL20230016211)

Owner:
KC Naples Tamiami LLC
101 N. Wacker Dr. #611
Chicago, IL 60606

Applicant:
Metropolitan Naples, LLC
1500 Fifth Ave. S., Suite 106
Naples, FL 34102

Agents:
D. Wayne Arnold, AICP
Q. Grady Minor & Associates, P.A.
3800 Via Del Rey
Bonita Spring, FL 34134

Richard D. Yovanovich, Esq
Coleman, Yovanovich & Koester, P.A.
4001 Tamiami Trail N, Suite 300
Naples, FL 34103

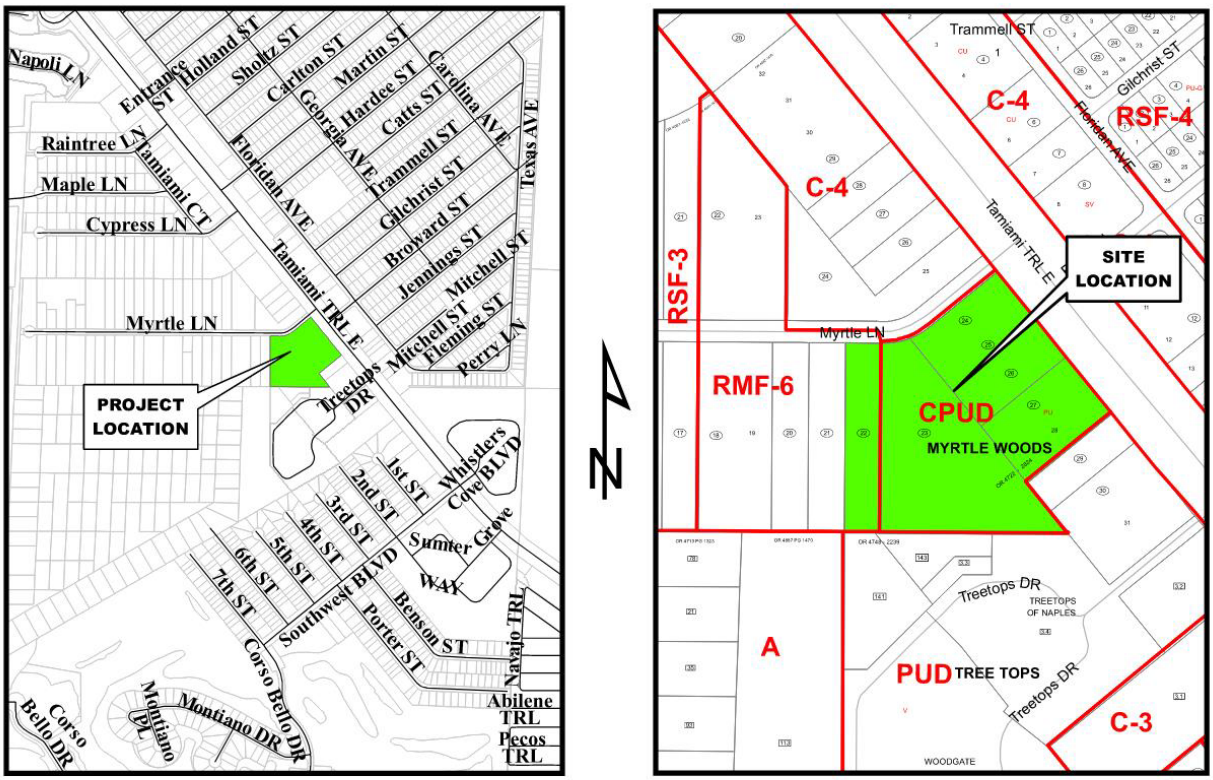
REQUESTED ACTION:

The petitioner requests that the Collier County Planning Commission (CCPC) consider a rezone of ±8.24 acres from the Myrtle Woods Commercial Planned Unit Development (CPUD) and the Residential Multi-Family – 6 (RMF-6) zoning districts to the 5396 Myrtle Lane Commercial Planned Unit Development (CPUD) zoning district to allow development of up to 200,000 square feet gross floor area of indoor self-storage/warehouse with automotive rental and leasing and outdoor equipment rental and leasing and a maximum of 3,000 square feet of gross floor area of other commercial uses.

A companion Growth Management Plan Amendment (GMPA-PL20230016211) is requested to establish a new subdistrict called 5396 Myrtle Lane Commercial Subdistrict on land currently designated Urban Designation, Mixed Use District, Urban Coastal Fringe to allow the proposed uses and intensities.

GEOGRAPHIC LOCATION:

The subject property is located on the southwest quadrant of Tamiami Trail East and Myrtle Lane in Section 29, Township 50 South, Range 26 East, Collier County, Florida. *(See location map on following page)*



Petition Number: PL20230016212

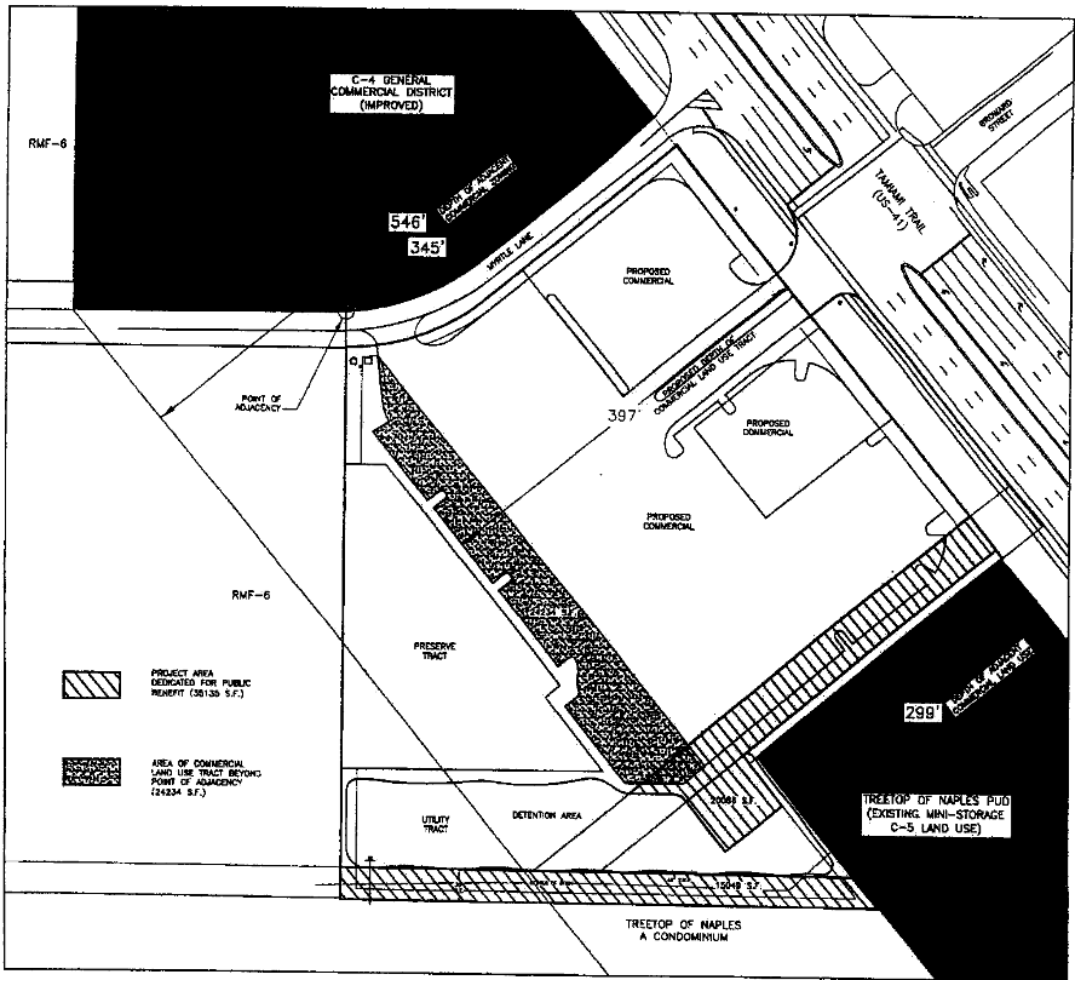
PURPOSE AND DESCRIPTION OF PROJECT:

The site consists of four parcels that are vacant and undeveloped. Three parcels front U.S. 41 (Parcel Nos. 60780920000, 60780960002, and 60781000000); these are zoned Myrtle Woods Commercial CPUD by Ordinance 2008-09. The fourth parcel fronts on Myrtle Lane (Parcel No. 60780880001) and is zoned Residential Multi-Family – 6 (RMF-6).

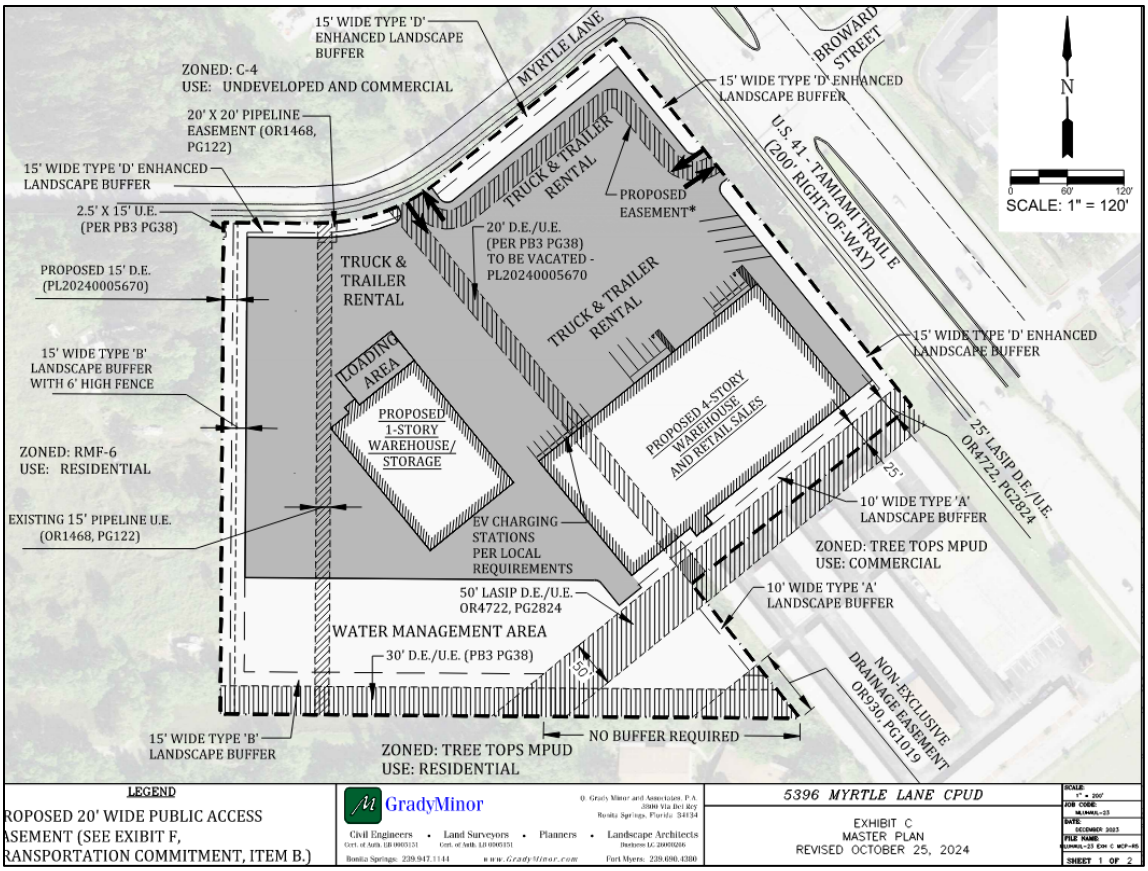
The property owner requests to rezone the four parcels totaling ±8.24-acres from Myrtle Woods CPUD and RMF-6 to the 5396 Myrtle Lane CPUD to allow for a U-Haul facility consisting of up to 200,000 square feet of indoor self-storage/warehouse with automotive rental/leasing and outdoor equipment rental/leasing, and a maximum of 3,000 square feet of other commercial uses. Exhibit A of the Draft Ordinance (Attachment A) indicates the other proposed commercial uses are those permitted in the C-1, C-2, and C-3 conventional zoning districts.

Approximately 5.66 acres of the subject site were zoned Myrtle Woods PUD by Ordinance 81-23, approved on May 5, 1981, which permitted 45 residential units and commercial uses ranging from retailers to new car dealerships, shopping centers, and vehicle rental. This PUD was *repealed* on February 12, 2008, when 7.04 acres were rezoned from Myrtle Woods PUD and C-4 to Myrtle Woods CPUD by Ordinance 2008-09 (Attachment B), which permits the development of 61,000 square feet of commercial uses ranging from retail/office to new vehicle dealers and drive through restaurants. Warehouse/storage, automotive rental/leasing, and outdoor equipment rental/leasing are not included in the list of currently permitted uses.

The top exhibit below shows the arrangement of commercial uses, preserve area, and access currently approved for the Myrtle Woods CPUD per Ordinance 08-09, followed by the proposed Master Plan.



Master Plan Exhibit titled "Infill Commercial Exhibit 1" from Myrtle Woods CPUD (See Attachment B for Ordinance 08-09)



Proposed Master Plan for 5396 Myrtle Lane CPUD (See Attachment A for Draft Ordinance)

Per Ordinance 08-09 for the Myrtle Woods CPUD, the approved maximum zoned building height is three stories/50 feet or 75 feet maximum actual height, including architectural appurtenances. The current Ordinance contains Transportation Commitment K in Exhibit F, List of Developer Commitments, requiring a public access easement from Myrtle Lane to the signalized intersection of US 41 and Broward Street. Exhibit F also includes Water Management Commitment B to dedicate a 50-foot-wide drainage and utility easement and Utilities Commitment D to dedicate a 60-foot by 70-foot well site easement and associated utilities and access easement. The Stormwater and Utility requirements have been reviewed as part of the proposed PUD rezoning and Easement Vacation petition, PL20240005670, which is currently under review to vacate and relocate a drainage easement on the property.

The proposed PUD rezoning adds indoor self-storage/warehouse with automotive rental/leasing and outdoor equipment rental/leasing as permitted uses. A total of 17 uses are prohibited, including the seven prohibited uses listed in Ordinance 08-09. Maximum heights are proposed to be 50 feet (zoned) and 60 feet (actual), which is consistent with the current PUD. Transportation Commitment B in Exhibit F, List of Development Commitments, includes the requirement for a public access easement that connects vehicles from Myrtle Lane to the US 41/Broward Street intersection; the final location will be coordinated with the County Transportation Planning staff.

The companion GMPA petition (PL20230016211) seeks to establish a new subdistrict called 5396 Myrtle Lane Commercial Subdistrict on land currently designated Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict, which would support the proposed uses and intensities. The site is within the boundaries of the East Naples Community Development Plan (ENCDP), which is discussed in more detail in the GMP Consistency section on pages 6-7 of this report.

No deviations are requested.

[Remainder of this page is intentionally blank.]

SURROUNDING LAND USE AND ZONING:

This section of the staff report identifies the land uses, zoning classifications, and maximum approved densities for properties surrounding the subject site. The subject site is zoned Myrtle Woods Commercial Planned Unit Development (CPUD) District and Residential Multi-Family – 6 (RMF-6) District and is vacant and undeveloped.

North: To the north across Myrtle Lane is vacant land and a florist shop zoned General Commercial District (C-4)

East: Immediately east of the property is CubeSmart mini storage zoned Treetops of Naples MPUD (Ord 80-91), and across Tamiami Trail is the Green Store, a carwash, and a laundromat zoned General Commercial District (C-4)

South: Immediately south is multi-family residential zoned Treetops of Naples MPUD (Ord 80-91).

West: West of the property is single-family residential zoned Residential Multi-Family – 6 (RMF-6)

GROWTH MANAGEMENT PLAN (GMP) CONSISTENCY:

Future Land Use Element (FLUE): The subject site is designated as: Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict on the Future Land Use Map of the Growth Management Plan (GMP) and in the Coastal High Hazard Area. The Urban Coastal Fringe Subdistrict is intended to provide transitional densities between the Conservation designated area (primarily located to the south of the Subdistrict) and the remainder of the Urban designated area (primarily located to the north of the Subdistrict).

An amendment to the GMP is needed to increase the intensity on the property. This PUD Rezoning may only be deemed consistent with the Future Land Use Element (FLUE) of the GMP if the companion GMPA-PL20230016211 is approved and goes into effect and the uses and intensities in this PUD align with those in the GMPA.

The subject site is located within the boundaries of the East Naples Community Development Plan (ENCDP), the US 41 East Overlay – Community Center in the Future Land Use Element (FLUE), and on the US 41 East Overlay Map 4 of the Future Land Use Map (FLUM) Series in the Growth Management Plan (GMP), and, within the proposed *draft* US 41 East Zoning Overlay (US 41 EZO).

The community developed the ENCDP through a series of public meetings and surveys, and it reflects the overall vision of the community; the Board of County Commissioners accepted the ENCDP in October 2020. The ENCDP promotes the strategic placement of land uses to enhance the community's sense of place and provides guidance for future development and redevelopment for employment, leisure, dining, and shopping opportunities to meet the growing needs of the community. The community worked with County staff and a consultant to develop a FLUE overlay and a zoning overlay for the US 41 East corridor to implement the ENCDP for that area. The FLUE overlay allows moderate to low-intensity mixed-use development, commercial development, residential development, hotel/motel uses at a maximum density of 26 units per acre, and certain economic development uses; the Board of County Commissioners (BCC) adopted the FLUE overlay in November 2023. The site's designation within a Community Center is intended to allow moderate to low-intensity mixed-use development, commercial, residential development, hotel/motel at a maximum density of 26 units per acre, and certain economic development uses.

The proposed *draft* zoning overlay establishes development standards, design standards, and spacing criteria for commercial uses. The *draft* zoning overlay has not yet been reviewed or adopted by the BCC due to a State legislative preemption prohibiting a county or municipality from adopting more restrictive regulations in their comprehensive plan and Land Development Code (LDC) until Oct. 1, 2026. However, applicants who submit certain land use petitions (rezone, conditional use, GMP amendment) are encouraged to incorporate, where practicable, the proposed standards and spacing criteria contained in the *draft* zoning overlay.

The ENCDP identifies self-storage warehousing and outdoor storage uses – including equipment storage, etc. – as undesirable uses and discourages the development of these heavy commercial uses along the US 41 East corridor. However, the proposed *draft* US 41 EZO recognizes private property rights and the desire of property owners to develop their commercial property. Therefore,

the *draft* zoning overlay includes specific criteria for developing these commercial land uses, including a distance separation from a like use (1/4 mile), providing enhanced buffering with native canopy trees along the roadway frontage and adjacent lots, increasing setbacks from adjacent property lines, limiting parking in front of the buildings to a maximum of one double loaded drive aisle, and, limiting the height and location of outdoor storage to the rear and side yards of the property.

Relevant to this petition, the petitioner has not committed to providing a separation of a quarter mile from any existing self-storage and/or outdoor storage facility nor limiting outdoor storage/display to the rear and side yards of lots/parcels. The petitioner has arranged the site so that customer parking along US 41 does not exceed one double-loaded drive aisle, although trucks and trailers for rent will be displayed along US 41 and Myrtle Lane to a greater degree. The petitioner has committed to enhancing the buffers along US 41 and Myrtle Lane by having the required canopy trees a minimum of 14 feet tall at the time of planting and palm tree clusters of staggered heights between the canopy trees; additionally, the right-of-way canopy trees will be native, and palms may not be substituted, which is consistent with the proposed *draft* US 41 East zoning overlay.

Because the proposed truck and trailer display along the US 41 corridor and along residentially oriented Myrtle Lane is a significant departure from the uses that are contemplated in the US 41 East Overlay – Community Center (moderate to low-intensity mixed-use development, commercial development, residential development, hotel/motel uses at a maximum density of 26 units per acre, and certain economic development uses), and the proposed truck and trailer display and loading zone oriented toward Myrtle Lane warrants measures to protect residents from undesirable views, lighting, noise, or other adverse off-site influences, staff's recommendation is to further enhance the buffering to include:

- ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

- ***The buffer along US 41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

Transportation Element: In evaluating this project, staff reviewed the applicant's August 20, 2024, Traffic Impact Statement for consistency with Policy 5.1 of the Transportation Element of the Growth Management Plan (GMP) using the 2022 and 2023 Annual Update and Inventory Reports (AUIR).

Policy 5.1 of the Transportation Element of the GMP states:

> *"The County Commission shall review all rezone petitions, SRA designation applications, conditional use petitions, and proposed amendments to the Future Land Use Element (FLUE) affecting the overall countywide density or intensity of permissible development, with consideration of their impact on the overall County transportation system, and shall not approve any petition or application that would directly access a deficient roadway segment as identified in the current AUIR or if it impacts an adjacent roadway segment*

that is deficient as identified in the current AUIR, or which significantly impacts a roadway segment or adjacent roadway segment that is currently operating and/or is projected to operate below an adopted Level of Service Standard within the five year AUIR planning period, unless specific mitigating stipulations are also approved. A petition or application has significant impacts if the traffic impact statement reveals that any of the following occur:

a. For links (roadway segments) directly accessed by the project where project traffic is equal to or exceeds 2% of the adopted LOS standard service volume;
b. For links adjacent to links directly accessed by the project where project traffic is equal to or exceeds 2% of the adopted LOS standard service volume; and
c. For all other links the project traffic is considered to be significant up to the point where it is equal to or exceeds 3% of the adopted LOS standard service volume.

Mitigating stipulations shall be based upon a mitigation plan prepared by the applicant and submitted as part of the traffic impact statement that addresses the project's significant impacts on all roadways."

Staff Findings: According to the Traffic Impact Study (TIS) provided with this petition, the proposed development will generate a projected total of +/- 62 PM peak hour, 2-way trips on the adjacent roadway segments of Tamiami Trail East (US-41). This represents a reduction of (- 176) PM peak hour, 2-way trips on the roadways from the previously allowed 61,000 square foot shopping center. The trips generated by this development will occur on the following adjacent roadway link:

Link/Roadway	Link	Current Peak Hour Peak Direction Volume/Peak Direction	Projected P.M. Peak Hour/Peak Direction Project Trips (1)	2022 AUIR LOS/ Remaining Capacity	2023 AUIR LOS/ Remaining Capacity
93.0/Tamiami Trail East (US-41)	Rattlesnake Hammock Rd to Triangle Blvd	3,000/East	29/East	D/ 280 (2)	D/ 307 (2)

(1) Source for P.M. Peak Hour/Peak Direction Project Traffic is from the August 20, 2024 Traffic Impact Statement provided by the petitioner.
(2) Expected Deficiency due to Trip Bank not caused by this proposed development (see State Statute 163.3180). Additionally, this development is located in the recently expanded Traffic Congestion Exception Area (TCEA). This development also shows a net reduction in the number of potential trips on the network of (-176) PM peak hour trips compared to the currently allowed commercial uses for this PUD.

Provisions of Florida Statute 163.3180

- Must allow an applicant to enter into a binding agreement to pay or construct their proportionate fair share.
- Facilities determined to be deficient with existing, committed, and vested trips plus projected background traffic from any source other than the development shall be removed from the proportionate share calculation.

- The improvement necessary to correct this type of deficiency is the funding responsibility of the maintaining entity.
- Applicant must receive a credit for the anticipated road impact fees.
- The expected and existing deficiencies are not caused by this proposed development.

Based on the TIS, the 2022 and 2023 AUIR, State Statute 163.3180, and the TCEA provisions of the GMP, the subject PUD can be found to be consistent with Policy 5.1 of the Transportation Element of the Growth Management Plan. The Traffic Impact Statement (TIS) indicates that the adjacent roadway network has sufficient capacity to accommodate this project within the 5-year planning period.

Conservation and Coastal Management Element (CCME): The petition, as proposed, will not affect the requirements of the GMP's Conservation and Coastal Management Element (CCME). No preservation is required, and no native vegetation or listed species are present on-site. Therefore, the petition meets the requirements of CCME Policy 6.1.1, Policy 7.1.1, and Section 3.05.07 of the LDC. Environmental Services staff recommends approval.

GMP Conclusion: This PUD Rezoning may only be deemed consistent with the Future Land Use Element (FLUE) of the Growth Management Plan if the companion GMPA-PL20230016211 is approved and goes into effect and the uses and intensities in this PUD align with those in the GMPA.

STAFF ANALYSIS:

Staff has completed a comprehensive evaluation of this petition, including the criteria upon which a recommendation must be based, specifically noted in LDC Section 10.02.13.B.5, Planning Commission Recommendation (referred to as the "PUD Findings"), and Section 10.02.08.F, Nature of Requirements of Planning Commission Report (referred to as "Rezone Findings"), which establish the legal basis to support the CCPC's recommendation. The CCPC uses the aforementioned criteria as the basis for its recommendation to the Board, who in turn use the criteria to support their action on the rezoning or amendment request. An evaluation relative to these subsections is discussed below under the heading " Zoning Review." In addition, staff offers the following analyses:

Environmental Review: Environmental Planning staff has reviewed the petition for compliance with the GMP and the LDC and recommends approval.

Environmental Services staff has reviewed the petition to address environmental concerns. The existing site conditions were field verified by staff during the review of the PUD rezoning petition. This is the location of the Myrtle Woods PUD, which was originally approved in 1981 and amended to its current uses by Ordinance 08-09. Ordinance 08-09 had a .98 acre preserve tract; however, a site inspection by ES staff revealed that the property is dominated by invasive exotic vegetation. The Master Plan does not show a preserve since no minimum preservation is required; additionally, no listed animal species were observed on the property.

This project does not require an Environmental Advisory Council (EAC) review, as this project did not meet the EAC scope of land development project reviews as identified in Section 2-1193 of the Collier County Codes of Laws and Ordinances. Environmental Services staff recommend approval of the proposed petition.

Transportation Review: The Transportation Planning staff has reviewed the petition for compliance with the GMP and the LDC. All work in the right-of-way requires a right-of-way permit, and all construction plans for the improvements associated with access require County or FDOT approval, as appropriate. As part of the US 41/Broward Street intersection improvements associated with this project, a crosswalk from the sidewalk at the PUD project entrance on US 41 to the sidewalk on Broward Street will provide pedestrian access to the existing CAT bus stop on Broward Street. Transportation Planning Staff recommends approval.

Utility Review: The project lies within the regional potable water service area and the South wastewater service area of the Collier County Water-Sewer District (CCWSD). Water and wastewater services are available via existing infrastructure within the adjacent right-of-way. Sufficient water and wastewater treatment capacities are available.

Any improvements to the CCWSD's water or wastewater systems necessary to provide sufficient capacity to serve the project will be the responsibility of the owner/developer and will be conveyed to the CCWSD at no cost to the County at the time of utility acceptance.

Landscape Review: In an effort to be consistent with buffer standards for pending petition PL20220005137, 11760 Tamiami Trail East Rezone, which were based on public input related to the ENCDP, staff recommends approval subject to the following conditions:

- ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

- ***The buffer along US 41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

These conditions will particularly help screen views of the truck and trailer rental and loading that faces Myrtle Lane to the west of the Myrtle Lane access point.

Zoning Review: Zoning staff has evaluated the proposed uses, intensity, and compatibility.

The land use pattern in the local area contains a mix of residential and commercial uses. The current zoning of the property is RMF-6, which allows residential up to 6 dwelling units per acre, and Myrtle Woods CPUD, which is permitted for up to 61,000 square feet of commercial use.

The PUDR request is an intensification of use with the addition of three primary permitted uses, two of which are only permitted in the C-5 zoning district, as displayed below.

Proposed Permitted Use	Myrtle Woods CPUD (Ord. 08-09)	C-4 General Commercial	C-5 Heavy Commercial
Automotive rental and leasing, only vehicles for which a commercial driver's license is not required (7513, 7519 only trailer and utility trailer rental).	N/A	Conditional Use	Permitted
Outdoor equipment rental and leasing (no construction equipment may be leased or rented) (7359, including only truck and tool rental and leasing. No vehicle rentals are permitted, which require a commercial driver's license)	N/A	Permitted	Permitted
Indoor storage, including cube storage and moving supplies sales (4225 and 4226, including only household goods and furniture storage)	N/A	Conditional Use	Permitted

The PUDR request represents an intensification of over three times the currently approved building area, allowing up to 200,000 gross square feet of indoor self-storage/warehouse and a maximum of 3,000 gross square feet of other commercial uses. The Master Plan is reconfigured with more of the site designated for buildings and parking; no preserve area is required.

The proposed development standards are generally consistent with the C-4 General Commercial zoning district dimensional standards of LDC Section 4.02.01. The building heights proposed for the four-story warehouse building and one-story warehouse/storage building are 50 feet maximum zoned height and 60 feet maximum actual height; this aligns with the current PUD maximum zoned building height of 3 stories/50 feet or 75 feet maximum actual height including architectural appurtenances. The proposed maximum heights are less than the maximum zoned height of 75 feet, which applies to the conventional zoning district that predominates the corridor (C-4).

LDC Section 4.07.02.B. requires that development within a PUD district shall be compatible with established or planned uses of surrounding neighborhoods and property. This section states that fences, walls, or vegetative screening at the boundaries of PUD districts shall be provided, at a minimum, in accordance with the landscaping/buffering requirements of section 4.06.00 to protect residents from undesirable views, lighting, noise, or other adverse off-site influences, or to protect residents of adjoining districts from similar possible influences from within the PUD district. LDC Section 4.07.02 B.4 requires that PUDs with off-street parking areas for five or more cars, service areas for loading or unloading vehicles other than passengers, and areas for storage and collection of trash and garbage shall be screened.

While the existing and permitted land uses along the six-lane arterial corridor of US 41 are generally commercial and auto-oriented uses associated with the C-4 zoning district, the character along Myrtle Lane is that of an established low-density residential neighborhood. The impact of introducing higher intensity uses and square footage at the Myrtle Lane/US 41 intersection should be mitigated in recognition of the lower intensity residential area to the west by minimizing the

degree of incompatible size, scale, noise, views, and traffic associated with the development in relation to the Myrtle Lane neighborhood.

The current Myrtle Woods Ordinance 08-09 contains Transportation Commitment K in Exhibit F, List of Developer Commitments, requiring a public access easement from Myrtle Lane to the signalized intersection of US 41 and Broward Street.

Aspects of the proposed PUD that help minimize the degree of incompatibility include:

- A total of 17 uses are prohibited, including the seven prohibited uses listed in Ordinance 08-09.
- The proposed maximum 50 feet-zoned height and 60 feet actual height align with the current PUD maximum zoned building height of 3 stories/50 feet or 75 feet maximum actual height, including architectural appurtenances. The proposed maximum heights are less than the maximum zoned height of 75 feet, which applies to the conventional zoning district that predominates the corridor (C-4).
- Landscaping Commitment A in Exhibit F, List of Development Commitments, includes that buffers will be enhanced along US 41 and Myrtle Lane with required canopy trees a minimum of 14 feet tall at the time of planting and palm tree clusters of staggered heights between the canopy trees; additionally, the right-of-way canopy trees will be native, and palms may not be substituted.
- Transportation Commitment B in Exhibit F, List of Development Commitments, includes the requirement for a public access easement that connects vehicles from Myrtle Lane to the US 41/Broward Street intersection; the final location will be coordinated with the County Transportation Planning staff.
- Planning Commitment A in Exhibit F, List of Development Commitments, includes specifications for parking lot lighting to be dark sky compliant and light levels limited to no more than 0.2-ft-candles along the joint property line adjacent to residential property.

The following additional measures to help minimize the degree of incompatibility and adverse off-site influences are recommended as conditions of approval:

- ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

- ***The buffer along US41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

PUD and Rezoning Findings summarized below offer conclusions of zoning services review.

PUD FINDINGS:

LDC Section 10.02.13.B.5 states that, "In support of its recommendation, the CCPC shall make findings as to the PUD Master Plan's compliance with the following criteria in addition to the findings in LDC Section 10.02.08." (Zoning Division staff responses in non-bold).

1. ***The suitability of the area for the type and pattern of development proposed in relation to physical characteristics of the land, surrounding areas, traffic and access, drainage, sewer, water, and other utilities.***

   The site is along the US 41 corridor, a six-lane arterial roadway developed with a mix of commercial and auto-oriented uses. The proposed uses are generally consistent with the conditions along the corridor, namely, the Cube Smart self-storage facility adjoining the site to the southeast; however, the proposed intensity contrasts with the adjoining low-density residential character along Myrtle Lane and the Treetops multifamily neighborhood to the southwest. The proposed intensity will only be allowable if the companion GMPA-PL20230016211 is approved and becomes effective.

   Stormwater and Utility requirements have been reviewed as part of the proposed PUD rezoning, and the Easement Vacation petition PL20240005670 is in the process of vacating and relocating a drainage easement on the property. A water main is available along Myrtle Lane, and a wastewater main is also available along Myrtle Lane. There are adequate water and wastewater treatment capacities to serve the project. Any improvements to the CCWSD's water or wastewater systems necessary to provide sufficient capacity to serve the project will be the responsibility of the owner/developer and will be conveyed to the CCWSD at no cost to the County at the time of utility acceptance.

   Site access is proposed to align with the US 41/Broward Street signalized intersection, and the most intense uses are oriented toward the six-lane arterial corridor. A second access point is located along Myrtle Lane, and connectivity is proposed to enhance the public's turning movement options and safety between Myrtle Lane and the signalized intersection.

   The arrangement of the site, including truck and trailer rental and loading that faces Myrtle Lane to the west of the Myrtle Lane access point, is contrary to the residential development pattern along Myrtle Lane and should only be allowed if fully screened from view along the Lane and along the residentially zoned property to the west. Staff recommends two conditions of approval related to landscaping:

   - ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

   - ***The buffer along US41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

2. ***Adequacy of evidence of unified control and suitability of any proposed agreements, contracts, or other instruments or for amendments in those proposed, particularly as they***

may relate to arrangements or provisions to be made for the continuing operation and maintenance of such areas and facilities that are not to be provided or maintained at public expense.

Documents to demonstrate unified control were submitted with the petitioner and were reviewed by the County Attorney's Office.

3. ***Conformity of the proposed Planned Unit Development with the goals, objectives, and policies of the [GMP].***

Comprehensive Planning staff reviewed the petition and analyzed it for consistency with the GMP's goals, objectives, and policies. The subject site is located within the boundaries of the East Naples Community Development Plan (ENCDP), the US 41 East Overlay – Community Center in the Future Land Use Element (FLUE), and on the US 41 East Overlay Map 4 of the Future Land Use Map (FLUM) Series in the GMP. The site is also in the Coastal High Hazard Area. Staff finds that the proposed amendment will be consistent with the GMP upon adoption and effectiveness of the companion GMPA-PL20230016211 to designate the site 5396 Myrtle Lane Commercial Subdistrict.

4. ***The internal and external compatibility of proposed uses, which conditions may include restrictions on location of improvements, restrictions on design, and buffering and screening requirements.***

While the existing and permitted land uses along the six-lane arterial corridor of US 41 are generally commercial and auto-oriented uses associated with the C-4 zoning district, the character along Myrtle Lane is that of an established low-density residential neighborhood. The impact of introducing higher intensity uses and square footage at the Myrtle Lane/US 41 intersection should be mitigated relative to the lower intensity residential area to the west by minimizing the degree of incompatible size, scale, noise, views, and traffic associated with the development in relation to the Myrtle Lane neighborhood. Staff recommends the following conditions:

- ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

- ***The buffer along US 41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

5. ***The adequacy of usable open space areas in existence and as proposed to serve the development.***

For Commercial PUDs, thirty percent of the gross area shall be devoted to usable open space according to LDC Section 4.07.02. G.2. The PUD Master Plan indicates compliance with this standard, with 30% designated for open space.

6. ***The timing or sequence of development for the purpose of assuring the adequacy of available improvements and facilities, both public and private.***

A water main is available along Myrtle Lane, and a wastewater main is also available along Myrtle Lane. There are adequate water and wastewater treatment capacities to serve the project. Any improvements to the CCWSD's water or wastewater systems necessary to provide sufficient capacity to serve the project will be the responsibility of the owner/developer and will be conveyed to the CCWSD at no cost to the County at the time of utility acceptance.

As noted in the Transportation Element consistency review, the roadway infrastructure has adequate capacity to serve the proposed project. Operational impacts will be addressed at the first development order Site Development Plan (SDP) or Plat, at which time a new TIS will be required to demonstrate turning movements for all site access points. The development must comply with all other applicable concurrency management regulations when development approvals, including but not limited to any plats and or site development plans, are sought.

7. ***The ability of the subject property and of surrounding areas to accommodate expansion.*** A maximum of 200,000 gross square feet of indoor self-storage/warehouse and a maximum of 3,000 gross square feet of other commercial uses are proposed. Expansion to the north is limited by Myrtle Lane, to the east by US 41 and the existing self-storage facility, and to the south by an existing residential multi-family development.

8. ***Conformity with PUD regulations, or as to desirable modifications of such regulations in the particular case, based on determination that such modifications are justified as meeting public purposes to a degree at least equivalent to literal application of such regulations.***

   No deviations are requested.

REZONE FINDINGS:

LDC Subsection 10.02.08 F. states, "When pertaining to the rezoning of land, the report and recommendations to the planning commission to the Board of County Commissioners…shall show that the planning commission has studied and considered proposed change in relation to the following when applicable."

1. ***Whether the proposed change will be consistent with the goals, objectives, & policies of the Future Land Use Map and the elements of the GMP.***

   Comprehensive Planning staff reviewed the petition and analyzed it for consistency with the GMP's goals, objectives, and policies. The subject site is located within the boundaries of the East Naples Community Development Plan (ENCDP), the US 41 East Overlay – Community Center in the Future Land Use Element (FLUE), and on the US 41 East Overlay Map 4 of the Future Land Use Map (FLUM) Series in the GMP. The site is also in the Coastal High Hazard Area. Staff finds that the proposed amendment will only be consistent with the GMP upon adoption and effectiveness of the companion GMPA-PL20230016211 to designate the site 5396 Myrtle Lane Commercial Subdistrict.

2. ***The existing land use pattern.***

   The existing land use pattern of the abutting properties is described in this staff report's Surrounding Land Use and Zoning section. Properties to the north across Myrtle Lane are vacant and retail, zoned commercial; properties to the east across US 41 are commercial, zoned commercial, and immediately adjacent are self-storage, zoned MPUD; to the south is multi-family residential, zoned MPUD; and to the west is single-family zoned RMF-6.

3. ***The possible creation of an isolated district unrelated to adjacent and nearby districts.***

   Should the rezoning to CPUD be approved, it would not create an isolated CPUD district and is not unrelated to existing uses on properties specifically to the east that are zoned MPUD and C-4.

4. ***Whether existing district boundaries are illogically drawn in relation to existing conditions on the property proposed for change.***

   The CPUD boundary follows the parcel boundaries of the property.

5. ***Whether changed or changing conditions make the passage of the proposed rezoning necessary.***

   The proposed change is not necessary but is being requested in compliance with the LDC provisions to seek such changes. The petitioner is seeking to construct a maximum of 200,000 gross square feet of indoor self-storage/warehouse and a maximum of 3,000 gross square feet of other commercial uses permitted by right within the C-1 through C-3 Zoning District. In order to increase the intensity on the property, a GMP Amendment and PUD Rezoning are needed.

6. ***Whether the proposed change will adversely influence living conditions in the neighborhood.***

   While the existing and permitted land uses along the six-lane arterial corridor of US 41 are generally commercial and auto-oriented uses associated with the C-4 zoning district, the character along Myrtle Lane is that of an established low-density residential neighborhood. The impact of introducing higher intensity uses and square footage at the Myrtle Lane/US 41 intersection should be mitigated in recognition of the lower intensity residential area to the west by minimizing the degree of incompatible size, scale, noise, views, lighting, and traffic associated with the development in relation to the Myrtle Lane neighborhood. Staff recommends the following conditions:

   - ***The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.***

   - ***The buffer along US 41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.***

7. ***Whether the proposed change will create or excessively increase traffic congestion or create types of traffic deemed incompatible with surrounding land uses because of peak volumes or projected types of vehicular traffic, including activity during construction phases of the development, or otherwise affect public safety.***

   The roadway infrastructure has adequate capacity to serve the proposed project at this time and as outlined above, i.e., GMP consistent at the time of rezoning as evaluated as part of the GMP Transportation Element consistency review. Operational impacts will be addressed at the time of the first development order (SDP or Plat). Additionally, the project's development must comply with all other applicable concurrency management regulations when development approvals are sought.

   As a condition of the current Myrtle Woods CPUD zoning, a developer commitment was approved requiring that the developer "provide a public access easement from Myrtle Lane to the signalized intersection of US 41 and Broward Street…" The exact location and design of the public access easement shall be approved by the Transportation Division at the time of SDP application review." No buffers or setbacks are required from the public access easement.

   Proposed Transportation Commitment B in Exhibit F, List of Development Commitments, includes the requirement for a public access easement that connects vehicles from Myrtle Lane to the US 41/Broward Street intersection; the final location will be coordinated with the County Transportation Planning staff. As part of the US 41/Broward Street intersection improvements associated with this project, a crosswalk from the sidewalk at the PUD project entrance on US 41 to the sidewalk on Broward Street will provide pedestrian access to the existing CAT bus stop on Broward Street.

8. ***Whether the proposed change will create a drainage problem.***

   Stormwater and Utility requirements have been reviewed as part of the proposed PUD rezoning, and the Easement Vacation petition PL20240005670 is in the process of vacating and relocating a drainage easement on the property as shown on the PUD Master Plan. Stormwater best management practices, treatment, and storage will be addressed through Environmental Resource Permitting (ERP) with the South Florida Water Management District (SFWMD). Staff will evaluate the stormwater management system and design criteria at the time of SDP or PPL.

9. ***Whether the proposed change will seriously reduce light and air to adjacent areas.***

   It is not anticipated that this CPUD will reduce light or air to the adjacent areas. Development of the site will need to meet site design standards as set forth in the LDC.

10. ***Whether the proposed change will adversely affect property values in the adjacent area.***

    This is a subjective determination based upon anticipated results, which may be internal or external to the subject property. Property valuation is affected by a host of factors,

including zoning; however, zoning by itself may or may not affect values since value determination is driven by market value.

11. ***Whether the proposed change will be a deterrent to the improvement or development of adjacent property in accordance with existing regulations.***

The approval of the CPUD rezone request is not likely to deter development activity of the surrounding properties.

12. ***Whether the proposed change will constitute a grant of special privilege to an individual owner as contrasting with the public welfare.***

If the companion GMP Amendment (PL20230016211) is approved, that will constitute a public policy statement supporting that the development parameters are found to be appropriate, and the zoning action would subsequently be consistent with the Comprehensive Plan as amended. In light of this fact, the proposed change does not constitute a grant of special privilege. Consistency with the FLUE is further determined to be a public welfare relationship because actions consistent with plans are in the public interest.

13. ***Whether there are substantial reasons why the property cannot be used in accordance with existing zoning.***

The property could develop in accordance with the existing Myrtle Woods Commercial PUD and RMF-6 Zoning, but the intended use of the property for up to 200,000 gross square feet of indoor self-storage/warehouse and a maximum of 3,000 gross square feet of other commercial uses permitted by right within the C-1, C-2 and C-3 Zoning Districts as proposed requires the rezoning action and companion GMP Amendment.

14. ***Whether the change suggested is out of scale with the needs of the neighborhood or the County.***

Myrtle Lane has the character of an established low-density residential neighborhood, and the intensity of the proposed uses may be out of scale with the needs of the surrounding neighborhood. The Countywide need exists to accommodate the use that is being displaced from the Mini Triangle Area of the Community Redevelopment Area (CRA). Staff recommends the PUD rezoning be subject to adoption of the companion GMPA-PL20230016211 and subject to recommended conditions of approval to address neighborhood compatibility.

15. ***Whether it is impossible to find other adequate sites in the County for the proposed use in districts already permitting such use.***

The petition was reviewed for compliance with the GMP and the LDC, and staff does not specifically review other sites in conjunction with a specific petition.

16. ***The physical characteristics of the property and the degree of site alteration, which would be required to make the property usable for any of the range of potential uses under the proposed zoning classification***.

    The property is currently a low-lying, undeveloped, vegetated site. The CPUD Master Plan depicts substantial alteration with most of the site designated for buildings and parking; no preserve area is required. Any development anticipated by this PUD would require significant site alteration and is subject to applicable federal, state, and local development regulations during the SDP and/or platting process and again as part of the building permit process.

17. ***The impact of development on the availability of adequate public facilities and services is consistent with the levels of service adopted in the Collier County Growth Management Plan and as defined and implemented through the Collier County Adequate Public Facilities Ordinance, as amended.***

    The project must comply with the criteria set forth in LDC Section 6.02.00 regarding Adequate Public Facilities (APF) and must be consistent with applicable goals and objectives of the GMP related to adequate public facilities. Concurrency review for Adequate Public Facilities is determined at the time of SDP review.

18. ***Such other factors, standards, or criteria that the Board of County Commissioners shall deem important in protecting public health, safety, and welfare.***

    To be determined by the Board during its advertised public hearing.

DEVIATION DISCUSSION

No deviations are requested.

NEIGHBORHOOD INFORMATION MEETING (NIM):

The petitioner conducted an NIM on May 6, 2024, at the South Regional Library Meeting Room, 8065 Lely Cultural Parkway. The meeting commenced at approximately 5:30 p.m. and ended at 6:04 p.m. Approximately 15-20 people were in attendance, and two participants attended via ZOOM.

The petitioner's agent explained the request for the proposed PUD Rezone and companion Growth Management Plan Amendment to allow for the proposed uses. Concerns were raised about existing flooding conditions, traffic on Myrtle Lane, access to the signalized intersection on Tamiami Trail, and comments that the project is out of scale with the needs of the community.

See Attachment D for the NIM documentation.

ENVIRONMENTAL ADVISORY COUNCIL (EAC) REVIEW

This project does not require Environmental Advisory Council (EAC) review, as this project did not meet the EAC scope of land development project reviews as identified in Section 2-1193 of the Collier County Codes of Laws and Ordinances.

COUNTY ATTORNEY OFFICE REVIEW:

This Staff Report was reviewed by the County Attorney's office on November 6, 2024.

RECOMMENDATION:

Staff recommends that the Collier County Planning Commission (CCPC) forward PUD Rezone Petition PL20230016212 for the 5396 Myrtle Lane CPUD to the Board of County Commissioners (BCC) with a recommendation of approval, subject to the companion GMPA-PL20230016211 being adopted and becoming effective, and subject to the following conditions of approval:

1. The trees in the West buffer shall be canopy trees only. Understory trees shall not be substituted for canopy trees.
2. The buffer along US 41 and Myrtle Lane shall be a Type B buffer. Trees shall be hardwoods only.

ORDINANCE NO. 2025-_____

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA RELATING TO MYRTLE WOODS, AMENDING ORDINANCE NUMBER 2004-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE, WHICH ESTABLISHED THE COMPREHENSIVE ZONING REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, BY AMENDING THE APPROPRIATE ZONING ATLAS MAP OR MAPS BY CHANGING THE ZONING CLASSIFICATION OF THE HEREIN DESCRIBED REAL PROPERTY FROM THE MYRTLE WOODS COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD) AND RMF-6 ZONING DISTRICTS TO A COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD) ZONING DISTRICT FOR A PROJECT TO BE KNOWN AS 5396 MYRTLE LANE COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD), TO ALLOW DEVELOPMENT OF UP TO 200,000 SQUARE FEET OF GROSS FLOOR AREA OF INDOOR SELF-STORAGE/WAREHOUSE AND UP TO 3,000 SQUARE FEET OF GROSS FLOOR AREA OF OTHER COMMERCIAL USES ON PROPERTY LOCATED ON THE SOUTHWEST QUADRANT OF TAMIAMI TRAIL EAST AND MYRTLE LANE IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA CONSISTING OF 8.24+/- ACRES; AND PROVIDING FOR REPEAL OF ORDINANCE NO. 2008-09, AS AMENDED, THE MYRTLE WOODS COMMERCIAL PLANNED UNIT DEVELOPMENT; AND BY PROVIDING AN EFFECTIVE DATE. [PL20230016212]

WHEREAS, on February 12, 2008, by Ordinance No. 2008-09, the Board of County Commissioners created the Myrtle Woods CPUD,; and

WHEREAS, Metropolitan Naples, LLC, represented by D. Wayne Arnold, AICP of Q. Grady Minor and Associates, P.A. and Richard D. Yovanovich, Esquire of Coleman, Yovanovich & Koester, P.A., petitioned the Board of County Commissioners to change the zoning classification of the herein described real property and repeal the Myrtle Woods CPUD.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

SECTION ONE:

The zoning classification of the herein described real property located in Section 29, Township 50 South, Range 26 East, Collier County, Florida, is changed from a Commercial Planned Unit Development (CPUD) and RMF-6 Zoning Districts to a Commercial Planned Unit Development for a 8.24± acre project to be known as 5396 Myrtle Lane CPUD, to allow a up to 200,000 square feet of gross floor area of indoor self-storage/warehouse and up to 3,000 square feet of gross floor area of other

commercial uses in accordance with Exhibits A through F attached hereto and incorporated by reference herein. The appropriate zoning atlas map or maps, as described in Ordinance Number 2004-41, as amended, the Collier County Land Development Code, is/are hereby amended accordingly.

SECTION TWO:

Ordinance No. 2008-09, as amended, the Myrtle Woods CPUD is hereby repealed.

SECTION THREE:

This Ordinance shall become effective upon filing with the Department of State and on the date that the Growth Management Plan Amendment in Ordinance No. 2025-____ becomes effective.

PASSED AND DULY ADOPTED by super-majority vote of the Board of County Commissioners of Collier County, Florida, this _____ day of _____, 2025.

Exhibit A - List of Permitted Uses
Exhibit B - Development and Design Standards
Exhibit C - Master Concept Plan
Exhibit D - Legal Description
Exhibit E - Deviations
Exhibit F - Development Commitments

EXHIBIT A
LIST OF PERMITTED USES

Regulations for development of this CPUD shall be in accordance with the contents of this document and all applicable sections of the Growth Management Plan (GMP), the Land Development Code (LDC), and the Administrative Code in effect at the time of approval of the Site Development Plan (SDP) or plat. Where the PUD ordinance does not provide development standards, then the provision of the specific sections of the LDC that are otherwise applicable shall apply.

PERMITTED USES:

A maximum of 200,000 square feet of gross floor area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross floor area of other commercial uses within the CPUD.

A. Principal Uses:

1.	Uses permitted by right in the C-1 through C-3 Zoning District.	
2.	Automotive rental and leasing, only vehicles for which a commercial drivers license is not required.	(7513 and 7519, including only trailer and utility trailer rental)
3.	Outdoor equipment rental and leasing (no construction equipment may be leased or rented)	(7359, including only truck and tool rental and leasing. No vehicle rentals are permitted which require a commercial driver license)
4.	Indoor storage, including cube storage and moving supplies sales	(4225 and 4226, including only household goods and furniture storage)
5.	Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.	

B. The following uses are prohibited:

1. Adult X-rated video stores
2. Animal specialty services (0752)
3. Any business establishment displaying any obscene or offensive name
4. Automotive Services (7549)

5. Bail Bonds offices
6. Educational plants and public schools
7. Group Care Facilities
8. Homeless shelters
9. Membership organizations, miscellaneous (8699)
    a. Farm granges
    b. Humane societies
10. Parking Lots/Structures (7521)
11. Pawn shops
12. Personal services, miscellaneous (7299)
    a. Bartering services
    b. Comfort station operation
    c. Escort service
    d. Turkish baths
13. Public administration (9661)
14. Retail services - miscellaneous (5999)
    a. Monuments/tombstones
    b. Sales barns
15. Soup kitchens
16. Tattoo parlors
17. Valet parking

C. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1. Electric vehicle charging stations
2. Minor auto service and repair, for rental/leased vehicles only. Vehicle maintenance for rented/leased vehicles shall be limited to minor maintenance and repairs including but not limited to vehicle washing, battery replacement, tire changing, trailer hitch installation, wiper blade replacement and similar repairs.
3. Propane gas dealers, including grilling and propane accessories
4. Water management
5. Any other accessory use which is comparable in nature with the foregoing list of permitted accessory uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

EXHIBIT B

LIST OF DEVELOPMENT STANDARDS

The standards for land uses within the development shall be as stated in these development standard tables. Standards not specifically set forth herein shall be those specified in applicable sections of the LDC in effect as of the date of approval of the SDP or subdivision plat.

TABLE I
COMMERCIAL DEVELOPMENT STANDARDS

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 SQUARE FEET	N/A
MINIMUM LOT WIDTH	100 FEET	N/A
MINIMUM YARDS (External)		
From Tamiami Trail East ROW (Front) 1	25 FEET	20 FEET
From Myrtle Lane ROW (Front) 1	25 FEET	20 FEET
From Western PUD Boundary (Side)	25 FEET	20 FEET
From Southern Boundary (Side)	25 FEET	25 FEET
MINIMUM DISTANCE BETWEEN STRUCTURES	10 FEET	10 FEET
MAXIMUM HEIGHT		
Zoned	50 FEET	25 FEET
Actual	60 FEET	25 FEET
MINIMUM GROSS FLOOR AREA FOR ANY PERMITTED USE	700 SQUARE FEET	N/A
MAXIMUM GROSS FLOOR AREA FOR PUD Indoor Self Storage/warehousing Other uses	 200,000 SQUARE FEET 3,000 SQUARE FEET	N/A

Notes:
1 - No buffers or setbacks are required from the public access easement.

No deviation requested.

EXHIBIT F
LIST OF DEVELOPMENT COMMITMENTS

PURPOSE:

The purpose of this Section is to set forth the development commitments for the development of this project.

GENERAL:

A. One entity (hereinafter the Managing Entity) shall be responsible for PUD monitoring until close-out of the PUD, and this entity shall also be responsible for satisfying all PUD commitments until close-out of the PUD. At the time of this PUD approval, the Managing Entity is Metropolitan Naples, LLC, 1500 Fifth Avenue South, Suite 106, Naples, FL 34102. Should the Managing Entity desire to transfer the monitoring and commitments to a successor entity, then it must provide a copy of a legally binding document that needs to be approved for legal sufficiency by the County Attorney. After such approval, the Managing Entity will be released of its obligations upon written approval of the transfer by County staff, and the successor entity shall become the Managing Entity. As Owner and Developer sell off tracts, the Managing Entity shall provide written notice to County that includes an acknowledgement of the commitments required by the PUD by the new owner and the new owner's agreement to comply with the Commitments through the Managing Entity, but the Managing Entity shall not be relieved of its responsibility under this Section. When the PUD is closed-out, then the Managing Entity is no longer responsible for the monitoring and fulfillment of PUD commitments.

B. Issuance of a development permit by a county does not in any way create any rights on the part of the applicant to obtain a permit from a state or federal agency and does not create any liability on the part of the county for issuance of the permit if the applicant fails to obtain requisite approvals or fulfill the obligations imposed by a state or federal agency or undertakes actions that result in a violation of state or federal law." (Section 125.022, FS)

C. All other applicable state or federal permits must be obtained before commencement of the development.

D. Outdoor amplified sound including a public address system is prohibited.

TRANSPORTATION:

A. The maximum total daily trip generation for the PUD shall not exceed 62 two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval.

B. The owner shall provide a vehicular connection from Myrtle Lane to the intersection of US-41 and Broward Street directly across US-41 to Broward Street as approximately shown on Exhibit C, CPUD Master Plan. The final location of the vehicular access will be coordinated with the Collier County Transportation Planning staff, and owner will convey an

access easement to the public for public use without responsibility of maintenance by Collier County. The access easement will be recorded at time of the first Site Development Plan or Plat, free and clear of all liens and encumbrances. The access connection and supporting infrastructure will be constructed to the property line by the owner or its successors or assigns prior to the first Certificate of Occupancy. The interconnections shall remain open to the public. Please see Exhibit B, Development Standards Table regarding setbacks and buffer requirements.

C. Costs for traffic signal modifications at the US 41 and Broward Street intersection are the responsibility of the owner of the PUD.

D. Signage indicating "right turn only for trucks" is required at the Myrtle Lane driveway exiting the site.

E. County Transportation staff shall evaluate the proposed access point along Myrtle Lane at time of Site Development Plan permitting, and decisions about whether it should be constructed and how it should be designed will be determined based on safety considerations at that time.

ENVIRONMENTAL:

A. No native preservation area is required as there is no native vegetative community on the property.

LANDSCAPING:

A. The 15' wide type 'D' landscape buffer on U.S. 41 and the 15' wide type 'B' buffer on Myrtle Lane as shown on the Master Plan shall be enhanced above the LDC required buffer by having the required canopy trees a minimum of 14' tall at time of planting and palm tree clusters of staggered heights shall be planted between the canopy trees for both the U.S. 41 and Myrtle Lane buffers. The right-of-way canopy trees shall be native canopy trees and palm trees may not be substituted.

PLANNING:

A. Parking lot lighting shall be dark sky compliant (flat panel, full cut off fixtures—backlight, uplight and glare (BUG) rating where U = 0) to avoid light spill onto adjacent properties. Fixtures within 50-ft of residential properties along the PUD boundary shall be set at no higher than a 15-ft mounting height. Otherwise, the site light poles shall not exceed a 25-ft mounting height. Light levels along the PUD boundary shall be limited to no more than 0.2-ft-candles along the joint property line where adjacent to residential property.

ORDINANCE NO. 08- 09

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 2004-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE WHICH INCLUDES THE COMPREHENSIVE ZONING REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, BY AMENDING THE APPROPRIATE ZONING ATLAS MAP OR MAPS BY CHANGING THE ZONING CLASSIFICATION OF THE HEREIN DESCRIBED REAL PROPERTY FROM A PLANNED UNIT DEVELOPMENT (PUD) ZONING DISTRICT AND A GENERAL COMMERCIAL (C-4) ZONING DISTRICT TO A COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD) ZONING DISTRICT FOR A 7.04+/- ACRE PARCEL LOCATED ON TAMIAMI TRAIL EAST (US 41), SOUTH OF MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA; PROVIDING FOR THE REPEAL OF ORDINANCE NUMBER 81-23, THE FORMER MYRTLE WOODS PUD; AND BY PROVIDING AN EFFECTIVE DATE.

FILED
2008 FEB 20 PM 4:19
DEPARTMENT OF STATE
TALLAHASSEE, FLORIDA

WHEREAS, on May 5, 1981, the Board of County Commissioners adopted Ordinance Number 81-23 establishing the Myrtle Woods PUD; and

WHEREAS, Myrtle Woods, LLC, represented by Dwight Nadeau of RWA, Inc., petitioned the Board of County Commissioners to change the zoning classification of the herein described real property.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

SECTION ONE:

The zoning classification of the herein described real property located in Section 29, Township 50 South, Range 26, Collier County, Florida, is changed from a Planned Unit Development (PUD) Zoning District and a General Commercial (C-4) Zoning District to a Commercial Planned Unit Development (CPUD) Zoning District for a 7.04+/- acre parcel to be known as the Myrtle Woods CPUD, in accordance with Exhibits A through F attached hereto and incorporated by reference herein. The appropriate zoning atlas map or maps, as described in Ordinance Number 2004-41, as amended, the Collier County Land Development Code, is/are hereby amended accordingly.

SECTION TWO:

Ordinance Number 81-23, known as the Myrtle Woods PUD, adopted on May 5, 1981, by the Board of County Commissioners is hereby repealed in its entirety.

SECTION THREE:

This Ordinance shall become effective upon filing with the Department of State.

PASSED AND DULY ADOPTED by super-majority vote of the Board of County Commissioners of Collier County, Florida, this 12th day of February, 2008.

PERMITTED USES

Table I

PROJECT LAND USE TRACTS

	TYPE	GSF	ACREAGE±
TRACT "CO"	COMMERCIAL	61,000	4.53
TRACT "U"	UTILITY	0	1.53
TRACT "P"	PRESERVE	0	0.98

Note: GSF is gross square feet.

I **PERMITTED USES:**

Within the CO, Commercial Tract, no building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the following:

A. Principal Uses:

1) Commercial banks – including those commercial banks with drive-through facilities (Groups 6021-6029).

2) Real estate agents and managers (Group 6531).

3) Hardware store only (Group 5251).

4) Variety stores – 5,000 square foot maximum floor area (Group 5331).

5) Miscellaneous general merchandise stores, except catalog showrooms – 5,000 square foot maximum floor area (Group 5399).

6) Grocery stores, except frozen food and freezer plants – 10,000 square foot maximum floor area (Group 5411).

7) Fish, meat, and seafood markets only (Group 5421).

8) Fruit and vegetable markets (Group 5431).

9) Retail bakeries (Group 5461).

10) Health food store only – 2,500 square foot maximum floor area (Group 5499).

11) Apparel and accessory stores – 2,500 square foot maximum floor area (Groups 5611-5661).

12) Record and prerecorded tape stores (Group 5735).

13) Eating places, except caterers and industrial and institutional food service establishments, dinner theaters, drive-in restaurants and restaurants with drive-through facilities (Group 5812). Outdoor entertainment, outdoor televisions, speakers, and amplified sound are prohibited.

14) Agents for laundries and drycleaners only (Group 7212).

15) Dry cleaning (Group 7215).

16) Diaper service, and garment alteration and repair shops only (Group 7219).

17) Beauty shops, except beauty schools and cosmetology schools (Group 7231).

18) Barber shops, except barber colleges (Group 7241).

19) Depilatory salon, electrolysis, massage parlor, shopping service for individuals, and tanning salons only (Group 7299).

20) Housekeeping and maid service only (Group 7349).

21) Video tape rental (Group 7841).

22) Physical fitness facilities (Group 7991).

23) Offices and/or clinics of physicians, and offices and/or clinics of dentists (Groups 8011-8021).

24) Offices and clinics of chiropractors (Group 8041).

25) Motor vehicle dealers-only new (Group 5511).

26) Miscellaneous retail (Groups 5912, 5941-5949, and 5992-5999, with the retail sales of fireworks prohibited).

Reference Executive Office of the President, Office of Management and Budget, *Standard Industrial Classification Manual*, 1987 Edition.

Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals ("BZA") by the process outlined in the LDC.

All retail establishments shall be located only on the ground floors of commercial buildings.

B. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1) Parking facilities.

2) One caretaker's residence.

3) Uses and structures that are accessory and incidental to the uses permitted as of right.

II PROHIBITED USES:

The applicant has agreed on the record that the following uses shall be prohibited in this CPUD Zoning District:

1) Soup kitchens
2) Pawn shops
3) Tattoo parlors
4) Adult X-rated video stores
5) Bail bonds offices
6) Homeless shelters
7) Any business establishment displaying any obscene or offensive name.

III REGULATIONS FOR DEVELOPMENT:

Regulations for development of this project shall be in accordance with the contents of this ordinance and other sections and parts of the Land Development Code and Growth Management Plan in effect at the time of site development plan, subdivision plat, or any other type of approval to which those regulations apply.

EXHIBIT B
DEVELOPMENT STANDARDS

GENERAL:

Development of the Myrtle Woods CPUD shall be in accordance with the contents of this Ordinance and applicable sections of the Collier County Land Development Code (LDC) and Growth Management Plan (GMP) in effect at the time of issuance of any development order, such as, but not limited to, final subdivision plat, final site development plan, excavation permit, and preliminary work authorization, to which such regulations relate. Where these regulations fail to provide developmental standards, then the provisions of the most similar district in the LDC shall apply.

Except as provided for herein, all criteria set forth below shall be understood to be in relation to individual parcel or lot boundary lines, or between structures. Commercial condominium, and/or property owners' association boundaries shall not be utilized for determining development standards.

Table I below sets forth the development standards for land uses within the CPUD Commercial Subdistrict. Standards not specifically set forth herein shall be those specified in applicable sections of the LDC in effect as of the date of approval of the site development plan (SDP) or subdivision plat.

TABLE I
DEVELOPMENT STANDARDS FOR COMMERCIAL DISTRICT

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 Sq. Ft.	N/A
MINIMUM LOT WIDTH	75 Ft.	N/A
MINIMUM YARDS		
Front	25 Ft.	15 Ft.
Rear	50% of the building height, but not less than 15 Ft.	10 Ft.
Side	50 % of the building height, but not less than 15 Ft.	10 Ft.
MIN. DISTANCE BETWEEN STRUCTURES	15 Ft.	50% of the building height, but not less than 15 Ft.
MAXIMUM HEIGHT (ZONED)		
Retail Buildings	3 stories, NTE 50 Ft.*	N/A
Office Buildings	3 stories NTE 50 Ft.*	N/A
MINIMUM FLOOR AREA	700 Sq. Ft. **	N/A

* Architectural appurtenances shall not exceed 75 feet in "actual" height.
** Per principal structure, on the finished first floor.

Note: NTE represents "not to exceed".

LEGAL DESCRIPTION

LOTS 23, 24, 25, 26, 27 AND 28, MYRTLE COVE ACRES, BLOCK A, UNIT 1, AS RECORDED IN PLAT BOOK 3, PAGE 38 OF THE PUBLIC RECORDS OF COLLIER COUNTY, FLORIDA

EXHIBIT E
LIST OF DEVIATIONS

None

EXHIBIT F
LIST OF DEVELOPER COMITMENTS

TRANSPORTATION

A. All traffic control devices, signs, pavement markings and design criteria shall be in accordance with Florida Department of Transportation (FDOT) *Manual of Uniform Minimum Standards (*MUMS*)*, current edition, FDOT *Design Standards*, current edition, and the *Manual on Uniform Traffic Control Devices* (MUTCD), current edition. All other improvements shall be consistent with and as required by the Collier County LDC.

B. Arterial level street lighting shall be provided at all access points. Access lighting shall be in place prior to the issuance of the first certificate of occupancy (CO).

C. Access points shown on the CPUD Master Plan are considered to be conceptual. Nothing depicted on any such Master Plan shall vest any right of access at any specific point along any property frontage. All such access issues shall be approved or denied during the review of required subsequent site plans, final plat submissions, FDOT permits and/or by an approved Developer Contribution Agreement (DCA). All such access shall be consistent with the FDOT Access Management Policy, as it may be amended from time to time. The number of access points constructed may be less than the number depicted on the Master Plan; however, no additional access points shall be considered unless a PUD amendment is approved.

D. If, in the sole opinion of Collier County and FDOT, a traffic signal, or other traffic control device, sign, or pavement marking improvement within any public right-of- way or easement is determined to be necessary, the cost of such improvement shall be the responsibility of the developer, its successors or assigns. The improvements shall be paid for or installed, at the County's and FDOT's direction. This could be prior to the issuance of the appropriate, corresponding CO.

E. Site related improvements (as opposed to system related improvements) necessary for safe ingress and egress to this project, as determined by Collier County, shall not be eligible for impact fee credits. To the extent possible, all the required improvements shall be in place and available to the public prior to commencement of on-site construction.

F. All proposed median opening locations shall be in accordance with the FDOT Access Management Policy, as it may be amended. FDOT and Collier County reserves the right to close any median opening existing at any time which is found to be adverse to the health, safety, and welfare of the public. Any such modifications shall be based on, but not limited to, safety, operational circulation, and roadway capacity.

G. Nothing in any development order (DO) shall vest a right of access in excess of a right-in/right-out condition at any access point. Neither shall the existence of a point of ingress, a point of egress, or a median opening, nor the lack thereof, be the basis for any future cause of action against the County by the developer, its successor in title, or assignee.

H. All internal roads, driveways, alleys, pathways, sidewalks, interconnections to adjacent developments shall be operated and maintained by an entity created by the developer in accordance with the applicable administrative codes and/or statutes of the State of Florida; and Collier County shall have no responsibility for maintenance of any such facilities.

I. If any required turn lane improvement requires the use of existing County rights-of-way or easement(s), then, if required by County staff, compensating right-of-way shall be provided at no cost to Collier County as a consequence of such improvement(s).

J. All off-site access improvements must be completed prior to commencement of on-site construction.

K. The developer shall provide a public access easement from Myrtle Lane to the signalized intersection of US-41 and Broward Street as approximately shown on Exhibit C, CPUD Master Plan. The public access easement shall not be considered road right-of-way and shall not be used for determining setbacks, or buffering requirements. The exact location and design of the public access easement shall be approved by the Transportation Division at the time of SDP application review.

WATER MANAGEMENT

A. Detailed paving, grading and site drainage plans shall be submitted to Engineering Review Services for review and approval. No construction permits shall be issued unless and until approval of the proposed construction, in accordance with the approved plans is granted by Engineering Review Services.

B. The developer shall grant or dedicate a 50 foot wide drainage and utility easement to Collier County as approximately shown on Exhibit C, CPUD Master Plan. This easement dedication shall occur within the earlier of 60-days of written request by the County, or at submittal of the SDP. The easement shall be granted or dedicated at no cost to the County, with the developer providing all appropriate sketches and legal descriptions. At the County's request, the developer shall install drainage and utility facilities in the drainage and utility easement as part of the site construction, with the location of these facilities determined through the SDP review process.

The County shall reimburse the developer within 180-days of the completion of the installation of the utility and drainage facilities.

The County shall not be responsible for the restoration costs of private facilities within the easement should maintenance of the public utility and drainage facilities be required in the future.

UTILITIES

A. Water distribution and sewage collection and transmission facilities to serve the project are to be designed, constructed, conveyed, owned, and maintained in accordance with applicable Collier County ordinances, and other applicable County rules and regulations.

B. All customers connecting to the water distribution and sewage collection facilities will be considered to be customers of the County, and will be billed by the County in accordance with the County's established rates.

C. The development shall be subject to application for and conditions associated with a water and sewer availability letter from Collier County Utilities Division.

D. The developer shall grant a 60 foot by 70 foot well site easement and an associated utilities and access easement to connect the well site easement to a public right-of-way. The County shall compensate the developer for the well easement dedication through impact fee credits based on the fair market value of the land so dedicated. The utilities and access easement shall be 20 feet wide unless the well site is contiguous to a public right-of-way, in which case, it shall be 15 feet wide. The County utility, access easement is for access, installation, operation, and maintenance of transmission mains, power, telemetry lines and appurtenances. This conveyance shall occur at the time the SDP, plat (or similar process) of the area within the development phase that contains the easement is approved by County staff. At the time of SDP and/or plat submittal, the developer shall provide the well site easement that meets the standard setback requirements for water wells.

ENVIRONMENTAL

A. If prehistoric or historic artifacts, such as pottery of ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial of American settlement are encountered at any time within the project site area, the permitted project should cease all activities involving subsurface disturbance in the immediate vicinity off such discoveries. The permittee, or other designee, should contact the Florida Department of State, Division of Historical Resources, Review and Compliance section at (850) 245-6333 or (800)847-7278, as well as the appropriate permitting agency office. Project activities should not resume without verbal and/or written authorization from the Division of Historical Resources. In the event that unmarked human remains are encountered during the permitted activities, all work shall stop immediately and the proper authorities notified in accordance with Florida law.

B. A Florida Fish and Wildlife Conservation Commission (FWC) relocation permit shall be obtained for the relocation of the one gopher tortoise found on site prior to commencement of any construction activities. A copy of the permit shall be forwarded to Environmental Services Staff.

C. The developer shall provide a report to Environmental Services Staff on the results of the relocation of the gopher tortoise within thirty days of the relocation. The report shall include the number of burrows excavated, the number of tortoises relocated, and the final relocation site.

PLANNING

A. The depth of the commercial buildings and parking areas associated with the development shall not exceed 397 feet as measured from the property line fronting on US-41, in order to meet the infill criteria of the GMP.

B. The developer shall install a fence/wall associated with the southern property boundary and the southwest property boundary. No fence/wall shall be installed within the Preserve Tract. The final location of the fence/wall shall be determined during the SDP review process.

RE: 5396 Myrtle Lane CPUD Rezone (PL20230016212), Submittal 1

Dear Ms. DeJohn:

An application for Public Hearing for a Planned Unit Development (PUD) rezone for property located at the southwest corner of Tamiami Trail East (U.S. 41) and Myrtle Lane. The PUD rezone proposes to rezone the 8.24± acre property from the Myrtle Woods CPUD and RMF-6 Zoning Districts to the 5396 Myrtle Lane Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses.

A companion Growth Management Plan Amendment (5396 Myrtle Lane Commercial Subdistrict PL20230016211)) has been filed to authorize the proposed commercial development.

Documents filed with submittal 1 include the following:

1. Cover Letter
2. Application for PUD Rezone
3. Evaluation Criteria
4. Pre-Application meeting notes
5. Affidavit of Authorization
6. Property Ownership Disclosure
7. Covenant of Unified Control
8. Addressing Checklist

REZONE REQUEST

This application is requesting a rezone from: Myrtle Woods CPUD and RMF-6 Zoning district(s) to the 5396 Myrtle Lane CPUD zoning district(s).

Present Use of the Property: Undeveloped

Proposed Use (or range of uses) of the property: Commercial

Original PUD Name: Myrtle Woods CPUD

Ordinance No.: Ordinance 2008-09

PROPERTY INFORMATION

On a separate sheet attached to the application, provide a detailed legal description of the property covered by the application:

- If the request involves changes to more than one zoning district, the applicant shall include a separate legal description for property involved in each district;
- If required to do so at the pre-application meeting, the applicant shall submit four (4) copies of a recent survey (completed within the last six (6) months, maximum 1" to 400' scale), and
- The applicant is responsible for supplying the correct legal description. If questions arise concerning the legal description, an engineer's certification or sealed survey may be required.

Section/Township/Range: 29 / 50 / 26

Lot: 22 - 28 **Block:** A **Subdivision:** Myrtle Cove Acres Unit No. 1

Metes & Bounds Description: See Boundary Survey

Plat Book: 3 **Page #:** 38 **Property I.D. Number:** 60780880001, 60780920000, 60780960002 & 60781000000

Size of Property: Irregular **ft. x** Irregular **ft. =** 358,934+/- **Total Sq. Ft. Acres:** 8.24 +/-

Address/ General Location of Subject Property: Southwest corner of Myrtle Lane and Tamiami Trail East (U.S. 41)

PUD District (refer to LDC subsection 2.03.06 C):

EVALUATION CRITERIA

Pursuant to LDC subsections 10.02.13 B, 10.02.08 F and Chapter 3 G. of the Administrative Code, staff's analysis and recommendation to the Planning Commission, and the Planning Commission's recommendation to the Board of County Commissioners shall be based upon consideration of the applicable criteria. **On a separate sheet attached to the application, provide a narrative statement describing the rezone request with specific reference to the criteria below. Include any backup materials and documentation in support of the request.**

a. The suitability of the area for the type and pattern of development proposed in relation to physical characteristics of the land, surrounding areas, traffic and access, drainage, sewer, water, and other utilities.
b. Adequacy of evidence of unified control and suitability of any proposed agreements, contract, or other instruments, or for amendments in those proposed, particularly as they may relate to arrangements or provisions to be made for the continuing operation and maintenance of such areas and facilities that are not to be provided or maintained at public expense. Findings and recommendations of this type shall be made only after consultation with the County Attorney.
c. Conformity of the proposed PUD with the goals, objectives, and policies of the Growth Management Plan. (This is to include identifying what subdistrict, policy, or other provision allows the requested uses/density, and fully explaining/addressing all criteria or conditions of that subdistrict, policy, or other provision.)
d. The internal and external compatibility of proposed uses, which conditions may include restrictions on location of improvements, restrictions on design, and buffering and screening requirements.
e. The adequacy of usable open space areas in existence and as proposed to serve the development.
f. The timing or sequence of development for the purpose of assuring the adequacy of available improvements and facilities, both public and private.
g. The ability of the subject property and of surrounding areas to accommodate expansion.
h. Conformity with PUD regulations, or as to desirable modifications of such regulations in the particular case, based on determination that such modifications of justified as meeting public purposes to a degree at least equivalent to literal application of such regulations.

Deed Restrictions: The County is legally precluded from enforcing deed restrictions; however, many communities have adopted such restrictions. You may wish to contact the civic or property owners association in the area for which this use is being requested in order to ascertain whether or not the request is affected by existing deed restrictions.

Previous land use petitions on the subject property: To your knowledge, has a public hearing been held on this property within the last year? If so, what was the nature of that hearing?

No

Official Interpretations or Zoning Verifications: To your knowledge, has there been an official interpretation or zoning verification rendered on this property within the last year?

☐ Yes ☑ No If so, please provide copies.

PUBLIC NOTICE REQUIREMENTS

This land use petition requires a Neighborhood Information Meeting (NIM), pursuant to Chapter 8 B of the Administrative Code and LDC section 10.03.05. Following the NIM, the applicant will submit a written summary and any commitments that have been made at the meeting. Refer to Chapter 8 B of the Administrative Code for the NIM procedural requirements.

Chapter 8 of the Administrative Code requires that the applicant must remove their public hearing advertising sign(s) after final action is taken by the Board of County Commissioners. Based on the Board's final action on this item, please remove all public hearing advertising sign(s) immediately.

RECORDING OF DEVELOPER COMMITMENTS

Within 30 days of adoption of the Ordinance, the owner or developer (specify name) at their expense shall record in the Public Records of Collier County a Memorandum of Understanding of Developer Commitments or Notice of Developer Commitments that contains the legal description of the property that is the subject of the land use petition and contains each and every commitment of the owner or developer specified in the Ordinance. The Memorandum or Notice shall be in form acceptable to the County and shall comply with the recording requirements of Chapter 695, FS. A recorded copy of the Memorandum or Notice shall be provided to the Collier County Planned Unit Development Monitoring staff within 15 days of recording of said Memorandum or Notice.

LDC subsection 10.02.08 D

This application will be considered "open" when the determination of "sufficiency" has been made and the application is assigned a petition processing number. The application will be considered "closed" when the petitioner withdraws the application through written notice or ceases to supply necessary information to continue processing or otherwise actively pursue the rezoning, amendment, or change, for a period of six (6) months. An application deemed "closed" will not receive further processing, and an application "closed" through inactivity shall be deemed withdrawn. An application deemed "closed" may be re-opened by submission of a new application, repayment of all application fees, and the grant of a determination of "sufficiency". Further review of the request will be subject to the then current code.

COVENANT OF CONTROL

The undersigned do hereby swear or affirm that we are the fee simple titleholders and owners of record of property commonly known as _____

_____

(Street address and City, State and Zip Code) and legally described in *Exhibit A* attached hereto.

The property described herein is the subject of an application for Residential planned unit development (R PUD) zoning. We hereby designate _____, legal representative thereof, as the legal representatives of the property and as such, these individuals are authorized to legally bind all owners of the property in the course of seeking the necessary approvals to develop. This authority includes, but is not limited to, the hiring and authorization of agents to assist in the preparation of applications, plans, surveys, and studies necessary to obtain zoning approval on the site. These representatives will remain the only entity to authorize development activity on the property until such time as a new or amended covenant of unified control is delivered to Collier County.

The undersigned recognize the following and will be guided accordingly in the pursuit of development of the project:

1. The property will be developed and used in conformity with the approved master plan including all conditions placed on the development and all commitments agreed to by the applicant in connection with the planned unit development rezoning.
2. The legal representative identified herein is responsible for compliance with all terms, conditions, safeguards, and stipulations made at the time of approval of the master plan, even if the property is subsequently sold in whole or in part, unless and until a new or amended covenant of unified control is delivered to and recorded by Collier County.
3. A departure from the provisions of the approved plans or a failure to comply with any requirements, conditions, or safeguards provided for in the planned unit development process will constitute a violation of the Land Development Code.
4. All terms and conditions of the planned unit development approval will be incorporated into covenants and restrictions which run with the land so as to provide notice to subsequent owners that all development activity within the planned unit development must be consistent with those terms and conditions.
5. So long as this covenant is in force, Collier County can, upon the discovery of noncompliance with the terms, safeguards, and conditions of the planned unit development, seek equitable relief as necessary to compel compliance. The County will not issue permits, certificates, or licenses to occupy or use any part of the planned unit development and the County may stop ongoing construction activity until the project is brought into compliance with all terms, conditions and safeguards of the planned unit development.

5396 Myrtle Lane CPUD (PL20230016212)

Evaluation Criteria

Pursuant to LDC subsections 10.02.13 B, 10.02.08 F and Chapter 3 G. of the Administrative Code, staff's analysis and recommendation to the Planning Commission, and the Planning Commission's recommendation to the Board of County Commissioners shall be based upon consideration of the applicable criteria. Provide a narrative statement describing the rezone request with specific reference to the criteria below. Include any backup materials and documentation in support of the request.

The applicant is proposing to rezone the 8.24+/- acre property from the Myrtle Woods CPUD and RFM-6 Zoning Districts to a Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. The site is proposed to be developed with a U-Haul smart mobility center that will be a modern facility designed to meet the indoor storage and moving needs for the growing Collier County market. This will be a replacement facility for the existing U-Haul facility that has operated 5 miles to the west in the Mini-triangle redevelopment area. U-Haul has outgrown the existing smaller site and the 8.4-acre site at Myrtle Lane and U.S. 41 is of sufficient size to build a modern indoor self-storage facility, with an area of sufficient size to allow for their rental fleet of vehicles as well as retail sales for moving supplies.

a. The suitability of the area for the type and pattern of development proposed in relation to physical characteristics of the land, surrounding areas, traffic and access, drainage, sewer, water, and other utilities.

The site is well-suited for continued commercial development. The site has been zoned for commercial and residential development and is in an area of the County having water and sewer services. The property has available access to both U.S. 41 and Myrtle Lane and is discussing signal modification at Broward Street to serve the project. Full access to Myrtle Lane will be provided if the site access to U.S. 41 is signalized at Broward Street. The site will be designed to have a functional water management system meeting the criteria of the SFWMD.

b. Adequacy of evidence of unified control and suitability of any proposed agreements, contract, or other instruments, or for amendments in those proposed, particularly as they may relate to arrangements or provisions to be made for the continuing operation and maintenance of such areas and facilities that are not to be provided or maintained at public expense. Findings and recommendations of this type shall be made only after consultation with the county attorney.

The applicant is the contract purchaser of the property.

c. Conformity of the proposed PUD with the goals, objectives and policies of the Growth Management Plan. (This is to include identifying what Sub-district, policy or other provision allows the requested uses/density, and fully explaining/addressing all criteria or conditions of that Sub-district, policy or other provision.)

A companion small-scale growth management plan amendment has been filed which establishes a new subdistrict which is tailored to this specific property and establishes the proposed intensity of a maximum of 200,000 square feet of gross leasable area of indoor self-

GradyMinor
Civil Engineers • Land Surveyors • Planners • Landscape Architects
Q. Grady Minor and Associates, LLC
3800 Via Del Rey, Bonita Springs, FL 34134 • 239-947-1144 • engineering@gradyminor.com • www.gradyminor.com

storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. The PUD also provides for the truck and trailer rental associated with U-Haul facilities.

Future Land Use Element

Policy 5.4 requires that all applications must be consistent with the Growth Management Plan as determined by the Board of County Commissioners. A companion small-scale growth management plan amendment has been filed which creates a new subdistrict providing for development of the proposed commercial use. Upon approval of the Subdistrict, the project may be deemed consistent with the Growth Management Plan.

Policies 5.5 and 5.7 discourage unacceptable levels of urban sprawl by utilizing urban areas for development before redesignating new property for urban intensity. The proposed development is an urban infill project and does not constitute urban sprawl. The site is presently zoned for commercial uses and multi-family residential uses. The site is located within the Coastal High Hazard Area of Collier County, making the use of the site more appropriate for commercial-only uses.

Policy 5.6 requires that new projects will be compatible with and complementary to the surrounding land uses. The proposed CPUD has a conceptual PUD master plan that identifies the location of the proposed building(s) parking areas, buffer, and site access. The PUD document contains development standards which establish building setbacks appropriate for the type of uses proposed. The project will be complementary to the surrounding area by providing a use for which there is market demand. U-Haul has discussed in their market demand analysis why this site to serve as a replacement for their existing facility is necessary. The site is appropriately sized and well-located to serve their growing demand for moving and storage facilities. The buildings and site will be developed in accordance with the LDC, and the buildings will be designed to meet the requirements of the County's architectural standards.

Objective 7, and implementing Policies 7.1-7.7, promote smart growth policies to reduce greenhouse gas emissions and to adhere to the development character of the County. The site is an urban infill site and located on a 6-lane arterial roadway offering capture of trips already on the surrounding roadway network. The site has also proposed secondary access to the adjacent Mrytle Lane. The Master Plan notes that this will be a full access if signalized access at the Broward Street signal is approved. No access is feasible to the developed storage facility to the south or vacant residential property to the west.

Transportation Element

Please see the Traffic Impact Analysis prepared which demonstrates compliance with the Level of Service Standards for arterial roadways.

Conservation and Coastal Management Element

Policy 6.1.1 requires preservation of the existing onsite native vegetation. The PUD master plan previously identified a native vegetation preservation area on the property; however, the updated vegetative mapping indicates there is no native vegetation on-site; therefore no preservation area is proposed.

Objective 7.1: Direct incompatible land uses away from listed animal species and their habitats. Please refer to the listed species management and indigenous preservation plans prepared by Collier Environmental which concludes there are no listed species onsite. There are no native plant species on the site; therefore, no preserve area is proposed.

d. The internal and external compatibility of proposed uses, which conditions may include restrictions on location of improvements, restrictions on design, and buffering and screening requirements.

The project as proposed is compatible both internally and externally. The PUD application includes a conceptual master plan which identifies proposed buffers, vehicle rental areas, and building areas, and the PUD document includes development standards which will assure the use(s) will be compatible with the nearby development. The proposed mobility center will be a replacement facility for the U-Haul facility that has operated for decades in the Mini-triangle redevelopment area. The relocation to this site will allow for a modern indoor self-storage and moving facility consistent with the demand analysis prepared in support of the companion small-scale amendment.

e. The adequacy of usable open space areas in existence and as proposed to serve the development.

The commercial PUD will have the required 30% open space as required by the LDC, which will include buffers, water management areas, and landscape islands.

f. The timing or sequence of development for the purpose of assuring the adequacy of available improvements and facilities, both public and private.

Adequate infrastructure must be in place to support future development on the site. Water and sewer services are available at the site and there are no known capacity issues that will impact this project.

g. The ability of the subject property and of surrounding areas to accommodate expansion.

The CPUD is surrounded by commercially zoned and developed land to the north and south. The vacant RMF-6 zoned parcel to the west is being retained by the seller of a portion of land included in the CPUD; however, the owner has no desire to include this parcel in the subject CPUD. Expansion of the PUD boundary is not necessary to support the proposed uses.

h. Conformity with PUD regulations, or as to desirable modifications of such regulations in the particular case, based on determination that such modifications of justified as meeting public purposes to a degree at least equivalent to literal application of such regulations.

The project as proposed is consistent with the LDC.

10.02.08 - Requirements for Amendments to the Official Zoning Atlas

F. Nature of requirements of Planning Commission report. When pertaining to the rezoning of land, the report and recommendations of the Planning Commission to the Board of County

Commissioners required in LDC section 10.02.08 E shall show that the Planning Commission has studied and considered the proposed change in relation to the following findings, when applicable:

1. Whether the proposed change will be consistent with the goals, objectives, and policies and future land use map and the elements of the Growth Management Plan.

Future Land Use Element

Policy 5.4 requires that all applications must be consistent with the Growth Management Plan as determined by the Board of County Commissioners. A companion small-scale growth management plan amendment has been filed which creates a new subdistrict providing for development of the proposed commercial use. Upon approval of the Subdistrict, the project may be deemed consistent with the Growth Management Plan.

Policies 5.5 and 5.7 discourage unacceptable levels of urban sprawl by utilizing urban areas for development before redesignating new property for urban intensity. The proposed development is an urban infill project and does not constitute urban sprawl. The site is presently zoned for commercial uses and multi-family residential uses. The site is located within the Coastal High Hazard Area of Collier County, making the use of the site more appropriate for commercial-only uses.

Policy 5.6 requires that new projects will be compatible with and complementary to the surrounding land uses. The proposed CPUD has a conceptual PUD master plan that identifies the location of the proposed building(s) parking areas, buffer, and site access. The PUD document contains development standards which establish building setbacks appropriate for the type of uses proposed. The project will be complementary to the surrounding area by providing a use for which there is market demand. U-Haul has discussed in their market demand analysis why this site to serve as a replacement for their existing facility is necessary. The site is appropriately sized and well-located to serve their growing demand for moving and storage facilities. The buildings and site will be developed in accordance with the LDC, and the buildings will be designed to meet the requirements of the County's architectural standards.

Objective 7, and implementing Policies 7.1-7.7, promote smart growth policies to reduce greenhouse gas emissions and to adhere to the development character of the County. The site is an urban infill site and located on a 6-lane arterial roadway offering capture of trips already on the surrounding roadway network. The site has also proposed secondary access to the adjacent Mrytle Lane. The Master Plan notes that this will be a full access if signalized access at the Broward Street signal is approved. No access is feasible to the developed storage facility to the south or vacant residential property to the west.

Transportation Element

Please see the Traffic Impact Analysis prepared which demonstrates compliance with the Level of Service Standards for arterial roadways.

Conservation and Coastal Management Element

Policy 6.1.1 requires preservation of the existing onsite native vegetation. The PUD master plan previously identified a native vegetation preservation area on the property; however,

the updated vegetative mapping indicates there is no native vegetation on-site; therefore no preservation area is proposed.

Objective 7.1: Direct incompatible land uses away from listed animal species and their habitats. Please refer to the listed species management and indigenous preservation plans prepared by Collier Environmental which concludes there are no listed species onsite. There are no native plant species on the site; therefore, no preserve area is proposed.

2. The existing land use pattern.

The lands to the northwest, southeast and north are zoned and/or developed with commercial uses. Lands to the west along Myrtle Lane are zoned RMF-6. One single family home is located to the west and the PUD proposes to include a 15' wide Type B buffer consistent with the LDC in this area.

3. The possible creation of an isolated district unrelated to adjacent and nearby districts.

The CPUD boundary does not create an isolated district. The CPUD permits all C-3 uses and the addition to the indoor storage and moving related uses. Properties proximate to the site are zoned and developed with commercial uses.

4. Whether existing district boundaries are illogically drawn in relation to existing conditions on the property proposed for change.

The PUD boundary represents a logical boundary and includes all property under the control of the applicant. The proposed PUD meets all design criteria for a PUD as specified in Section 4.07.02 of the PUD.

5. Whether changed or changing conditions make the passage of the proposed amendment necessary.

The applicant has prepared a market demand analysis and determined that the proposed U-Haul mobility center can be supported in this location. This will be a replacement facility for the U-Haul that has been operating in the Mini-triangle redevelopment area for decades. Their existing site is functionally obsolete due to the size of the site and lack of opportunity to expand at the current location. Due to the existing growth management plan policy regarding existing commercially zoned property, the zoning must be modified as the existing C-3 type uses permitted in the PUD and the RMF-6 zoning zoning does not permit the proposed moving and storage uses.

6. Whether the proposed change will adversely influence living conditions in the neighborhood.

The proposed rezone will not adversely influence living conditions in the neighborhood. The proposed master plan, buffers and development standards will assure compatibility.

7. Whether the proposed change will create or excessively increase traffic congestion or create types of traffic deemed incompatible with surrounding land uses, because of peak volumes or projected types of vehicular traffic, including activity during construction phases of the development, or otherwise affect public safety.

The proposed commercial development will not create or excessively increase traffic congestion. The TIS prepared for the PUD rezoning application concludes that the project will not adversely impact the surrounding road network or cause any roadways to operate below their adopted level of service.

8. Whether the proposed change will create a drainage problem.

The project will obtain a SFWMD permit for the surface water management system and will have no impact on surrounding development.

9. Whether the proposed change will seriously reduce light and air to adjacent areas.

The proposed rezone will have no impact on light and air to adjacent areas.

10. Whether the proposed change will adversely affect property values in the adjacent area.

The proposed rezone should have no impact on property values in the adjacent area.

11. Whether the proposed change will be a deterrent to the improvement or development of adjacent property in accordance with existing regulations.

The proposed rezone from PUD and RMF-6 to a commercial PUD will enhance surrounding properties by permitting a modern facility designed to have appropriate buffers and development standards which will not deter improvement or development of nearby properties.

12. Whether the proposed change will constitute a grant of special privilege to an individual owner as contrasted with the public welfare.

Any property owner may propose zoning changes subject to the requirements of the LDC. No special privilege results from the PUD rezone.

13. Whether there are substantial reasons why the property cannot be used in accordance with existing zoning.

The existing growth management plan policies and zoning do not permit the proposed mobility center and related uses; therefore, the zoning and companion small-scale plan amendment are required to be changed in order to develop the moving and storage uses.

14. Whether the change suggested is out of scale with the needs of the neighborhood or the county.

The scale of the project is in scale with the needs of the community and represents the necessary square footage to develop the moving and storage facilities.

15. Whether it is impossible to find other adequate sites in the county for the proposed use in districts already permitting such use.

It is not impossible to find other sites in the County; however, this commercially zoned infill property has commercial development surrounding it and it is served by a 6-lane arterial roadway. The applicant has determined that this location will better serve the growing demand for moving and storage in Collier County. The existing facility is functionally obsolete, and this property is of sufficient size to construct a facility of appropriate size and mix of uses to service the growing needs for moving and storage. The site also has water and wastewater services available to it.

16. The physical characteristics of the property and the degree of site alteration which would be required to make the property usable for any of the range of potential uses under the proposed zoning classification.

A portion of the site has been previously cleared and filled. The site has no native vegetation and is infested with exotic vegetation. Portions of the site will be cleared and filled to support the proposed building and parking areas within the PUD. The required site work is typical of most vacant parcels in Collier County.

17. The impact of development on the availability of adequate public facilities and services consistent with the levels of service adopted in the Collier County Growth Management Plan and as defined and implemented through the Collier County Adequate Public Facilities Ordinance [Code ch. 106, art. II], as amended.

There are adequate roadways and utilities available at the site. There are no public facilities deficiencies at the present time, and none will occur as a result of this project.

18. Such other factors, standards, or criteria that the Board of County Commissioners shall deem important in the protection of the public health, safety, and welfare.

The project is consistent with the proposed Growth Management Plan amendment, and it is compatible with surrounding development. The applicant has also determined that there is market demand for the proposed U-Haul mobility center uses.

Subject: 5396 Myrtle Lane PUDR Pre-app Notes (PL20230016212)

Thomas, Here are the zoning notes for the referenced PUDR pre-app meeting today:

- Companion site specific GMP Amendment is being proposed.
- Petitioner seeks to develop a U Haul facility based on their smart mobility model as a replacement to the existing U-Haul at 2001 Tamiami Trail E, Naples, FL 34112. This will include a 4-story indoor self storage building and 1-story warehousing (indoor cube). Also outdoor display of trucks & trailers for rent, propane sales to general public, electric charging stations available to general public, and approx. 3,000 s.f. of retail (moving & packing supplies) available to the general public. Other C-3 uses will also be proposed as permitted.
- Site is approx. 8.25 acres, currently zoned CPUD (Ord. 08-09) & RMF-6. PU-89-7 is expired.
- The zoning action will be a PUD rezoning (PUDR).
- To address compatibility within the PUD, identify the specific uses (by SIC) that are anticipated on the site as permitted uses and/or prohibited uses.
- For the PUD Master Plan, include contents outlined in the Administrative Code, section G.1. Include all easements, roads, rights-of-ways, and pedestrian systems on and proximate to the site.
- If deviations from LDC requirements are proposed, provide justifications demonstrating such master plan elements may be waived without detrimental effect on the health, safety and welfare of the community (LDC section 10.02.13.A.3), and/or demonstrating that the deviation is "justified as meeting public purposes to a degree at least equivalent to literal application of such regulations" per 10.02.13.B.5.h.
- Along with development standards, identify operational aspects in the PUD Submittal: hours of operation, outdoor sound control
- Refer to screening requirement in LDC 4.02.12 if outdoor storage is proposed.
- For information purposes, refer to Ordinance 08-09 for past conditions to provide public access, drainage/utility easement, and 60' x 70' well site easement.
- Architectural standards of LDC Section 5.05.08 apply.
- Applicant is required to hold a Neighborhood Information Meeting before the item is heard by the Planning Commission and Board of County Commissioners.
- In the application form where civic associations must be listed, and for purposes of NIM mailings, include East Naples Civic Association – confirm accurate mailing addresses per the Dept. of State Division of Corporations

Comprehensive Planning Pre-App Notes
Myrtle Lane GMPA and Rezone December 19, 2023 – 1:30 p.m.

GMPA PL20230016211 – Kathy Eastley
PUDZ PL20230016212 – Laura DeJohn

Description:

The applicant proposes to rezone four parcels to allow for up to 200,000 square feet of:

- Warehouse and Storage (SIC 4225) (both indoor storage and cube storage).
- Outdoor storage and display for U-Hauls (SIC 7513).
- Limited General Commercial (C-4) uses related to U-haul supplies such as boxes and packing materials, limited to 3,000 square feet.
- LPG Sales.

The property is at the southwest intersection of Myrtle Lane and US 41. Three of the properties are currently zoned Myrtle Woods CPUD and one parcel is zoned RSF-3. All parcels are currently vacant and total approximately 8.25 acres.

Access to the site is proposed at the signalized intersection of Broward Street and US 41, with emergency access proposed on Myrtle Lane. Discuss the potential to provide interconnection from Myrtle Lane to the signalized intersection at Broward.

The site plan indicates a four-story storage facility at the southeast, U-Haul storage and display at the intersection of US 41 and Myrtle Lane, a single-story warehouse at the western end of the property adjacent to the RSF-3 parcels, and a water management facility at the south adjacent to the Tree Tops MPUD.

The Growth Management Plan (GMP) Future Land Use Element (FLUE) and Future Land Use Map (FLUM) and Map Series, designate the property as Urban, Mixed-Use District, Urban Coastal Fringe Subdistrict, and Coastal High Hazard Area. The applicant proposes a Growth Management Plan Amendment (GMPA) to create a subdistrict to allow the requested uses.

The applicant should provide a detailed description of the uses proposed on the property, along with the associated SIC Codes. Justification for the proposed GMPA must be provided including the provision of data and analysis demonstrating the need for the use, **as well as the appropriateness of the use at the proposed location**. Please include a defined market area with to support the location as well as each of the proposed uses. This study should also include an inventory of all approved similar facilities within the defined market area. Please note that this is an existing facility that will be relocating, with current location and specific uses that exist in the current business.

The US 41 Overlay should be reviewed and applied to the site, including the required enhancements and incorporating the development criteria into the plan.

Page 2. B.2.

Address the compatibility of the use, the availability of public and/or private infrastructure to serve the use, and impacts, if any, on environmental and cultural resources.

Please include information related to the apparent accesses through the subject properties. Are these easements that serve drainage in the area?

Growth Management Plan Amendments require the applicant to address and demonstrate consistency with the following policies:

- Please address Collier County Growth Management Plan Policy 5.6 regarding compatibility and policies 7.1-7.4. regarding smart growth policies specific to interconnection and access issues. These policies are found in the document at the following link: https://www.colliercountyfl.gov/home/showpublisheddocument/103430/638181213305930000
- List and address applicable provisions of Florida Statues 163.3187 and 163.3177 for amending the Growth Management Plan (GMP).

General Information

- **Public Notice requirements in Subsection 10.03.06.B**
  - Staff suggests communicating with neighbors regarding the proposal.
- **One neighborhood information meeting (NIM)** is required at least 15 days prior to the advertised Planning Commission Hearing. The applicant is eligible for a NIM at the conclusion of the first review.
  - The GMPA and PUDZ can be combined in one NIM
- **Public Hearings**
  - EAC, if required
  - One CCPC
  - Final Decision is made by the BCC following recommendations from EAC and CCPC
- The rezone petition decision is pending decision for the GMPA

Transportation Planning and PUD Monitoring Pre-App Notes

Developer Commitments:

Transportation Planning

" The maximum total daily trip generation for the PUD shall not exceed ____ two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval."

Use Codes

Provide both ITE and SIC use codes in the TIS.

PUD Monitoring

"One entity (hereinafter the Managing Entity) shall be responsible for PUD monitoring until close-out of the PUD, and this entity shall also be responsible for satisfying all PUD commitments until close-out of the PUD. At the time of this CPUD approval, the Managing Entity is the Insert Company Name Here. Should the Managing Entity desire to transfer the monitoring and commitments to a successor entity, then it must provide a copy of a legally binding document that needs to be approved for legal sufficiency by the County Attorney. After such approval, the Managing Entity will be released of its obligations upon written approval of the transfer by County staff, and the successor entity shall become the Managing Entity. As Owner and Developer sell off tracts, the Managing Entity shall provide written notice to County that includes an acknowledgement of the commitments required by the CPUD by the new owner and the new owner's agreement to comply with the Commitments through the Managing Entity, but the Managing Entity shall not be relieved of its responsibility under this Section. When the PUD is closed-out, then the Managing Entity is no longer responsible for the monitoring and fulfillment of PUD commitments."

Miscellaneous

Pursuant to Section 125.022(5) F.S., issuance of a development permit by a county does not in any way create any rights on the part of the applicant to obtain a permit from a state or federal agency and does not create any liability on the part of the county for issuance of the permit if the applicant fails to obtain requisite approvals or fulfill the obligations imposed by a state or federal agency or undertakes actions that result in a violation of state or federal law.

All other applicable state or federal permits must be obtained before commencement of the development.

Thomas,
There are my notes for this one.

1. Please provide Environmental Data: Please provide FLUCFCS aerial map of the subject property please include the invasive exotic plant percentage amounts and indicate which FLUCFCS are being considered Native Vegetation. Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the Florida Land Use Cover and Forms Classification System (FLUCFCS), and provide a legend for each of the FLUCFCS Codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of **native vegetation** required to be retained on-site. In a separate report, demonstrate how the preserve selection criteria pursuant to 3.05.07 have been met. Where applicable, include in this report an aerial showing the project boundaries along with any undeveloped land, preserves, natural flowways or other natural land features, located on abutting properties.

2. Please provide a current Listed species survey, which should include listed plants for the subject property. Provide supporting exhibits (i.e. Panther zones ect.) be sure to include Black Bear and Florida Bonneted Bat as part of the evaluation. Provide a wildlife survey for the nests of bald eagle and for **listed species known to inhabit** biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the Florida Fish and Wildlife Conservation Commission (FFWCC) and the U.S. Fish and Wildlife Service (USFWS).
   Provide a survey for listed plants identified in 3.04.03.

3. Provide calculations on site plan showing the appropriate acreage of native vegetation to be retained, the max. amount and ratios permitted to be created on-site or mitigated off-site. Exclude vegetation located within utility and drainage easements from the preserve calculations (LDC 3.05.07.B-D; 3.05.07.F; 3.05.07.H.1.d-e). (15 % of native vegetation of the total acreage is required for preservation.) Label the Master plan with a note that the preservation is to be addressed off-site and provide the calculation in the packet submitted.

4. **Please address how the proposed project is consistent with Conservation Coastal Management Element (CCME) Policy 6.1 and Objective 7.1.**

5. Explain how the project meets or exceeds the native vegetation requirements and minimizes impacts to listed species as required in the CCME. (**The preservation Requirement is 15 % of native vegetation).**

6. Indicate how the project design minimizes impacts to listed species. Describe the measures that are proposed as mitigation for impacts to listed species. (**If found onsite).**

7. Demonstrate that the design of the proposed stormwater management system and analysis of water quality and quantity impacts fully incorporate the requirements of the Watershed Management regulations of 3.07.00.

8. Please address any clearing that has occurred when it occurred and provide permit information associated with the clearing (Historic aerials).

Subject: Zoning Pre-App RESEARCH for 5396 Myrtle Ln (PUDZ)-PL20230016212 and GMPA

Good afternoon all,

Please see the attached Pre-App Research for **Companion** petitions; **5396 Myrtle Ln (PUDZ)-PL20230016212 and GMPA – PL20230016211.**

The Pre-App meeting is **Tuesday 12/19/23 at 1:30pm via ZOOM**.

See attached link below:

Zoom Invite:
Topic: Pre-App Meeting PL20230016212/PL20230016211- 5396 Myrtle Lane GMPA & PUDZ
Time: Dec 19, 2023, 01:30 PM Eastern Time (US and Canada)

Join Zoom Meeting:

https://us02web.zoom.us/j/81962592721?pwd=V2czdUtZUGgzWUllQm5YbmwzZG1PZz09

Page 3.C.2

Environmental PUDZ-PUDA Checklist (non-RFMU)
Project Name 5396 MYRTLE LN (PUDA) + (GMPA)

1. Is the project is in compliance with the overlays, districts and/or zoning on the subject site and/or the surrounding properties? (CON, ST, PUD, RLSA, RFMU, etc.) (LDC 2.03.05-2.03.08; 4.08.00) Not in CV Library

2. Submit a current aerial photograph (available from the Property Appraiser's office) and clearly delineate the subject site boundary lines. If the site is vegetated, provide FLUCFCS overlay and vegetation inventory identifying upland, wetland and exotic vegetation (Admin. Code Ch. 3 G.1. Application Contents #24). FLUCFCS Overlay -P627

3. Clearly identify the location of all preserves and label each as "Preserve" on all plans. (LDC 3.05.07.H.1). Preserve Label- P546

4. Provide calculations on site plan showing the appropriate acreage of native vegetation to be retained, the max. amount and ratios permitted to be created on-site or mitigated off-site. Exclude vegetation located within utility and drainage easements from the preserve calculations (LDC 3.05.07.B-D; 3.05.07.F; 3.05.07.H.1.d-e). Preserve Calculation - P547

5. Created and retained preserve areas shall meet the minimum width requirements per LDC 3.05.07.H.1.b. Preserve Width - P603

6. Retained preservation areas shall be selected based on the criteria defined in LDC 3.05.07.A.3, include all 3 strata, be in the largest contiguous area possible and shall be interconnected within the site and to adjoining off-site preservation areas or wildlife corridors. (LDC 3.05.07.A.1-4) Preserve Selection- P550

7. Principle structures shall be located a minimum of 25' from the boundary of the preserve boundary. No accessory structures and other site alterations, fill placement, grading, plant alteration or removal, or similar activity shall be permitted within 10' of the boundary unless it can be shown that it will not affect the integrity of the preserve (i.e. stem wall or berm around wetland preserve). Provide cross-sections for each preserve boundary identifying all site alterations within 25'. (LDC 3.05.07.H.3; 6.01.02.C.) Preserve Setback – New

8. Wildlife survey required for sites where an EIS is not required, when so warranted. (LDC 10.02.02.A.2.f) Listed Species - P522

9. Provide Environmental Data identifying author credentials, consistency determination with the GMPs, off-site preserves, seasonal and historic high water levels, and analysis of water quality. For land previously used for farm fields or golf course, provide soil sampling/groundwater monitoring reports identifying any site contamination. (LDC 3.08.00) Environmental Data Required – P 522

10. PUD Document and Master Plan shall state the minimum acreage required to be preserved. (LDC 10.02.13.A.2) Master Plan Contents-P626

11. If the PUD includes a Preserve Tract section UP FOR DISCUSSION – DISCUSS WITH CAO

    When listing preserve uses, the following is suggested:
    A. Principal Use: Preserve; B. Accessory Uses: All other uses (list as applicable or refer to the LDC – see 1-3 below as typical uses listed by agents)
    (ensure the text states "subject to LDC section related to Allowable uses within County required preserves"

    Alternate format:
    A. Uses subject to LDC section *Allowable uses within County required preserves*:
        1. Nature trails that do not reduce the amount of required preserve.
        2. Passive Recreation uses, as per LDC requirements.
        3. Stormwater only when in accordance with the LDC.

PUD Commitments and Site Plan notes

Where preserves occur adjacent to development off site and will be used in lieu of landscape buffers, include the following condition in the environmental commitments section of the PUD document or master plan:

> Preserves may be used to satisfy the landscape buffer requirements after exotic vegetation removal in accordance with LDC sections 4.06.02 and 4.06.05.E.1. Supplemental plantings with native plant materials shall be in accordance with LDC section 3.05.07.

12. PUD Document shall identify any listed species found on site and/or describe any unique vegetative features that will be preserved on the site. (LDC 10.02.13.A.2.) Unique Features- P628
    Example: A management plan for the entire project shall be submitted in accordance with the requirements and procedures of the LDC for listed species including but not limited to Black Bear, Gopher Tortoise and listed birds. The management plan shall be submitted prior to development of the first phase of the project.

13. Review cross-sections if provided; they are not required with the PUD. However, sometimes they are provided. Is there any fill proposed in the preserve?

Additional Comments:

Environmental Data Checklist

Project Name 5396 Myrtle Ln (PUD2) & (CMPA)

The Environmental Data requirements can be found in LDC Section 3.08.00

1. Provide the EIS fee if PUD or CU.

2. WHO AND WHAT COMPANY PREPARED THE ENVIRONMENTAL DATA REPORT? Preparation of Environmental Data. Environmental Data Submittal Requirements shall be prepared by an individual with academic credentials and experience in the area of environmental sciences or natural resource management. Academic credentials and experience shall be a bachelor's or higher degree in one of the biological sciences with at least two years of ecological or biological professional experience in the State of Florida. **Please include revision dates on resubmittals.**

3. Identify on a current aerial, the location and acreage of all SFWMD jurisdictional wetlands according to the Florida Land Use Cover and Forms Classification System (FLUCFCS) and include this information on the SDP or final plat construction plans. Wetlands must be verified by the South Florida Water Management District (SFWMD) or Florida Department of Environmental Protection (DEP) prior to SDP or final plat construction plans approval. For sites in the **RFMU district,** provide an assessment in accordance with 3.05.07 F and identify on the FLUCFCS map the location of all high quality wetlands (wetlands having functionality scores of at least 0.65 WRAP or 0.7 UMAM) and their location within the proposed development plan. Sites with high quality wetlands must have their functionality scores verified by the SFWMD or DEP prior to first development order approval. Where functionality scores have not been verified by either the SFWMD or DEP, scores must be reviewed and accepted by County staff, consistent with State regulation.

4. SDP or final plat construction plans with impacts to five (5) or more acres of wetlands shall provide an analysis of potential water quality impacts of the project by evaluating water quality loadings expected from the project (post development conditions considering the proposed land uses and stormwater management controls) compared with water quality loadings of the project area as it exists in its pre-**development** conditions. The analysis shall be performed using methodologies approved by Federal and State water quality agencies, and must demonstrate no increase in nutrients (nitrogen and phosphorous) loadings in the post development scenario.

5. Where treated stormwater is allowed to be directed into preserves, show how the criteria in 3.05.07 H have been met.

6. Where **native vegetation** is retained on site, provide a topographic map to a half foot and, where possible, provide elevations within each of the FLUCFCS Codes identified on site. For SDP or final plat construction plans, include this information on the site plans.

7. Provide a wildlife survey for the nests of bald eagle and for **listed species known to inhabit** biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the Florida Fish and Wildlife Conservation Commission (FFWCC) and the U.S. Fish and Wildlife Service (USFWS). Survey times may be reduced or waived where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, as determined by the FFWCC and USFWS. Where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, the survey time may be reduced or waived by the County Manager or designee, when the project is not reviewed or technical assistance not provided by the FFWCC and USFWS. Additional survey time may be required if listed species are discovered

8. Provide a survey for listed plants identified in 3.04.03

9. Wildlife habitat management and monitoring plans in accordance with 3.04.00 shall be required where listed species are utilizing the site or where wildlife habitat management and monitoring plans are required by the FFWCC or USFWS. These plans shall describe how the project directs incompatible land uses away from listed species and their habitats. Identify the location of listed species nests, burrows, dens, foraging areas, and the

location of any bald eagle nests or nest protection zones on the native vegetation aerial with FLUCFCS overlay for the site. Wildlife habitat management plans shall be included on the SDP or final plat construction plans. Bald eagle management plans are required for sites containing bald eagle nests or nest protection zones, copies of which shall be included on the SDP or final plat construction plans.

10. For sites or portions of sites cleared of native vegetation or in agricultural operation, provide documentation that the parcel(s) were issued a permit to be cleared and are in compliance with the 25 year rezone limitation pursuant to section 10.02.06. For sites permitted to be cleared prior to July 2003, provide documentation that the parcel(s) are in compliance with the 10 year rezone limitation previously identified in the GMP. Criteria defining native vegetation and determining the legality, process and criteria for clearing are found in 3.05.05, 3.05.07 and 10.02.06.

11. Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the Florida Land Use Cover and Forms Classification System (FLUCFCS), and provide a legend for each of the FLUCFCS Codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of **native vegetation** required to be retained on-site. Include the above referenced calculations and aerials on the SDP or final plat construction plans. In a separate report, demonstrate how the preserve selection criteria pursuant to 3.05.07 have been met. Where applicable, include in this report an aerial showing the project boundaries along with any undeveloped land, preserves, natural flowways or other natural land features, located on abutting properties.

12. Include on a separate site plan, the project boundary and the land use designations and overlays for the RLSA, RFMU, ST and ACSC-ST districts. Include this information on the SDP or final plat construction plans.

13. Where off-site preservation of **native vegetation** is proposed in lieu of on-site, demonstrate that the criteria in section 3.05.07 have been met and provide a note on the SDP or final plat construction plans indicating the type of donation (monetary payment or land donation) identified to satisfy the requirement. Include on the SDP or final plat construction plans, a location map(s) and property identification number(s) of the off-site parcel(s) if off-site donation of land is to occur.

14. Provide the results of any Environmental Assessments and/or Audits of the property, along with a narrative of the measures needed to remediate if required by FDEP.

15. Soil and/or ground water sampling shall be required at the time of first development order submittal for sites that occupy farm fields (crop fields, cattle dipping ponds, chemical mixing areas), golf courses, landfill or junkyards or for sites where **hazardous products** exceeding 250 gallons of liquid or 1,000 pounds of solids were stored or processed or where **hazardous wastes** in excess of 220 pounds per month or 110 gallons at any point in time were generated or stored. The amount of sampling and testing shall be determined by a registered professional with experience in the field of Environmental Site Assessment and shall at a minimum test for organochlorine pesticides (U.S. Environmental Protection Agency (EPA) 8081) and Resource Conservation and Recovery Act (RCRA) 8 metals using Florida Department of Environmental Protection (FDEP) soil sampling Standard Operating Procedure (SOP) FS 3000, in areas suspected of being used for mixing and at discharge point of water management system. Sampling should occur randomly if no points of contamination are obvious. Include a background soil analysis from an undeveloped location hydraulically upgradient of the potentially contaminated site. Soil sampling should occur just below the root zone, about 6 to 12 inches below ground surface or as otherwise agreed upon with the registered professional with experience in the field of Environmental Site Assessment. Include in or with the Environmental Site Assessment, the acceptable State and Federal pollutant levels for the types of contamination found on site and indicate in the Assessment, when the contaminants are over these levels. If this analysis has been done as part of an Environmental Audit then the report shall be submitted. The County shall coordinate with the FDEP where contamination exceeding applicable FDEP standards is identified on site or where an Environmental Audit or Environmental Assessment has been submitted.

16. Shoreline development must provide an analysis demonstrating that the project will remain fully functional for its intended use after a six-inch rise in sea level.

17. Provide justification for deviations from environmental LDC provisions pursuant to GMP CCME Policy 6.1.1 (13), if requested.

18. Where applicable, provide evidence of the issuance of all applicable federal and/or state oil and gas permits for proposed oil and gas activities in Collier County. Include all state permits that comply with the requirements of Chapter 62C-25 through 62C-30, F.A.C., as those rules existed on January 13, 2005.

19. Identify any Wellfield Risk Management Special Treatment Overlay Zones (WRM-ST) within the project area and provide an analysis for how the project design avoids the most intensive land uses within the most sensitive WRM-STs and will comply with the WRM-ST pursuant to 3.06.00. Include the location of the Wellfield Risk Management Special Treatment Overlay Zones on the SDP or final plat construction plans. For land use applications such as standard and PUD rezones and CUs, provide a separate site plan or zoning map with the project boundary and Wellfield Risk Management Special Treatment Overlay Zones identified.

20. Demonstrate that the design of the proposed stormwater management system and analysis of water quality and quantity impacts fully incorporate the requirements of the Watershed Management regulations of 3.07.00.

21. For sites located in the Big Cypress Area of Critical State Concern-Special Treatment overlay district (ACSC-ST), show how the project is consistent with the development standards and regulations in 4.02.14.

22. For multi-slip docking facilities with ten slips or more, and for all marina facilities, show how the project is consistent with 5.05.02. Refer to the Manatee Protection Plan for site specific requirements of the Manatee Protection Plan not included in 5.05.02.

23. For development orders within RFMU sending lands, show how the project is consistent with each of the applicable Objectives and Policies of the Conservation and Coastal Management Element of the GMP.

24. The County Manager or designee may require additional data or information necessary to evaluate the project's compliance with LDC and GMP requirements. (LDC 10.02.02.A.3 f)

    The following to be determined at preapplication meeting:
    (Choose those that apply)

    a. Provide overall description of project with respect to environmental and water management issues.
    b. Explain how project is consistent with each of the applicable objectives and policies in the CCME of the GMP.
    c. Explain how the project meets or exceeds the native vegetation preservation requirement in the CCME and LDC.
    d. Indicate wetlands to be impacted and the effects of the impact to their functions and how the project's design compensates for wetland impacts.
    e. Indicate how the project design minimizes impacts to listed species. Describe the measures that are proposed as mitigation for impacts to listed species.

25. PUD zoning and CU petitions. For PUD rezones and CU petitions, applicants shall collate and package applicable Environmental Data Submittal Requirements into a single Environmental Impact Statement (EIS) document, prior to public hearings and after all applicable staff reviews are complete. Copies of the EIS shall be provided to the County Manager or designee prior to public hearings.

26. Is EAC Review (by CCPC) required?

27. PUD master plan or PPL/SDP site plan notes:

    Where preserves occur adjacent to development off site and will be used in lieu of landscape buffers, include the following condition in the environmental commitments section of the PUD document.

    Preserves may be used to satisfy the landscape buffer requirements after exotic vegetation removal in accordance with LDC sections 4.06.02 and 4.06.05.E.1. Supplemental plantings with native plant materials shall be in accordance with LDC section 3.05.07.

AFFIDAVIT OF AUTHORIZATION

FOR PETITION NUMBERS(S) PL20230016211 and PL20230016212

I, Kevin M. Cahill (print name), as Manager (title, if applicable) of KC Naples Tamiami, LLC (company, If applicable), swear or affirm under oath, that I am the (choose one) owner [✓] applicant [ ] contract purchaser [ ] and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Collier County to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application; and that
4. The property will be transferred, conveyed, sold or subdivided subject to the conditions and restrictions imposed by the approved action.
5. We/I authorize Metropolitan Naples, LLC to act as our/my representative in any matters regarding this petition including 1 through 2 above.

Notes:

- *If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.*
- *If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."*
- *If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.*
- *If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.*
- *If the applicant is a trust, then they must include the trustee's name and the words "as trustee".*
- *In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, and then use the appropriate format for that ownership.*

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

COVENANT OF CONTROL

The undersigned do hereby swear or affirm that we are the fee simple titleholders and owners of record of property commonly known as 5396 Myrtle Lane Commercial PUD (Petition Number PL20230016212)

Parcel ID Numbers 60780880001, 60780920000, 60780960002 and 60781000000

(Street address and City, State and Zip Code) and legally described in *Exhibit A* attached hereto.

The property described herein is the subject of an application for Commercial planned unit development (C PUD) zoning. We hereby designate Metropolitan Naples, LLC, legal representative thereof, as the legal representatives of the property and as such, these individuals are authorized to legally bind all owners of the property in the course of seeking the necessary approvals to develop. This authority includes, but is not limited to, the hiring and authorization of agents to assist in the preparation of applications, plans, surveys, and studies necessary to obtain zoning approval on the site. These representatives will remain the only entity to authorize development activity on the property until such time as a new or amended covenant of unified control is delivered to Collier County.

The undersigned recognize the following and will be guided accordingly in the pursuit of development of the project:

1. The property will be developed and used in conformity with the approved master plan including all conditions placed on the development and all commitments agreed to by the applicant in connection with the planned unit development rezoning.
2. The legal representative identified herein is responsible for compliance with all terms, conditions, safeguards, and stipulations made at the time of approval of the master plan, even if the property is subsequently sold in whole or in part, unless and until a new or amended covenant of unified control is delivered to and recorded by Collier County.
3. A departure from the provisions of the approved plans or a failure to comply with any requirements, conditions, or safeguards provided for in the planned unit development process will constitute a violation of the Land Development Code.
4. All terms and conditions of the planned unit development approval will be incorporated into covenants and restrictions which run with the land so as to provide notice to subsequent owners that all development activity within the planned unit development must be consistent with those terms and conditions.
5. So long as this covenant is in force, Collier County can, upon the discovery of noncompliance with the terms, safeguards, and conditions of the planned unit development, seek equitable relief as necessary to compel compliance. The County will not issue permits, certificates, or licenses to occupy or use any part of the planned unit development and the County may stop ongoing construction activity until the project is brought into compliance with all terms, conditions and safeguards of the planned unit development.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED is made this 19 day of December, 2012, by CRE PROPERTIES, INC., a Florida corporation ("**Grantor**"), whose mailing address is 7765 NW 148 Street, Miami Lakes, Florida 33016, in favor of KC NAPLES TAMIAMI, LLC, a Florida limited liability company ("**Grantee**"), whose mailing address is 30 South Wacker Drive, Suite 1710, Chicago, IL 60606.

WITNESSETH:

THAT Grantor, for and in consideration of the sum of Ten Dollars ($10.00) and other valuable consideration, the receipt and adequacy of which is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto Grantee, certain real property located in Collier County, Florida which is more particularly described as follows ("**Property**"):

> Lots 23, 24, 25, 26, 27 and 28, Block A, MYRTLE COVE ACRES, Unit One, according to the Plat thereof, recorded in Plat Book 3, Page 38, of the Public Records of Collier County, Florida.

TOGETHER with all the easements, tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining; and

TO HAVE AND TO HOLD, the same in fee simple forever.

AND Grantor hereby covenants with Grantee that Grantor will warrant and defend the Property against the lawful claims and demands of all persons claiming by, through, or under Grantor, but against none other, and that the Property is free of all encumbrances, except real estate taxes for the year 2013 and subsequent years which are not yet due and payable, assessments and special district levies, zoning and other regulatory laws and ordinances affecting the Property, and easements, reservations, charges, covenants, restrictions, rights of way, and other matters of record (which is not deemed to reimpose same).

Warranty Deed

This Warranty Deed made this 26 day of **February, 2018,** between **Omaida Rives, aka Omalda Rives, a single woman,** whose post office address is **18 Santa Fe Trail, Naples, FL 34113**, grantor, and **KC Naples Tamiami, LLC, A Florida limited liability company**, whose post office address is **30 South Wacker Drive, Suite 1710, Chicago, IL 60606**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Collier County, Florida** to-wit:

Lot 22 of Block "A" in Myrtle Cove Acres (Unit 1), according to the Plat thereof recorded in Plat Book 3 at Page 38, Public Records of Collier County, Florida.

Parcel Identification Number: 60780880001

Also known as: **5396 Myrtle Lane, Naples, FL 34113.**

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2017.**

DRAINAGE AND UTILITY EASEMENT

THIS EASEMENT ("**Easement**") is made and entered into this 2 day of September, 2011, by **CRE PROPERTIES, INC.,** a Florida corporation, whose mailing address is 7765 NW 148th Street, Miami Lakes, Florida 33016 (hereinafter referred to as "**Grantor**"), to **COLLIER COUNTY**, a political subdivision of the State of Florida, whose mailing address is 3299 Tamiami Trail East, c/o the Office of the County Attorney, Suite 800, Naples, Florida 34112, (hereinafter referred to as "**Grantee**").

(Wherever used herein the terms "Grantor" and "Grantee" include all the parties to this instrument and their respective heirs, legal representatives, successors and assigns. Grantor and Grantee are used for singular or plural, as the context requires.)

WITNESSETH:

For and in consideration of TEN DOLLARS ($10.00) and other valuable consideration paid by the Grantee, the receipt and sufficiency of which is hereby acknowledged, Grantor and Grantee do hereby covenant, stipulate and agree as follows:

1. Grantor does hereby convey, grant, bargain and sell unto the Grantee a perpetual, non-exclusive easement over, under, upon and across the lands located in Collier County, Florida and which are more particularly described in Exhibit "A" attached hereto (the "**Easement Area**"), for the purpose of constructing, operating, and maintaining drainage structures and facilities, including but not limited to canals, ditches, swales, earthen berms, rip-rap and retaining wall systems, underground pipes, and various types of water control structures within the Easement Area (collectively, the "**Facilities**"). This Easement includes the right to remove and use any and all excavated material within the Easement Area and to construct and maintain a stabilized roadbed facility capable of providing access for vehicles and equipment over the Easement Area for perpetual maintenance of drainage facilities thereon and adjacent thereto.

2. Grantee shall be solely responsible for all costs related to the installation, operation, maintenance, repair and replacements of the Facilities.

3. Grantor reserves the right and privilege to use the Easement Area in common with the Grantee for all purposes except as herein granted or as might interfere with Grantee's use, occupation or enjoyment thereof.

4. To the extent allowable by Florida law, and subject to the terms of Section 768.28, Florida Statutes, including all monetary limits listed therein, Grantee hereby agrees to indemnify, defend, save and hold Grantor harmless from and against all damages, expenses, losses, claims, injuries and liabilities arising or resulting from or in connection with the Grantee's negligent use of the easements granted herein, and all claims and actions brought by third parties resulting from or arising in connection with the Grantee's negligent use of the easements granted herein.

This property has been acquired under threat of condemnation and is exempt from documentary stamp tax.

5. This Easement shall not establish any rights in or for the benefit of the general public. The exercise of the rights and privileges granted hereby shall be exercised in a manner which does not unreasonably interfere with or disrupt the normal use, business or occupation of the improvements located or to be located on the adjacent property owned by Grantor and its successors and assigns.

6. Grantee acknowledges and agrees that the easements granted hereunder are subject to assessments and easements, reservations, charges, covenants, restrictions, rights of way and other matters of record, without re-imposing any of the same.

7. Grantee shall have the right to place fencing and gates around the Easement Area and shall have the right to limit access. The easement granted herein shall constitute easements running with the land and shall burden the lands described above.

8. In the event it shall be necessary for either party to this Easement to bring suit to enforce any provisions hereof or for damages on account of any breach of this Easement, the prevailing party in any such suit and any appeals therefrom, shall be entitled to recover from any other party, in addition to any damages or other relief granted as the result of such suit, all costs and expenses of such suit and a reasonable attorneys' fee as set by the court.

9. Grantor and Grantee each hereby represent and warrant that they have the legal authority to enter into and execute this Easement and to perform all of the obligations and duties herein.

10. This Easement shall be governed by and construed in accordance with the Laws of the State of Florida.

11. All sections and descriptive headings in this Easement are inserted for convenience only, and shall not affect the construction or interpretation hereof.

12. This Easement constitutes the entire agreement of the parties with respect to the subject matter hereof, and may not be modified or amended except by a written instrument equal in dignity herewith and executed by the parties to be bound thereby.

13. This Easement shall take effect on the date that this Easement is fully executed by the parties.

14. If any provision of this Easement is held to be illegal, invalid or unenforceable under present or future laws, such provision shall be fully severable; this Easement shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of this Easement, and the remaining provisions of this Easement shall remain in full force and effect and shall not be affected by such illegal, valid or unenforceable provision or by its severance from this Easement. This Easement shall not be construed more strongly against either party as the parties have negotiated the terms of this Easement.

GENERAL NOTES:
1. THIS SURVEY IS BASED UPON RECORD INFORMATION PROVIDED BY CLIENT. NO SPECIFIC SEARCH OF THE PUBLIC RECORD HAS BEEN MADE BY THIS OFFICE UNLESS OTHERWISE NOTED.
2. ANY FENCES SHOWN HEREON ARE ILLUSTRATIVE OF THEIR GENERAL POSITION ONLY. FENCE TIES SHOWN ARE TO GENERAL CENTERLINE OF FENCE. THIS OFFICE WILL NOT BE RESPONSIBLE FOR DAMAGES RESULTING FROM THE REMOVAL OF, OR CHANGES MADE TO, ANY FENCES UNLESS WE HAVE PROVIDED A SURVEY SPECIFICALLY LOCATING SAID FENCES FOR SUCH PURPOSES. DETERMINATION OF FENCE POSITIONS SHOULD BE BASED SOLELY ON THEIR PHYSICAL RELATIONSHIP TO THE MONUMENTED BOUNDARY LINES.
3. GRAPHIC REPRESENTATIONS MAY HAVE BEEN EXAGGERATED TO MORE CLEARLY ILLUSTRATE MEASURED RELATIONSHIPS - DIMENSIONS SHALL HAVE PRECEDENCE OVER SCALED POSITIONS.
4. UNDERGROUND IMPROVEMENTS HAVE NOT BEEN LOCATED EXCEPT AS SPECIFICALLY SHOWN.
5. ELEVATIONS ARE BASED UPON NATIONAL GEODETIC VERTICAL DATUM (N.G.V.D. 1929) OR NORTH AMERICAN VERTICAL DATUM (N.A.V.D. 1988) AS SHOWN HEREON.
6. ALL BOUNDARY AND CONTROL DIMENSIONS SHOWN ARE FIELD MEASURED AND CORRESPOND TO RECORD INFORMATION UNLESS SPECIFICALLY NOTED OTHERWISE.
7. ANY CORNERS SHOWN AS "SET" HAVE EITHER BEEN SET ON THE DATE OF FIELD WORK, OR WILL BE SET WITHIN 2 BUSINESS WEEKS OF SAID DATE AND ARE IDENTIFIED WITH A CAP MARKED LB (LICENSED BUSINESS) #8507.

Job Nr: 188277-SW	Date of Field Work : 10/16/2023	Drawn by: E.I.

I HEREBY CERTIFY THAT THIS SURVEY MEETS THE STANDARDS OF PRACTICE AS OUTLINED IN CHAPTER 5J-17.051 & 5J-17.052 OF THE FLORIDA ADMINISTRATIVE CODE, PURSUANT TO SECTION 472.027, FLORIDA STATUTES, AND THAT THE ELECTRONIC SIGNATURE AND SEAL HEREON MEETS PROCEDURES AS SET FORTH IN CHAPTER 5J-17.062. PURSUANT TO SECTION 472.025, FLORIDA STATUTES.

marcoe@prodigy.net

3.08.00 Environmental Data

Purpose

As per requirements in LDC Sections 3.08.00 and questions in the CU Checklist

Preparation Of Environmental Data

Preparation of Environmental Data, Environmental Data Submittal Requirement shall be prepared by an individual with academic credentials and experience in the area of environmental science or natural resource management. Academic credentials and experience shall be a bachelor's or higher degree in one of the biological sciences with at least two years of ecological or biological professional experience in the State of Florida

Qualifications of Environmental Consultant
Collier Environmental Consultants Inc. 2/96 - Present
3211 68th Street SW
Naples, Florida 34105

Marco A. Espinar- Biologist

Environmental Data. The following shall be submitted where applicable to evaluate projects.

A) Wetlands

i) Identify on Current Aerial / the location of all Collier County / SFWMD Jurisdictional wetlands according to the Florida Land Use Cover and Forms Classification System FLUCFCS

A FLUCFCS map and vegetation inventory has been included. The site consists of approximately 8.24 acres. This parcel is located on the south side of Myrtle Lane and US 41 (Tamiami Trail). The parcel is in Section 29 Township 50 Range 26. The parcel is heavily infested with exotics such as Melaleuca, Brazilian pepper, and ear leaf acacia. At the north east corner is a lower area primary vegetated with Melaleuca, Laurel ok sawgraas and swamp fern. This area may be considered Jurisdictional wetlands. The reaming areas are either cleared or heavily infested with exotic and a Slash pine canopy.

The applicant is proposing to rezone the 8.24+/- acre property from the Myrtle Woods CPUD and RFM-6 Zoning Districts to a Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. The site is proposed to be developed with a U-Haul smart mobility center that will be a modern facility designed to meet the indoor storage and moving needs for the growing Collier

County market. This will be a replacement facility for the existing U-Haul facility that has operated 5 miles to the west in the Mini-triangle redevelopment area. U-Haul has outgrown the existing smaller site and the 8.4 acre site at Myrtle Lane and U.S. 41 is of sufficient size to build a modern indoor self-storage facility, with an area of sufficient size to allow for their rental fleet of vehicles as well as retail sales for moving supplies.

B) Listed Species and Bald Eagle Nests and Nest Protection Zones

i) Provide a wildlife survey for the nests of bald eagle and for listed species known to inhabit biological communities similar to those existing on site. The survey shall be conducted in accordance with the guidelines or recommendations of the FFWCC and the USFWS. Survey times may be reduced or waived where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low as determined by the FFWCC and USFWS. Where an initial habitat assessment by the environmental consultant indicates that the likelihood of listed species occurrence is low, the survey time may be reduced or waived by the County Manager or designee.

Wildlife Listed Species Study
(LDC10.02.3.A.2.m)

A brief examination of the parcel found no listed animals on site. The site does provide some limited habitat for small, mammals and birds. The site shows past signs of greater functional capability. The site is surrounded by either development or roadway. In addition, the density of exotics is extremely limiting. A listed species study was conducted and attached.

This project site is not in the consultation panther zone and there are no known eagle nests nearby. This wildlife survey found no listed animal species.

Black bears are known to inhabit the neighboring areas. During the Site Development Plan process a Black Bear Management Plan may be required. This management plan would focus on lowering Black bear interaction.

This project meets the Objective of CCME Objective 7.1.

The area proposed to be impacted consists of lower grade habitat. Brazilian pepper dominates the midstory. No listed species should be impacted by this development.

CCME OBJECTIVE 7.1: Direct incompatible land uses away from listed animal species and their habitats. (The County relies on the listing process of State and Federal agencies to identify species that require special protection because of their endangered, threatened, or species of special concern status. Listed animal species are those species that the Florida Fish and Wildlife Conservation Commission has designated as endangered,

ii) Provide Listed Plants identified in LDC Section 3.04.03

See Attached Vegetation List / FLUCCS Code Map

iii) Wildlife Management Plans in accordance with LDC Section 3.04.00

See Attached Listed Species Study, Black bear management plan may be required at the time of SDP.

C) Native Vegetation Preservation

i) For Sites or Portions of Sites Cleared of Native Vegetation or in Agricultural Use:

Not Applicable

ii) Identify on a current aerial the acreage, location and community types of all upland and wetland habitats on the project site, according to the FLUCFCS system and provide a legend foe each of the FLUCFS codes identified. Aerials and overlay information must be legible at the scale provided. Provide calculations for the acreage of native vegetation required to be retained on site. Include the above referenced calculations and aerials on the SDP or PPL. In a separate report, demonstrate how the preserve criteria pursuant to LDC section 3.05.07 have been meet.

Location Maps / Aerials
(LDC10.02.3.A.2.m)
Aerials and location maps have been provided.

The entire parcel consists of approximately 8.24 acres.
The parcel is in Section 29, Township 50, Range 26; in Collier County, Florida. The parcel is located at the intersection of Myrtle Lane and US 41 (Tamiami Trail). The dominant forest type on this project site consists of 424H Hydric Melaleuca, 438 E4 Mixed Hardwoods with an exotic level of (76% 100%), 740 Disturbed Areas, 832 FPL easement.

424 H – Hydric Melaleuca	0.95 acres
438E4 – Mixed Hardwoods exotic level (76 – 100%)	3.93 acres
740 - Disturbed	3.01 acres
832 – FPL	0.35 acres
TOTAL	8.24 acres

See Attached Location Maps, Vegetation Maps / FLUCCS Maps

Native Vegetation Calculation
(LDC3.05.07.A.)

3.05.07 Preservation Standards

Based on the LDC a required preservation of 15 % of Native vegetation preservation would be required for this size parcel. However, this site has NO native habitat. The site is entirely vegetated with exotics such as Melaleuca, Java plum, ear leaf acacia and Brazilian pepper. A few native trees can be seen scattered throughout. These include a few Slash pines and Cabbage palms. Some scattered palmettos are also readily visible.

This will be consistent with Goal 6 of Collier County GMP's Objective 6.1 Protect native communities through the application of minimum preservation requirements.

Clearly identify the location of all preserves:

The preserve area has been identified on the Exhibit Master plan.

LISTED SPECIES SURVEY

Collier County, Florida

January 2023

Prepared By:

Collier Environmental Consultants, Inc.
3211 68th Street SW
Naples, Florida 34105
(239) 263 – 2687
marcoe@prodigy.net

I Introduction / Purpose

This report is an account of a Listed Species survey recently performed on a 8.24 acre tract called 5396 Myrtle Lane CPUD. Required to meet county review requirements its purpose is to identify and describe key habitats and report any listed species using the site that would be at risk due to possible future development actions on the site. This examination took place during November 21 - 24, 2023.

II Site Description

The entire parcel consists of approximately 8.24 acres. The parcel is in Section 29, Township 50, Range 26; in Collier County, Florida. The parcel is located at the intersection of Myrtle Lane and US 41 (Tamiami Trail). The dominant forest type on this project site consists of 424H Hydric Melaleuca, 438 E4 Mixed Hardwoods with an exotic level of (76% - 100%), 740 Disturbed Areas, 832 FPL easement.

See Item # 1 - Location Map

In total the site consists of approximately 8.24 acres. The following is how the acreage figures breakdown.

424 H – Hydric Melaleuca	0.95 acres
438E4 – Mixed Hardwoods exotic level (76 – 100%)	3.93 acres
740 - Disturbed	3.01 acres
832 – FPL	0.35 acres
TOTAL	8.24 acres

See Item #2 - FLUCCS Map

The entire site is dominated by exotics. The site does have some native vegetation such as Cabbage palms, Slash pine, cypress and scattered palmetto. However, exotics dominate. Melaleuca, Brazilian pepper, ear leaf acacia and Downy rose myrtle dominate the entire site.

III Listed Species Survey

The required survey for a Listed Species Survey calls for a survey covering 100 % of the site, at prescribed transect distances per site acreage. Such a survey was attempted in November 21 - 24, 2023. Established transects oriented north - south and east - west and superimposed on an aerial map.

Both meandering and linear transects and stationary observations were conducted. Early morning (0730 - 1000), mid-day (1100 - 1500) and late-day (1500 - 1800) time periods were chosen to survey these transects. All possible species of plants and animals listed by state and federal agencies were noted. Concurrently, notes for FLUCCS mapping purposes were kept.

IV Results & Discussions

Listed Flora

See Item # 3 - FLUCCS Plant List

Listed Fauna

See Item # 4 - Wildlife Species Observed

Key Species Discussion

Florida Black Bear

No individuals were observed during this survey even though Black bears are known to inhabit the general area. Special attention was given for signs such as scraps, tracks and scat. This mammal has a large home range and is known to inhabit the area. Black bear nuisance calls do show up in this area. An exhibit has been provided.

Bonneted Bat

The Florida bonneted bat is the largest species of bat in Florida. Previously known as the Florida (Wagner's) mastiff bats these bats were reclassified as a separate species unique to Florida. The species can grow to a length of 6.5 inches with a wingspan of 20 inches. This is a flying mammal free to traverse great distances.

Examination of all trees with potential cavities was conducted. The density of Brazilian pepper and other midstory plants may impede flight patterns. No individuals and/or guano were found. This project is not anticipated to negatively impact the species.

Florida Panther

This parcel would be considered in the urban area. The site is not in the Panther Consultation Area.

Conclusions

Focused searches were conducted over several days.

This parcel is dominated by a variety of exotic vegetation. The site does have a few scattered native Slash pines. However, the entire site is dominated with Brazilian pepper, java plum, ear leaf acacia and Melaleuca. Old world climbing fern was also identified onsite. This site is very limited as viable habitat for any vertebrates. The site is also bordered by US 41 and commercial buildings and is located on what would be considered urban lands. If utilized by any vertebrates, they would be birds traversing the site and/or small mammals commonly found in urban areas. This study found no listed vertebrates on site.

Threatened, Endangered and Species of Special Concern

Appendix E: Existing Site Counts 44

Project Description

The applicant is proposing to rezone property from the Myrtle Woods CPUD and RFM-6 Zoning Districts to a Commercial PUD to allow development of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses. This will be a replacement facility for the existing U-Haul facility 5 miles to the west in the Mini-triangle redevelopment area. The property is within Section 29, Township 50S, Range 26E and consists of ±8.24 acres. Refer to **Figure 1 – Project Location Map** and **Appendix A: Project Master Site Plan**.

Figure 1 – Project Location Map

The project will consist of a truck rental operation and 200,000 square feet (SF) of self-storage.

A methodology memorandum was transmitted via email to the Collier County Transportation Planning staff on January 24, 2024 (ref. **Appendix B: Initial Meeting Checklist (Methodology Meeting)**).

The project access connection to the surrounding roadway network is proposed as direct connections onto US 41 East and Myrtle Ln (emergency only). A detailed evaluation will be performed at the time of site development permitting.

The analysis year is 2029.

Trip Generation

The PUD is treated for trip generation purposes as 3,000 SF of truck rental office space represented by Institute of Transportation Engineers (ITE) land use code (LUC) 812, 200,000 SF of self-storage (LUC 151), and the three-day average peak hour trips counted at the existing site (daily not available) factored to peak season using the FDOT 2023 Countywide peak season conversion factor (all in **Appendix E)**.

The ITE rates or equations are used for the trip generation calculations, as applicable. The ITE 11th edition data pages are provided in **Appendix C**. The trip generation associated with the proposed build-out condition is summarized in **Table 1.**

Under the existing zoning, a typical development scenario could be 61,000 SF of shopping center. Its net new trip generation (excluding pass-by trips) is shown in **Table 1** for comparison (see **Appendix C** for details). The proposed development is projected to generate significantly less traffic.

Table 1 - Trip Generation

Use	ITE LU#	Measure-ment Unit	# of Units	Rate (1) or Eqn. (2)			Trips	Daily Traffic	Reduct-ion %	PM Peak Hour			Reduct-ion %	AM Peak Hour		
				Daily	AM	PM				In	Out	Total		In	Out	Total
Building Material and Lumber Store	812	1000 SF	3.000	1	1	1	Total	51		3	4	7		3	2	5
Mini-Warehouse	151	1000 SF	200	1	1	1		290		14	16	30		11	7	18
Existing Site										13	12	25		8	8	16
Total								341		30	32	62		22	17	39
Existing								3,501		116	122	238		49	30	79
Net Change								(3,160)	-	(86)	(90)	(176)	-	(27)	(13)	(40)

Trip Generation Rates from ITE *Trip Generation Manual* 11th Ed.

U-Haul Existing Site Traffic Counts in Appendix E - Existing Daily traffic not available.

In agreement with the Collier County TIS guidelines, significantly impacted roadways are identified based on the proposed project highest peak hour trip generation (net new total trips) and consistent with the peak hour of the adjacent street traffic. Based on the information contained in the Collier County 2023 Annual Update and Inventory Report (AUIR), the peak hour for the adjacent roadway network is PM peak hour.

The estimated effect on external trips at project buildout condition is a reduction of 176 PM peak hour two-way trips (adjusted).

The maximum total daily trip generation for the PUD shall not exceed 62 two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval.

Trip Distribution and Assignment

The distribution of project traffic was estimated by adding a new traffic analysis zone (TAZ# 2986) to the District 1 Regional Planning Model (D1RPM) containing 40 commercial employees consistent with the expected employment for the truck rental operation and the self-storage unit. **Figure 2** shows the distribution percentages produced by the adopted model in the immediate vicinity of the project.

Figure 2 - Trip Distribution

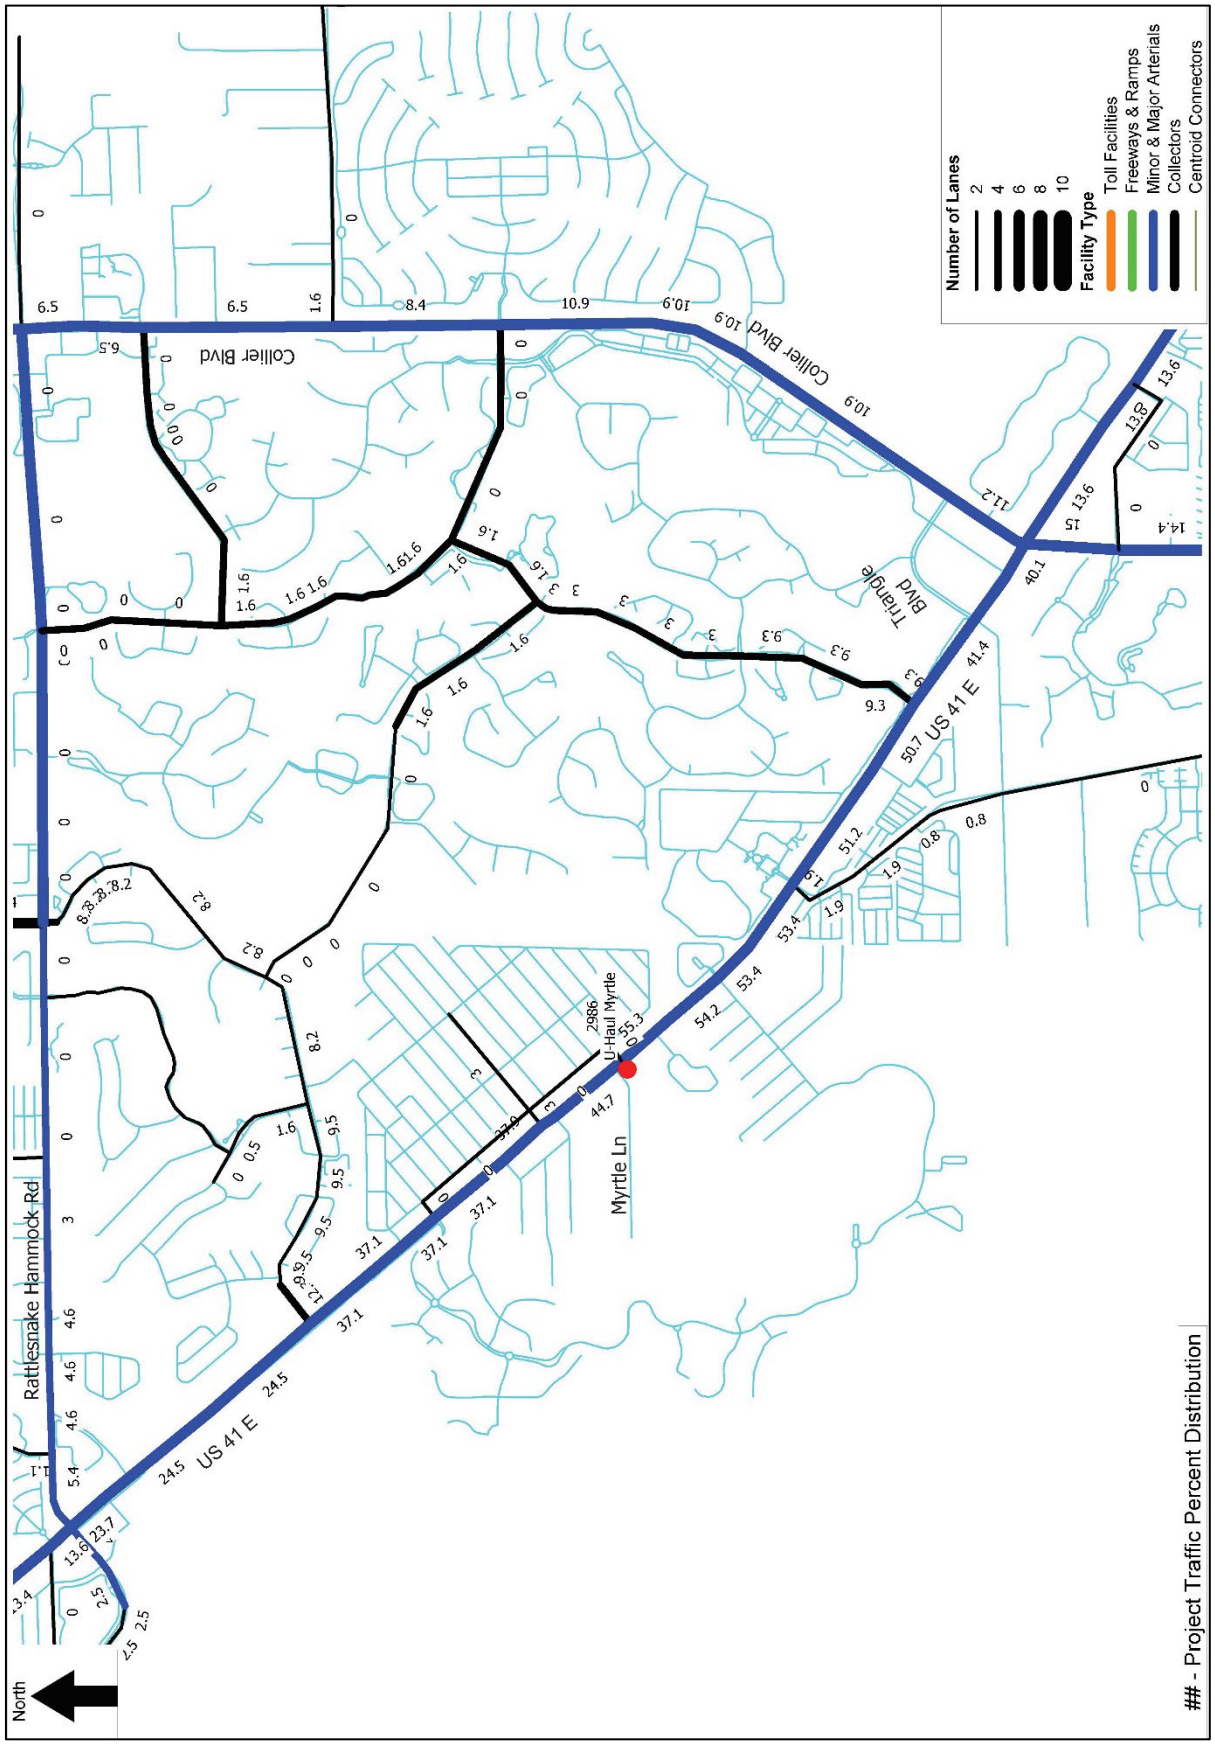

Table 2 contains the arterial and collector road segments on which the project has a significant impact or were reviewed to confirm the limit of significant impact. The distribution percentages are the averages of those at the segment endpoints in **Figure 2**. The traffic volume distributed is the project's estimated impact (62 peak hour two-way).

The calculations that **Table 2** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 2 –Project Traffic Distribution and PM Peak Hour Impact

AUIR ID #	Roadway Link	From	To	Percent of Total Project Traffic (1)	PM Peak Hour Project Traffic N/E (2)	PM Peak Hour Project Traffic S/W (2)	Existing Configuration (3)	LOS Minimum Standard	Peak Hour Peak Direction Service Volume (3)	Significance Threshold (%) (4)	Peak Direction Project Traffic as Percentage of Service Volume	Significant Impact Y/N
93.0	Tamiami Trail East	Rattlesnake Hammock Road	Myrtle Ln	34.2	10	11	6D	E	3000	2	0.4	No
93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	48.4	15	15	6D	E	3000	2	0.5	No

Notes: 1) Figure 2, average of segment endpoints.
2) Percentage times PM peak hour net new external directional project traffic totals Table 1
3) 2023 AUIR
4) Collier County TIS Guidelines

Future Background Traffic Volumes

Tables 3 through 5 contain the road segments to which the project connects.

The existing roadway conditions for arterials and collectors are from the Collier County 2023 AUIR.

In **Table 3**, the annual growth rate listed for arterials and collectors is the one used in the 2023 AUIR to predict future deficiencies and is used to inflate the existing year peak hour peak direction volume from the 2023 AUIR for the first five years (two percent thereafter).

For arterials and collectors, the growth rate derived result is compared with the 2023 AUIR volume plus the trip bank volume. The higher of the two results is used as the future background traffic volume. The calculations that **Table 3** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 3 – Future Background Traffic

AUIR ID #	Roadway Link	From	To	Existing Year	Existing Year Peak Hour Peak Direct-ion Volume (1)	Peak Direct-ion (1)	AUIR Annual Percent Growth Rate for First 5 years (1)	Growth Factor (2)	Trip Bank Volume (1)	2029 Growth Rate Based Peak Hour Peak Direction Back-ground Traffic Volume	AUIR + Trip Bank Volume	2029 Peak Hour Peak Direct-ion Back ground Traffic Volume (3)
93.0	Tamiami Trail East	Rattlesnake Hammock Road	Myrtle Ln	2023	2290	E	2.0%	1.126	403	2579	2693	2693
93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	2023	2290	E	2.0%	1.126	403	2579	2693	2693

Notes: 1) 2023 AUIR

2) Growth Factor assumes 2% annual growth after the first 5 years.

3) Greater of Growth based estimate or Existing + Trip Bank

Existing and Future Roadway Conditions Without Project

For arterials and collectors, the future roadway conditions are based on the current Collier County 5-Year Work Program. Roadway improvements that are currently under construction, scheduled to be constructed within the five-year Transportation Improvement Plan (TIP) or Capital Improvement Program (CIP) are considered committed improvements. There are no scheduled improvements to analyzed roadway segments.

Existing and future roadway conditions are illustrated in **Table 4**. The analyzed segments are operating at acceptable level of service in existing conditions. Due to future background traffic all segments are projected to operate at acceptable level of service.

The calculations that **Table 4** contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

Table 4 – Existing and Future Roadway Conditions

AUIR ID #	Roadway Link	From	To	Existing Configuration (1)	Existing Peak Hour Peak Direction Service Volume (1)	Existing Year Peak Hour Peak Direction Volume (1)	Existing Year V/C	Level of Service Deficiency Yes/ No	2029 Future Configuration (2)	Improved	2029 Peak Hour Peak Direction Service Volume (2)	2029 Peak Hour Peak Direction Background Traffic Volume (3)	2029 Background Traffic V/C	2029 Level of Service Deficiency Yes/ No

93.0	Tamiami Trail East	Myrtle Ln	Triangle Boulevard	6D	3000	2290	0.76	No	6D	No	3000	2693	0.90	No

Notes: 1) 2023 AUIR

2) 2023 AUIR or funded improvements

3) Table 3

Future Conditions With Project

Table 5 adds the project traffic volumes developed in **Table 2** to the 2029 background traffic volumes developed in **Table 3.** In cases where the peak direction of project traffic aligns with the peak direction of background traffic, the background traffic portion of the total traffic is the peak hour peak direction volume from **Table 3**.

In the cases where the two peak directions (background and project) are opposed, a D factor of 0.56 is assumed for the background traffic, the average of the values used for interrupted flow facilities in the FDOT Generalized Service Volume Table for Urbanized Areas (see **Appendix D**). This factor is used to estimate the background two-way volume, and hence to establish the two directional components of that two-way volume. Directional project traffic volumes from **Table 2** are added and the maximum of the resulting two total traffic directional volumes is used as the basis of analysis.

All of the analyzed segments are projected to operate at acceptable level of service when project traffic is added to future background traffic.

The calculations that the table contains are performed with more decimal places than those displayed. Using only the displayed decimals may yield slightly different results.

The analyzed roadway segments are not located within Collier County's Transportation Concurrency Exception Area (TCEA). In addition, the proposed development is not situated within a County designated Transportation Concurrency Management Area (TCMA). The TCEA's and TCMA's designations are provided in Policy 5.4 and 5.6 of the Transportation Element – Collier County Growth Management Plan (GMP).

Notes: 1) Table 3
2) Table 2
3) Appendix D
4) Table 4

Site Access Management

The site connection to US 41 East will be analyzed at the site development approval stage.

The posted speed is 50 mph. Left and right turn lanes are recommended based on travel speed.

The recommended deceleration length including taper is 290 feet.

Expected westbound Left Turn = 30 * 55.3% = 17 vehicles.

Expected eastbound Right turn = 30* 44.7% = 13 vehicles.

Improvement Analysis

Based on the results illustrated within this traffic analysis, the proposed project would have a de-minimis impact on the segments of US 41 E to which the project connects. Those segments are currently operating at acceptable level of service and all will operate at acceptable level of service in 2029 with or without project traffic.

The maximum total daily trip generation for the CPUD shall not exceed **62** two-way PM peak hour net trips based on the use codes in the ITE Manual on trip generation rates in effect at the time of application for SDP/SDPA or subdivision plat approval.

Mitigation of Impact

The developer proposes to pay the appropriate Collier County Road Impact Fee as building permits are issued for the project, as applicable.

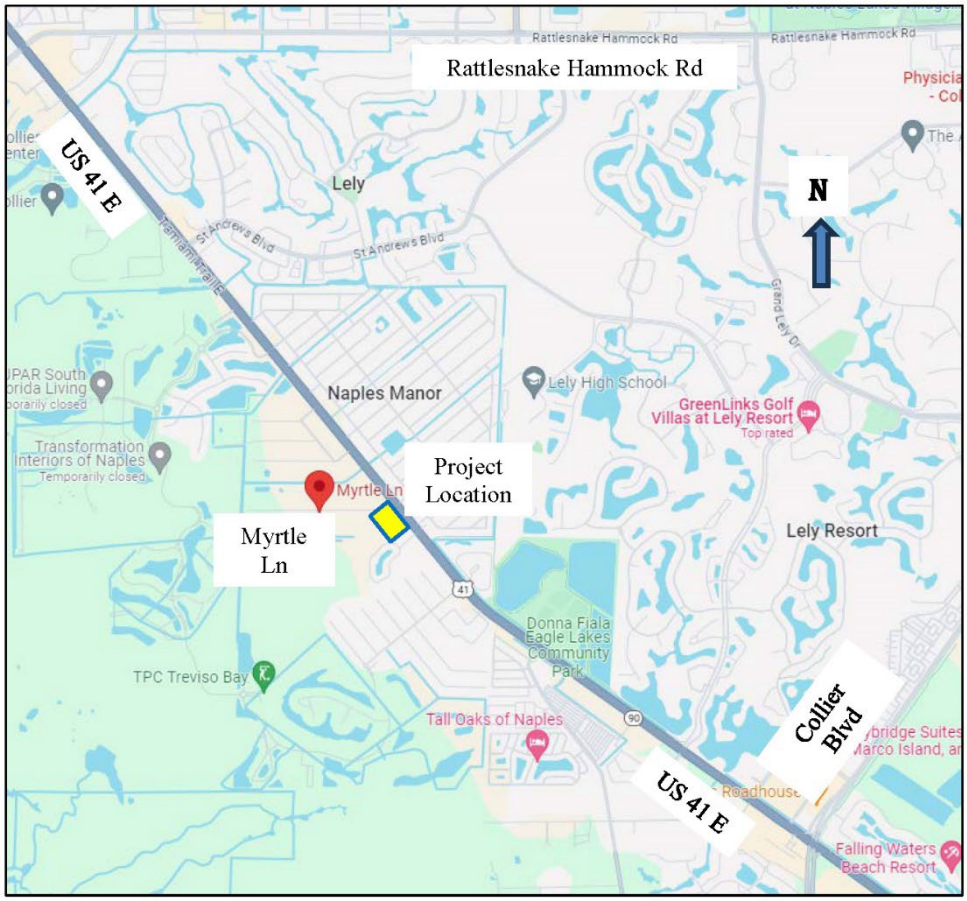
Proposed Development:
Name: U-Haul Relocation
Location: on the south side of Tamiami Trail E at the intersection of Myrtle Ln. (refer to **Figure 1**).

Page **1** of **7**

Figure 1 – Project Location Map



Land Use Type: Mix of truck rental and self-storage.

ITE Code#s:

ITE has no land use code (LUC) for truck rental. LUC 812 Building Material and Lumber Store is proposed as a comparable use and possible replacement for Custom.

Custom – Driveway volume counts at existing location of the truck rental and moving related retail sales.

LUC 151 – Mini-Warehouse.

Description: The application seeks to allow the relocated U-Haul truck rental operation moving from its current location (US 41 E east of its intersection with Davis Blvd.), and add self-storage uses.

Zoning
Existing: Commercial Planned Unit Development (CPUD)
Comprehensive plan recommendation: Urban Fringe.
Requested: PUD Amendment.

Findings of the Preliminary Study:
Study type: Since projected net external AM or PM 2-way peak hour project traffic are expected to be less than 100, this study is expected to qualify as a Minor Study TIS.
Proposed TIS will include trip generation, traffic distribution and assignments, significance test (based on 2%/2%/3% criterion), and operational site access analysis.
The report will provide existing LOS and document the impact the proposed project will have on designated arterial and collector roads.
Roadway concurrency analysis – based on estimated net external PM peak hour traffic.
The TIS shall be consistent with Collier County TIS Guidelines and Procedures.
Site access is via direct access from US 41 East and Myrtle Ln. Access operations will be evaluated at the time of development order application.
No intersection analysis will be provided with the initial report and there will be a follow up operations analysis coordinated with the FDOT.

Study Type: (if not net increase, operational study)

Collier County
Traffic Impact Study Review Fee Schedule

Fees will be paid incrementally as the development proceeds: Methodology Review, Analysis Review, and Sufficiency Reviews. Fees for additional meetings or other optional services are also provided below.

Methodology Review - $500 Fee
Methodology Review includes review of a submitted methodology statement, including review of submitted trip generation estimate(s), distribution, assignment, and review of a "Small Scale Study" determination, written approval/comments on a proposed methodology statement, and written confirmation of a re-submitted, amended methodology statement, and one meeting in Collier County, if needed.

"Small Scale Study" Review - No Additional Fee (Includes one sufficiency review)
Upon approval of the methodology review, the applicant may submit the study. The review includes: a concurrency determination, site access inspection and confirmation of the study compliance with trip generation, distribution and maximum threshold compliance.

"Minor Study Review" - $750 Fee (Includes one sufficiency review)
Review of the submitted traffic analysis includes: optional field visit to site, confirmation of trip generation, distribution, and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of off-site improvements within the right-of-way, review of site access and circulation, and preparation and review of "sufficiency" comments/questions.

"Major Study Review" - $1,500 Fee (Includes two intersection analysis and two sufficiency reviews)
Review of the submitted traffic analysis includes: field visit to site, confirmation of trip generation, special trip generation and/or trip length study, distribution and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of traffic growth analysis, review of off-site roadway operations and capacity analysis, review of site access and circulation, neighborhood traffic intrusion issues, any necessary improvement proposals and associated cost estimates, and preparation and review of up to two rounds of "sufficiency" comments/questions and/or recommended conditions of approval.

"Additional intersection Review" - $500 Fee
The review of additional intersections shall include the same parameters as outlined in the "Major Study Review" and shall apply to each intersection above the first two intersections included in the "Major Study Review"

"Additional Sufficiency Reviews" - $500 Fee
Additional sufficiency reviews beyond those initially included in the appropriate study shall require the additional Fee prior to the completion of the review.

Mini-Warehouse

Description

A mini-warehouse is a building in which a number of storage units or vaults are rented for the storage of goods. They are typically referred to as "self-storage" facilities. Each unit is physically separated from other units, and access is usually provided through an overhead door or other common access point.

Additional Data

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s, the 1990s, the 2000s, and the 2010s in California, Colorado, Massachusetts, Minnesota, Nevada, New Jersey, Texas, and Utah.

Land Use: 812
Building Materials and Lumber Store

Description

A building materials and lumber store is a free-standing building that sells hardware, building materials, and lumber. The lumber may be stored in the main building, yard, or storage shed. Hardware/paint store (Land Use 816) and home improvement superstore (Land Use 862) are related uses.

Additional Data

An outside storage area is not included in the overall gross floor area measurements. However, if the storage area is located within the principal outside faces of the exterior walls, it is included in the overall gross floor area of the building.

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s and the 2010s in California, New York, Texas, and Washington.

Land Use: 821
Shopping Plaza (40-150k)

Description

A shopping plaza is an integrated group of commercial establishments that is planned, developed, owned, and managed as a unit. Each study site in this land use has between 40,000 and 150,000 square feet of gross leasable area (GLA). The term "plaza" in the land use name rather than "center" is simply a means of distinction between the different shopping center size ranges. Various other names are commonly used to categorize a shopping plaza within this size range, depending on its specific size and tenants, such as neighborhood center, community center, and fashion center.

Its major tenant is often a supermarket but many sites are anchored by home improvement, discount, or other stores. A shopping plaza typically contains more than retail merchandising facilities. Office space, a movie theater, restaurants, a post office, banks, a health club, and recreational facilities are common tenants. A shopping plaza is almost always open-air and the GLA is the same as the gross floor area of the building.

The 150,000 square feet GLA threshold value between shopping plaza and shopping center (Land Use 820) is based on an examination of trip generation data. For a shopping plaza that is smaller than the threshold value, the presence or absence of a supermarket within the plaza has a measurable effect on site trip generation. For a shopping center that is larger than the threshold value, the trips generated by its other major tenants mask any effects of the presence or absence of an on-site supermarket.

The 40,000 square feet GFA threshold between shopping plaza and strip retail plaza (Land Use 822) was selected based on an examination of the overall shopping center/plaza database. No shopping plaza with a supermarket as its anchor is smaller than 40,000 square feet GLA.

Shopping center (>150k) (Land Use 820), strip retail plaza (<40k) (Land Use 822), and factory outlet center (Land Use 823) are related uses.

Land Use Subcategory

The presence or absence of a supermarket in a shopping plaza has been determined to have a measurable effect on site trip generation. Therefore, data are presented for two subcategories for this land use: sites with a supermarket anchor and sites without a supermarket.

Additional Data

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s, the 1990s, the 2000s, and the 2010s in Alberta (CAN), British Columbia (CAN), California, Connecticut, District of Columbia, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Nevada, New Jersey, New York, Ontario (CAN), Oregon, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Washington, and Wisconsin.

On a: Weekday,
Peak Hour of Adjacent Street Traffic,
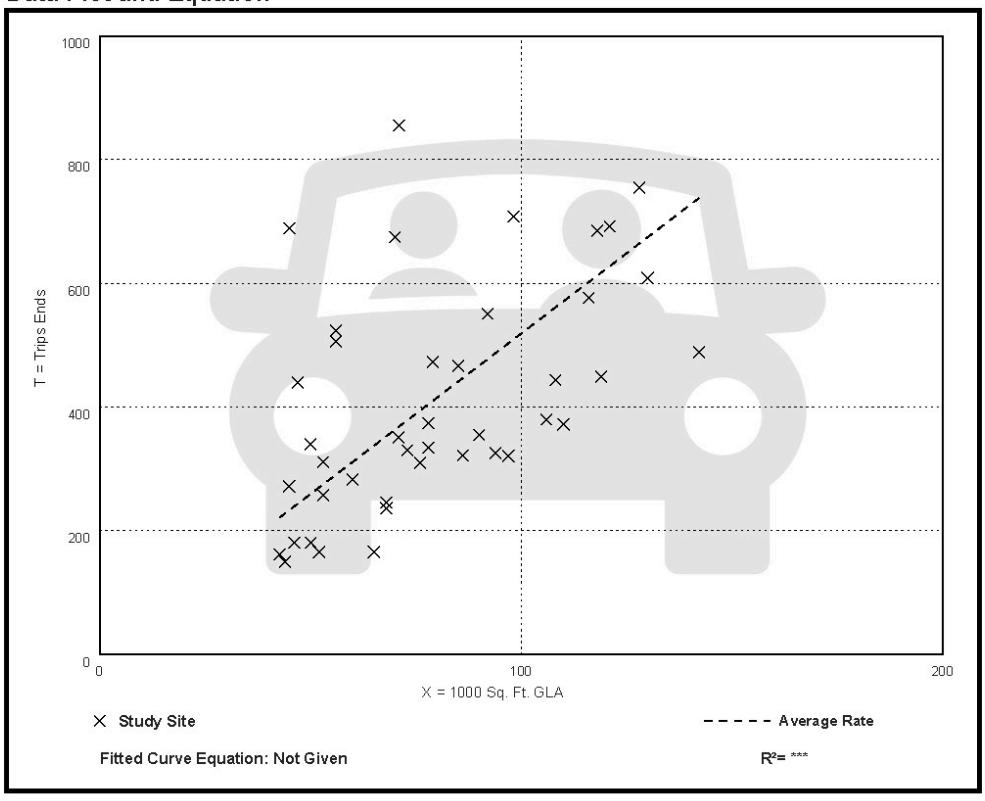
One Hour Between 4 and 6 p.m.
Setting/Location: General Urban/Suburban
Number of Studies: 42
Avg. 1000 Sq. Ft. GLA: 79
Directional Distribution: 49% entering, 51% exiting

Vehicle Trip Generation per 1000 Sq. Ft. GLA

Average Rate	Range of Rates	Standard Deviation
5.19	2.55 - 15.31	2.28

Data Plot and Equation



Appendix D:

FDOT Generalized Level of Service Tables

TABLE 7 Generalized **Peak Hour Directional** Volumes for Florida's Urbanized Areas

January 2020

INTERRUPTED FLOW FACILITIES

STATE SIGNALIZED ARTERIALS

Class I (40 mph or higher posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	830	880	**
2	Divided	*	1,910	2,000	**
3	Divided	*	2,940	3,020	**
4	Divided	*	3,970	4,040	**

Class II (35 mph or slower posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	370	750	800
2	Divided	*	730	1,630	1,700
3	Divided	*	1,170	2,520	2,560
4	Divided	*	1,610	3,390	3,420

Non-State Signalized Roadway Adjustments

(Alter corresponding state volumes by the indicated percent.)

Non-State Signalized Roadways -10%

Median & Turn Lane Adjustments

Lanes	Median	Exclusive Left Lanes	Exclusive Right Lanes	Adjustment Factors
1	Divided	Yes	No	+5%
1	Undivided	No	No	-20%
Multi	Undivided	Yes	No	-5%
Multi	Undivided	No	No	-25%
–	–	–	Yes	+5%

One-Way Facility Adjustment

Multiply the corresponding directional volumes in this table by 1.2

BICYCLE MODE[2]

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes.)

Paved Shoulder/Bicycle Lane Coverage	B	C	D	E
0-49%	*	150	390	1,000
50-84%	110	340	1,000	>1,000
85-100%	470	1,000	>1,000	**

PEDESTRIAN MODE[2]

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes.)

Sidewalk Coverage	B	C	D	E
0-49%	*	*	140	480
50-84%	*	80	440	800
85-100%	200	540	880	>1,000

BUS MODE (Scheduled Fixed Route)[3]

(Buses in peak hour in peak direction)

Sidewalk Coverage	B	C	D	E
0-84%	> 5	≥ 4	≥ 3	≥ 2
85-100%	> 4	≥ 3	≥ 2	≥ 1

UNINTERRUPTED FLOW FACILITIES

FREEWAYS

Core Urbanized

Lanes	B	C	D	E
2	2,230	3,100	3,740	4,080
3	3,280	4,570	5,620	6,130
4	4,310	6,030	7,490	8,170
5	5,390	7,430	9,370	10,220
6	6,380	8,990	11,510	12,760

Urbanized

Lanes	B	C	D	E
2	2,270	3,100	3,890	4,230
3	3,410	4,650	5,780	6,340
4	4,550	6,200	7,680	8,460
5	5,690	7,760	9,520	10,570

Freeway Adjustments

Auxiliary Lane	Ramp Metering
+1,000	+5%

UNINTERRUPTED FLOW HIGHWAYS

Lanes	Median	B	C	D	E
1	Undivided	580	890	1,200	1,610
2	Divided	1,800	2,600	3,280	3,730
3	Divided	2,700	3,900	4,920	5,600

Uninterrupted Flow Highway Adjustments

Lanes	Median	Exclusive left lanes	Adjustment factors
1	Divided	Yes	+5%
Multi	Undivided	Yes	-5%
Multi	Undivided	No	-25%

[1]Values shown are presented as peak hour directional volumes for levels of service and are for the automobile/truck modes unless specifically stated. This table does not constitute a standard and should be used only for general planning applications. The computer models from which this table is derived should be used for more specific planning applications. The table and deriving computer models should not be used for corridor or intersection design, where more refined techniques exist. Calculations are based on planning applications of the HCM and the Transit Capacity and Quality of Service Manual.

[2] Level of service for the bicycle and pedestrian modes in this table is based on number of vehicles, not number of bicyclists or pedestrians using the facility.

[3] Buses per hour shown are only for the peak hour in the single direction of the higher traffic flow.

* Cannot be achieved using table input value defaults.

** Not applicable for that level of service letter grade. For the automobile mode, volumes greater than level of service D become F because intersection capacities have been reached. For the bicycle mode, the level of service letter grade (including F) is not achievable because there is no maximum vehicle volume threshold using table input value defaults.

* PEAK SEASON

09-MAR-2024 18:41:37 830UPD

5396 Myrtle Lane CPUD (PL20230016212)

Deviation Justification

1. Deviation #1 request relief from LDC 5.05.08 D.10.c.ii., Roof Treatments, which requires when a flat roof is screened with a parapet wall or mansard roof at any façade, a parapet or mansard roof treatment must extend along the remaining façades to instead require the parapet roof to be provided on three sides of each building. The deviation would not require the parapet roof to be provided on the southeast (back) roofline of the proposed 4-story indoor storage building or along the southern (back) roofline of the single-story warehouse building as identified on the conceptual PUD master plan.

   Justification:
   The parapet deviation is warranted on the single side of each of the two buildings as this area of each building does not face a public right of way, and the area represents the rear of the building which will not have any line of sight by the general public.

2. Deviation 2 seeks relief from LDC Section 5.06.04.F.4, On-premise Signs, which permits one wall, mansard, canopy or awning sign shall be permitted for each single-occupancy parcel, or for each unit in a multiple-occupancy parcel. Sign(s) shall be affixed to the associated tenant or lease holder's unit, with exceptions for architectural design impediments, as noted in LDC section 5.06.04 F.4.b. End units within shopping centers and multiple-occupancy parcels, or single occupancy parcels where there is double frontage on a public right-of-way, shall be allowed 2 signs, but such signs shall not be placed on one wall. Retail businesses with a floor area of larger than 25,000 square feet and a front wall length of more than 200 linear feet, are allowed 3 wall signs; however, the combined area of those signs shall not exceed the maximum allowable display area for signs by the LDC.

   To instead allow for Building A, the U-Haul Indoor Self Storage Retail Center to be 1,327 square feet with a total of 2 wall signs. The East elevation wall sign exceeds 80% of the building width and clear space and for Building B, U-Box warehouse to have a single sign with 380 square feet of area. Please see the proposed building signage exhibits for each building.

   Justification:
   Our main Center is a combined Retail Store, Self-Storage and Truck Rental facility measuring 46,488 square feet that has a total Gross Square Footage of 139,464 square feet for all 3 floors. The U-Box building measures 20,239 square feet and is setback 514' from Hwy 41 property line.

   When you consider the various products and services, we offer from our business and the size of the development, we believe the signage is appropriate in size and number of signs. The clear space for building A east elevation sign is

dictated by the building architectural features. We believe the U-Box signage scale is appropriate for building setback.

The development entrance is US Hwy 41 which is a six-lane major arterial with 50 mph speed limit, which makes it difficult to focus in on just one section of the main building to identify the development and services.

Please keep in mind our customers are often driving a 32' long moving truck and they typically don't have a lot of experience with driving a truck that size and or may not be familiar with the area. We want to give our drivers enough time to make safe lane changes to exit Highway 41 and avoid traffic hazards.

For these reasons the additional signage proposed will meet the intent of the Collier County Sign Code, reducing traffic hazards to pedestrians and motorists by locating signage in visible locations on the buildings.

ORDINANCE NO. 08- 09

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 2004-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE WHICH INCLUDES THE COMPREHENSIVE ZONING REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, BY AMENDING THE APPROPRIATE ZONING ATLAS MAP OR MAPS BY CHANGING THE ZONING CLASSIFICATION OF THE HEREIN DESCRIBED REAL PROPERTY FROM A PLANNED UNIT DEVELOPMENT (PUD) ZONING DISTRICT AND A GENERAL COMMERCIAL (C-4) ZONING DISTRICT TO A COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD) ZONING DISTRICT FOR A 7.04+/- ACRE PARCEL LOCATED ON TAMIAMI TRAIL EAST (US 41), SOUTH OF MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA; PROVIDING FOR THE REPEAL OF ORDINANCE NUMBER 81-23, THE FORMER MYRTLE WOODS PUD; AND BY PROVIDING AN EFFECTIVE DATE.

FILED
2008 FEB 20 PM 4:19
DEPARTMENT OF STATE
TALLAHASSEE, FLORIDA

WHEREAS, on May 5, 1981, the Board of County Commissioners adopted Ordinance Number 81-23 establishing the Myrtle Woods PUD; and

WHEREAS, Myrtle Woods, LLC, represented by Dwight Nadeau of RWA, Inc., petitioned the Board of County Commissioners to change the zoning classification of the herein described real property.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

SECTION ONE:

The zoning classification of the herein described real property located in Section 29, Township 50 South, Range 26, Collier County, Florida, is changed from a Planned Unit Development (PUD) Zoning District and a General Commercial (C-4) Zoning District to a Commercial Planned Unit Development (CPUD) Zoning District for a 7.04+/- acre parcel to be known as the Myrtle Woods CPUD, in accordance with Exhibits A through F attached hereto and incorporated by reference herein. The appropriate zoning atlas map or maps, as described in Ordinance Number 2004-41, as amended, the Collier County Land Development Code, is/are hereby amended accordingly.

SECTION TWO:

Ordinance Number 81-23, known as the Myrtle Woods PUD, adopted on May 5, 1981, by the Board of County Commissioners is hereby repealed in its entirety.

SECTION THREE:

This Ordinance shall become effective upon filing with the Department of State.

PASSED AND DULY ADOPTED by super-majority vote of the Board of County Commissioners of Collier County, Florida, this 12th day of February, 2008.

ATTEST:
DWIGHT E. BROCK, CLERK

By: _____, Deputy Clerk

Attest as to Chairman's signature only.

PERMITTED USES

Table I

PROJECT LAND USE TRACTS

	TYPE	GSF	ACREAGE±
TRACT "CO"	COMMERCIAL	61,000	4.53
TRACT "U"	UTILITY	0	1.53
TRACT "P"	PRESERVE	0	0.98

Note: GSF is gross square feet.

I **PERMITTED USES:**

Within the CO, Commercial Tract, no building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the following:

A. Principal Uses:

1) Commercial banks – including those commercial banks with drive-through facilities (Groups 6021-6029).

2) Real estate agents and managers (Group 6531).

3) Hardware store only (Group 5251).

4) Variety stores – 5,000 square foot maximum floor area (Group 5331).

5) Miscellaneous general merchandise stores, except catalog showrooms – 5,000 square foot maximum floor area (Group 5399).

6) Grocery stores, except frozen food and freezer plants – 10,000 square foot maximum floor area (Group 5411).

7) Fish, meat, and seafood markets only (Group 5421).

8) Fruit and vegetable markets (Group 5431).

9) Retail bakeries (Group 5461).

10) Health food store only – 2,500 square foot maximum floor area (Group 5499).

11) Apparel and accessory stores – 2,500 square foot maximum floor area (Groups 5611-5661).

12) Record and prerecorded tape stores (Group 5735).

13) Eating places, except caterers and industrial and institutional food service establishments, dinner theaters, drive-in restaurants and restaurants with drive-through facilities (Group 5812). Outdoor entertainment, outdoor televisions, speakers, and amplified sound are prohibited.

14) Agents for laundries and drycleaners only (Group 7212).

15) Dry cleaning (Group 7215).

16) Diaper service, and garment alteration and repair shops only (Group 7219).

17) Beauty shops, except beauty schools and cosmetology schools (Group 7231).

18) Barber shops, except barber colleges (Group 7241).

19) Depilatory salon, electrolysis, massage parlor, shopping service for individuals, and tanning salons only (Group 7299).

20) Housekeeping and maid service only (Group 7349).

21) Video tape rental (Group 7841).

22) Physical fitness facilities (Group 7991).

23) Offices and/or clinics of physicians, and offices and/or clinics of dentists (Groups 8011-8021).

24) Offices and clinics of chiropractors (Group 8041).

25) Motor vehicle dealers-only new (Group 5511).

26) Miscellaneous retail (Groups 5912, 5941-5949, and 5992-5999, with the retail sales of fireworks prohibited).

Reference Executive Office of the President, Office of Management and Budget, *Standard Industrial Classification Manual*, 1987 Edition.

Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals ("BZA") by the process outlined in the LDC.

All retail establishments shall be located only on the ground floors of commercial buildings.

B. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1) Parking facilities.

2) One caretaker's residence.

3) Uses and structures that are accessory and incidental to the uses permitted as of right.

II PROHIBITED USES:

The applicant has agreed on the record that the following uses shall be prohibited in this CPUD Zoning District:

1) Soup kitchens
2) Pawn shops
3) Tattoo parlors
4) Adult X-rated video stores
5) Bail bonds offices
6) Homeless shelters
7) Any business establishment displaying any obscene or offensive name.

III REGULATIONS FOR DEVELOPMENT:

Regulations for development of this project shall be in accordance with the contents of this ordinance and other sections and parts of the Land Development Code and Growth Management Plan in effect at the time of site development plan, subdivision plat, or any other type of approval to which those regulations apply.

EXHIBIT B
DEVELOPMENT STANDARDS

GENERAL:

Development of the Myrtle Woods CPUD shall be in accordance with the contents of this Ordinance and applicable sections of the Collier County Land Development Code (LDC) and Growth Management Plan (GMP) in effect at the time of issuance of any development order, such as, but not limited to, final subdivision plat, final site development plan, excavation permit, and preliminary work authorization, to which such regulations relate. Where these regulations fail to provide developmental standards, then the provisions of the most similar district in the LDC shall apply.

Except as provided for herein, all criteria set forth below shall be understood to be in relation to individual parcel or lot boundary lines, or between structures. Commercial condominium, and/or property owners' association boundaries shall not be utilized for determining development standards.

Table I below sets forth the development standards for land uses within the CPUD Commercial Subdistrict. Standards not specifically set forth herein shall be those specified in applicable sections of the LDC in effect as of the date of approval of the site development plan (SDP) or subdivision plat.

TABLE I
DEVELOPMENT STANDARDS FOR COMMERCIAL DISTRICT

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 Sq. Ft.	N/A
MINIMUM LOT WIDTH	75 Ft.	N/A
MINIMUM YARDS		
Front	25 Ft.	15 Ft.
Rear	50% of the building height, but not less than 15 Ft.	10 Ft.
Side	50 % of the building height, but not less than 15 Ft.	10 Ft.
MIN. DISTANCE BETWEEN STRUCTURES	15 Ft.	50% of the building height, but not less than 15 Ft.
MAXIMUM HEIGHT (ZONED)		
Retail Buildings	3 stories, NTE 50 Ft.*	N/A
Office Buildings	3 stories NTE 50 Ft.*	N/A
MINIMUM FLOOR AREA	700 Sq. Ft. **	N/A

* Architectural appurtenances shall not exceed 75 feet in "actual" height.
** Per principal structure, on the finished first floor.

Note: NTE represents "not to exceed".

LOTS 23, 24, 25, 26, 27 AND 28, MYRTLE COVE ACRES, BLOCK A, UNIT 1, AS RECORDED IN PLAT BOOK 3, PAGE 38 OF THE PUBLIC RECORDS OF COLLIER COUNTY, FLORIDA

EXHIBIT E
LIST OF DEVIATIONS

None

EXHIBIT F
LIST OF DEVELOPER COMITMENTS

TRANSPORTATION

A. All traffic control devices, signs, pavement markings and design criteria shall be in accordance with Florida Department of Transportation (FDOT) *Manual of Uniform Minimum Standards (*MUMS*)*, current edition, FDOT *Design Standards*, current edition, and the *Manual on Uniform Traffic Control Devices* (MUTCD), current edition. All other improvements shall be consistent with and as required by the Collier County LDC.

B. Arterial level street lighting shall be provided at all access points. Access lighting shall be in place prior to the issuance of the first certificate of occupancy (CO).

C. Access points shown on the CPUD Master Plan are considered to be conceptual. Nothing depicted on any such Master Plan shall vest any right of access at any specific point along any property frontage. All such access issues shall be approved or denied during the review of required subsequent site plans, final plat submissions, FDOT permits and/or by an approved Developer Contribution Agreement (DCA). All such access shall be consistent with the FDOT Access Management Policy, as it may be amended from time to time. The number of access points constructed may be less than the number depicted on the Master Plan; however, no additional access points shall be considered unless a PUD amendment is approved.

D. If, in the sole opinion of Collier County and FDOT, a traffic signal, or other traffic control device, sign, or pavement marking improvement within any public right-of- way or easement is determined to be necessary, the cost of such improvement shall be the responsibility of the developer, its successors or assigns. The improvements shall be paid for or installed, at the County's and FDOT's direction. This could be prior to the issuance of the appropriate, corresponding CO.

E. Site related improvements (as opposed to system related improvements) necessary for safe ingress and egress to this project, as determined by Collier County, shall not be eligible for impact fee credits. To the extent possible, all the required improvements shall be in place and available to the public prior to commencement of on-site construction.

F. All proposed median opening locations shall be in accordance with the FDOT Access Management Policy, as it may be amended. FDOT and Collier County reserves the right to close any median opening existing at any time which is found to be adverse to the health, safety, and welfare of the public. Any such modifications shall be based on, but not limited to, safety, operational circulation, and roadway capacity.

G. Nothing in any development order (DO) shall vest a right of access in excess of a right-in/right-out condition at any access point. Neither shall the existence of a point of ingress, a point of egress, or a median opening, nor the lack thereof, be the basis for any future cause of action against the County by the developer, its successor in title, or assignee.

H. All internal roads, driveways, alleys, pathways, sidewalks, interconnections to adjacent developments shall be operated and maintained by an entity created by the developer in accordance with the applicable administrative codes and/or statutes of the State of Florida; and Collier County shall have no responsibility for maintenance of any such facilities.

I. If any required turn lane improvement requires the use of existing County rights-of-way or easement(s), then, if required by County staff, compensating right-of-way shall be provided at no cost to Collier County as a consequence of such improvement(s).

J. All off-site access improvements must be completed prior to commencement of on-site construction.

K. The developer shall provide a public access easement from Myrtle Lane to the signalized intersection of US-41 and Broward Street as approximately shown on Exhibit C, CPUD Master Plan. The public access easement shall not be considered road right-of-way and shall not be used for determining setbacks, or buffering requirements. The exact location and design of the public access easement shall be approved by the Transportation Division at the time of SDP application review.

WATER MANAGEMENT

A. Detailed paving, grading and site drainage plans shall be submitted to Engineering Review Services for review and approval. No construction permits shall be issued unless and until approval of the proposed construction, in accordance with the approved plans is granted by Engineering Review Services.

B. The developer shall grant or dedicate a 50 foot wide drainage and utility easement to Collier County as approximately shown on Exhibit C, CPUD Master Plan. This easement dedication shall occur within the earlier of 60-days of written request by the County, or at submittal of the SDP. The easement shall be granted or dedicated at no cost to the County, with the developer providing all appropriate sketches and legal descriptions. At the County's request, the developer shall install drainage and utility facilities in the drainage and utility easement as part of the site construction, with the location of these facilities determined through the SDP review process.

The County shall reimburse the developer within 180-days of the completion of the installation of the utility and drainage facilities.

The County shall not be responsible for the restoration costs of private facilities within the easement should maintenance of the public utility and drainage facilities be required in the future.

UTILITIES

A. Water distribution and sewage collection and transmission facilities to serve the project are to be designed, constructed, conveyed, owned, and maintained in accordance with applicable Collier County ordinances, and other applicable County rules and regulations.

B. All customers connecting to the water distribution and sewage collection facilities will be considered to be customers of the County, and will be billed by the County in accordance with the County's established rates.

C. The development shall be subject to application for and conditions associated with a water and sewer availability letter from Collier County Utilities Division.

D. The developer shall grant a 60 foot by 70 foot well site easement and an associated utilities and access easement to connect the well site easement to a public right-of-way. The County shall compensate the developer for the well easement dedication through impact fee credits based on the fair market value of the land so dedicated. The utilities and access easement shall be 20 feet wide unless the well site is contiguous to a public right-of-way, in which case, it shall be 15 feet wide. The County utility, access easement is for access, installation, operation, and maintenance of transmission mains, power, telemetry lines and appurtenances. This conveyance shall occur at the time the SDP, plat (or similar process) of the area within the development phase that contains the easement is approved by County staff. At the time of SDP and/or plat submittal, the developer shall provide the well site easement that meets the standard setback requirements for water wells.

ENVIRONMENTAL

A. If prehistoric or historic artifacts, such as pottery of ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial of American settlement are encountered at any time within the project site area, the permitted project should cease all activities involving subsurface disturbance in the immediate vicinity off such discoveries. The permittee, or other designee, should contact the Florida Department of State, Division of Historical Resources, Review and Compliance section at (850) 245-6333 or (800)847-7278, as well as the appropriate permitting agency office. Project activities should not resume without verbal and/or written authorization from the Division of Historical Resources. In the event that unmarked human remains are encountered during the permitted activities, all work shall stop immediately and the proper authorities notified in accordance with Florida law.

B. A Florida Fish and Wildlife Conservation Commission (FWC) relocation permit shall be obtained for the relocation of the one gopher tortoise found on site prior to commencement of any construction activities. A copy of the permit shall be forwarded to Environmental Services Staff.

C. The developer shall provide a report to Environmental Services Staff on the results of the relocation of the gopher tortoise within thirty days of the relocation. The report shall include the number of burrows excavated, the number of tortoises relocated, and the final relocation site.

PLANNING

A. The depth of the commercial buildings and parking areas associated with the development shall not exceed 397 feet as measured from the property line fronting on US-41, in order to meet the infill criteria of the GMP.

B. The developer shall install a fence/wall associated with the southern property boundary and the southwest property boundary. No fence/wall shall be installed within the Preserve Tract. The final location of the fence/wall shall be determined during the SDP review process.

2210 Vanderbilt Beach Road, Suite 1201
Naples, FL 34109

Re: Zoning Verification Letter (ZLTR-PL201300001169) regarding lots 23, 24, 25, 26, 27 and 28, Block A; Myrtle Cove Acres (Folio Numbers: 60781000000 & 60870920000) in Section29, Township 50 South, Range 26 East.

Dear Mr. Durant,

In your application found sufficient on June 6, 2013, you asked for staff to confirm the status of the zoning for the above referenced property.

From the information contained in your application, the subject site is zoned as the Myrtle Woods Commercial Planned Unit Development (CPUD) that was approved on February 12, 2008 with the adoption of Ordinance Number: 08-09.

It should be noted that Section 10.02.13.D.2 of the Collier County Land Development Code (LDC), requires physical development of a minimum of 15 percent of the authorized commercial floor area to be completed by the fifth anniversary date of the CPUD approval. Any PUD that has not met the time frame for development as outlined in this LDC provision shall be deemed to have sunseted.

Since no development has occurred within the Myrtle Woods CPUD as of this date, the sunset date was established to occur on February 12, 2013. However, the BCC approved a tolling ordinance (LDC Section 10.02.13.D.12) which tolled the PUD time limit for all active PUD zoned projects for an additional 4 years. Therefore, the resulting new sunset date for this CPUD is now listed as 2/12/2017.

Please be advised that the information presented in this verification letter is based on the Collier County Land Development Code and/or Growth Management Plan in effect as of this date. It is possible that subsequent amend(s) to either of these documents could affect the validity of this verification letter. It is also possible that development of the subject property could be affected by other issues not addressed in this letter, such as, but not limited to, concurrency related to the provision of Adequate Public Facilities, Environmental Impact, and other requirements of the Collier County Land Development Code or related ordinances such as the Building Code.

Should you require further information concerning this matter, please do not hesitate to call me at (239) 252-2484.

Sincerely,

Raymond V. Bellows, Zoning Services Section Manager

Mike

Hope you are well.

On the KC Naples Tamiami parcel, we made some inquiries of the County on the status of the PUD and how to confirm that it can be extended.

Per the below, looks like we can get it extended through 2017, but if you could take a look and let us know of any actions that would need to be taken.

Also regarding that parcel, we received and completed the attached Certification but have not yet sent it in. Perhaps you could also advise who this should be sent to and/or simply send it on as part of getting the PUD extended.

Thanks,

Subj: RE: Myrtle Please email me back on confirmation

It appears the most recent PUD was approved February 2008. Standard 5 year PUD provisions brings you February 2013, with the standard tolling provisions which add 4 years to 2017.

As a suggestion a zoning letter would be the best method of confirmation.

Please let me know of additional questions.

ORDINANCE NO. 08- 09

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING ORDINANCE NUMBER 2004-41, AS AMENDED, THE COLLIER COUNTY LAND DEVELOPMENT CODE WHICH INCLUDES THE COMPREHENSIVE ZONING REGULATIONS FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, BY AMENDING THE APPROPRIATE ZONING ATLAS MAP OR MAPS BY CHANGING THE ZONING CLASSIFICATION OF THE HEREIN DESCRIBED REAL PROPERTY FROM A PLANNED UNIT DEVELOPMENT (PUD) ZONING DISTRICT AND A GENERAL COMMERCIAL (C-4) ZONING DISTRICT TO A COMMERCIAL PLANNED UNIT DEVELOPMENT (CPUD) ZONING DISTRICT FOR A 7.04+/- ACRE PARCEL LOCATED ON TAMIAMI TRAIL EAST (US 41), SOUTH OF MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA; PROVIDING FOR THE REPEAL OF ORDINANCE NUMBER 81-23, THE FORMER MYRTLE WOODS PUD; AND BY PROVIDING AN EFFECTIVE DATE.

FILED
2008 FEB 20 PM 4:19
DEPARTMENT OF STATE
TALLAHASSEE, FLORIDA

WHEREAS, on May 5, 1981, the Board of County Commissioners adopted Ordinance Number 81-23 establishing the Myrtle Woods PUD; and

WHEREAS, Myrtle Woods, LLC, represented by Dwight Nadeau of RWA, Inc., petitioned the Board of County Commissioners to change the zoning classification of the herein described real property.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

SECTION ONE:

The zoning classification of the herein described real property located in Section 29, Township 50 South, Range 26, Collier County, Florida, is changed from a Planned Unit Development (PUD) Zoning District and a General Commercial (C-4) Zoning District to a Commercial Planned Unit Development (CPUD) Zoning District for a 7.04+/- acre parcel to be known as the Myrtle Woods CPUD, in accordance with Exhibits A through F attached hereto and incorporated by reference herein. The appropriate zoning atlas map or maps, as described in Ordinance Number 2004-41, as amended, the Collier County Land Development Code, is/are hereby amended accordingly.

SECTION TWO:

Ordinance Number 81-23, known as the Myrtle Woods PUD, adopted on May 5, 1981, by the Board of County Commissioners is hereby repealed in its entirety.

SECTION THREE:

This Ordinance shall become effective upon filing with the Department of State.

PASSED AND DULY ADOPTED by super-majority vote of the Board of County Commissioners of Collier County, Florida, this 12th day of February, 2008.

PROJECT LAND USE TRACTS

	TYPE	GSF	ACREAGE±
TRACT "CO"	COMMERCIAL	61,000	4.53
TRACT "U"	UTILITY	0	1.53
TRACT "P"	PRESERVE	0	0.98

Note: GSF is gross square feet.

I **PERMITTED USES:**

Within the CO, Commercial Tract, no building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the following:

A. Principal Uses:

1) Commercial banks – including those commercial banks with drive-through facilities (Groups 6021-6029).

2) Real estate agents and managers (Group 6531).

3) Hardware store only (Group 5251).

4) Variety stores – 5,000 square foot maximum floor area (Group 5331).

5) Miscellaneous general merchandise stores, except catalog showrooms – 5,000 square foot maximum floor area (Group 5399).

6) Grocery stores, except frozen food and freezer plants – 10,000 square foot maximum floor area (Group 5411).

7) Fish, meat, and seafood markets only (Group 5421).

8) Fruit and vegetable markets (Group 5431).

9) Retail bakeries (Group 5461).

10) Health food store only – 2,500 square foot maximum floor area (Group 5499).

11) Apparel and accessory stores – 2,500 square foot maximum floor area (Groups 5611-5661).

12) Record and prerecorded tape stores (Group 5735).

13) Eating places, except caterers and industrial and institutional food service establishments, dinner theaters, drive-in restaurants and restaurants with drive-through facilities (Group 5812). Outdoor entertainment, outdoor televisions, speakers, and amplified sound are prohibited.

14) Agents for laundries and drycleaners only (Group 7212).

15) Dry cleaning (Group 7215).

16) Diaper service, and garment alteration and repair shops only (Group 7219).

17) Beauty shops, except beauty schools and cosmetology schools (Group 7231).

18) Barber shops, except barber colleges (Group 7241).

19) Depilatory salon, electrolysis, massage parlor, shopping service for individuals, and tanning salons only (Group 7299).

20) Housekeeping and maid service only (Group 7349).

21) Video tape rental (Group 7841).

22) Physical fitness facilities (Group 7991).

23) Offices and/or clinics of physicians, and offices and/or clinics of dentists (Groups 8011-8021).

24) Offices and clinics of chiropractors (Group 8041).

25) Motor vehicle dealers-only new (Group 5511).

26) Miscellaneous retail (Groups 5912, 5941-5949, and 5992-5999, with the retail sales of fireworks prohibited).

Reference Executive Office of the President, Office of Management and Budget, *Standard Industrial Classification Manual*, 1987 Edition.

Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals ("BZA") by the process outlined in the LDC.

All retail establishments shall be located only on the ground floors of commercial buildings.

B. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1) Parking facilities.

2) One caretaker's residence.

3) Uses and structures that are accessory and incidental to the uses permitted as of right.

II PROHIBITED USES:

The applicant has agreed on the record that the following uses shall be prohibited in this CPUD Zoning District:

1) Soup kitchens
2) Pawn shops
3) Tattoo parlors
4) Adult X-rated video stores
5) Bail bonds offices
6) Homeless shelters
7) Any business establishment displaying any obscene or offensive name.

III REGULATIONS FOR DEVELOPMENT:

Regulations for development of this project shall be in accordance with the contents of this ordinance and other sections and parts of the Land Development Code and Growth Management Plan in effect at the time of site development plan, subdivision plat, or any other type of approval to which those regulations apply.

EXHIBIT B
DEVELOPMENT STANDARDS

GENERAL:

Development of the Myrtle Woods CPUD shall be in accordance with the contents of this Ordinance and applicable sections of the Collier County Land Development Code (LDC) and Growth Management Plan (GMP) in effect at the time of issuance of any development order, such as, but not limited to, final subdivision plat, final site development plan, excavation permit, and preliminary work authorization, to which such regulations relate. Where these regulations fail to provide developmental standards, then the provisions of the most similar district in the LDC shall apply.

Except as provided for herein, all criteria set forth below shall be understood to be in relation to individual parcel or lot boundary lines, or between structures. Commercial condominium, and/or property owners' association boundaries shall not be utilized for determining development standards.

Table I below sets forth the development standards for land uses within the CPUD Commercial Subdistrict. Standards not specifically set forth herein shall be those specified in applicable sections of the LDC in effect as of the date of approval of the site development plan (SDP) or subdivision plat.

TABLE I
DEVELOPMENT STANDARDS FOR COMMERCIAL DISTRICT

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 Sq. Ft.	N/A
MINIMUM LOT WIDTH	75 Ft.	N/A
MINIMUM YARDS		
Front	25 Ft.	15 Ft.
Rear	50% of the building height, but not less than 15 Ft.	10 Ft.
Side	50 % of the building height, but not less than 15 Ft.	10 Ft.
MIN. DISTANCE BETWEEN STRUCTURES	15 Ft.	50% of the building height, but not less than 15 Ft.
MAXIMUM HEIGHT (ZONED)		
Retail Buildings	3 stories, NTE 50 Ft.*	N/A
Office Buildings	3 stories NTE 50 Ft.*	N/A
MINIMUM FLOOR AREA	700 Sq. Ft. **	N/A

* Architectural appurtenances shall not exceed 75 feet in "actual" height.
** Per principal structure, on the finished first floor.

Note: NTE represents "not to exceed".

EXHIBIT E
LIST OF DEVIATIONS

None

EXHIBIT F
LIST OF DEVELOPER COMITMENTS

TRANSPORTATION

A. All traffic control devices, signs, pavement markings and design criteria shall be in accordance with Florida Department of Transportation (FDOT) *Manual of Uniform Minimum Standards (*MUMS*)*, current edition, FDOT *Design Standards*, current edition, and the *Manual on Uniform Traffic Control Devices* (MUTCD), current edition. All other improvements shall be consistent with and as required by the Collier County LDC.

B. Arterial level street lighting shall be provided at all access points. Access lighting shall be in place prior to the issuance of the first certificate of occupancy (CO).

C. Access points shown on the CPUD Master Plan are considered to be conceptual. Nothing depicted on any such Master Plan shall vest any right of access at any specific point along any property frontage. All such access issues shall be approved or denied during the review of required subsequent site plans, final plat submissions, FDOT permits and/or by an approved Developer Contribution Agreement (DCA). All such access shall be consistent with the FDOT Access Management Policy, as it may be amended from time to time. The number of access points constructed may be less than the number depicted on the Master Plan; however, no additional access points shall be considered unless a PUD amendment is approved.

D. If, in the sole opinion of Collier County and FDOT, a traffic signal, or other traffic control device, sign, or pavement marking improvement within any public right-of- way or easement is determined to be necessary, the cost of such improvement shall be the responsibility of the developer, its successors or assigns. The improvements shall be paid for or installed, at the County's and FDOT's direction. This could be prior to the issuance of the appropriate, corresponding CO.

E. Site related improvements (as opposed to system related improvements) necessary for safe ingress and egress to this project, as determined by Collier County, shall not be eligible for impact fee credits. To the extent possible, all the required improvements shall be in place and available to the public prior to commencement of on-site construction.

F. All proposed median opening locations shall be in accordance with the FDOT Access Management Policy, as it may be amended. FDOT and Collier County reserves the right to close any median opening existing at any time which is found to be adverse to the health, safety, and welfare of the public. Any such modifications shall be based on, but not limited to, safety, operational circulation, and roadway capacity.

G. Nothing in any development order (DO) shall vest a right of access in excess of a right-in/right-out condition at any access point. Neither shall the existence of a point of ingress, a point of egress, or a median opening, nor the lack thereof, be the basis for any future cause of action against the County by the developer, its successor in title, or assignee.

H. All internal roads, driveways, alleys, pathways, sidewalks, interconnections to adjacent developments shall be operated and maintained by an entity created by the developer in accordance with the applicable administrative codes and/or statutes of the State of Florida; and Collier County shall have no responsibility for maintenance of any such facilities.

I. If any required turn lane improvement requires the use of existing County rights-of-way or easement(s), then, if required by County staff, compensating right-of-way shall be provided at no cost to Collier County as a consequence of such improvement(s).

J. All off-site access improvements must be completed prior to commencement of on-site construction.

K. The developer shall provide a public access easement from Myrtle Lane to the signalized intersection of US-41 and Broward Street as approximately shown on Exhibit C, CPUD Master Plan. The public access easement shall not be considered road right-of-way and shall not be used for determining setbacks, or buffering requirements. The exact location and design of the public access easement shall be approved by the Transportation Division at the time of SDP application review.

WATER MANAGEMENT

A. Detailed paving, grading and site drainage plans shall be submitted to Engineering Review Services for review and approval. No construction permits shall be issued unless and until approval of the proposed construction, in accordance with the approved plans is granted by Engineering Review Services.

B. The developer shall grant or dedicate a 50 foot wide drainage and utility easement to Collier County as approximately shown on Exhibit C, CPUD Master Plan. This easement dedication shall occur within the earlier of 60-days of written request by the County, or at submittal of the SDP. The easement shall be granted or dedicated at no cost to the County, with the developer providing all appropriate sketches and legal descriptions. At the County's request, the developer shall install drainage and utility facilities in the drainage and utility easement as part of the site construction, with the location of these facilities determined through the SDP review process.

The County shall reimburse the developer within 180-days of the completion of the installation of the utility and drainage facilities.

The County shall not be responsible for the restoration costs of private facilities within the easement should maintenance of the public utility and drainage facilities be required in the future.

UTILITIES

A. Water distribution and sewage collection and transmission facilities to serve the project are to be designed, constructed, conveyed, owned, and maintained in accordance with applicable Collier County ordinances, and other applicable County rules and regulations.

B. All customers connecting to the water distribution and sewage collection facilities will be considered to be customers of the County, and will be billed by the County in accordance with the County's established rates.

C. The development shall be subject to application for and conditions associated with a water and sewer availability letter from Collier County Utilities Division.

D. The developer shall grant a 60 foot by 70 foot well site easement and an associated utilities and access easement to connect the well site easement to a public right-of-way. The County shall compensate the developer for the well easement dedication through impact fee credits based on the fair market value of the land so dedicated. The utilities and access easement shall be 20 feet wide unless the well site is contiguous to a public right-of-way, in which case, it shall be 15 feet wide. The County utility, access easement is for access, installation, operation, and maintenance of transmission mains, power, telemetry lines and appurtenances. This conveyance shall occur at the time the SDP, plat (or similar process) of the area within the development phase that contains the easement is approved by County staff. At the time of SDP and/or plat submittal, the developer shall provide the well site easement that meets the standard setback requirements for water wells.

ENVIRONMENTAL

A. If prehistoric or historic artifacts, such as pottery of ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial of American settlement are encountered at any time within the project site area, the permitted project should cease all activities involving subsurface disturbance in the immediate vicinity off such discoveries. The permittee, or other designee, should contact the Florida Department of State, Division of Historical Resources, Review and Compliance section at (850) 245-6333 or (800)847-7278, as well as the appropriate permitting agency office. Project activities should not resume without verbal and/or written authorization from the Division of Historical Resources. In the event that unmarked human remains are encountered during the permitted activities, all work shall stop immediately and the proper authorities notified in accordance with Florida law.

B. A Florida Fish and Wildlife Conservation Commission (FWC) relocation permit shall be obtained for the relocation of the one gopher tortoise found on site prior to commencement of any construction activities. A copy of the permit shall be forwarded to Environmental Services Staff.

C. The developer shall provide a report to Environmental Services Staff on the results of the relocation of the gopher tortoise within thirty days of the relocation. The report shall include the number of burrows excavated, the number of tortoises relocated, and the final relocation site.

PLANNING

A. The depth of the commercial buildings and parking areas associated with the development shall not exceed 397 feet as measured from the property line fronting on US-41, in order to meet the infill criteria of the GMP.

B. The developer shall install a fence/wall associated with the southern property boundary and the southwest property boundary. No fence/wall shall be installed within the Preserve Tract. The final location of the fence/wall shall be determined during the SDP review process.

Name: Kevin Cahill

Signature: K Cahill

Date: 6/1/13

E-Mail: Cahillaw@aol.com

If during the past year, the PUD or a parcel(s) within the PUD has been sold to a subsequent owner(s), provide the following information for each parcel that has been sold (attach additional sheets if needed):

Owner entity:
Tract and folio number:
Allocation of development rights and PUD commitments:
Contact's name:
Address:
Telephone number:
Email address:

AUTHORIZED DENSITY/INTENSITY:

	TYPE:	GSF
Tract "CO"	COMMERCIAL	61,000

List the total amount of square feet constructed to date:

DEVELOPER COMMITMENTS:
Check the box that indicates the status of each commitment.

If the commitment has been completed, attach documentation to this report (copy of permit, copy of Preserve Management Plan, copy of receipt or canceled check, etc.). For dedications, list O.R. Book and Page

Commitments deleted from the report and considered fulfilled are no longer monitored through the PUD Annual Monitoring process but are subject to compliance through ongoing maintenance and upkeep. Examples of these types of commitments include exotic vegetation removal, littorals and landscaping.

Land Development Code and County Ordinance

Number.

If the commitment has not been completed, please list the estimated completion date.

commitments have been removed from the monitoring report but compliance will still be required at development review, inspection, certificate of occupancy, etc.

ENGINEERING:

All other commitments have been fulfilled or removed.

COMPLETE ☐ INCOMPLETE ☑

The developer shall grant or dedicate a 50 foot wide drainage and utility easement to Collier County as approximately shown on Exhibit C, CPUD Master Plan. This easement dedication shall occur within the earlier of 60-days of written request by the County, or at submittal of the SDP. The easement shall be granted or dedicated at no cost to the County, with the developer providing all appropriate sketches and legal descriptions. At the County's request, the developer shall install drainage and utility facilities in the drainage and utility easement as part of the site construction, with the location of these facilities determined through the SDP review process.

COMPLETE ☐ INCOMPLETE ☑

The County shall reimburse the developer within 180-days of the completion of the installation of the utility and drainage facilities.

COMPLETE ☐ INCOMPLETE ☑

The County shall not be responsible for the restoration costs of private facilities within the easement should maintenance of the public utility and drainage facilities be required in the future.

ENVIRONMENTAL:

COMPLETE ☐ INCOMPLETE ☑

If prehistoric or historic artifacts, such as pottery, ceramics, stone tools or metal implements, dugout canoes or any other physical remains that could be associated with Native American cultures, or early colonial or American settlement are encountered at any time within the project site area, the permitted project should cease all activities involving subsurface disturbance in the immediate vicinity of such discoveries. The permittee, or other designee, should contact the Florida Department of State, Division of Historical Resources, Review and Compliance Section at (850) 245-6333 or (800) 847-7278, as well as the appropriate permitting agency office. Project activities should not resume without verbal and/or written authorization from the Division of Historical Resources. In the event that unmarked human remains are encountered during the permitted activities, all work shall stop immediately and the proper authorities notified in accordance with Florida law.

COMPLETE ☐ INCOMPLETE ☑

A Florida Fish and Wildlife Conservation Commission

(FWC) relocation permit shall be obtained for the relocation of the one gopher tortoise found on site prior to commencement of any construction activities. A copy of the permit shall be forwarded to Environmental Services Staff.

COMPLETE ☐ INCOMPLETE ☑

The developer shall provide a report to Environmental Services Staff on the results of the relocation of the gopher tortoise within thirty days of the relocation. The report shall include the number of burrows excavated, the number of tortoises relocated and the final relocation site.

PLANNING:

COMPLETE ☐ INCOMPLETE ☑

The depth of the commercial buildings and parking areas associated with the development shall not exceed 397 feet as measured from the property line fronting on US-41, in order to meet the infill criteria of the GMP.

COMPLETE ☐ INCOMPLETE ☑

The developer shall install a fence/wall associated with the southern property boundary and the southwest property boundary. No fence/wall shall be installed within the Preserve Tract. The final location of the fence/wall shall be determined during the SDP review process.

TRANSPORTATION:

All other commitments have been fulfilled or removed.

COMPLETE ☐ INCOMPLETE ☑

Arterial level street lighting shall be provided at all access points. Access lighting shall be in place prior to the issuance of the first certificate of occupancy (CO).

COMPLETE ☐ INCOMPLETE ☑

If, in the sole opinion of Collier County and FDOT, a traffic signal, or other traffic control device, sign, or pavement marking improvement within any public right-of-way or easement is determined to be necessary, the cost of such improvement shall be the responsibility of the developer, its successors or assigns. The improvements shall be paid for or installed, at the County's and FDOT's direction. This could be prior to the issuance of the appropriate, corresponding CO.

COMPLETE ☐ INCOMPLETE ☑

If any required turn lane improvement requires the use of existing County rights-of-way or easement(s), then, if required by County staff, compensating right-of-way shall be provided at no cost to Collier County as a consequence of such improvement(s).

COMPLETE ☐ INCOMPLETE ☑

All off-site access improvements must be completed prior to commencement of on-site construction.

COMPLETE ☐ INCOMPLETE ☑

The developer shall provide a public access easement from Myrtle Lane to the signalized intersection of US-41 and Broward Street as approximately shown on Exhibit C, CPUD Master Plan. The public access easement shall not be considered road right-of-way and shall not be used for determining setbacks, or buffering requirements. The exact location and design of the public access easement shall be approved by the Transportation Division at the time of SDP application review.

COMPLETE ☐ INCOMPLETE ☑

A onetime payment for permanent traffic count stations shall be due at the time of the first PUD Annual Monitoring Report following the first certificate of occupancy within the PUD. The payment shall be based upon the number of ingress and/or egress points (Access Points) based upon the conceptual Master Plan within the PUD Ordinance. Each Access Point shall require a payment of $500.00. If additional Access Points are granted at any time, an additional payment of $500 per Access Point will be payable with the following Annual Monitoring Report. The Traffic Count monitoring requirement shall be considered fulfilled for all PUD's that have already provided at least one traffic count or payment in lieu of traffic counts. PUD's that have traffic count monitoring language tied to specific commitments within their ordinances shall remain in effect.

Please include a copy of the Conceptual Master Plan from the PUD ordinance.

Payment in the amount of $_____

Payable to the C.C. Board of County Commissioners.

Check to be submitted with the annual report to the PUD Monitoring Department.

UTILITIES:

COMPLETE ☐ INCOMPLETE ☑

Water distribution and sewage collection and transmission facilities to serve the project are to be designed, constructed, conveyed, owned, and maintained in accordance with applicable Collier County ordinances, and other applicable County rules and regulations.

COMPLETE ☐ INCOMPLETE ☑

All customers connecting to the water distribution and sewage collection facilities will be considered to be customers of the County, and will be billed by the County in accordance with the County's established rates.

COMPLETE ☐ INCOMPLETE ☑

The development shall be subject to application for and conditions associated with a water and sewer availability letter from Collier County Utilities Division.

COMPLETE ☐ INCOMPLETE ☑

The developer shall grant a 60 foot by 70 foot well site easement and an associated utilities and access easement to connect the well site easement to a public right-of-way. The County shall compensate the developer for the well easement dedication through impact fee credits based on

the fair market value of the land so dedicated. The utilities and access easement shall be 20 feet wide unless the well site is contiguous to a public right-of-way, in which case, it shall be 15 feet wide. The County utility, access easement is for access, installation, operation, and maintenance of transmission mains, power, telemetry lines and appurtenances. This conveyance shall occur at the time the SDP, plat (or similar process) of the area within the development phase that contains the easement is approved by County staff. At the time of SDP and/or plat submittal, the developer shall provide the well site easement that meets the standard setback requirements for water wells.

LLC AFFIDAVIT

STATE OF Illinois)

COUNTY OF Cook) ss:

BEFORE ME, the undersigned officer authorized to administer oaths, on this day personally appeared Kevin Cahill, the Manager (Title) of KC Naples Tamiami, a Florida limited liability company (the "LLC"), who upon being duly sworn, deposes and says:

1. The undersigned is over the age of 18 years, understands the obligations of an oath, and has personal knowledge of the facts stated herein the Collier County Annual Monitoring Report.

2. The undersigned is the Manager of the LLC.

3. The LLC was formed under the laws of the State of Florida, is currently in good standing there under, and has not been dissolved.

FURTHER AFFIANT SAYETH NAUGHT.

Kevin Cahill, Manager
Name, Title

KC Naples Tamiami, LLC
a, Florida LLC

The foregoing instrument was sworn to, subscribed and acknowledged before me this 3rd day of June, 2013, by Kevin Cahill, the (Title) Manager of, a Florida LLC, who is personally known to me or has produced KC Naples Tamiami as identification.

RE: PL2024-5670 Letter of No Objection
Parcel# 60780960002 & 60781000000
5396 Myrtle Lane,
Naples, FL, 34113

Dear Michael Delate,

In response to your request to vacate a 20' wide drainage and utility easement located within Myrtle Cove Acres (Plat Book 3 Page 38, Block A, Lots 24, 25, 26, 27 and 28) on property identified as Parcel Numbers 60780960002 and 60781000000 and installation of an undefined sized pipe underneath a Collier County 50' drainage easement.

The Collier County Road, Bridge and Stormwater Maintenance Division (RBSM) has reviewed your request for vacation as per PL2024-5670 and has no objection to the vacation of the 20' wide drainage easements, on the following conditions:

- A 15' wide replacement easement along the western property line in exchange for the above-mentioned drainage easement vacation.

The Collier County RBSM has reviewed your request to install an undefined size pipe underneath the Collier County 50' drainage easement as per PL2024-5670 and has no objection to the installation of this pipe on the following conditions:

- The RBSM Department must review and approve of design plans for pipe installation across drainage easement.
- Applicant will assume responsibility for restoring the area back to its original or improved conditions.
- The County will not assume maintenance responsibility for installed pipe and will have the right to request its removal if at any point in time the pipe proves a hindrance to maintenance operations or detrimental to easement conditions.

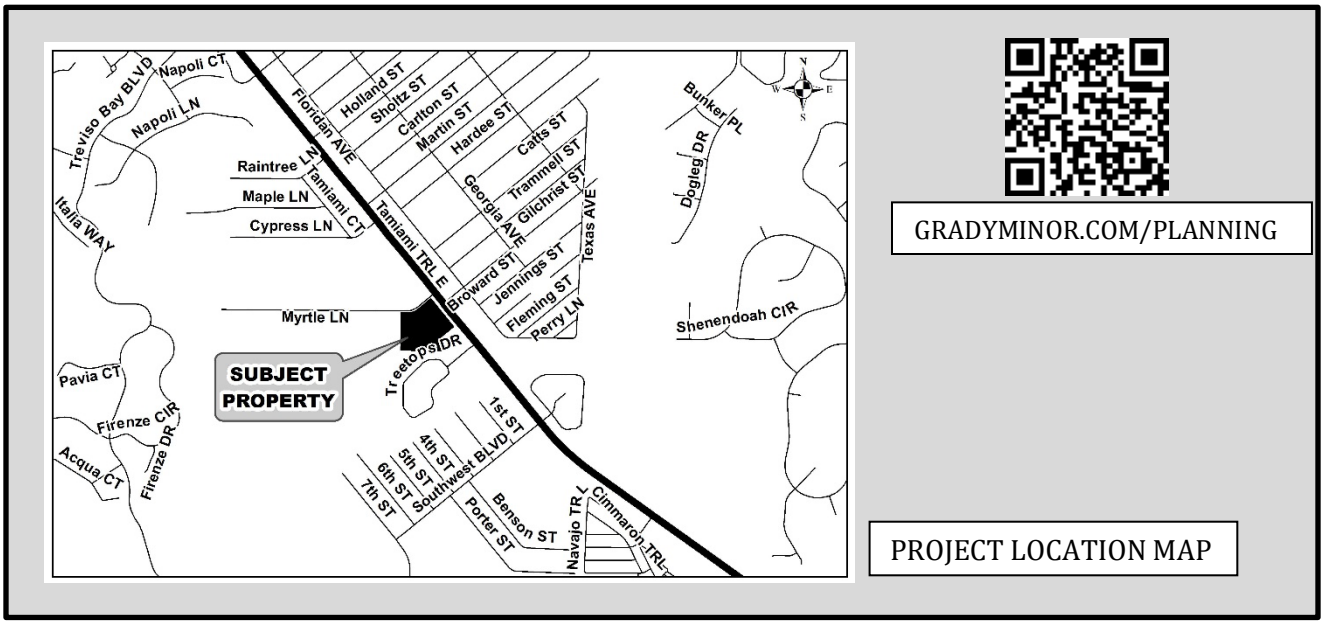
NOTICE OF NEIGHBORHOOD INFORMATION MEETING

PETITION: **PL20230016211 – 5396 Myrtle Lane Commercial Subdistrict**
PL20230016212 – 5396 Myrtle Lane Commercial Planned Unit Development

In compliance with the Collier County Land Development Code (LDC) requirements, a neighborhood Information meeting (NIM) hosted by D. Wayne Arnold, AICP, of Q. Grady Minor and Associates, LLC (GradyMinor), representing Metropolitan Naples, LLC (Applicant) will be held **May 6, 2024, 5:30 pm** at **South Regional Library, Meeting Room A, 8065 Lely Cultural Pkwy, Naples, FL 34113.**

Metropolitan Naples, LLC has submitted formal applications to Collier County, seeking approval of a Small-Scale Growth Management Plan Amendment and Commercial Planned Unit Development (CPUD) Rezone to permit the redevelopment of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse uses, outdoor vehicle leasing and related activities and a maximum of 3,000 square feet of gross leasable area of retail office and service uses.

The subject property is comprised of 8.24± acres and is located at the southwest corner of Myrtle Lane and Tamiami Trail East (U.S. 41) in Section 29, Township 50 South, Range 26 East, Collier County, Florida.



GRADYMINOR.COM/PLANNING

PROJECT LOCATION MAP

If you have questions, please contact Sharon Umpenhour with GradyMinor by email: sumpenhour@gradyminor.com or phone: 239-947-1144. For project information or to register to participate remotely* go to, GradyMinor.com/Planning. Any information provided is subject to change until final approval by the governing authority.

The purpose and intent of this Neighborhood Information Meeting is to provide the public with notice of an impending zoning application and to foster communication between the applicant and the public. The expectation is that all attendees will conduct themselves in such a manner that their presence will not interfere with the orderly progress of the meeting.

**Remote participation is provided as a courtesy and is at the user's risk. The applicant and GradyMinor are not responsible for technical issues.*

NOTICE OF NEIGHBORHOOD INFORMATION MEETING

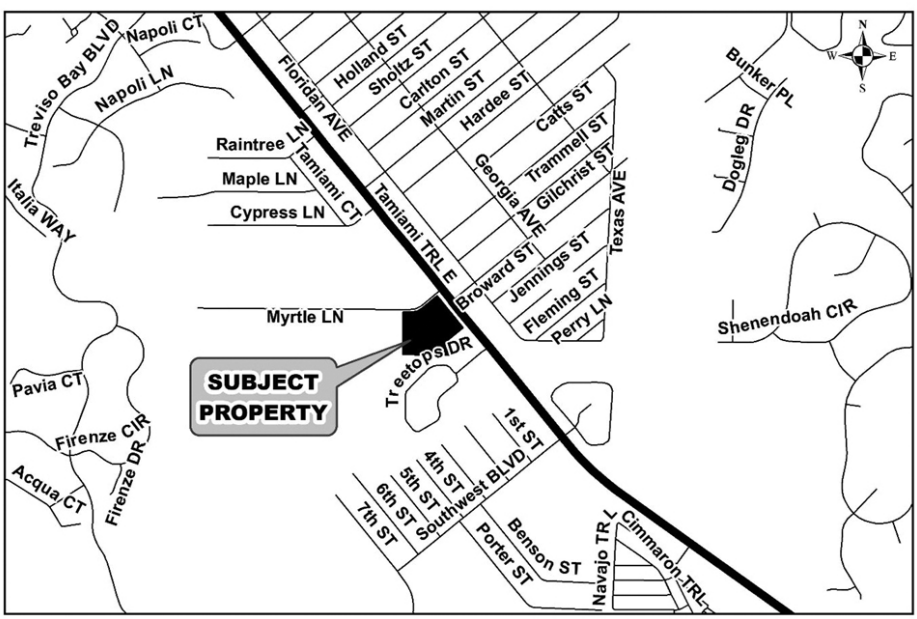
PETITION: **PL20230016211 – 5396 Myrtle Lane Commercial Subdistrict**

PL20230016212 – 5396 Myrtle Lane Commercial Planned Unit Development

In compliance with the Collier County Land Development Code (LDC) requirements, a neighborhood Information meeting (NIM) hosted by D. Wayne Arnold, AICP, of Q. Grady Minor and Associates, LLC (GradyMinor), representing Metropolitan Naples, LLC (Applicant) will be held **May 6, 2024, 5:30 pm at South Regional Library, Meeting Room A, 8065 Lely Cultural Pkwy, Naples, FL 34113.**

Metropolitan Naples, LLC has submitted formal applications to Collier County, seeking approval of a Small-Scale Growth Management Plan Amendment and Commercial Planned Unit Development (CPUD) Rezone to permit the redevelopment of up to 200,000 square feet of gross leasable area of indoor self-storage/warehouse uses, outdoor vehicle leasing and related activities and a maximum of 3,000 square feet of gross leasable area of retail office and service uses.

The subject property is comprised of 8.24± acres and is located at the southwest corner of Myrtle Lane and Tamiami Trail East (U.S. 41) in Section 29, Township 50 South, Range 26 East, Collier County, Florida.



If you have questions, please contact Sharon Umpenhour with GradyMinor by email: sumpenhour@gradyminor.com or phone: 239-947-1144. For project information or to register to participate remotely* go to, gradyminor.com/Planning. Any information provided is subject to change until final approval by the governing authority.

The purpose and intent of this Neighborhood Information Meeting is to provide the public with notice of an impending zoning application and to foster communication between the applicant and the public. The expectation is that all attendees will conduct themselves in such a manner that their presence will not interfere with the orderly progress of the meeting.

**Remote participation is provided as a courtesy and is at the user's risk. The applicant and GradyMinor are not responsible for technical issues.*

5396 Myrtle Lane Commercial Subdistrict (GMPA PL20230016211) and Commercial Planned Unit Development (PUDZ PL20230016212)
May 6, 2024 Neighborhood Meeting Summary and Transcript

Wayne Arnold:	00:01	All right, well good evening everybody. My name is Wayne Arnold and I'm with Grady Miners Associates here tonight representing the applicant sitting in the front row, Sharon on the aisle. She's handling the audiovisual equipment tonight we're required by the County to record the meeting and create a transcript, so we are doing that. So the meeting is being taped and I'll make a couple of other introductions. Over here, with us on our team is Rich Yovanovich, Rich is our land use counsel. Next to him is Norm Trebilcock, who's our transportation engineer, and Mike Delate, who's sort of in the back over there. He's our engineer of record for the project. So we've got a short presentation to go through and talk about the two applications that are pending with the county and make two more introductions, we have Laura Dijon and Parker Clough, both work for Collier County, helping review the planning and zoning documents that we're going through the county review right now.
	01:00	So we're here for two applications for the property that is zoned commercial in part on Myrtle Lane and US 41. We have an application pending for what's called a small-scale conference of plan amendment, and we also have a PUD rezoning application, and those two documents are required for us to move forward with the project to eliminate the existing zoning on the property, replace it with a new zoning document that would be PUD zoning, and I'll show you some of the details of that momentarily. As you can see the site, it's been previously zoned for development, but it's undeveloped and we are sitting sort of between undeveloped, commercially zoned property to the north along Tamiami Trail. And then we have the CubeSmart property just to the east. That's part of the Treetops planned development.
	01:53	So as I mentioned, we're here for two projects, but we're in the urban designated area. Right now we're proposing to create a new sub-district that would be for the Myrtle Lane property, and that establishes basic parameters for what development intensity we can have on the site. We're also then rezoning it for the companion item for the planned development zoning. And that zoning and comp plan, we're seeking a maximum of 200,000 square feet for self-storage and warehousing uses. And then 3000 square feet of retail and service commercial type uses that are supporting what's essentially the U-Haul facility that is proposing to be located here.

02:32 These are part of the future land use map. You can see we're having to create a new district map that would go in the comprehensive plan. You can see some sub-district language that's on the page, but we're asking for development that would allow us to have related uses to the indoor self-storage and warehousing that would support U-Haul, and then also the rental leasing of vehicles and trailers that they do. They have this one, if you're familiar with some of the U-Haul facilities, they have a propane gas facility where you can go and get your propane tank or if you have an alternative fuel automobile, you can get fuel in there. So those are the kind of uses we're proposing in addition to all the C-I through C-III uses that are permitted generally on the property today.

03:20 This is the approved master plan. It's really hard to read, back in the day when this was approved, the county's obviously reproduction capabilities were not what they are today, but this is oriented north to your right. So Tamiami Trail is toward the bottom of the page. It showed access to both Myrtle Lane and the US 41. There was a water management and reserve area toward the western part of the project. The site we've had recently evaluated, it's all exotic vegetation that's on the site. It doesn't qualify for any native preservation. So our project proposes a new master plan, and this one north is oriented up. So you can see that on the bottom toward the Woodgate condominiums. We have our water management area, we have to do some drainages when we clean up and we're coordinating with the county on that.

04:11 And then you can see a series of proposed buildings on the site where we're proposing a four-story warehouse building that would be for indoor self-storage. U-Haul also has concept that you're familiar with, the pods and things like that where you can also store and those are more mobile. Those would be stored at a warehouse building on site as well. And then there's some other alternative storage that they have, and they're not certain that it would be located here, but they have some storage that's sort of a drop-in-place storage type thing. So we've reflected probably three types of buildings that are on the site.

04:42 And then as I mentioned, the retail, if you're familiar with U-Haul, they sell moving supplies. They also sell other incidental things, boxes and things of that nature. This one is considered mobility center and some of those have a little bit of alternative things that they also sell. Some are getting into EV charging stations, which we've made allowances for here. There may be

electric bike sales at some point in the future, but those would be typical C-1 through C-3, and they would be conducted within the three-thousand square foot part of that building.

05:11 The one represents a deviation that we're asking for, and we asked for kind of a blanket deviation and we knew we'd be discussing that in greater detail with staff, and that involves the architectural design standards for the building. Rich and I just represented Home Depot on another parcel just south of here that was recently approved, and they had some alternative design standards that were approved by the county. So we're going to be working with the county engineer and staff to come up with some architectural standards that would be for the U-Haul facility.

05:42 This is a conceptual rendering showing two of those three buildings I described. The third building, as I mentioned, is kind of an alternative that they haven't committed to, but you can see just sort of how this starts to orient on the site. We've asked for a four-story building, which is reflected in those exhibits. This is kind of a co-conceptual rendering. We're working, like I said, with the county's architect to help refine what the buildings will look like and what the buffering will be. Those are all part of our review process.

06:11 As I mentioned before, the permitted uses, we define those by SIC code. We've asked for accessory uses that include things that U-Haul typically does. They do minor servicing and repair of their vehicles, and we also have electric charging stations that we've asked for, as well as some of the other accessory uses such as water management, signage and those things.

06:36 We've asked for and we have a series of development standards that are part of the development of the PUD. We've asked for a zone height of 60 feet today. The zone height of the existing PUD is 50 feet. We've asked for the 60 feet so that we have some flexibility in design for the final building for U-Haul. And we're in the review process. We have not resubmitted after our first round of comments from the staff. We're meeting with them later this week to go over some of the comments that we know we have to have more dialogue on. So we don't have any hearing dates established yet, but this is our opportunity to reach out to the community and get some feedback, let you all understand what it is that we're actually asking for. And then if you've got notice for this meeting, you'll receive notice for a

		planning commission hearing that the county will establish when we get to that stage.
	07:26	It's going to be several months off before we get there, but those dates, you'll get a mail notice. Then signage gets posted on the site. I'm sure you've seen those around the area, where you get the four by eight sign that says, "Notice of Hearing," and it briefly describes that and has the hearing dates on it.
	07:41	So with that, we have those and then this is an informational page. You can certainly take a picture of it or if you want to pick up Sharon's card before you leave, you can either email us at the information or you can go to the QR code, it'll take you to our website and that has all of our latest submittal information for both applications with the county, and we update that as, once we make another submittal back to staff, all those documents that we've revised will be freshened and there will be a copy of this presentation there as well.
	08:11	So that's our brief presentation. We're happy to entertain any questions, anything I didn't answer or any questions you have? If we don't have the answer tonight, we'll certainly do our best to get an answer for you. So just so it's clear on the record, the county likes to make sure our planning commissioners can actually hear the dialogue. So the transcript is clear who I am, but when you all speak, it'd be great if you could either give your name or say whether you're a nearby resident, et cetera, just so that it's clear that it's not one of our development team members that are speaking. And we'd ask that you come to a microphone or if you're not capable, we'll get the microphone to you. So anybody has a question, just raise your hand and we'll start from there.
Walter Roshe:	08:52	Yeah.
Wayne Arnold:	08:52	Yes, sir.
Walter Roshe:	08:53	I'll come up. My name is Walter Roshe and I'm a resident. I noticed that on Myrtle Lane you want to have emergency access.
Wayne Arnold:	09:05	Yes, that's-
Walter Roshe:	09:06	I mean, how do you stop that? Because then you went to the rendering and it looks wide open like anybody could just drive

		there. Is there going to be a sign that says no driving unless you're an emergency vehicle?
Wayne Arnold:	09:17	Well, typically where we have those types of access points, they are signed in that manner, that it's for emergency vehicles.
Walter Roshe:	09:24	But that's it. Just a sign?
Wayne Arnold:	09:25	It is often a sign, it can't be a gate, but that is one of the comments that staff came back to us and said, if there's an opportunity that you get a signalized access point at the Broward signal that's there, we want you to maintain that access open to the public. So that's a point that we're dialoguing with the county staff right now.
Walter Roshe:	09:41	So it doesn't sound like it's going to be emergency access?
Wayne Arnold:	09:44	I honestly don't know. I mean, we just don't know.
Walter Roshe:	09:46	Because on the original PUD that was approved, there was no access.
Wayne Arnold:	09:50	There actually was, but there was a condition that said we had to maintain that as a public access point.
Walter Roshe:	09:56	That's what I wanted to know.
Rich Yovanovich:	09:57	Is it, sir?
Wayne Arnold:	09:59	Excuse me, sir.
Rich Yovanovich:	10:00	Is it your preference that we'd be limited to a emergency access only on Myrtle?
Walter Roshe:	10:05	I prefer that you don't use Myrtle because you have commercial trucks on a lane that's a very, it's not a highway, it's not a road. It's a lane. And definitely from the rendering it looks like people are going to drive in their trucks, they're going to go down the street, sweep out their trucks and go back in. That's the problem, sir. And the truck, the street can't handle the traffic, can't handle all the trucks.
Wayne Arnold:	10:25	Okay, thank you. Anybody else have a question, comment. Come on up.

Steve Fuller:	10:37	Thank you, Laura. I'm Steve Fuller. [inaudible 00:10:42]. Hi, I'm Steve Fuller. I live in 5259 Myrtle. This is a real small representation of the neighborhood meeting we had on Thursday night?
Walter Roshe:	10:50	Thursday night.
Steve Fuller:	10:52	At seven o'clock when the majority of the 35 homes on Myrtle Lane were capable of actually attending. So there is a much larger contingency that's not real happy with this, and I respect your position as an engineering firm.
Sharon Umpenhour:	11:08	Sir, can you please speak into the microphone? Thank you.
Steve Fuller:	11:14	But there's a lot of issues and I've come up with a lot more questions. I value Walts. You showed the picture of the four-story buildings. And the city of Naples are capped at 42 and 45 high, and they can get four stories in and we're seeing 60 and 70 feet of height. That could be much more than four stories. That's one thought. Myrtle Lane, as Walter said, is a seventeen-foot wide road. The majority of people on that street drive trucks and trailers, eight and a half foot wide vehicles. You got to pause to let people go down that road. You got to dodge mail boxes.
	11:57	Myrtle Lane hasn't been resurfaced in the 20 years since I've known it. If anybody knows any different, please speak up. So Myrtle Lane is an extremely rural, low density, low volume lane, 17 feet wide. I think if you look at the new standards for roadways and communities, it's 32 to 36 feet. Okay, so let's start with that. I'm one of the belief that if whatever happens on these lots, commercial and the potential rezoning of RMF 6 to commercial, and I got a question, how many designations of commercial zoning are there? I mean, is there just one or is there retail? Is there industrial?
Wayne Arnold:	12:48	Well, we're rezoning to a commercial PUD.
Steve Fuller:	12:51	Commercial PUD.
Wayne Arnold:	12:52	Yes.
Steve Fuller:	12:52	So once that's been rezoned to a commercial PUD, does that create an avenue where other things could be developed in that commercial PUD?

Wayne Arnold:	13:04	Well, today most of the property is zoned as a commercial plan development.
Steve Fuller:	13:07	But you're adding more like two and a half lots. Two and a half acres of RMF 6?
Wayne Arnold:	13:12	Yes sir. We're adding some of the land that's on the west side. Yes, sir.
Steve Fuller:	13:17	You know, you guys talked a lot about the RMF 6 apron around this property, but you really neglected the, excuse me, RMF 6. You really neglected the single family, 35 homes at the end of that street that are going to really carry the burden of traffic. I think the building height is too much. I think the county has come up with some incredible questions of the development study and plan and Laura's got a lot on there. I saw the architectural review has a lot of questions there. Environmental has questions. That community, Myrtle Lane is bound on three sides by South Florida Water Management canals and their major canals, the [inaudible 00:14:05] Drainage Canal and the one by Treviso, they are major canals, flood, and several these people who live at the end of the street will tell you how high the waters come up. Not just in our last flood from Hurricane Ian, but in previous times.
Wayne Arnold:	14:18	Sure.
Steve Fuller:	14:19	That's a lot of concrete. That's a lot of surface area. And we're concerned with water retention, which I don't know, I'm not an engineer, but there's some real unique ways that stats and numbers are managed and a water management area that is supposed to be like, I don't know, whether it's 1.2, 1.4 acres, but it encroaches in to other utility easements and other drainage easements. I was under the impression they're supposed to be kept separate. Please, if you got answers for these. I'd love to hear.
Wayne Arnold:	14:53	Well, you've raised issues that the county staff, that's part of the normal review process that we go through on almost every project. So we are addressing traffic, we're addressing stormwater management. The county staff has questioned because of the East Naples plan that's been in process, some of the design standards for the buildings, those are all things that we'll continue to dialogue with staff about as we go through the process.

Steve Fuller:	15:16	I thought the county commissioners, both Rick LoCastro and Saunders was considering a moratorium on storage facilities. We have eight between Airport Road and which goes down to [inaudible 00:15:32] with 92. We have like eight storage centers already. And there's one more planned, in addition to what you guys are thinking. So I ask the question, this is to the county that has a responsibility to really oversee development in a responsible fashion that's an asset to the community, and an asset to the surrounding neighbors that live within that community.
	15:55	And I'm wondering how this mega U-Haul center is really going to be an asset there when it could be easily located further down on I 51 or further out 41 where there's already agricultural in making land around it and more commercial around it. Here you're going to make a big impact on a small community.
	16:27	I know this is a meeting for the U-Haul, but we also know that there's an application into the county to take the lot right over there on the left-hand side, it's 2.7 acres, which in RMF 6 zoning would yield maybe 16 units. There's already an application in for 44 units. Casey in Naples, who still will own four and a half acres surrounding the west side and kind of south side, he's all zoned with multi [inaudible 00:17:02]. What's he going to do? Is he going to come in and try to pop 12 units per acre now on his property also. We got questions about the height, the amount of concrete, the facility itself. And let me ask you, because you showed in that rendering the building on the right and we were told that you were going for four stories. What's the square footage in that building in four stories?
Wayne Arnold:	17:25	I don't think we know the breakdown yet of any of those building square footage. We just know the total is about 200,000.
Steve Fuller:	17:33	And it's zoned for 20,000. Correct/.
Wayne Arnold:	17:33	I'd have to check the prior zoning, but I think it's more than-
Steve Fuller:	17:34	So you're asking for a major change in the zoning?
Wayne Arnold:	17:39	Yes sir. We're aware of that. But again, indoor self-storage generates a lot of square footage with little impact. Most of those indoor self-storage units-

Steve Fuller:	17:47	You don't live on Myrtle, I'm sorry, Mr. Arnold, we're going to differ on your term of impact.
Wayne Arnold:	17:52	That's okay.
Steve Fuller:	17:54	The other proposed one-story and the other proposed one-story, on your rendering that also is a four-story building.
Wayne Arnold:	18:00	I know I told you that was a conceptual rendering that U-Haul prepared to show you how these buildings were going to be oriented on the site.
Steve Fuller:	18:06	Okay. I've also talked to EMS and the fire station right across the street. This may be a question for you. I know there's been a lot of traffic control, signage, orientation, arrows on roads down at Barefoot Williams. I know they've had a couple of bad wrecks there. I know at our intersection of Broward, at 41, I couldn't get real stats because it's unique how the county doesn't, they're three to five-year data on the fields, but they're changing software and they said there's only been one accident in the last three years. I know that's not the truth. There's two memorials, two memorials at that intersection for people that have died.
	18:47	So I think when you put this structure with the access that you've drawn it, you're going to create more of a nightmare for the residents. Certainly on Myrtle, you're create a nightmare. You're create a nightmare for the manor. If you go back to that 2008 proposed zoning change for the Myrtle Cove Acre commercial put, they connected Myrtle to Broward.
Wayne Arnold:	19:13	Yes, sir.
Steve Fuller:	19:13	A lot of us want that. A few don't. There's concern if you connect it to Broward, then all of a sudden that's going to open the venue for the multifamily, what they could do down the road, that emergency exit, if that was a bona fide, even larger than the Myrtle seventeen-foot wide lane, that was a bona fide pass through to where we could at least use that to access a stoplight for traffic control and accessibility. That might be one perk. I think that would be a benefit. I'm sure you all doesn't want us winding through their lot. My suggestion would be to split that lot and bring Myrtle to the light. Then you've got, is KC Naples here? So the actual landowner's not here. He'd end up with two more valuable corner parcels.

Wayne Arnold:	20:10	Okay. Thanks, Steve.
Steve Fuller:	20:10	Safety responsible.
Wayne Arnold:	20:13	Thanks Steve. Anybody else have a comment? Yes sir. Come on up.
Greg Vilk:	20:26	Hi, I'm Greg Vilk. I'm actually a property owner.
Wayne Arnold:	20:31	Could you repeat your name please?
Greg Vilk:	20:31	Greg Vilk.
Wayne Arnold:	20:31	Greg Vilk, thank you.
Greg Vilk:	20:31	I just had a question if you can flip back Exhibit C. You had mentioned that was an approved plan?
Wayne Arnold:	20:39	This one?
Greg Vilk:	20:40	Yeah.
Wayne Arnold:	20:41	Yes, it is.
Greg Vilk:	20:43	Do you have any history on that approval? What it was approved for, the use?
Wayne Arnold:	20:46	I do.
Greg Vilk:	20:47	And it looks as if it goes right into the intersection, the entries, because I had always thought that that land had to use the intersection.
Wayne Arnold:	21:01	That existing zoning for the commercial for planned development has language in there that would mandate if there's a signalized access point here on Tamiami Trail, that that needs to be opened back to Myrtle Lane.
Greg Vilk:	21:14	Okay. Is it those conditions or first you must use the intersection for access?
Wayne Arnold:	21:21	I can go back and look at the language, but I'm pretty certain that we talked about if we gain that access of the Broward signal, then that's how that is, so that's essentially what staff has asked us to do and that's what we're continuing to discuss with them now.

Greg Vilk:	21:34	Okay. And let me just ask as far as the commercial zoning, as far as the classification. At this time, I'm familiar with, I think it's C3, C4, C5 and so on. Does this fall into as a C3, a C4, a C5, or are they completely different?
Wayne Arnold:	21:51	Well, it's a little different, but most of the uses that we've asked for that we want are not C3 uses because the indoor self-storage is a conditional use in C4. But we're not asking for straight zoning, we're asking for a planned development. So that's why we've indicated those uses. So those would be more traditionally found in C4 type zoning industries.
Greg Vilk:	22:13	Which is what I thought. So the U-Haul facility doesn't comply in a C3, which it's currently zoned at. What it's marketed at?
Wayne Arnold:	22:20	It is not really zoned C3 today. It's primarily zoned commercial plan development and it allows a whole bunch of different uses. It allows 61,000 square feet of commercial uses today.
Greg Vilk:	22:31	Okay.
Wayne Arnold:	22:33	It allows a whole host of things, offices, medical offices, vehicle sales. I mean I've got a list that's got 20-odd uses that are permitted by right in those groups.
Greg Vilk:	22:45	All right, thank you.
Wayne Arnold:	22:45	Yes, sir. Anybody else have a questions, comment? Yes, sir.
Dick Whitesell:	23:00	My name's Dick Whitesell. Now, back here some years ago, the county came in and they widened the canal out behind our houses and I'm getting flooded every time it rains. And the county said they were going to come back and they were going to care of the issue. How much more water are we going to get from this running down my backyard?
Wayne Arnold:	23:26	Well, we're not really in that part of the site design phase yet. This is more the conceptual zonings phase. We have to have a very conceptualized water management plan and you can see on our master plan.
Dick Whitesell:	23:37	Well, the water management came down and they did all that out that night on my backyard and they said they were going to take it away. They never did. Now the water just floods me out every time it rains.

Wayne Arnold:	23:47	Well, I would encourage you to talk to the county stormwater management department. I
Dick Whitesell:	23:50	I did. If it didn't do no good, but you're going to go ahead, you're going to put this in there. Where's all that water going to go?
Wayne Arnold:	23:56	So the water we're required to discharge into that canal system and so we have to treat and store water on the site as well. So we've designed a conceptual area for water management, that's on that south side of the site and of course the Lely improvements come down to this way. So there's part of those Lely, LASIP, canal system that comes through a portion of the property. But yeah, we have not designed the detailed water management system yet. But we will, we definitely-
Dick Whitesell:	24:25	That's the one thing you're going to want to think about because that floods every time, even with the little, when the rains we've been getting and we start getting heavier rains, you're going to put all that black top and cement out there. All that water's got to go somewhere and it's going to be right in my backyard again. It's going to wash out other people too.
Wayne Arnold:	24:39	Understood. Thank you. Anybody else?
Claudia Fuller:	24:53	Hi, Claudia Fuller, 5259 Martin Lane. The existing use of doctor's offices, like retail is much more in character with the community than the Mobility Center and maybe that's why the Mobility Center is not zoned for this area. When I read through the plan and the response that was set up for this, very little reference was made to the residential area beyond the RMF 6. In our neighborhood meeting last week, a lot of people said, why bother rezoning it, leave the RMF 6, leave the zoning as it is, use it to its best ability and if Mobility Center doesn't work there, then it doesn't work there because it's not consistent with the neighborhood character.
	25:57	Ways it's not consistent is that the four-story, 60-foot building really does not fit with our neighborhood. And the density of use seems awfully high because you have the 200,000 square feet of storage plus 3000 square feet of retail. But you're not even talking about how much outdoor storage also, I mean the whole piece of property is going to be used in that sense and talking about drainage, all of that is a lot of junk draining off into our canals.

	26:39	Your executive statement also talks about this being great for urban infill. Well, commercial urban infill is intended to provide beneficial goods and services to the community. It's not this. This is not beneficial to our neighborhood. So the rezone to U-Haul does not benefit our community. Maybe it would be better down by the Home Depot that you guys just worked on. Down at a cross road arterial road like 951 and 41 or even out by the interstate.
	27:13	And then also in your executive summary, you guys talked about how this was such a great location and it meets the needs of the community and this is on point 14, it says whether change suggested is at scale with the needs of the neighborhood or the county. And your response was the scale of the project is in scale with the needs of the community. I disagree. The change is out of scale with the needs of the neighborhood, the needs are already met in the immediate area. In a 2.8 mile stretch from that this, on 41 that this complex encompasses. We already have five constructed storage centers plus another one that's going to be built. So this all represents over 450,000 square feet of storage in 2.8 miles. Maybe this is an overreach and maybe it's too much, too close to the neighborhood and all the other storage units. Thank you.
Wayne Arnold:	28:16	Thank you. Bye.
	28:20	Anybody else have any thoughts? Everybody ready to go home and have dinner?
Claudia Fuller:	28:28	Can I ask a question without coming out again?
Wayne Arnold:	28:29	No, you need to be on the microphone, Steve.
Steve Fuller:	28:32	I would like to know the process. The board is here and Peter's here, but what's the process? Like I said earlier, most of the people on our street are working and they can't be here, so is there going to be another meeting? Is there going to be a meeting that's conducive to the timeframe of the residents that are going to be impacted by this? When would we have a next meeting? How's this going to go on, right?
Wayne Arnold:	29:01	Steve, as I mentioned, we're going to, we'll take one at a time and the answer to your question is we're required to hold one neighborhood information meeting after we get our first round of review comments and before we hold a planning commission hearing. And then the planning commission is the first public

		hearing, that's an advertised public hearing and that occurs on a first or third Thursday of the month at 9:00 A.M. at Collier County Commission chambers and then that's followed, they make a recommendation to Collier County Commission in which those meetings are generally speaking, 9:00 A.M. meetings as well.
Steve Fuller:	29:39	How can a small community that doesn't have a homeowners association like Myrtle Cove that can't get off of work, how can we represent ourselves?
Wayne Arnold:	29:48	Well, it sounds like you already started. One, you've talked to your own residents and two, you've had dialogue with county staff, which is probably the most appropriate way for you to communicate your thoughts to the staff so you can at least have your thoughts represented while they're reviewing the application.
Steve Fuller:	30:02	Thank you.
Wayne Arnold:	30:05	Thanks, Steve. Yes, sir. Come on up.
Greg Vilk:	30:11	I just wanted to make one mention off of what Steve is saying as far as the meetings. Every meeting with the county officials is a public meeting.
Wayne Arnold:	30:21	Correct.
Greg Vilk:	30:22	It's an open meeting to anybody that wants to attack. You may not have the right to talk [inaudible 00:30:31] that you can attack and I think that's probably for the community and for the development and engineers probably have that dialogue. Make sure that the community is present at those.
Wayne Arnold:	30:40	You'll get notice. Like I said, if you receive notice at this meeting, you'll get public notice of those other public hearings.
Greg Vilk:	30:45	I'm talking about all the meetings. I'm talking about any meetings, any at all.
Wayne Arnold:	30:49	Yes. And at those meetings you will be given time. The public is always given time to comment on the projects that are on the-
Greg Vilk:	30:54	Okay, I just wanted, because that's kind of what he asked.
Wayne Arnold:	30:56	Okay, thank you. Anybody else?

Joe Smith:	30:59	I'm going to give it a try.
Wayne Arnold:	30:59	Okay, come on.
Joe Smith:	31:02	I'm not very good at this. My name is Joe Smith. My family's been on the street since 1968. We bought a first piece of property, then we bought a second, then we bought the house. I currently live in the house my family owned since '72, '73. We flood. As Dick says, it's a low-lying area. My house is flat on the ground. It is not elevated. It probably wouldn't meet code at this time. With the new building standards, obviously everything changes over time. If they build this and they do not fix the drainage, I'll flood even worse.
	31:57	Currently, as Steve has stated and other people have stated, our street is very narrow. We should not allow any commercial access to our street. I started a business in '99 and I had to sign a document with the county stating that my business would not create any extra traffic on the street. So this business obviously is going to create extra traffic on the street. It doesn't matter if we connect the street to the stoplight, which I prefer we would not connect the street to the stoplight and that emergency access you have there, if this plan was to go through, would have to be gated to keep all the traffic from the commercial building off of our street. That's pretty much all I got to say.
Wayne Arnold:	32:56	Well, thank you for the comments. Anyone else? Yes sir. Come on up.
Todd:	33:07	Todd Jones. 5315 Merlin, about 20 years. I'd just like to concur with my other neighbors here. This is not concurrent with the feel or the usage of what this area should be. There should definitely not be access, emergency or otherwise onto a street that can barely accommodate two vehicles at this time. I feel that this not only would propose a downside effect to our property value, but also to our quality of living. You have a situation where you're going to have industrial activity. Every U-Haul truck has a backup beeper. How many trucks are going to be there beeping all day long, backing up, moving back and forth. Are you going to have propane fill there? Are you going to have a large propane area? I just don't think this is a proper place for this project. And I share the sentiments of my neighbors.
Wayne Arnold:	34:02	Okay, thank you for coming out. Thanks for the comment. If there's nobody else, we'll close the meeting and I'd like to thank

everybody for coming out tonight and as I mentioned, we go back to that page if you want to take a photo of it or any of the information for our contacts so you can get a copy of the materials. That's where you do it. Thank you, all. Good night.

PROJECT INFORMATION

FUTURE LAND USE (FLU) DESIGNATION:

Existing: Urban Designation, Mixed Use District, Urban Coastal Fringe Subdistrict

Proposed: 5396 Myrtle Lane Commercial Subdistrict

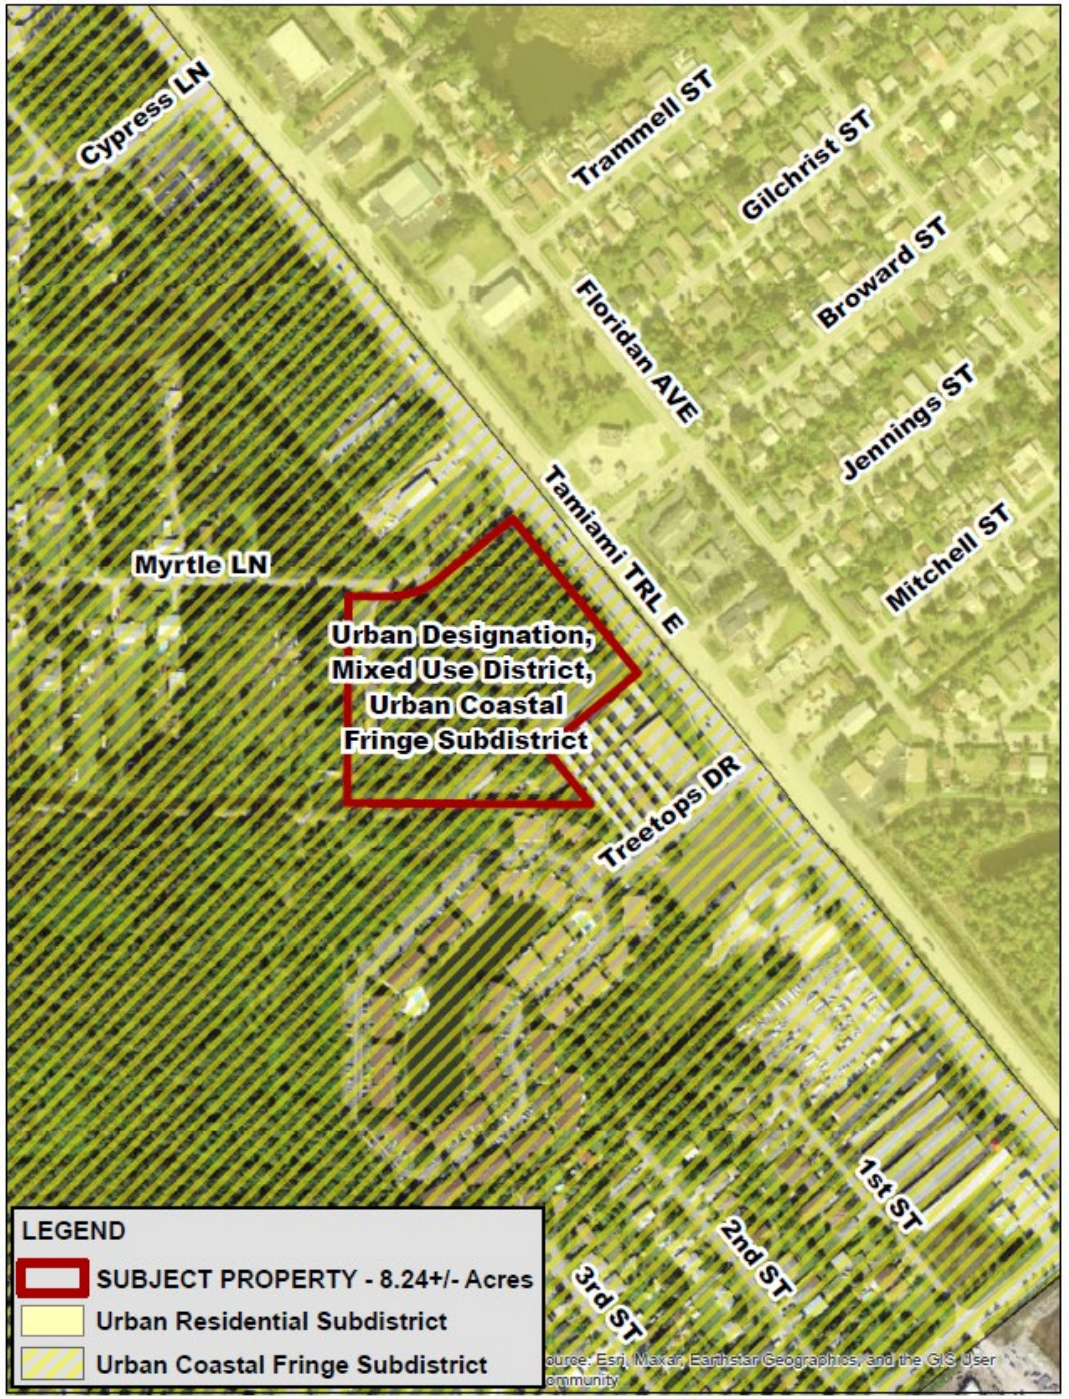
ZONING: **Existing:** Myrtle Woods CPUD and RMF-6

Proposed: 5396 Myrtle Lane Commercial CPUD

PROPOSED REQUEST:

- Modify the FLU map to add the 5396 Myrtle Lane Commercial Subdistrict
- Rezone from the Myrtle Woods CPUD and RMF-6, Zoning Districts to the 5396 Myrtle Lane Commercial PUD
- To allow a maximum of 200,000 square feet of indoor self-storage/warehouse and a maximum of 3,000 square feet of retail and service uses

FUTURE LAND USE MAP - EXISTING



FUTURE LAND USE MAP - PROPOSED

Proposed Subdistrict Language:

22. 5396 Myrtle Lane Commercial Subdistrict [page 77]

This Subdistrict is approximately 8.24 acres in size and is located on the southwest quadrant of Tamiami Trail East (U.S. 41) and Myrtle Lane as depicted on the 5396 Myrtle Lane Subdistrict Map. The purpose of this Subdistrict is to provide commercial land uses. Development within the Subdistrict shall be subject to the following:

a. All development within this Subdistrict shall be rezoned to a Planned Unit Development (PUD).

b. The PUD Ordinance must include development standards and buffers to ensure compatibility with surrounding properties.

c. Allowable uses shall be limited to:

1. A maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses shall be permitted within the CPD. No building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the uses permitted by right in the C-1 through C-3 Zoning District and the following uses.

2. Automotive rental and leasing (7513 and 7519)

3. Outdoor equipment rental and leasing (7359)

4. Indoor storage, including cube storage and moving supplies sales (4225 and 4226)

5. Propane gas dealers, including grilling and propane accessories (5984)

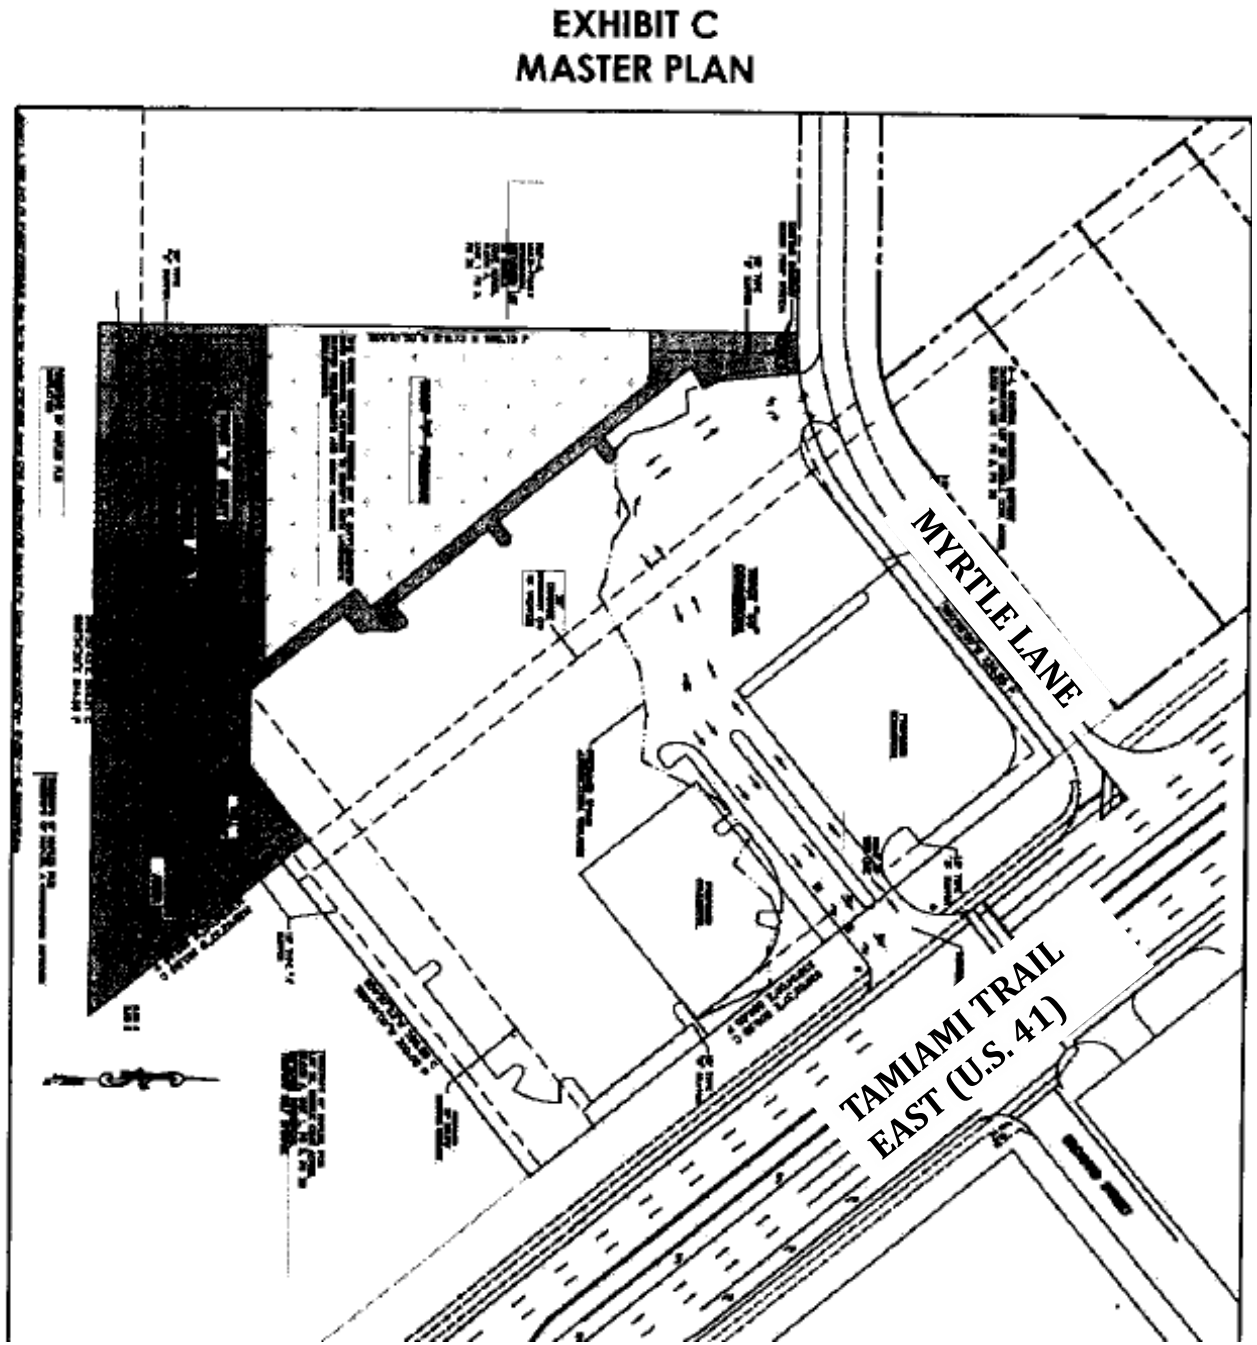
6. Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

d. Development is limited to a maximum intensity of 200,000 square feet of gross floor area for indoor self-storage/warehouse and a maximum of 3,000 square feet of gross floor area for retail uses.

N

APPROVED MASTER PLAN

Ordinance 08-09



PROPOSED MASTER PLAN

SITE SUMMARY

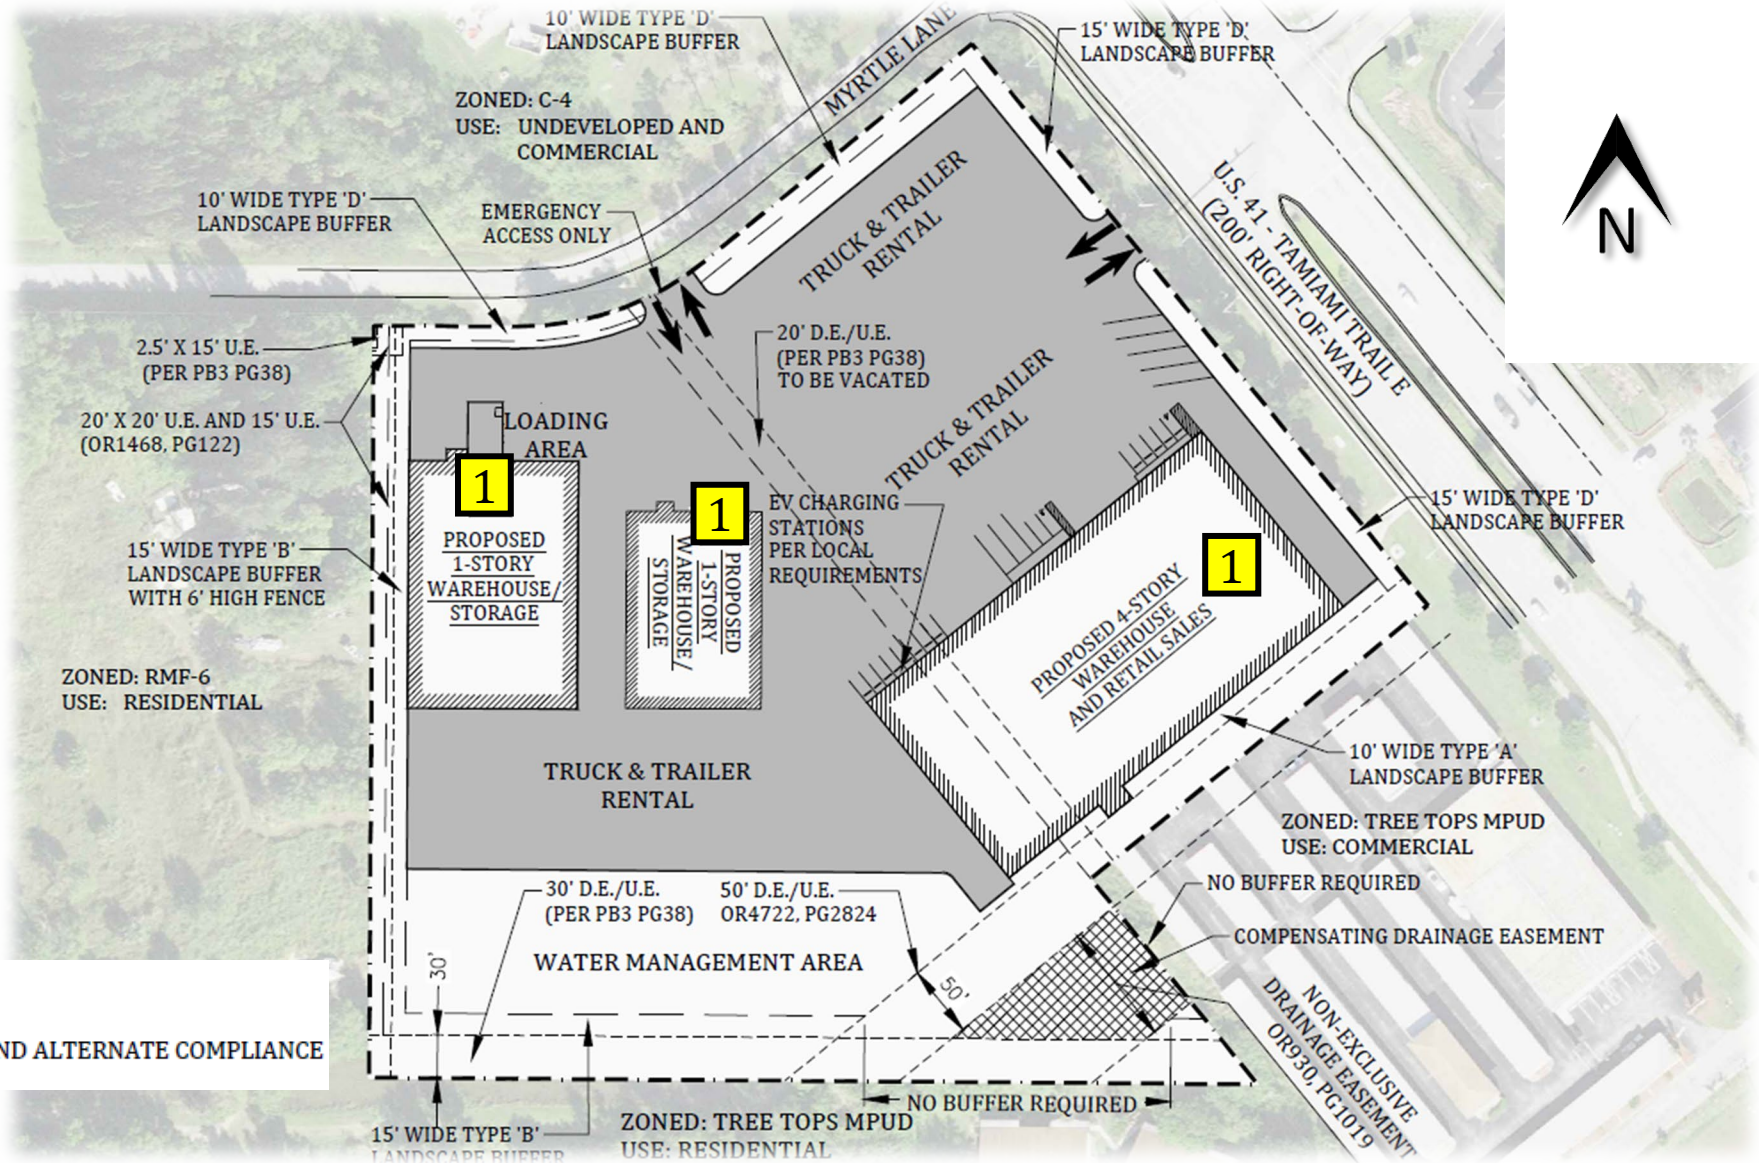
TOTAL SITE AREA: 8.24± ACRE

COMMERCIAL	5.81± AC (71%)
WATER MANAGEMENT	1.94± AC (23%)
LANDSCAPE BUFFERS	0.49± AC (6%)

SELF STORAGE/WAREHOUSE: MAXIMUM 200,000 S.F.
RETAIL: MAXIMUM 3,000 S.F.

OPEN SPACE:
REQUIRED: 30%
PROVIDED: 30% (WITHIN THE OVERALL PUD)

PRESERVE:
REQUIRED: 0± ACRES (0 ACRES NATIVE VEGETATION X 15%)
PROVIDED: 0± ACRES



DEVIATIONS (SEE EXHIBIT E)

1 RELIEF FROM LDC SECTION 5.05.08, DEVIATIONS AND ALTERNATE COMPLIANCE

CONCEPTUAL SITE RENDERING

A&M ASSOCIATES, INC.
2727 N. CENTRAL AVENUE
PHOENIX, ARIZONA 85004
P: 602.263.6841

PROPOSED PERMITTED USES

A. Principal Uses:

1. A maximum of 200,000 square feet of gross leasable area of indoor self-storage/warehouse and a maximum of 3,000 square feet of gross leasable area of retail and service uses shall be permitted within the CPD. No building or structure, or part thereof, shall be erected, altered or used, or land used, in whole or in part, for other than the uses permitted by right in the C-1 through C-3 Zoning District and the following uses.
2. Automotive rental and leasing (7513 and 7519)
3. Outdoor equipment rental and leasing (7359)
4. Indoor storage, including cube storage and moving supplies sales (4225 and 4226)
5. Propane gas dealers, including grilling and propane accessories (5984)
6. Any other principal use which is comparable in nature with the foregoing list of permitted principal uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

B. The following uses are prohibited:

1. Animal specialty services (0752)
2. Automotive Services (7549)
3. Educational plants and public schools
4. Group Care Facilities
5. Membership organizations, miscellaneous (8699)
   a. Farm granges
   b. Humane societies
6. Parking Lots/Structures (7521)
7. Personal services, miscellaneous (7299)
   a. Bartering services
   b. Comfort station operation
   c. Escort service
   d. Turkish baths
8. Public administration (9661)
9. Retail services - miscellaneous (5999)
   a. Monuments/tombstones
   b. Sales barns
10. Valet parking

C. Accessory Uses:

Accessory uses and structures customarily associated with the permitted principal uses and structures, including, but not limited to:

1. Electric vehicle charging stations
2. Essential services
3. Minor auto service and repair, for rental/leased vehicles only
4. Signage
5. Water management
6. Any other accessory use which is comparable in nature with the foregoing list of permitted accessory uses, as determined by the Board of Zoning Appeals (BZA) or the Hearing Examiner by the process outlined in the LDC.

PROPOSED DEVELOPMENT STANDARDS

TABLE I
COMMERCIAL DEVELOPMENT STANDARDS

	PRINCIPAL USES	ACCESSORY USES
MINIMUM LOT AREA	10,000 SQUARE FEET	N/A
MINIMUM LOT WIDTH	100 FEET	N/A
MINIMUM YARDS (External)		
From Tamiami Trail East ROW (Front)	25 FEET	25 FEET
From Eastern PUD Boundary (Side)	25 FEET	10 FEET
From Western PUD Boundary (Side)	25 FEET	15 FEET
From Southern Boundary (Rear)	25 FEET	15 FEET
MINIMUM YARDS (Internal)		
Internal Drives/ROW	10 FEET	0 FEET
Rear	10 FEET	10 FEET
Side	10 FEET	10 FEET
MINIMUM DISTANCE BETWEEN STRUCTURES	10 FEET	10 FEET
MAXIMUM HEIGHT		
Zoned	60 FEET	25 FEET
Actual	70 FEET	25 FEET
MINIMUM GROSS FLOOR AREA FOR ANY PERMITTED USE	700 SQUARE FEET	N/A
MAXIMUM GROSS FLOOR AREA FOR PUD Indoor Self Storage/warehousing ~~Retail and Service~~Other uses	200,000 SQUARE FEET 3,000 SQUARE FEET	N/A

NEXT STEPS

- **File resubmittal**
- **Hearing Notices mailed to adjacent property owners within 500 feet of the subject property.**
- **Hearing sign posted on property advertising hearing dates.**

- **<u>HEARING DATES:</u>**
  - **CCPC – TBD, 9:00 a.m., Collier County Government Center, 3299 Tamiami Trail East, 3rd floor BCC Chamber, Naples, FL, 34112**
  - **BCC – TBD, 9:00 a.m., Collier County Government Center, 3299 Tamiami Trail East, 3rd floor BCC Chamber, Naples, FL, 34112**

Laura DeJohn, Senior Planner, Zoning Department Laura.DeJohn@colliercountyfl.gov

Parker Klopf, Comprehensive Planning Review Parker.Klopf@colliercountyfl.gov

I am writing to you in opposition to Metropolitan Naples request of the Change in Zoning and several other requested Deviations on this project AKA U-Haul Mobility Center.

How does this project align with the "EAST NAPLES COMMUNITY DEVELOPMENT PLAN" That was prepared in November of 2020?

I am attaching the relevant pages for ease of review.

Page 3 of the plan in the Executive Summary specifically limits "undesired uses to include Self-Storage."

Page 19 goes into more detail on the scope of undesired uses for this area.

Page 6 Names the area US 41 at Naples Manor and an Artist Rendering depicts an idea of what the build-out for the area should look like. This artist rendering includes the parcels in question.

Pages 25-28 Details the current status and the ideal future land use for the US 41 at Naples Manor Corridor, which encompasses the subject property.

As you are aware this study included County Departments, Stakeholders and Public input with the assistance of a paid Consultant. The take-aways and vision from this plan should be the primary guide to how review of this proposal is administered.

It is my opinion that both the Commercial C-3 zoning and RMF-6 zoning that was requested to be rezoned to a more intense commercial PUD is not consistent with the county GMP and the immediate surrounding neighbors.

As the current zoning would permit for Office space and light retail, these land uses would have a better impact on the neighborhood and surrounding community, with services that would be relevant to our daily lives and might even enhance our community.

The proposed “U-Haul Mobility Storage Rental Complex” is of a more industrial nature and does not belong adjacent to low density RMF – 6 zoning and within 500 feet of a single-family neighborhood.

Each time I read the application and notes related to this project I see or realize the scope of the project and concerns.

- Building Height 60’, where on the East Trail does anything this high exist except at the government center and of course at the applicant’s “monstrosity” at the Davis Triangle?
- Request to Deviate from Glazing Standards, applicant wants to build a 60’ tall warehouse that will be a blight on the entire East Trail.
- Density of Use, nearly all of the 8.24 acres will be of an industrial nature, from the aforementioned 60’ warehouse with appx 200,000 sf of indoor storage. 2 other warehouse buildings of undetermined height and the entire site paved with impermeable surface for Trucks and Trailer Rental.
- Accessory Uses, Propane Storage, Gas Storage for Rental Vehicles, Fleet Maintenance to include Oil Changes, Transmission Fluid Changes, Brakes, Tires etc. All susceptible to Run-off into the adjacent canals of the Lely Drainage Project and then into Rookery Bay.
- Access to Myrtle Lane, While the site plan calls for emergency access at this location, several places within the applicants’ evaluation criteria this secondary access on Myrtle Lane is referenced as a viable alternate egress and access to the facility.

  Myrtle Lane is a narrow (17’) wide Lane that services 35 Homeowners and several undeveloped RMF 6 parcels. We already have access issues to US 41 due to lack of alignment with a light, so we make a U-Turn either coming or going when we need to access or leave the lane.

  We have a local courtesy on the street that we yield to other vehicles based on where it is safe to pull over when a neighbor is pulling a trailer. Lost drivers who are unaccustomed to the size of their vehicle can become a real safety hazard on this Lane.

I have been on Myrtle Lane for over 20 years, and in Collier County for 45+ it may not be relevant but speaking to a bigger picture of East Naples, is this really good for our community, One more Self Storage Center in a very Short distance?

I calculated in a 2.8 mile stretch along US 41 between Valley Stream Dr. and SW Blvd there are 5 already built SS Centers plus another to be built for autos, representing over 450,000 sf of storage space.

When I travel and visit new cities I judge them by the entry into the city. The Tamiami Trail is a major thoroughfare that brings out of town visitors into our community. So if you were crossing over 951 headed into town, first you would see a shopping plaza, then nice lakes with horse statues, a nice park, followed

by a nasty litter filled ditch and a then bunch of storage centers, truck rentals and used golf carts. It all seems low rent, and not a great reflection on our community.

Commission Saunders will remember this bit of CC history, back 35+ years ago, East Naples was going to be the "bomb" a development called Sable Bay was going to Rival Pelican Bay. The community was fought on legitimate environmental reasons and also general NIMBY opposition. So all of the "preferred" development moved towards North Naples.

East Naples became the "undesired place" blighted, but now so many years later we have beautiful, sustainable, lower density communities. However, the stigma is still there and allowing it to perpetuate by providing multiple deviations and land use changes to developers like this applicant has requested, does not enhance our community or way of life.

Large Self Storage Centers with the varied services of truck rental, propane etc. is better suited at an industrial location with access cross arterial roads.

Deviating from the Comprehensive Growth Management Plan is not a good idea. Every deviation, re-zone and relief from the LDC erodes the framework that was created to make Collier County a quality-of-life community. The requested deviations and re-zone do not enhance our quality of life in the surrounding neighborhoods. Nor do they add to the health, safety, and well-being of our residents.

I appreciate your review of my comments and apologize for the length of this letter.

Sincerely,
Claudia Fuller

Collier County

EAST NAPLES

COMMUNITY DEVELOPMENT PLAN

NOVEMBER 2020

EXECUTIVE SUMMARY

KEY TAKEAWAYS & VISION

The area generally has good coverage by public facilities and services but would benefit from improvements to provide better transportation options, including non-motorized options such as walking and biking, for localized travel. The US 41 2018 Study recommended focusing on transportation network improvements for streets connecting to and running parallel to US 41; these recommendations have been considered for land use concepts developed as part of this plan.

Outreach from prior studies and this current study indicate a desire in the community for more diverse and quality commercial establishments. Looking generally at the amount of non-residential development that would include commercial, the area is underserved, with only 11% of current square footage built as non-residential relative to the unincorporated county as a whole that has a share of 15% non-residential square footage. This plan looks at approaches to increase the share of non-residential development by focusing on increasing desired commercial and other uses that can be paired with commercial for mixed-use development.

The area may already face some potential limitations to adding more commercial uses, which include:

- Limited roadway connections between neighborhoods and commercial corridors
- Low population density
- Significant seasonal population
- Uncertainties related to general market demand

An important starting point for ensuring desirable future development is to implement limitations on undesired uses (such as gas stations, self-storage, car washes, fast food restaurants) and ensure that new development being built includes desirable uses (such

Map 2: Existing Land Uses and Roadways in the East Naples Study Area

EXECUTIVE SUMMARY

US 41 AT NAPLES MANOR

MODERATE BUILD-OUT SCENARIO DEVELOPMENT ESTIMATES*

- Commercial Square Footage Added: **254,000**
- Max. Office/Residential Square Footage Added: **59,000**
- Max. Employees/Units Added: **700 Employees/40 Units**

**See plan for calculation details and assumptions.*

TRANSPORTATION AND LANDSCAPING HIGHLIGHTS

- US 41 redesigned as multi-way boulevard, moving higher-speed traffic to center lanes and lower-speed traffic to side lanes with a high degree of access and parking; side and center lanes separated by median containing protected pathway with trees
- Improved connections to neighborhoods with additional landscaping; new connections between neighborhoods and US 41 via parking lots, helping reduce block size
- Enhanced street crossings and intersections to aid cyclist/pedestrian movement
- Street parking
- Native plants

LAND USE AND DESIGN HIGHLIGHTS

- Spaces along street frontage filled in with buildings that hug lot edges to support walkability
- Mix of ground-floor commercial and some multi-story mixed-use with commercial and office/residential (more limited build-out in this concept); warehouse space can be encouraged to redevelop as mixed-use
- “Gas backwards” gas station design – placement of fuel pumps at rear of site and store at front of site along roadway, making store easily approachable by pedestrians and cyclists

2.0 KEY TAKEAWAYS & VISION

An important starting point for ensuring desirable future development is to implement limitations on undesired uses and ensure that new development being built includes desirable uses for the community:

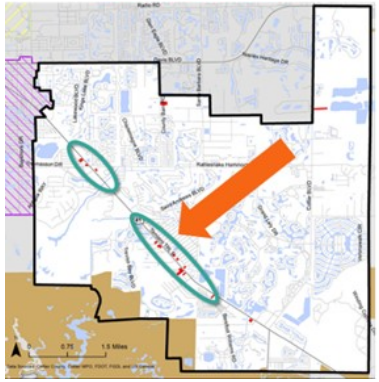
- **Limit undesired uses**: Undesired uses include several auto-oriented uses, such as car washes, gas stations, fast food restaurants, and warehousing. Certain limitations are already in place or are under consideration, such as spacing requirements for gas stations and design requirements in C-4 commercial districts to incorporate warehousing into mixed-use development; this plan provides additional approaches for evaluation.
- **Attract desirable uses**: Desirable uses as identified through outreach from the 2018 US 41 Corridor Study and efforts as part of this plan identified several desirable uses that tended to be commercial, including retail/shopping, mixed-use and live/work units, restaurants, grocery stores, hotels/resorts, entertainment, and services such as healthcare and businesses that create jobs; respondents to the public survey for this planning effort indicated that restaurants are a particular priority.
- **Ensure green spaces:** Additional comments from the public survey for this plan indicated a desire to ensure ample green space and natural spaces in the area.

Note that although the 2018 study indicated the desired uses mentioned above as priorities, preferences identified through outreach activities indicated that a majority of outreach participants would support certain forms of residential development along the corridor, including live/work.

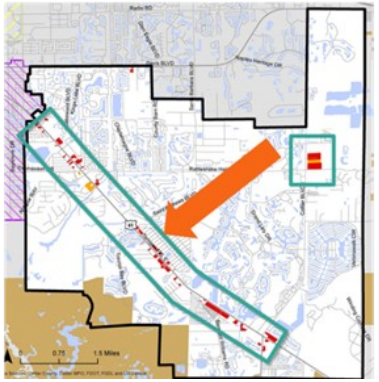
Development and redevelopment options to provide additional desired commercial uses should focus **primarily on the US 41 corridor** and nodes (see Technical Memorandum 1 in the supporting documents) but provide approaches that can be used at other development and redevelopment sites in the East Naples Study Area and beyond, such as the outlet shops on Collier Boulevard south of US 41 and developments under consideration near Collier Boulevard and Rattlesnake Hammock Road.

US 41 FOCUS

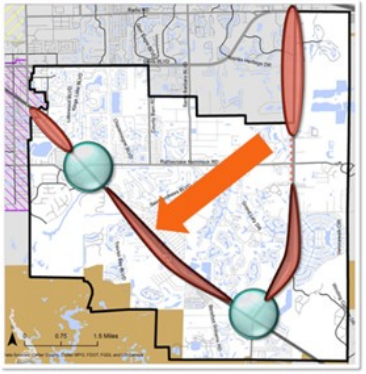
Likely Redevelopment Opportunities



Vacant Land Opportunities



Location Preferences from Public Survey



3.0 LAND USE CONCEPTS

US 41 AT NAPLES MANOR

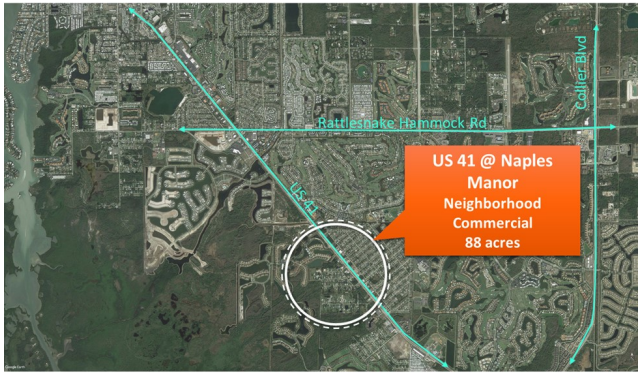


Figure 14: US 41 at Naples Manor Existing Conditions and Connectivity Opportunities

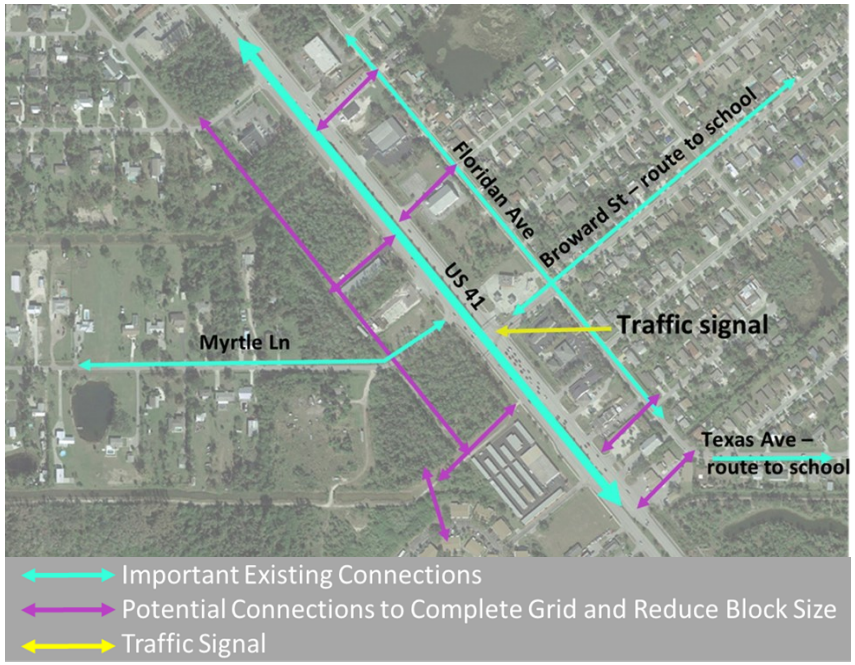
EXISTING CONDITIONS

This site is furthest from the more urban node of Downtown Naples. Many of the streets connecting to US 41 in this area are neighborhood roads, and these connections to neighborhoods such as Naples Manor are fairly regular. The commercial lots along this corridor are also relatively shallow. As a result, the project team considered the lowest levels of potential intensity for this site relative to the other sites.

A closer look at traffic connectivity in this area (Figure 14) shows the near alignment of Myrtle Lane and Broward Street, intersecting with Tamiami Trail with the presence of a traffic signal. The fact that it is near the center of this node makes this intersection a natural place to start building a walkable, mixed-use center. Additionally, the west side of Tamiami Trail lacks a parallel lane to link the commercial properties in the way that Floridan Avenue links the parcels on the east side. Such a lane would provide connectivity for the western side of Tamiami Trail and reduce traffic pressure along Tamiami Trail.



3.0 LAND USE CONCEPTS

MODERATE BUILD-OUT SCENARIO

LEGEND

- Existing Buildings
- 3 story Infill / Redevelopment
- 1 story Infill / Redevelopment
- Demolished Structures

NAPLES MANOR—MODERATE BUILD-OUT SCENARIO	
DEVELOPMENT ESTIMATES	
Commercial Sq. Ft. Added	254,000
Max. Office/Residential Sq. Ft. Added	59,000
Max. Employees/Units Added	700 Employees/ 40 Units

Source: concept image: PlusUrbia Design; calculations—Tindale Oliver; notes on calculations:
Numbers based on conceptual design and rounded. The calculations shown herein are conceptual and do not guarantee potential build-out.
Maximum square footage of either office or residential indicates that which could be added given the concept design and based on whether net square footage added was all office or all residential, yet some combination of the two would be possible.
Maximum employees or units indicate those that could be added given the concept design and based on whether net square footage added was all office or all residential, yet some combination of office and residential would be possible. Assumed 1400 sq ft unit, 300 sq ft of office per employee, 500 sq ft of retail per employee.

3.0 LAND USE CONCEPTS

TRANSPORTATION AND LANDSCAPING HIGHLIGHTS

- US 41 redesign as multi-way boulevard as it passes to the west of Naples Manor. This design would allow for higher speed traffic to move in the lanes of the central thoroughfare and for lower speed traffic to move to side lanes with a high degree of access and parking (similar to Floridan Avenue on the east side); the side and center lanes are separated by a median that contains a protected multi-use pathway with trees.
- Improved connections to neighborhoods, including additional landscaping
- New connections between neighborhoods and US 41 via parking lots, which can help reduce block size
- Enhanced street crossings
- Protected intersection; may include elements such as: corner curb extensions where cyclists and pedestrians can wait for the crossing signal; clear crosswalks for pedestrians and a bike crossing zone, which are striped and positioned to maximize visibility for turning cars; stop bars for cars located slightly farther back than a conventional intersection's stop bars, allowing for wider crosswalks; and a textured area that assists with traffic calming
- Street parking
- Native plantings: multi-way boulevard can be planted with multiple rows of Florida Royal Palms; canopy trees on other streets might include: Florida Live Oak, Gumbo Limbo, Bald Cypress, Florida Maple, Paradise Tree, Satinleaf, Florida Slash Pine, Pigeon Plum, Dahoon Holly, and Wild Tamarind, supplemented by palms such as cabbage palm, Florida Silver Palm, Keys Brittle Thatch Palm, Buccaneer Palm, and Saw Palmetto

LAND USE AND DESIGN HIGHLIGHTS

- Spaces along street frontage filled in with buildings that hug the edge of parcels to support walkability
- Mix of ground-floor commercial and some multi-story mixed-use with commercial and office/residential (more limited build-out in this concept); warehouse space can be encouraged to redevelop as mixed-use
- "Gas backwards" gas station design- placement of the fuel pumps at the rear of the site and the store at the front of the site along the roadway, making the store easily approachable by pedestrians and cyclists

3.0 LAND USE CONCEPTS

OTHER BUILD-OUT OPTIONS CONSIDERED

The Light and Robust build-out scenarios provided other options for this site. Figure 17 shows landscaping and transportation improvements in the light concept; this scenario could also include adjustments to building design as lots redeveloped. Figure 18 shows the Robust option, which would provide a further build-out of the site using the approaches mentioned for the Moderate scenario. Note that approaches to encourage desired uses and prohibit/discourage undesired uses could still be applied in these scenarios.

Re: 5396 Myrtle Lane
PL 20230016211
PL 20230016212

To the Collier County Planners and County Commissioner;

There was a meeting on May 6th at 5:30pm, a Neighborhood Information Meeting, hosted by GradyMinor and Associates, for the above property. Many neighbors attended this meeting, some could not make it because of the time. We had our own neighborhood meeting on May 2nd, with 33 neighbors in attendance.

We had some discussions this past weekend with neighbors that could not make the May 6th meeting. We all feel that this type of project is not good for our little neighborhood. There are too many storage facilities already in our area, one being right next door to this proposed project (CubeSmart). The type of project they are proposing would be better suited in an industrial park or a highly dense commercial area, not in a small residential neighborhood like ours.

Some of the concerns were about the flooding due to a project this large. The West end of Myrtle sits lower than the East end. The West end floods in the rainy season, with some of the properties having severe flooding during hurricanes and heavy rainstorms.

Another huge concern for all of us is the obvious, the traffic in our neighborhood. This will bring too much traffic and unwanted guests to our neighborhood, during construction and afterwards. Our neighborhood does not have sidewalks and we have many young children/grandchildren that play outside and ride bikes, and residents walking pets.

Many of the residents on Myrtle Lane have been in their homes for several years, some for 25–55 years. Our family purchased two lots in 1968, and our home in 1973. The most impacted resident would be 5371, her husband built their home in 1971 and they raised their four children there. She is now a widow and scared to death what this type of project will bring. Our quiet, peaceful neighborhood will be gone.

We all always knew that something would be built there eventually, but never imagined what is being proposed. We feel that what would be built there should be built according to the current zoning and not be allowed any access to/from Myrtle Lane.

When you make your decision regarding this proposed project, our neighborhood is begging you to take into consideration the impact this will have on the residents. Please leave the current zoning in place and do not allow a project of this size next to our neighborhood.

Sincerely,

Joe R. & Katherine L. Smith

Laura and Parker,

We have been reviewing the latest update from the developer of the proposed UHaul site at the corner of Myrtle Lane and Tamiami Trail.

We are also monitoring the Planning Commission Calendar for when this item may go before them.

We appreciate staff comments and questions regarding whether this site is viable for the size and scope of the project. All efforts to minimize the height of this structure still leaves us with an out of place business and facility. The site is inappropriate for propane storage as it is not an industrial location and is immediately adjacent to residential zoning.

Though the attempt to help buffer this mega storage center has merit, it still is merely a Band-Aid on the blight that this mega storage structure will leave in damnably and indefinitely on 41 E which in fact is a major gateway between Naples and Marco and an entrance gateway into the city of Naples from traffic from the Miami and East Coast area. All

attempts to minimize the impact of this will still not hide this decision that the Collier County Commissioners will be left with for years to come.

Further it is rather unfortunate that the developer does not feel that they should abide be the East Naples Development Plan because it has not been "enacted". Although it has not been formally adopted it is obvious from the amount of time, effort and money by many parties and organizations to produce such a plan that this is the "will' of the community. The Developer is obviously not interested in being a contributor or long term neighbor of East Naples, in fact the whole project is really because U-Haul at it's current location is a hindrance to Metropolitan Developments Mega Project at the Davis Triangle. So they are trying to find the fastest cheapest piece of land to appease U-Haul without consideration of Myrtle Cove Acres or East Naples as a whole. "Just Push it down the road"

The applicants follow up and modifications reference an amended Master site Plan in Attachment 2 within the portal, we cannot seem to locate that, if you have a copy can you please forward to us.

Thank You,
Steve & Claudia Fuller

RE: PL20230016211 and PL20230016212

Regarding the above property, I am against rezoning for a multitude of reasons which our community has brought to your attention: drainage issues due to the street being a low area; additional traffic in an already congested road; numerous mini storage units within a 2 mile range. I am also strongly against any kind of additional access on to Myrtle Lane whether it be general or emergency. The road only has one way in and one way out and the width of the road makes it even more treacherous.

Please add my comments to the file for this property.

PL20230016212

Laura DeJohn, Senior Planner, Zoning Department Laura.DeJohn@colliercountyfl.gov

Parker Klopf, Comprehensive Planning Review Parker.Klopf@colliercountyfl.gov

Michael Sawyer, Transportation, Michaelsawyer@colliercountyfl.gov

This Letter written as a formal objection to the proposed development of a Mega U-Haul center at the corner of Myrtle and 41, it will be summarized in bullet points with no specific order of importance simply from the perspective that all of these bullet points carry an equal weight of importance depending on the neighborhood's perspective.

- There have been several studies and suggestions by City Council members and County Commissioners that there be a moratorium on self-storage facilities around the county. Cape Coral has already instituted a moratorium on these projects.
- The neighboring property is a CubeSmart central station and a block down a CubeSmart satellite station, these locations currently have tons of availability, and as of today they are offering a 40% discount and waving administrative fees, why would we need an additional 300,000 square feet.
- The proposed structure in the plan, though under the disguise of a four-story building which would be the largest structure on the East Trail, is actually proposed at 60 to 70 feet tall. Making it far higher than 4 stories and standing out as the biggest eyesore just East of the Gateway into Collier County and Naples; it would offer nothing for neighborhood enhancement or beautification.
- The facility itself not only is not needed and too large and offers absolutely nothing for the surrounding neighbors or communities, It is in an an awkward location in terms of its accessibility, both egress and access.
- On the proposed site plan produced by Grady Minor they talk of sidewalks on 41 and Myrtle, there is no sidewalk on Myrtle there are no streetlights on Myrtle. Myrtle Lane is a very narrow 17-foot-wide Rd., Desperately in need of paving and certainly no additional traffic; this road has not been serviced in the last 18-20 years.
- Whatever is to be built at the corner of 41/Myrtle/Broward intersection, it should come with a well thought out County plan as to traffic flow and safety. This is an intersection that has had previous studies, with recorded plans and drawings that show realignment of Myrtle to the 41 intersection, a desperately needed improvement for safety and all traffic concern, there are already 2 memorials for people that have died in car wrecks at this intersection.

- Stated as a separate bullet point there are already two people who have died at this intersection.
- There is an easement they would like to capitalize on at back of the property between the commercial and the RMF 6 is an active easement with several power lines going through it.
- I feel the intention of the developers, Metropolitan Naples, LLC, is not for the benefit of the community. It is simply to move U-Haul off the approx. 2.4 acres adjacent to their current high-rise product and project to allow for additional land to build additional buildings further redefining the gateway into Naples and congesting the Davis 41 triangle.
- I recognize that this land (on Myrtle Lane) may be a cheaper alternative to other commercial land that is more suitable for the development of a mega storage center 300,000 square feet. Maybe with the guidance and foresight of our county planners and commissioners they can look elsewhere.
- The project offers nothing for residents within several miles in terms of daily services, weekly services, emergency services or Basic services for daily and household living and maintenance.
- The storage center by its nature is a drive to location as needed accessed infrequently and the distance of one to four extra miles is insignificant In the scope of its usage.
- This is a neighborhood that is surrounded by three canals, part of the South Florida Water Management system, that routinely experiences flooding. These canals filter through Rookery Bay.
- The impact that this large asphalt laden facility will create on surface water runoff at the very least needs to be studied further, with the aide of South Florida Water management potentially the Corps of Engineers.
- This particular project would commercialize this area to an industrial level that it sets an unfortunate precedent for what else might be attracted to this property and East Naples.
- The county has a duty and responsibility to ensure responsible, appropriate, and community enhancing development.

Sincerely,
Steve Fuller

SIGN POSTING INSTRUCTIONS

(CHAPTER 8, COLLIER COUNTY ADMINISTRATIVE CODE FOR LAND DEVELOPMENT)

A zoning sign(s) must be posted by the petitioner or the petitioner's agent on the parcel for a minimum of fifteen (15) calendar days in advance of the first public hearing and said sign(s) must be maintained by the petitioner or the petitioner's agent through the Board of County Commissioners Hearing. Below are general guidelines for signs, however these guidelines should not be construed to supersede any requirement of the LDC. For specific sign requirements, please refer to the Administrative Code, Chapter 8 E.

1. The sign(s) must be erected in full view of the public, not more than five (5) feet from the nearest street right-of-way or easement.
2. The sign(s) must be securely affixed by nails, staples, or other means to a wood frame or to a wood panel and then fastened securely to a post, or other structure. The sign may not be affixed to a tree or other foliage.
3. The petitioner or the petitioner's agent must maintain the sign(s) in place, and readable condition until the requested action has been heard and a final decision rendered. If the sign(s) is destroyed, lost, or rendered unreadable, the petitioner or the petitioner's agent must replace the sign(s

NOTE: AFTER THE SIGN HAS BEEN POSTED, THIS AFFIDAVIT OF POSTING NOTICE SHOULD BE RETURNED NO LATER THAN TEN (10) WORKING DAYS BEFORE THE FIRST HEARING DATE TO THE ASSIGNED PLANNER.

Individual speakers will be limited to three (3) minutes on any item. The selection of any individual to speak on behalf of an organization or group is encouraged. If recognized by the Chairman, a spokesperson for a group or organization may be allotted ten (10) minutes to speak on an item. Written materials intended to be considered by the Board shall be submitted to the appropriate County staff a minimum of seven (7) days prior to the public hearing. All materials used in presentations before the Board will become a permanent part of the record.

As part of an ongoing initiative to encourage public involvement, the public will have the opportunity to provide public comments remotely, as well as in person, during this proceeding. Individuals who would like to participate remotely should register through the link provided within the specific event/meeting entry on the Calendar of Events on the County website at www.colliercountyfl.gov/our-county/visitors/calendar-of-events after the agenda is posted on the County website. Registration should be done in advance of the public meeting, or any deadline specified within the public meeting notice. Individuals who register will receive an email in advance of the public hearing detailing how they can participate remotely in this meeting. Remote participation is provided as a courtesy and is at the user's risk. The County is not responsible for technical issues. For additional information about the meeting, please call Geoffrey Willig at 252-8369 or email to Geoffrey.Willig@colliercountyfl.gov.

Any person who decides to appeal any decision of the **Board** will need a record of the proceedings pertaining thereto and therefore, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Division, located at 3335 Tamiami Trail East, Suite 101, Naples, FL 34112-5356, (239) 252-8380, at least two (2) days prior to the meeting. Assisted listening devices for the hearing impaired are available in the Board of County Commissioners Office.

BOARD OF COUNTY COMMISSIONERS
COLLIER COUNTY, FLORIDA

CHRIS HALL,
CHAIRMAN

CRYSTAL K. KINZEL,
CLERK OF THE CIRCUIT COURT & COMPTROLLER

By: Jennifer Hansen
Deputy Clerk (SEAL)

Executive Summary

This item requires that ex-parte disclosure be provided by Commission members. Should a hearing be held on this item, all participants are required to be sworn in. Recommendation to approve Petition VAC-PL20240005670 to disclaim, renounce and vacate the County and the public interest in the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the Public Records of Collier County, Florida, located in the southeasterly quadrant of U.S. 41 and Myrtle Lane, in Section 29, Township 50 South, Range 26 East, Collier County, Florida, and to accept Petitioner's grant of a 15-foot wide by 520-foot long drainage easement to replace the vacated drainage easement. (Companion to items 9A and 9C)

OBJECTIVE: To adopt a Resolution to vacate the County and the public interest in the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the Public Records of Collier County, Florida, located in Section 29, Township 50 South, Range 26 East, Collier County, Florida, being more specifically shown in Exhibit A, and to accept Petitioner's grant of a 15-foot wide by 520-foot long drainage easement to replace the vacated drainage easement.

CONSIDERATIONS: Petition VAC-PL20240005670 has been received by the Development Review Division, Growth Management Community Development Department, with a request to vacate the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the Public Records of Collier County, Florida, located in Section 29, Township 50 South, Range 26 East, Collier County, Florida.

The request is to remove the 20-foot-wide drainage and utility easement that runs through Parcel Numbers 60780960002 and 60781000000. No drainage facilities are located within the portion of the easement that will be vacated. The applicant is currently rezoning (PL20230016212) 8.24+/- acres to a Commercial Planned Unit Development (CPUD) which includes Parcel Numbers 60780880001 (5396 Myrtle Lane), 60780920000 (5398 Myrtle Lane), 60780960002 and 60781000000. In order to develop the proposed CPUD, the existing 20-foot-wide drainage and utility easement, which runs through the middle of the overall CPUD, would need to be relocated. The applicant is proposing to relocate the easement to the western 15 feet of Parcel Number 60780880001, which would be the western 15 feet of the proposed CPUD boundary if the rezone is approved. The easement would only be approved if the rezone is approved.

The public benefit would be improved drainage, which would comply with LDC requirements. The Development Review Division has reviewed this petition and found no reason for objection.

FISCAL IMPACT: Growth Management Community Development Department, Development Review Division staff has collected a $2,000 "Petition to Vacate" fee from the petitioner, which covers the County's cost of recording and processing the Petition.

GROWTH MANAGEMENT IMPACT: There is no growth management plan impact associated with this action.

LEGAL CONSIDERATIONS: The Petitioner is requesting the vacation of the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the Public Records of Collier County, Florida. Pursuant to Resolution 2021-243 and Florida Statutes Section 177.101, the Board may adopt resolutions vacating plats in whole or in part of subdivisions in Collier County, returning the property covered by such plats either in whole or in part into acreage when the following criteria are met:

1. The request is in the interest of the general public welfare, or no public detriment is established.
2. The request does not invade or violate individual property rights.
3. The Petitioner owns the fee simple title to the whole, or that part of the parcel sought to be vacated; and

4. The vacation will not affect the ownership or right of convenient access of persons owning other parts of the subdivision.

   This item has been approved as to form and legality, and requires a majority vote for Board approval. --DDP

RECOMMENDATIONS: To Approve the attached Resolution relating to Petition VAC-PL20240005670, which will vacate the County and the public interest in the 20-foot drainage and utility easement and to accept Petitioner's grant of a 15-foot wide by 520-foot long drainage easement to replace the vacated drainage easement, and direct the Clerk to record a certified copy of the Resolution in the public records and to make proper notation of this Resolution on the plat of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38, of the Public Records of Collier County, Florida.

RESOLUTION NO. 2025-____

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, TO DISCLAIM, RENOUNCE AND VACATE THE COUNTY AND THE PUBLIC INTEREST IN THE 20-FOOT DRAINAGE AND UTILITY EASEMENT LOCATED ALONG THE SOUTHWESTERLY BORDER OF LOTS 24 THROUGH 28, BLOCK "A" OF UNIT NO. 1, MYRTLE COVE ACRES, AS RECORDED IN PLAT BOOK 3, PAGE 38, OF THE PUBLIC RECORDS OF COLLIER COUNTY, FLORIDA, LOCATED IN THE SOUTHEASTERLY QUADRANT OF U.S. 41 AND MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA. [PL20240005670]

WHEREAS, pursuant to Resolution 2021-243, Petitioner, Michael Delate, P.E., of Q. Grady Minor and Associates, LLC., on behalf of the fee simple property owner, has requested the vacation of the County and the Public interest in the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the Public Records of Collier County, Florida, located in Section 29, Township 50 South, Range 26 East, Collier County, Florida, being more specifically shown in Exhibit "A", attached hereto; and

WHEREAS, the Board of County Commissioners, on this day, held a public hearing to consider the petitioner's request and notice of said public hearing was given as required by law; and

WHEREAS, the granting of the petitioner's request will not affect the ownership or right of convenient access of persons owning other parts of the subdivision, nor invade or violate individual property rights.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that the County and Public interest in the 20-foot drainage and utility easement located along the southwesterly border of Lots 24 through 28, Block "A" of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38 of the public records of Collier County, Florida, located in Section 29, Township 50 South, Range 26 East, Collier County, Florida, being more specifically shown in Exhibit "A", is hereby vacated, extinguished, renounced and disclaimed, and this action is declared to be in the public interest and for the public benefit.

BE IT FURTHER RESOLVED AND ORDERED that the Clerk to the Board is hereby directed to record a certified copy of the Resolution in the Public Records and to make proper notation of this Resolution on the plat of Unit No. 1, Myrtle Cove Acres, as recorded in Plat Book 3, Page 38, of the Public Records of Collier County, Florida.

THIS RESOLUTION ADOPTED after motion, second and majority vote favoring same, this 14th day of January 2025.

AFFIDAVIT OF AUTHORIZATION

FOR PETITION NUMBERS(S) _____

I, _____ (print name), as _____ (title, if applicable) of _____ (company, if applicable), swear or affirm under oath, that I am the (choose one) ____ owner X___ applicant ____ contract purchaser and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Collier County to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application; and that
4. The property will be transferred, conveyed, sold or subdivided subject to the conditions and restrictions imposed by the approved action.
5. We/I authorize _____ to act as our/my representative in any matters regarding this petition including 1 through 2 above.

*Notes:

- If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.
- If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."
- If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.
- If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.
- If the applicant is a trust, then they must include the trustee's name and the words "as trustee."
- In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, and then use the appropriate format for that ownership.

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

RE: No Objection to Terminate Easement- 20' wide drainage and utility easement located within Myrtle Cove Acres (Plat Book 3 Page 38, Block A, Lots 24, 25, 26, 27 and 28) on property identified as Parcel Numbers 60780960002 and 60781000000.

Dear Sharon,

In response to your request to terminate the 20' wide drainage and utility easement located within Myrtle Cove Acres (Plat Book 3 Page 38, Block A, Lots 24, 25, 26, 27 and 28) on property identified as Parcel Numbers 60780960002 and 60781000000, LUMEN has **no objection** to the termination of the PUE as shown.

Please be advised that LUMEN **has a cross connect terminal [FID 26183] within the ROW of Tamiami Trail E.**

The no objection is contingent to LUMEN being provided any required easement for relocation of existing facilities, if facilities are within the identified PUE that could be affected, along with LUMEN being completely reimbursed by owner/developer on the cost of relocating such facilities.

Customer or Contractor, will need to call for Locates (Sunshine 811) prior to doing any work. **Customer will be responsible for any damage to LUMEN utilities**.

If I can be of further assistance, feel free to contact me at (239) 237-4853 or email Alexis.Powell@lumen.com

Sincerely,

Alexis Powell

RE: PL2024-5670 Letter of No Objection
Parcel# 60780960002 & 60781000000
5396 Myrtle Lane,
Naples, FL, 34113

Dear Michael Delate,

In response to your request to vacate a 20' wide drainage and utility easement located within Myrtle Cove Acres (Plat Book 3 Page 38, Block A, Lots 24, 25, 26, 27 and 28) on property identified as Parcel Numbers 60780960002 and 60781000000 and installation of an undefined sized pipe underneath a Collier County 50' drainage easement.

The Collier County Road, Bridge and Stormwater Maintenance Division (RBSM) has reviewed your request for vacation as per PL2024-5670 and has no objection to the vacation of the 20' wide drainage easements, on the following conditions:

- A 15' wide replacement easement along the western property line in exchange for the above-mentioned drainage easement vacation.

The Collier County RBSM has reviewed your request to install an undefined size pipe underneath the Collier County 50' drainage easement as per PL2024-5670 and has no objection to the installation of this pipe on the following conditions:

- The RBSM Department must review and approve of design plans for pipe installation across drainage easement.
- Applicant will assume responsibility for restoring the area back to its original or improved conditions.
- The County will not assume maintenance responsibility for installed pipe and will have the right to request its removal if at any point in time the pipe proves a hindrance to maintenance operations or detrimental to easement conditions.

Re: Request for No Objection for an Easement Vacation
Parcel Numbers 60780960002 and 60781000000

To whom it may concern:

On behalf of the property owners, we submitted an application to Collier County to vacate a 20' wide drainage and utility easement located within Myrtle Cove Acres (Plat Book 3 Page 38, Block A, Lots 24, 25, 26, 27 and 28) on property identified as Parcel Numbers 60780960002 and 60781000000.

The parcels are proposed to be rezoned to a Commercial Planned Unit Development (CPUD) to allow commercial/retail uses. Currently there are no drainage facilities that run through the easement. There are drainage easements on the west/south side of the proposed CPUD that will remain and have county facilities located in them. This UE/DE only has overhead utility lines located in it.

Enclosed for your review is an aerial location map depicting the limits of the easement to be vacated, proposed PUD Master Site Plan and Plat Book 3 Page 38.

If you have any questions or require additional information, please contact our office. Otherwise, please evidence your 'no objection' to the proposed easement vacation by providing a letter or email to our office.

Sincerely,

Michael J. Delate, P.E.

Re: No Objection Letter ~ To Vacate the Easement for Parcel Numbers 60780960002 and 607810000007665 COLLIER COUNTY. 34113

Mr. Delate,

Florida Power and Light Company has reviewed your proposed construction on the property located at Parcel Numbers 60780960002 and 607810000007665. 34113, Collier County, and has no objection to vacate the easement as far as you pay to relocate the FPL facilities before we vacate the easement. This "no objection" is provided with the stipulation that any FPL facilities within easements at this property retain all rights.

If you have any questions regarding this matter, please contact me at 239-231-6983.

Sincerely,

Mohammad Al Hamd

RE: Vacate of Easement
Parcel# 60780960002 & 60781000000
5396 Myrtle Lane,
Naples, FL, 34113

Dear Sharon,

Thank you for contacting Peoples Gas System, Inc. ("PGS") regarding the vacate of easement at the above referenced location. After reviewing the documents provided, TECO-PGS has NO objection to this request. TECO-PGS does not have any active facilities in this specified area. TECO-PGS does have an active facility in the Right of Way to the east, so Locates should be done prior to construction. Please see snippet of the map below.

If you have further questions, please do not hesitate to call.

Sincerely,

DRAINAGE EASEMENT

THIS EASEMENT is granted this ____ day of _____, 2024, by **KC NAPLES TAMIAMI, LLC**, a Florida limited liability company, whose mailing address is 101 N. Wacker Drive, Suite 611, Chicago, IL 60606 ("Grantor"), in favor of **COLLIER COUNTY**, a political subdivision of the State of Florida, whose mailing address is 3299 Tamiami Trail East, c/o the Office of the County Attorney, Suite 800, Naples, FL 34112 (hereinafter, "Grantee").

(Wherever used herein the terms "Grantor" and "Grantee" include all the parties to this instrument and their respective heirs, legal representatives, successors, and assigns. Grantor and Grantee are used for singular or plural, as the context requires.)

RECITALS:

Grantee desires to obtain an easement over, under, upon and across a portion of Grantor's property.

NOW THEREFORE, in consideration of Ten Dollars ($10.00) and other valuable consideration paid by Grantee, the receipt and sufficiency of which is hereby acknowledged, Grantor hereby grants to Grantee a perpetual, non-exclusive drainage easement (the "Easement") encumbering the portion of Grantor's property described on Exhibit "A" attached hereto (the "Easement Area").

The Easement shall be for drainage and stormwater management purposes and includes the right to enter upon the Easement Area to a) construct, operate, maintain, repair, replace and remove ponds, lakes, canals, weirs, pumps, underground pipes, ditches, swales, earthen berms, rip-rap, retaining walls and other retaining systems, irrigation lines, lighting and other electrical facilities, and all other types of water control and related structures and facilities, at County's sole discretion; and b) place, excavate, use, store, plant, remove and dispose of soil, trees, landscaping, and other materials and improvements, including the removal and disposal of any and all property, real and/or personal, not owned by the Grantee to the extent it interferes with the Grantee's rights under the Easement, without liability to the owner of such property; all as deemed necessary or appropriate from time to time by the Grantee.

The easement rights granted to Grantee are subject to existing easements, restrictions, reservations, and other matters of record, if any. This Easement constitutes an easement "running with the land" and shall inure to the benefit of Grantee and be binding upon Grantor and Grantor's successors-in-title.

Grantor represents that Grantor's property is not homestead property, nor is it contiguous thereto.

AFFIDAVIT OF LIMITED LIABILITY COMPANY

The undersigned, **KEVIN M. CAHILL** ("Affiant"), being first duly sworn, states as follows:

1. Affiant is the Manager of **KC NAPLES TAMIAMI, LLC**, a **Florida** limited liability company (the "Company").

2. The Company was organized and is validly existing under the laws of the State of Florida and is authorized to do business in the State of Florida.

3. The Company is currently in existence and has not been terminated or dissolved.

4. Neither the Company, nor any of its members, are currently a debtor in a bankruptcy or insolvency proceeding.

5. The following are all of the members of the Company:

   Kevin M. Cahill

6. The Company is manager managed pursuant to its Operating Agreement; **KEVIN M. CAHILL** is authorized by the Operating Agreement to execute all instruments on behalf of the Company affecting interests in real Property; and any and all necessary consents have been obtained.

Affiant acknowledges that Collier County and a title company issuing title insurance will rely upon this Affidavit. Affiant is familiar with the nature of an oath and with the penalties as provided by the laws of the State of Florida for falsely swearing to statements made in an instrument of this nature. Affiant certifies that Affiant has carefully read this Affidavit and understands all statements.

RESOLUTION 2021-_243

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, AMENDING RESOLUTION 2006-160, AS AMENDED, IN ORDER TO AMEND THE POLICIES AND PROCEDURES FOR: 1) THE CLOSING AND VACATION OF ROAD RIGHTS-OF-WAY; 2) THE VACATION AND ANNULMENT OF PLATS OR PORTIONS OF PLATS OF SUBDIVIDED LAND; AND 3) THE EXTINGUISHMENT OF PUBLIC EASEMENTS CONVEYED BY SEPARATE INSTRUMENT RECORDED IN THE PUBLIC RECORDS (CONVEYANCES OTHER THAN ON A SUBDIVISION PLAT) ON PLATTED OR UNPLATTED LAND, EXCEPT FOR PUBLIC ROADS, OR THE EXCHANGE OF REAL PROPERTY.

WHEREAS, the Board of County Commissioners of Collier County, Florida ("Board"), pursuant to sections 125.01, 125.37, 177.101, 336.09 and 336.10, Florida Statutes, Collier County Ordinance No. 2004-31, as amended, and the Collier County Land Development Code, is authorized to grant or deny vacations and annulments of plats of subdivided land, road rights-of-way, alleyways, and public dedicated easements conveyed by separate instrument recorded in the public records, and exchange of real property; and

WHEREAS, the Board, on July 25, 2006, adopted Resolution 2006-160, which superseded and replaced Resolution 1998-465, establishing the policies and procedures previously established for the above; and

WHEREAS, the Board, on September 10, 2013, adopted Resolution 2013-166, which amended Resolution 2006-160, to further amend the policies and procedures previously established for the above; and

WHEREAS, the Board desires to further amend the policies and procedures for: 1) closing and vacation of road rights-of-way; 2) vacation and annulment of plats or portions of plats of subdivided land; and 3) extinguishment of public easements conveyed by separate instrument records in the public records (conveyances other than on a subdivision plat) on platted or unplatted land, except for public roads, and exchange of real property.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

1. This Resolution amends Resolution No. 2006-160, as amended, as set forth in the following Attachments.

2. The policies and procedures for the closing and vacation of road rights-of-way are amended and set forth in Attachment "A", incorporated herein and made part of this Resolution.

3. The policies and procedures for the vacation and annulment of plats or portions of plats of subdivided land are amended and set forth in Attachment "B", incorporated herein and made part of this Resolution.

4. The policies and procedures for the extinguishment of public easements conveyed by separate instrument records in the public records (conveyances other than on a subdivision plat) on platted or unplatted land, except for public roads, or the exchange of real property, are amended and set forth in Attachment "C", incorporated herein and made a part of this Resolution.

BE IT ALSO RESOLVED that the Clerk be directed to record this Resolution in the Public Records of Collier County, Florida.

THIS RESOLUTION ADOPTED after motion, second, and majority vote favoring same this 14th day of December, 2021.

Attachment "A"

POLICY AND PROCEDURE ON THE CLOSING AND VACATION OF ROAD RIGHT-OF-WAY

A. AUTHORITY: –Sections 336.09 and 336.10, Florida Statutes.

B. POLICY: When a request is in the interest of the general public welfare or where no public detriment is established and when said request does not invade or violate individual property rights and otherwise qualifies under ~~S~~section 336.09, Florida Statutes, the Board of County Commissioners (BCC) may:

1. Vacate, abandon, discontinue and close any existing public or private street, alleyway, road, highway, or other place used for travel, or any portion thereof, other than a state or federal highway, and to renounce and disclaim any right of the County and the public in and to any land in connection therewith.

2. Renounce and disclaim any right of the County and the public in and to any land, or interest therein, acquired by purchase, gift, devise, dedication or prescription for street, alleyway, road or highway purposes, other than lands acquired for state and federal highways.

3. Renounce and disclaim any right of the County and the public in and to land, other than land constituting, or acquired for, a state or federal highway, delineated on any recorded map or plat as a street, alleyway, road, highway or other place used for vehicular travel.

C. PROCEDURE:

1. An application for the vacation of road right-of-way is to be completed along with the listed items needed for review and to be submitted to Growth Management, Development Review Division ~~/ Planning and Regulation, Engineering Services Section~~. It must be accompanied by a non-refundable application fee (refer to Growth Management, Development Services' ~~/ Planning and Regulation~~ current fee schedule for the applicable fee).

2. The petitioner must also provide:

   a) Evidence to show that the petitioner owns the fee simple title to the whole or that part of the parcel sought to be vacated (F~~EE~~ee S~~IMPLE~~imple D~~EED~~eed). If petitioner is

not the owner of the fee simple title, petitioner shall provide a statement demonstrating the reason for the request including any property or financial interest or projects affected by a granting of such request.

b) A statement explaining the general public benefit received from the proposed vacation.

c) A copy of the document which granted, conveyed or dedicated the right-of-way to the County or the public.

d) Certificate(s) showing all State and County taxes have been paid for the subject parcel if petitioner is the owner or the agent of owner of the fee simple title to the whole or part of the parcel sought to be vacated. (Available from the Collier County Tax Collector's Office, Building C-1, at the Government Center).

e) Assessment Map depicting area of proposed vacation. (Available from the Collier County Property Appraiser's Office, Radio Road).

f) List of abutting and other property owners within 250 feet of the proposed vacation to include:

(1) Name
(2) Address
(3) Zip Code
(4) Parcel Number

g) Site Plan - the site plan must be on 8 ½" X 11" paper and show all data pertinent to the proposed vacation, which shall include at least the following:

(1) Date of drawing
(2) Scale
(3) North arrow
(4) Locations and dimensions of property lines, abutting rights-of-way, easements, setbacks, off-street parking, and proposed and/or existing above and below grade structures~~, and any proposed landscaping.~~
(5) Location of proposed vacation and, if applicable, proposed dedication~~.~~

h) A sketch and ~~L~~legal description of what is to be vacated submitted on 8 ½" X 11" paper labeled in bold capital letters as EXHIBIT "A"~~. This legal description is to be accompanied by a sketch of the legal description.~~ Both the legal description and sketch are to be signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Florida Professional Surveyor and Mapper.

i) When applicable, a copy of the recorded subdivision plat. (Available from the Clerk of Court Recording Department online or on the 2nd~~nd~~ Floor of the Collier County Courthouse).

~~i~~j) A property ownership disclosure form listing all persons with equitable interests in the application.

~~j~~k)"Letters of No Objection" from all pertinent utility companies or authorized users of the easement and/or dedicated public area as determined by the Growth Management, Development Review Division ~~/ Planning and Regulation~~ Administrator or ~~his~~ their designee. Such letters may include but shall not be limited to the following:

(1) Electric Company
(2) Telephone Company
(3) Cable Television Company
(4) Collier County Sheriff's Office
(5) Homeowner's Association
(6) Rescue and Fire Control District
(7) Adjacent property owners

The letter sent to the utility companies and authorized users requesting a "Letter of No Objection" shall contain the statement "I have no objection to the proposed vacation" at the bottom of the letter with a signature block directly below it.

Upon submitting the petition for approval, ~~Engineering Services~~ Development Review Division will distribute the package to the following areas for their approval or objection:~~.~~

(~~1~~8) Collier County Public Utilities Engineering & Project Management Division ~~Utilities/PUED~~
(~~2~~9) Collier County ~~Engineering Services~~Development Review Division ~~Subdivision Review~~
(~~3~~10)Collier County ~~Engineering Services~~Capital Project Planning, Impact Fees & Program Management Division – Stormwater Review
(4~~11~~)Collier County Capital Project Planning, Impact Fees & Program Management Division – Transportation ~~Department~~ Planning Review

If the petitioner is unable to get the pertinent "approvals" or Letters of No Objection~~s~~ from those listed above, then the application is deemed denied.

~~k~~)l)If a replacement easement is required by Collier County, the reviewing parties are under no obligation to accept the offered alternative. If a Petition to Vacate is premised on the grant of a replacement easement, the Board will not take action on the Petition until the instrument necessary to grant the alternative real property interest has been accepted in form and content by all reviewing parties and the County Attorney's Office, it is properly executed by the granting or conveying entity,

and delivered to the County Attorney's Office to be held in trust pending the Board's consideration of the requested vacation. If a replacement easement is required by Collier County, the following shall be submitted:

(1) A sketch and ~~L~~legal description ~~and sketch~~ of what is to be dedicated, prepared along with a current attorney's title opinion or certification by a title company and noted on the sketch, signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Professional Surveyor and Mapper~~,~~.
(2) An attorney's title opinion or certification by a title company ~~Ownership & Encumbrance Report by a title company~~ (current)~~,~~.
(3) Executed conveyance document, and~~.~~
(4) Executed subordination documents.

3. ~~Engineering Services~~Development Review Division will review the petition application for completeness and compliance with this Resolution. ~~Engineering Services~~Development Review Division will prepare an appropriate executive summary and resolution and transmit both documents to the County Attorney's Office for approval.

   If approved as to form and legality by the County Attorney, the petition will be filed with the Clerk to the Board with a request for a time and date for a public hearing. The petition may be placed on the BCC agenda to establish a time and date for a public hearing by Resolution pursuant to ~~S~~section 336.09, Florida Statutes.

4. Once the time and date of the public hearing is~~are~~ established, the Clerk to the Board shall publish legal notice of the hearing one time in a newspaper of general circulation at least two weeks prior to the date stated therein for such hearing.

5. The petitioner and all property owners within 250 feet (and others as may be required by the ~~Engineering Services~~Development Review Division) of the requested vacation parcel shall be given notice by the Clerk to the Board; stating time, place and date of public hearing, by regular mail. If the number of property owners within two hundred fifty feet (250') exceeds twenty (20), petitioner shall incur an additional postage and handling charge of fifty cents ($.50) per additional property owner.

6. In the event that the petitioner for the property in question does not represent ~~him~~themself at the public hearing(s), they must provide a signed letter or other appropriate documentation which authorizes another specific person to represent ~~him~~them.

7. The Board of County Commissioners shall then hold a public hearing and any approved resolution by such governing body shall have the effect of vacating all requested streets and alleys which have not become highways necessary for use by the traveling public.

8. Notice of the adoption of such a resolution by the Commissioners shall be published by the Clerk to the Board one time, within 30 days following its adoption, in one issue of a newspaper of general circulation published in the County. The proof of publication of

notice of public hearing, a certified copy of the resolution, and the proof of publication of the notice of the adoption of such resolution shall be recorded by the Clerk to the Board in the Public Records of the County.

9. The processing of this petition shall coincide, where applicable, with the processing of such other platting or land use change applications proposed for the same property with regard to submissions of applications, staff reviews, reviews by advisory bodies, or the Board of County Commissioners, so that the decision on such vacation shall occur at the same meeting at which time the ~~reuse~~ application is reviewed by the Board of County Commissioners.

10. Once the application is accepted for review it will remain under review so long as a resubmittal in response to a county reviewer's comments is received within 90 days of the date on which the comments were sent to the applicant with a one time extension of an additional 90 days upon written notification. If a response is not received within this time, the application ~~for request review~~ will be considered withdrawn. Further review of the project will require a new application subject to the then current code.

PORTIONS OF PLATS OF SUBDIVIDED LAND

A. **AUTHORITY**: Section 177.101 Florida Statutes, and Collier County Ordinance No. ~~01-57~~ 2004-31 and the Collier County Land Development Code.

B. **POLICY**: When a request is in the interest of the general public welfare or no public detriment is established, the persons making application for said vacation own the fee simple title to the whole or that part of the tract covered by the plat sought to be vacated, the request will not affect the ownership or right of convenient access of persons owning other parts of the subdivision, and the request does not invade or violate individual property rights, the Board of County Commissioners may adopt resolutions vacating plats in whole or in part of subdivisions in said county~~ies~~, returning the property covered by such plats either in whole or in part into acreage.

C. **PROCEDURE**:

1. To petition for the vacation and annulment of plats or portions of plats of subdivided land, an application is to be completed along with the listed items needed for review. The application must be submitted to ~~Engineering Services~~Growth Management, Development Review Division, accompanied by a non-refundable application fee (refer to Growth Management, Development Services' ~~/ Planning and Regulation~~ current fee schedule for the applicable fee).

2. The petitioner must also provide:

   a) Evidence to show that the petitioner owns the fee simple title to the whole or that part of the parcel sought to be vacated (F~~EE~~ee S~~IMPLE~~imple D~~EED~~eed).

   b) A statement explaining the general public benefit received from the proposed vacation and demonstrating that the request will not affect the ownership or right of convenient access of persons owning other parts of the subdivision.

c) Certificate showing all State and County taxes have been paid for the subject parcel. (Available from the Collier County Tax Collector's Office, Building C-1, in the Government Center).

d) Assessment Map. (Available from the Collier County Property Appraiser's Office, Radio Road).

e) List of abutting and other property owners within 250 feet of the proposed vacation to include:

(1) Name
(2) Address
(3) Zip Code
(4) Parcel Number

f) Site Plan - the site plan must be on 8 ½" X 11" paper with an adequate scale showing all data pertinent to the proposed vacation, which shall include at least the following:

(1) Date of drawing
(2) Scale
(3) North arrow
(4) Locations and dimensions of property lines, abutting rights-of-way, easements, setbacks, off-street parking, and proposed and/or existing above and below grade structures~~, and any proposed landscaping.~~
(5) Location of proposed vacation and, if applicable, proposed dedication~~.~~

g) A sketch and ~~L~~legal description of what is to be vacated submitted on 8 ½" X 11" paper labeled in bold capital letters as EXHIBIT "A" to the petition. ~~This legal description is to be accompanied by a sketch of the legal description.~~ Both the sketch and legal description ~~and sketch~~ are to be signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Florida Professional Surveyor and Mapper.

h) A copy of the recorded subdivision plat. (Available from the Clerk of Court Recording Department online or on the 2nd Floor of the Collier County Courthouse).

i) A property ownership disclosure form listing all persons with equitable interests in the application.

~~e)~~j) "Letters of No Objection" from all pertinent utility companies or authorized users of the easement and/or dedicated public area as determined by the Development Review Division Administrator or their designee. Such letters may include but shall not be limited to the following:

(1) Electric Company
(2) Telephone Company

(3) Cable Television Company
(4) Collier County Sheriff's Office
(5) Homeowner's Association
(6) Rescue and Fire Control District
(7) Adjacent property owners

The letter sent to the utility companies and authorized users requesting a "Letter of No Objection" shall contain the statement "I have no objection to the proposed vacation" at the bottom of the letter with a signature block directly below it.

Upon submitting the petition for approval ~~Engineering Services~~Development Review Division will distribute the package to the following areas for their approval or objection:~~.~~

(~~1~~8) Collier County Public Utilities Engineering & Project Management Division ~~Utilities/PUED~~
(~~2~~9) Collier County ~~Engineering Services~~Development Review Division ~~Subdivision Review~~
(~~3~~10) Collier County ~~Engineering Services~~Capital Project Planning, Impact Fees & Program Management Division – Stormwater Review
(~~4~~11) Collier County Capital Project Planning, Impact Fees & Program Management Division – Transportation ~~Department~~ Planning Review

If the petitioner is unable to get the pertinent "approvals" or Letters of No Objections from those listed above, then the application is deemed denied~~"null and void."~~

~~f~~)k) If a replacement easement is required by Collier County, the reviewing parties are under no obligation to accept the offered alternative. If a Petition to Vacate is premised on the grant of a replacement easement, the Board will not take action on the Petition until the instrument necessary to grant the alternative real property interest has been accepted in form and content by all reviewing parties and the County Attorney's Office, it is properly executed by the granting or conveying entity, and delivered to the County Attorney's Office to be held in trust pending the Board's consideration of the requested vacation. If a replacement easement is required by Collier County, the following shall be submitted:

(1) Sketch and ~~L~~legal description ~~and sketch~~ of what is to be dedicated, prepared along with a current attorney's title opinion or certification by a title company and noted on the sketch, signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Professional Surveyor and Mapper~~.~~
(2) Attorney's title opinion or ~~Ownership & encumbrance Report~~certification by a title company (current)~~.~~
(3) Executed conveyance document, and~~.~~
(4) Executed subordination documents.

3. Development Review Division will review the petition for completeness and compliance with this Resolution. ~~Engineering Services~~Development Review Division will prepare an appropriate executive summary and resolution and transmit both documents to the County Attorney's Office for approval.

   If approved as to form and legality by the County Attorney, the petition will be filed with the Clerk to the Board with a request for a time and date for a public hearing.

4. Once the time and date of the agenda item is~~are~~ established, the Clerk to the Board shall publish legal notice of the hearing in not less than two weekly issues of a newspaper of general circulation in the County, pursuant to ~~S~~section 177.101, Florida~~.~~ Statutes.

5. The petitioner and all property owners within 250 feet (and others as may be required by ~~Engineering Services~~the Development Review Division) of the requested vacation parcel shall be given notice by the Clerk to the Board; stating time, place and date of the agenda item, by regular mail. If the number of property owners within two hundred fifty feet (250') exceeds twenty (20), petitioner shall incur an additional postage and handling charge of fifty cents ($.50) per additional property owner. If the County receives an objection or anticipates an objection to the vacation request, then the agenda item shall be scheduled under advertised public hearings in the BCC Agenda.

6. In the event that the owner for the property in question does not represent ~~him~~themself at the BCC meeting, they must provide a signed letter or other appropriate documentation which authorizes another specific person to represent ~~him~~them.

7. The County Commission may adopt a resolution vacating plats in whole or in part of subdivisions in the -County, returning the property covered by such plats either in whole or part into acreage.

8. A certified copy of any approved resolution shall be recorded in the public records of Collier County.

9. The processing of this petition shall coincide, where applicable, with the processing of such other platting or land use change applications proposed for the same property with regard to submissions of applications, staff reviews, reviews by advisory bodies, or the Board of County Commissioners, so that the decision on such vacation shall occur at the same meeting at which time the ~~reuse~~ application is reviewed by the Board of County Commissioners.

10. Once the application is accepted for review it will remain under review so long as a resubmittal in response to a county reviewer's comments is received within 90 days of the date on which the comments were sent to the applicant with a one time extension of an additional 90 days upon written notification. If a response is not received within this time, the application ~~for request review~~ will be considered withdrawn and cancelled. Further review of the project will require a new application subject to the then current code.

Attachment "C"

POLICY AND PROCEDURE FOR THE EXTINGUISHMENT OF PUBLIC EASEMENTS CONVEYED BY SEPARATE INSTRUMENT RECORDED IN THE PUBLIC RECORDS (CONVEYANCES OTHER THAN ON A SUBDIVISION PLAT) ON PLATTED OR UNPLATTED LAND, EXCEPT FOR PUBLIC ROADS, OR THE EXCHANGE OF REAL PROPERTY.

A. **AUTHORITY**: –Sections 125.01 and 125.37, Florida Statutes.

B. **POLICY**: Requests will be granted as long as the public benefit is established or no public detriment is established. The Board of County Commissioners may:

1. Extinguish, vacate, abandon, discontinue, and close any easements, or any portion thereof, granted to the County or public by any instrument recorded in the public records of Collier County and to renounce and disclaim any right of the County and the public in and to any land in connection therewith; when such interest is granted to the County or public by any instrument recorded in the public records other than on a subdivision plat.

2. Quitclaim, renounce, and disclaim any right of the County and the public in and to any land, or interest therein, acquired by purchase, gift, devise, dedication or prescription for drainage, utilities, access, maintenance, preservation, or conservation or other public purposes; when such interest is granted to the County or public by any instrument recorded in the public records of Collier County other than on a subdivision plat.

3. To make an exchange of real property whenever, in the opinion of the County Commissioners, the County holds and possesses any real property, not needed for county purposes, and such property may be to the best interest of the County exchanged for other real property, which the County may desire to acquire for county purposes, as authorized by ~~S~~section 125.37, Florida Statutes.

C. **PROCEDURE**:

1. To petition for the extinguishment of County dedicated easement on unplatted land or platted land, an application is to be completed along with the listed items needed for review be submitted to ~~Engineering Services~~ Growth Management, Development Review Division, -and it must be accompanied by a non-refundable application fee (refer

to ~~-~~Growth Management, Development Services' ~~/ Planning and Regulation~~ current fee schedule for the applicable fee).

2. The petitioner must also provide:

   a) Evidence to show that the petitioner owns the fee simple title to the whole or that part of the parcel on which a public dedicated easement is sought to be extinguished (F~~EE~~ee S~~IMPLE~~imple D~~EED~~eed).

   b) A statement explaining the general public benefit received from the proposed vacation.

   c) A copy of the document which granted, conveyed or dedicated the easement interest to the County or the public.

   d) Certificate(s) showing all State and County taxes have been paid for the subject parcel. (Available from the Collier County Tax Collector's Office, Building C-1, in the Government Center).

   e) Assessment Map. (Available from the Collier County Property Appraiser's Office, Radio Road).

   f) Site Plan - the site plan must be on 8 ½" X 11" paper with an adequate scale showing all data pertinent to the proposed extinguishment, which shall include at least the following:

      (1) Date of drawing
      (2) Scale
      (3) North arrow
      (4) Locations and dimensions of property lines, abutting rights-of-way, easements, setbacks, off-street parking, and proposed and/or existing above and below grade structures~~, and any proposed landscaping.~~
      (5) Location of proposed extinguishment and, if applicable, proposed dedication~~.~~

   ~~f~~g)A sketch and l~~L~~egal description of what is to be extinguished submitted on 8 ½" X 11" paper labeled in bold capital letters as EXHIBIT "A". ~~This legal description is to be accompanied by a sketch of the legal description.~~ Both the sketch and legal description ~~and sketch~~ are to be signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Florida Professional Surveyor and Mapper.

   h) When applicable, a copy of the recorded subdivision plat. (Available from the Clerk of Court Recording Department online or on the 2nd Floor of the Collier County Courthouse).

i) A property ownership disclosure form listing all persons with equitable interests in the application.

~~g)~~j) Letters of No Objection~~"~~ from all pertinent utility companies or authorized users of the easement and/or dedicated public area as determined by the Growth Management, Development Review Division Administrator or their designee. Such letters may include but shall not be limited to the following:

(1) Electric Company
(2) Telephone Company
(3) Cable Television Company
(4) Collier County Sheriff's Office
(5) Homeowner's Association
(6) Rescue and Fire Control District
(7) Adjacent property owners

The letter sent to the utility companies and authorized users requesting a "Letter of No Objection" shall contain the statement "I have no objection to the proposed vacation" at the bottom of the letter with a signature block directly below it.

Upon submitting the petition for approval, ~~Engineering Services~~Development Review Division will distribute the package to the following areas for their approval or objection:~~.~~

(~~1~~8) Collier County Public Utilities Engineering & Project Management Division ~~Utilities/PUED~~
(~~2~~9) Collier County ~~Engineering Services~~Development Review Division ~~Subdivision Review~~
(~~3~~10) Collier County ~~Engineering Services~~Capital Project Planning, Impact Fees & Program Management Division – Stormwater Review
(~~4~~11) Collier County Capital Project Planning, Impact Fees & Program Management Division – Transportation ~~Department~~ Planning Review

If the petitioner is unable to get the pertinent "approvals" or Letters of No Objection~~s~~ from those listed above, then the application is deemed denied~~"null and void."~~

~~h)~~k) To the extent applicable, where the petitioner desires to exchange ~~his/her~~their interest with that interest dedicated to the County, the requirements and procedures of ~~§~~section 125.37, Florida Statutes, and the Collier County Utilities Standards and Procedures Ordinance No. ~~97-17~~ 04-31, as amended, shall be utilized as practicable and legally required. The reviewing parties are under no obligation to accept the offered alternative. If a Petition to Vacate is premised on the grant of a replacement easement, the Board will not take action on the Petition until the instrument necessary to grant the alternative real property interest has been accepted in form and content by all reviewing parties and the County Attorney's Office, it is properly executed by the granting or conveying entity, and delivered to the County Attorney's Office to be held

in trust pending the Board's consideration of the requested vacation. The following shall be submitted:

(1) A sketch and l~~L~~egal description ~~and sketch~~ of what is to be dedicated, prepared along with a current attorney's title opinion or certification by a title company and noted on the sketch, signed and sealed by a Florida Professional Surveyor and Mapper and have a "Prepared by" block listing the name and address of the Florida Professional Surveyor and Mapper.~~,~~
(2) Attorney's ~~Title~~ title ~~Opinion~~ opinion or certification by a title company ~~Ownership & Encumbrance Report~~ (current).~~,~~
(3) Executed conveyance document, and~~.~~
(4) Executed subordination documents.

3. ~~Engineering Services~~Development Review Division will review the petition for completeness and compliance with this Resolution. ~~Engineering Services~~Development Review Division will prepare an appropriate executive summary and resolution and transmit both documents to the office of the County Attorney for approval.

If approved as to form and legality by the County Attorney, the petition will be filed with the Clerk to the Board with a request for a time and date for a public hearing.

4. ~~Where an~~For exchanges of real property ~~interest is applicable~~pursuant to section 125.37, Florida Statutes, the terms and conditions of any such exchange of property shall be published, once a week for at least two weeks, in a newspaper of general circulation published in the County prior to the adoption by the Board of County Commissioners.

45. In the event that the owner of the property in question does not represent ~~him~~themself at the BCC meeting, they must provide a signed letter or appropriate documentation which authorizes another specific person to represent ~~him~~them.

~~5~~6. The processing of this petition shall coincide, where applicable, with the processing of such other platting or land use change applications proposed for the same property with regard to submissions of applications, staff reviews, reviews by advisory bodies, or the Board of County Commissioners, so that the decision on such extinguishment shall occur at the same meeting at which time the ~~re-use~~ application is reviewed by the Board of County Commissioners.

~~6~~7. Once the application is accepted for review it will remain under review so long as a resubmittal in response to a county reviewer's comments is received within 90 days of the date on which the comments were sent to the applicant with a one time extension of an additional 90 days upon written notification. If a response is not received within this time, the application ~~for request review~~ will be considered withdrawn and cancelled. Further review of the project will require a new application subject to the then current code.

NOTICE OF PUBLIC HEARING

Notice is hereby given that a public hearing will be held by the **Collier County Board of County Commissioners** commencing at **9:00 a.m.** on **January 14, 2025**, in the Board of County Commissioners meeting room, third floor, Collier Government Center, 3299 East Tamiami Trail, Naples, FL, to consider:

RESOLUTION NO. 2025-____

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, TO DISCLAIM, RENOUNCE AND VACATE THE COUNTY AND THE PUBLIC INTEREST IN THE 20-FOOT DRAINAGE AND UTILITY EASEMENT LOCATED ALONG THE SOUTHWESTERLY BORDER OF LOTS 24 THROUGH 28, BLOCK "A" OF UNIT NO. 1, MYRTLE COVE ACRES, AS RECORDED IN PLAT BOOK 3, PAGE 38, OF THE PUBLIC RECORDS OF COLLIER COUNTY, FLORIDA, LOCATED IN THE SOUTHEASTERLY QUADRANT OF U.S. 41 AND MYRTLE LANE, IN SECTION 29, TOWNSHIP 50 SOUTH, RANGE 26 EAST, COLLIER COUNTY, FLORIDA. [PL20240005670]

A copy of the proposed Resolution is on file with the Clerk to the Board and is available for inspection. All interested parties are invited to attend and be heard.

All persons wishing to speak on any agenda item must register with the County Manager prior to presentation of the agenda item to be addressed. Individual speakers will be limited to 3 minutes on any item. The selection of an individual to speak on behalf of an organization or group is encouraged. If recognized by the Chairman, a spokesperson for a group or organization may be allotted 10 minutes to speak on an item. Written materials intended to be considered by the Board shall be submitted to the appropriate County staff a minimum of 7 days prior to the public hearing. All materials used in presentations before the Board will become a permanent part of the record.

As part of an ongoing initiative to encourage public involvement, the public will have the opportunity to provide public comments remotely, as well as in person, during this proceeding. Individuals who would like to participate remotely should register through the link provided within the specific event/meeting entry on the Calendar of Events on the County website at www.colliercountyfl.gov/our-county/visitors/calendar-of-events after the agenda is posted on the County website. Registration should be done in advance of the public meeting or any deadline specified within the public meeting notice. Individuals who register will receive an email in advance of the public hearing detailing how they can participate remotely in this meeting. Remote participation is provided as a courtesy and is at the user's risk. The County is not responsible for technical issues. For additional information about the meeting, please call Geoffrey Willig at 252-8369 or email to Geoffrey.Willig@colliercountyfl.gov.

Any person who decides to appeal any decision of the Board will need a record of the proceedings pertaining thereto and therefore, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Division, located at 3335 Tamiami Trail East, Suite 101, Naples, FL 34112-5356, (239) 252-8380, at least two days prior to the meeting. Assisted listening devices for the hearing impaired are available in the Board of County Commissioners Office.

Executive Summary

Recommendation to approve an Ordinance amending the Collier County Growth Management Plan to create the Barefoot Williams Commercial Subdistrict to allow the development of 11,000 square feet of gross floor area of commercial uses, of which a car wash may be 5,000 square feet of gross floor area. The subject property is located on the south side of Tamiami Trail East (U.S. 41), approximately 350 feet east of the intersection of Tamiami Trail and Barefoot Williams Road, in Section 33, Township 50 South, Range 26 East, Collier County, Florida, consisting of ±1.92 acres. (Companion to item 9F)

OBJECTIVE: For the Board to approve (adopt) the proposed small-scale amendment to the Growth Management Plan (GMP) and approve said amendment for transmittal to the Florida Department of Commerce.

CONSIDERATIONS: The petition seeks to amend the Future Land Use Element (FLUE), specifically to create a new subdistrict, the Barefoot Williams Commercial Subdistrict, to allow a maximum of 11,000 square feet of commercial/office uses, including a car wash (SIC 7542) with a maximum intensity of 5,000 square feet. A companion petition (PL20220005137) would rezone the property from the Commercial Intermediate (C-3) zoning district to the General Commercial zoning district (C-4) to allow a car wash and all permitted uses allowed within the C-3 zoning district.

The ±1.92-acre site is currently zoned C-3 and undeveloped. Existing land uses in the surrounding area include residential, commercial, and public facility uses.
The subject property is designated Urban, Urban Mixed-Use District, Urban Coastal Fringe Subdistrict and is within the Coastal High Hazard Area (CHHA), all as identified on the Future Land Use Map (FLUM). The Urban Coastal Fringe Subdistrict provides for transitional densities between the Conservation designated area and the remainder of the Urban designated area. The CHHA is the geographical area lying below the elevation of the Category 1 storm surge line per the Southwest Florida Regional Planning Council's Hurricane Evacuation Study; increased density and expenditure of public infrastructure are discouraged in this area.

The site is also identified on Map FLUE-11, part of the FLUM Series, which identifies properties deemed "consistent by policy" (through the implementation of the Zoning Reevaluation Program in the 1990s). The property was granted an exemption or compatibility exception and retained its Residential Tourist (RT) zoning designation. In 2000, the site was rezoned to Commercial Intermediate District (C-3) by Ordinance 2000-81 via the Office and Infill Commercial Subdistrict text-based provision in the FLUE.

The subject site is also located within the boundaries of the East Naples Community Development Plan (ENCDP) and the proposed *draft* US 41 East Zoning Overlay (US 41 EZO). The ENCDP was developed by the community through a series of public meetings and surveys and reflects the overall vision of the community; the Board of County Commissioners accepted the ENCDP in October 2020. Relevant to this petition, the applicant has committed to providing native canopy trees along the US 41 East corridor, enhanced buffering along the US 41 frontage, a noise attenuation wall along the southern property line where the car wash abuts a mobile home community, increased building setbacks from US 41 East, a maximum of one double loaded drive aisle of parking in front of the buildings, and separation of a quarter mile from an existing car wash facility – all of which are consistent with the proposed *draft* US 41 East zoning overlay.

Per *Chapter 163.3187, Part II, Florida Statutes*, limitations are in place for this type of small-scale amendment, as identified below, followed by staff comments *[italicized in brackets]*.

Process for adoption of small-scale comprehensive plan amendment.
(1) A small-scale development amendment may be adopted under the following conditions:
(a) The proposed amendment involves a use of 50 acres or fewer. *[The amendment pertains to a property consisting of ±1.92 acres.]*
(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan but only proposes a land use change to the future land use map for a site-specific small-scale development activity. However, text changes that relate directly to, and are adopted simultaneously with the

small-scale future land use map amendment shall be permissible under this section. *[This amendment involves a site-specific text and map location.]*

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004 (3), and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05 (1*). [The subject property is not within an Area of Critical State Concern.]*

(4) Comprehensive plans may only be amended in such a way as to preserve the internal consistency of the plan pursuant to s. 163.3177. *[The amendment preserves the internal consistency between and among GMP elements.]*

FINDINGS AND CONCLUSIONS: Staff reviewed this petition, including the supporting data and analysis, and made the following findings and conclusions. Additional analysis is provided in the Staff Report to the CCPC.

- This petition proposes a small-scale Growth Management Plan amendment to create a subdistrict in the Urban Commercial District allowing for a car wash limited to 5,000 square feet, in addition to 6,000 square feet of [presently permitted] C-3 uses.
- There are no adverse environmental impacts as a result of this petition. The project has been historically developed and cleared. This project does not require Environmental Advisory Council (EAC) review, as this project did not meet the EAC scope of land development project reviews as identified in Section 2-1193 of the Collier County Codes of Laws and Ordinances.
- No historic or archaeological sites are affected by this amendment.
- There are no transportation or public utility-related concerns as a result of this petition and no concerns about the impact on other public infrastructure.
- The proposed uses are expected to create minimal impact on the surrounding area.
- There is no demonstrated need for the proposed car wash use until 2033.
- Many of the project's proposed development standards are consistent with the proposed draft US 41 East zoning overlay.
- The site can potentially be rezoned to C-5 (utilizing the Office and Infill Commercial Subdistrict provision of the FLUE) to allow more intensive land uses than those proposed by this petition.

[Note: Immediately east of the subject site, the Home Depot – SE Naples Commercial Subdistrict GMP amendment and companion rezone (CPUD) to allow home improvement store uses (SIC 5211-5261) were approved by the Board in mid-2024. As a result, the subject site became eligible for a rezone under the Office and Infill Commercial Subdistrict text-based provision in the FLUE to allow a car wash without a GMPA. However, the petitioner requested to proceed with the GMPA and rezone petitions to avoid delays [and fees] that may result from the withdrawal of the two petitions and the submittal of another zoning petition (CPUD).]

STAFF RECOMMENDATION TO THE COLLIER COUNTY PLANNING COMMISSION: That the Collier County Planning Commission forward petition PL20220005822 Barefoot Williams Commercial Subdistrict GMPA to the Board of County Commissioners with a recommendation to approve and adopt and transmit to the Florida Department of Commerce and other statutorily required agencies.

COLLIER COUNTY PLANNING COMMISSION (CCPC) RECOMMENDATION: The CCPC heard this petition at its November 7, 2024, meeting. The Planning Commission voted unanimously to forward it to the Board with a recommendation of approval. On January 7, 2025, a letter of objection was received. As such, this petition will be placed on Advertised Public Hearings.

FISCAL IMPACT: Petition fees account for staff review time and materials and the cost of associated legal advertising/public notice for the public hearings. Therefore, no fiscal impacts to Collier County result from the adoption of this amendment.

GROWTH MANAGEMENT IMPACT: The Board's adoption of the proposed amendment and its transmission to the Florida Department of Commerce will commence the Department's thirty-day (30) challenge period for any affected person. Provided the small-scale amendment is not challenged, it becomes effective thirty-one (31) days after Board adoption.

LEGAL CONSIDERATIONS: This Growth Management Plan (GMP) amendment is authorized by and subject to, the procedures established in Chapter 163, Part II, Florida Statutes, The Community Planning Act, and by Collier County Resolution No. 12-234, as amended. The Board should consider the following criteria in making its decision: "plan amendments shall be based on relevant and appropriate data and an analysis by the local government that may include but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue." 163.3177(1)(f), F.S. In addition, s. 163.3177(6)(a)2, F.S. provides that FLUE plan amendments shall be based on surveys, studies, and data regarding the area, as applicable, including:

a. The amount of land required to accommodate anticipated growth.
b. The projected permanent and seasonal population of the area.
c. The character of undeveloped land.
d. The availability of water supplies, public facilities, and services.
e. The need for redevelopment, including the renewal of blighted areas and the elimination of non-conforming uses which are inconsistent with the character of the community.
f. The compatibility of uses on lands adjacent to or closely proximate to military installations.
g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.
h. The need to modify land uses and development patterns with antiquated subdivisions.
i. The discouragement of urban sprawl.
j. The need for job creation, capital investment and economic development that will strengthen and diversify the community's economy.

And FLUE map amendments shall also be based upon the following analysis pe s. 163.3177(6)(a)8, F.S.:

a. An analysis of the availability of facilities and services.
b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.
c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

This item is approved as to form and legality. It requires an affirmative vote of four for approval because this is an Adoption hearing of the GMP amendment. (HFAC)

RECOMMENDATIONS: To adopt the Ordinance and transmit petition PL20220005822 to the Florida Department of Commerce and other statutorily required agencies.

ORDINANCE NO. 2025-___

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA AMENDING ORDINANCE NO. 89-05, AS AMENDED, THE COLLIER COUNTY GROWTH MANAGEMENT PLAN FOR THE UNINCORPORATED AREA OF COLLIER COUNTY, FLORIDA, SPECIFICALLY AMENDING THE FUTURE LAND USE ELEMENT AND FUTURE LAND USE MAP AND MAP SERIES BY CHANGING THE LAND USE DESIGNATION OF PROPERTY FROM URBAN, URBAN MIXED USE DISTRICT, URBAN COASTAL FRINGE SUBDISTRICT TO COMMERCIAL DISTRICT, BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT TO ALLOW 11,000 SQUARE FEET OF GROSS FLOOR AREA OF COMMERCIAL USES, OF WHICH A CAR WASH MAY BE 5,000 SQUARE FEET OF GROSS FLOOR AREA. THE SUBJECT PROPERTY IS LOCATED ON THE SOUTH SIDE OF TAMIAMI TRAIL EAST 350 FEET EAST OF THE INTERSECTION OF TAMIAMI TRAIL AND BAREFOOT WILLIAMS ROAD IN SECTION 33, TOWNSHIP 50 SOUTH, RANGE 26 EAST, CONSISTING OF 1.92± ACRES; AND FURTHERMORE, DIRECTING TRANSMITTAL OF THE ADOPTED AMENDMENT TO THE FLORIDA DEPARTMENT OF COMMERCE; PROVIDING FOR SEVERABILITY AND PROVIDING FOR AN EFFECTIVE DATE. [PL20220005822]

WHEREAS, Collier County, pursuant to Section 163.3161, et. seq., Florida Statutes, the Florida Local Government Comprehensive Planning and Land Development Regulation Act, was required to prepare and adopt a comprehensive plan; and

WHEREAS, the Collier County Board of County Commissioners adopted the Collier County Growth Management Plan on January 10, 1989; and

WHEREAS, the Community Planning Act of 2011 provides authority for local governments to amend their respective comprehensive plans and outlines certain procedures to amend adopted comprehensive plans; and

WHEREAS, 11760 Property, LLC requested an amendment to the Future Land Use Element and Future Land Use Map and Map Series to create the Barefoot Williams Commercial Subdistrict; and

WHEREAS, pursuant to Subsection 163.3187(1), Florida Statutes, this amendment is considered a Small-Scale Amendment; and

WHEREAS the Subdistrict property is not located in a rural area of opportunity; and

WHEREAS, the Collier County Planning Commission (CCPC) on November 7, 2024 considered the proposed amendment to the Growth Management Plan and recommended approval of said amendment to the Board of County Commissioners; and

WHEREAS, the Board of County Commissioners of Collier County did take action in the manner prescribed by law and held public hearings concerning the proposed adoption of the amendment to the Future Land Use Element and Future Land Use Map and Map Series of the Growth Management Plan on _____; and

WHEREAS, all applicable substantive and procedural requirements of law have been met.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF COLLIER COUNTY, FLORIDA, that:

SECTION ONE: ADOPTION OF AMENDMENT TO THE GROWTH MANAGEMENT PLAN

The Board of County Commissioners hereby adopts this small-scale amendment to the Future Land Use Element and Future Land Use Map and Map Series in accordance with Section 163.3184, Florida Statutes. The text amendment is attached hereto as Exhibit "A" and incorporated herein by reference.

SECTION TWO: SEVERABILITY.

If any phrase or portion of this Ordinance is held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portion.

SECTION THREE: EFFECTIVE DATE.

The effective date of this plan amendment, if the amendment is not timely challenged, shall be 31 days after Board adoption. If timely challenged, this amendment shall become effective on the date the state land planning agency or the Administration Commission enters a final order determining this adopted amendment to be in compliance. No development orders, development permits, or land uses dependent on this amendment may be issued or commence before it has become effective.

PASSED AND DULY ADOPTED by the Board of County Commissioners of Collier County, Florida this _____ day of _____, 2025.

20. Barefoot Williams Commercial Subdistrict

The Barefoot Williams Commercial Subdistrict is approximately 1.92 acres and is located on the south side of Tamiami Trail East (U.S. 41), approximately 350 feet east of Barefoot Williams Road, in Section 33, Township 50 South, Range 26 East. It is depicted on the Barefoot Williams Commercial Subdistrict Map. The purpose of this Subdistrict is to allow commercial intermediate uses and a car wash. Development in this Subdistrict is subject to the following requirements and limitations:

a. The rezone Ordinance shall include development standards and buffers to ensure compatibility with the surrounding properties.

b. Allowable uses shall be limited to:

1. Uses permitted by right in the C-3, Commercial Intermediate~~,~~ zoning district as listed in the Collier County Land Development Code (LDC), Ordinance No. 04-41, as amended.

Words underlined are additions; Words ~~struck through~~ are deletions
*** *** *** *** are a break in text

2. Car wash (Standard Industrial Classification 7542).

c. Development is limited to a maximum intensity of 11,000 square feet of gross floor area, of which a car wash shall not exceed 5,000 square feet.

d. The car wash shall be subject to the following conditions in addition to other applicable LDC requirements:

1. The minimum side yard setback shall be 10 feet when adjacent to a commercially zoned property.

2. A sound attenuation wall shall be: a) a minimum height of two feet higher than the entrance to the car wash tunnel, but not exceed 12 feet in height above grade; and b) provided twenty-five (25) feet from the rear property line along the entire width of the car wash facility, including the drive aisles that serve the car wash.

e. The following standards apply to establishments with drive-through facilities (Group 5812 Eating Places and 5813 Drinking Places) in addition to other applicable LDC requirements:

1. A maximum of 6,000 square feet of gross floor area in the principal structure.

2. In addition to satisfying design standards of LDC section 5.05.08 F.6., vehicular stacking lanes and drive through lanes shall not be located closer to the US 41 right-of-way than the principal building.

f. No building or structure shall exceed a zoned building height of thirty-five (35) feet~~,~~ and an actual height of forty-two (42) feet.

g. Parking lots, vehicular use areas, and service function areas shall be located to the sides or rear of buildings, no closer to US 41 than the principal building except that a maximum of one double loaded drive aisle of parking is permitted in the front yard.

h. Landscaping for parking lots, vehicular use areas, and service function areas shall be designed in accordance with LDC section 4.06.03, except that interior parking lot plantings shall be a maximum of twenty-five (25) percent turf grass. The balance shall be shrubs or groundcover in planting areas.

i. Landscape buffers shall be designed in accordance with LDC section 4.06.00, except for the following:

1. The 15-foot-wide Type 'B' front yard landscape buffer easement (LBE) shall be enhanced by:

a) Planting canopy shade trees (understory trees and palm trees may not be substituted for canopy trees) spaced twenty-five (25) feet on center with trees having a minimum average mature canopy spread of twenty (20) feet and an eight-foot vertical clearance for pedestrians, if applicable, as determined by the County Manager or designee.

b) Planting only native vegetation, grass, ground cover, or other landscape treatment in accordance with LDC section 4.06.00.

2. The 20-foot-wide Type 'B' rear yard LBE shall be enhanced with a minimum of five canopy trees (understory and palm trees may not be substituted for canopy trees) per 100 linear feet.

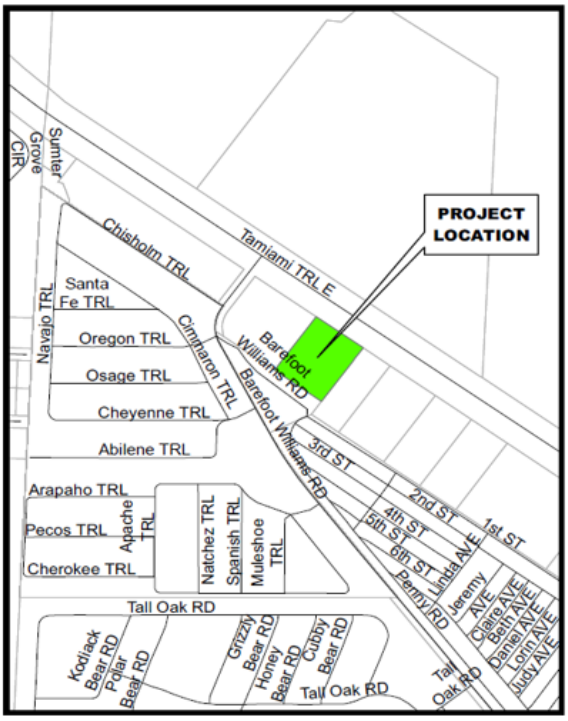
Naples, FL 34102

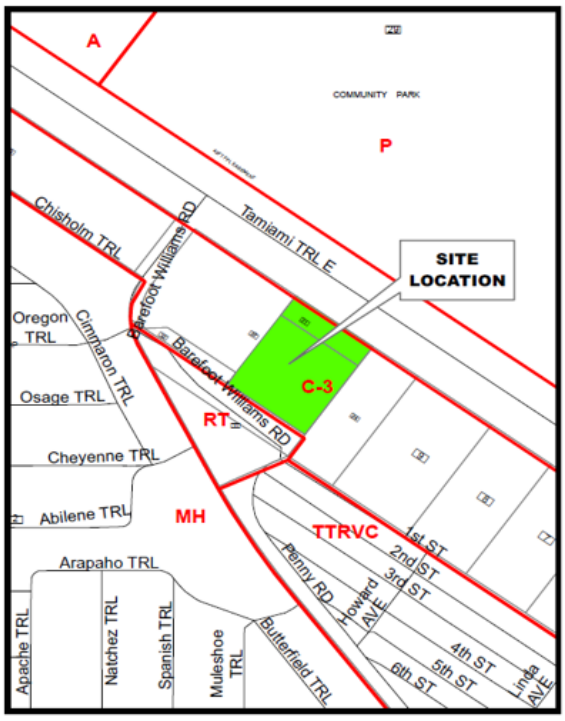
Owner: 11760 Property, LLC
21 Sawgrass Drive
Lemont, IL 60439

GEOGRAPHIC LOCATION:

The ±1.92-acre subject property is located on the south side of Tamiami Trail East (US 41), approximately 350 feet southeast of Barefoot Williams Road, in Section 33, Township 50 South, Range 26 East, Collier County, Florida. (Refer to the location and aerial maps on page 2.)



Location Map



Zoning Map

REQUESTED ACTION:

The applicant proposes a small-scale Growth Management Plan (GMP) amendment to the Future Land Use Element (FLUE), specifically to create a new subdistrict, the Barefoot Williams Commercial Subdistrict. The applicant also proposes to amend the countywide Future Land Use Map (FLUM) and create a new map ("Barefoot Williams Commercial Subdistrict") in the FLUM series of the FLUE, to identify the newly created Subdistrict. The proposed GMP amendment is attached as Exhibit "A".

PURPOSE/DESCRIPTION OF PROJECT:

To redesignate the property from the Urban Coastal Fringe Subdistrict to the Barefoot Williams Commercial Subdistrict to permit a maximum of 11,000 square feet of commercial/office uses, including a car wash (SIC 7542) with a maximum intensity of 5,000 square feet.

A companion petition (PL20220005137) would rezone the property from Commercial Intermediate (C-3) zoning district to General Commercial zoning district (C-4) to allow a car wash and all permitted uses allowed within the C-3 zoning district.

EXISTING CONDITIONS:

Subject Property:

The ±1.92-acre site is currently zoned C-3 and undeveloped. The subject property is designated Urban, Urban Mixed-Use District, Urban Coastal Fringe Subdistrict and is within the Coastal High Hazard Area (CHHA), all as identified on the FLUM.

Surrounding Lands:

North – Future Land Use Designation: Urban Residential Subdistrict. Zoned: Public Use. Land Use: Donna Fiala Eagle Lakes Community Park (across Tamiami Trail East, a major arterial).

East – Future Land Use Designation: Urban Commercial District, Home Depot – SE Naples Commercial Subdistrict. Zoned: CPUD. Land Use: The lot abutting the subject site is developed with the WAVV Radio FM 101 facility and the remaining lots within the Subdistrict are undeveloped.

South – Future Land Use Designation: Urban Mixed-Use District, Coastal Fringe Subdistrict. Zoned: RT. Land Use: Hitching Post mobile home park.

West – Future Land Use Designation: Urban Mixed-Use District, Coastal Fringe Subdistrict. Zoned: C-3. Land Use: RaceTrac gas station.

In summary, the existing land uses in the surrounding area are a mix of residential, commercial, and public facility uses. Activity Center #18, at the intersection of Collier Boulevard and Tamiami Trail East, is approximately 2 miles east of the subject property.

BACKGROUND AND ANALYSIS:

The FLUM designation on this property is Urban, Urban Mixed-Use District, Urban Coastal Fringe Subdistrict and located within the Coastal High Hazard Area (CHHA). The Urban Coastal Fringe Subdistrict provides for transitional densities between the Conservation designated area and the remainder of the Urban designated area. The CHHA is the geographical area lying below the elevation of the Category 1 storm surge line per the Southwest Florida Regional Planning Council's Hurricane Evacuation Study; increased density and expenditure of public infrastructure is discouraged in this area.

The site is also identified on Map FLUE-11, part of the FLUM Series which identifies properties deemed "consistent by policy" (through implementation of the Zoning Reevaluation Program in the 1990s). The property was granted an exemption or compatibility exception) and retained its Residential Tourist (RT) zoning designation. In 2000, the site was rezoned to Commercial Intermediate District (C-3) by Ordinance 2000-81 via the Office and Infill Commercial Subdistrict text-based provision in the FLUE.

The entire subject site is also located within the boundaries of the East Naples Community Development Plan (ENCDP) and the proposed US 41 East Zoning Overlay (US 41 EZO). The ENCDP was developed by the community through a series of public meetings and surveys and reflects the overall vision of the community; the Board of County Commissioners accepted the ENCDP in October 2020.

East Naples Community Development Plan (ENCDP):

The ENCDP promotes the strategic placement of land uses to enhance the community's sense of place and provides guidance for future development and redevelopment opportunities for employment, leisure, dining, and shopping to meet the growing needs of the community. The community worked with a consultant to develop a zoning overlay along the US 41 East corridor to establish development standards, design standards, and spacing criteria for commercial uses. The proposed zoning overlay has not yet been reviewed or adopted by the BCC due to a State legislative preemption that prohibits counties and municipalities from adopting more restrictive regulations in their respective comprehensive plan and land development code (LDC) until Oct. 1, 2026.

The ENCDP identifies car wash use as an undesirable use and discourages the development of these commercial facilities along the US 41 East corridor. However, the proposed *draft* US 41 East zoning overlay provides criteria for the development of car washes and other identified undesirable uses in in the ENCDP, including locational separation of a quarter mile from a like use, enhanced buffering, and increased setbacks.

Relevant to this petition, the applicant has committed to providing native canopy trees along the US 41 East corridor, enhanced buffering along the US 41 frontage, a noise attenuation wall along the southern property line where the car wash abuts a mobile home community, increased building setbacks from US 41 East, a maximum of one double loaded drive aisle of parking in front of the buildings, and separation of a quarter mile from an existing car wash facility – all of which are consistent with the proposed *draft* US 41 East zoning overlay.

Home Depot Land Use Approval – East of the Subject Project:

The Home Depot – SE Naples Commercial Subdistrict, located immediately to the east of the proposed Subdistrict, allows up to a maximum of 140,000 square feet of commercial/office uses, including home improvement store uses (SIC 5211-5261). This Subdistrict was adopted by the BCC and transmitted to the Florida Department of Commerce in April 2024 and became in effect in May 2024. As a result of this approval, the subject project became eligible for the FLUE text-based Office and Infill Commercial (OIC) Subdistrict provision. The OIC Subdistrict would allow the subject property to rezone from its current Commercial Intermediate District (C-3) to the highest intensity commercial zoning district of the abutting site (CPUD). The Home Depot Commercial Subdistrict allows uses consistent with the Heavy Commercial District (C-5) and the C-3 zoning district. The proposed car wash use is an allowed use within the General Commercial District (C-4) of the LDC. Accordingly, the subject site would be eligible to develop with C-3, C-4, and C-5 commercial uses without the need for a GMP amendment.

Compatibility:

FLUE Policy 5.6 requires new land uses to be compatible with, and complementary to, surrounding land uses. In reviewing the appropriateness of the requested uses and intensity on the subject site, a compatibility analysis might include a review of allowed use intensities and densities, development standards (building heights, setbacks, landscape buffers, etc.), building mass, building location, and orientation, architectural features, amount and type of open space, and location.

The area surrounding the proposed subdistrict is generally mixed-use in nature, as demonstrated in the Existing Conditions section of this report. Planning principals support locating higher intensity development closer to major roadways, with use intensities transitioning lower into residential neighborhoods. Locating this project along a six-lane arterial roadway provides a transition to the mobile home recreation area and mobile home community immediately south of the proposed project. Enhanced

buffering and noise attenuation wall between the proposed car wash and neighboring residents will also help the transition from commercial to the mobile home recreational area and mobile homes.

Compatibility can be more specifically addressed within the companion zoning petition, but staff finds that the requested uses will be compatible with the surrounding area (at the level at which GMP amendments are reviewed for compatibility) and, in accordance with best practices, that this is an appropriate location to provide for this car wash use.

Needs Analysis:

Real Estate Econometrics conducted a market study, which is included in the backup materials, analyzing market conditions for the subject site by identifying a trade area (3-mile radial distance and utilizing demographic data from ESRI) with estimated population, use saturation, and supply. Staff notes the following from the market analysis:

- The current population in the trade area is expected to increase by 4,500 drivers over the next 10 years per ESRI projections.
- Expenditures on vehicle cleaning services are expected to increase over the next 10 years, based on increased drivers projected in the trade area.
- The population in the trade area is currently served by five (5) competing car washes. (This figure does not include [non-competing] car washes accessory to gasoline service stations.)

Based on the market study, staff notes there is a sufficient supply of car washes (5) in the trade area to serve the current market until 2033. Additionally, there are other C-4 (and C-5) zoned properties in the trade area that could accommodate a future car wash when demand increases. Finally, there is the potential for the subject car wash, if approved, to take away a portion of the existing facilities' demand until such time as demand increases to warrant another car wash in the area.

CRITERIA FOR GMP AMENDMENTS FLORIDA STATUTES:

Data and analysis requirements for comprehensive plans and plan amendments are noted in Chapter 163, F.S., specifically as listed below.

Section 163.3177(1)(f), Florida Statutes:

(f) All mandatory and optional elements of the comprehensive plan and plan amendments shall be based upon relevant and appropriate data and an analysis by the local government that may include, but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the comprehensive plan or plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue.

1. Surveys, studies, and data utilized in the preparation of the comprehensive plan may not be deemed a part of the comprehensive plan unless adopted as a part of it. Copies of such studies, surveys, data, and supporting documents for proposed plans and plan amendments shall be made available for public inspection, and copies of such plans shall be made available to the public upon payment of reasonable charges for reproduction. Support data or summaries are not subject to the compliance review process, but the comprehensive plan must be clearly based on appropriate data. Support data or summaries may be used to aid in the determination of compliance and consistency.

2. Data must be taken from professionally accepted sources. The application of a methodology utilized in data collection or whether a particular methodology is professionally accepted may be evaluated. However, the evaluation may not include whether one accepted methodology is better than another. Original data collection by local governments is not required. However, local governments may use original data so long as methodologies are professionally accepted.

3. The comprehensive plan shall be based upon permanent and seasonal population estimates and projections, which shall either be those published by the Office of Economic and Demographic Research or generated by the local government based upon a professionally acceptable methodology. The plan must be based on at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period unless otherwise limited under s. 380.05, including related rules of the Administration Commission. Absent physical limitations on population growth, population projections for each municipality, and the unincorporated area within a county must, at a minimum, be reflective of each area's proportional share of the total county population and the total county population growth.

Section 163.3177(6)(a)2., Florida Statutes:

2. The future land use plan and plan amendments shall be based upon surveys, studies, and data regarding the area, as applicable, including:

   a. The amount of land required to accommodate anticipated growth.

   b. The projected permanent and seasonal population of the area.

   c. The character of undeveloped land.

   d. The availability of water supplies, public facilities, and services.

   e. The need for redevelopment, including the renewal of blighted areas and the elimination of nonconforming uses which are inconsistent with the character of the community.

   f. The compatibility of uses on lands adjacent to or closely proximate to military installations.

   g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.

   h. The discouragement of urban sprawl.

   i. The need for job creation, capital investment, and economic development that will strengthen and diversify the community's economy.

   j. The need to modify land uses and development patterns within antiquated subdivisions.

Section 163.3177(6)(a)8., Florida Statutes:

(a) A future land use plan element designating proposed future general distribution, location, and extent of the uses of land for residential uses, commercial uses, industry, agriculture, recreation, conservation, education, public facilities, and other categories of the public and private uses of land. The approximate acreage and the general range of density or intensity of use shall be provided for the gross land area included in each existing land use category. The element shall establish the long-term end toward which land use programs and activities are ultimately directed.

8. Future land use map amendments shall be based upon the following analyses:

   a. An analysis of the availability of facilities and services.

   b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.

   c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

The petitioner must provide appropriate and relevant data and analysis to address the statutory requirements for a Plan Amendment. For this petition, a market study was provided by the applicant.

Section 163.3187, Florida Statutes:

Process for adoption of small scale comprehensive plan amendment. *(Requirements to qualify for the Small-Scale amendment process.)*

(1) A small scale development amendment may be adopted under the following conditions:

(a) The proposed amendment involves a use of 50 acres or fewer. *[The subject site comprises ±1.92 acres.]*

(b) The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's comprehensive plan, but only proposes a land use change to the future land use map for a site-specific small-scale development activity. However, text changes that relate directly to, and are adopted simultaneously with, the small-scale future land use map amendment shall be permissible under this section. *[This amendment does include a text change to the Comprehensive Plan and those text changes are directly related to the proposed future land use map amendment.]*

(c) The property that is the subject of the proposed amendment is not located within an area of critical state concern, unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004(3) and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1). *[The subject property is not located within an Area of Critical State Concern.]*

(4) Comprehensive plans may only be amended in such a way as to preserve the internal consistency of the plan pursuant to s. 163.3177. Corrections, updates, or modifications of current costs which were set out as part of the comprehensive plan shall not, for the purposes of this act, be deemed to be amendments. *[This amendment preserves the internal consistency of the plan and is not a correction, update, or modification of current costs which were set out as part of the comprehensive plan.]*

NEIGHBORHOOD INFORMATION MEETING (NIM) NOTES:

A NIM was held on July 24, 2023, at Rookery Bay National Estuarine Research Preserve, 300 Tower Road, Naples, FL 34113. The meeting commenced at approximately 5:30 p.m. and adjourned at approximately 5:42 p.m. One member from the public attended the meeting in-person and two individuals attended the meeting by Zoom. The applicant's agent, Ellen Summers, AICP, explained the request for the proposed rezone and the companion small scale Growth Management Plan amendment. An attendee asked about the proposed use(s) for the remaining site acreage after the car wash was developed. The agent responded that the use(s) is unknown at this time.

The Administrative Code requires a second NIM be held when a petition has not been scheduled for public hearings within a year of the initial NIM. Over a year has elapsed since the first NIM was held in 2023. As a result, the petitioner conducted a second NIM on October 2, 2024, at Rookery Bay National Estuarine Research Preserve, 300 Tower Road, Naples, FL 34113. The meeting commenced at approximately 5:30 p.m. and adjourned at approximately 5:43 p.m. There were two members of the public present. The applicant's agent, Ellen Summers, AICP, explained the request for the proposed rezone and the companion small scale Growth Management Plan amendment. The attendees did not ask questions or raise any concerns regarding the proposed project.

The NIM documentation is included in the CCPC backup materials.

FINDINGS AND CONCLUSIONS:

- This petition proposes a small-scale Growth Management Plan amendment to create a subdistrict in the Urban Commercial District allowing for a car wash, limited to 5,000 square feet, in addition to 6,000 square feet of [presently permitted] C-3 uses.
- There are no adverse environmental impacts as a result of this petition. The project has been historically developed and cleared. This project does not require Environmental Advisory Council (EAC) review, as this project did not meet the EAC scope of land development project reviews as identified in Section 2-1193 of the Collier County Codes of Laws and Ordinances.
- No historic or archaeological sites are affected by this amendment.
- There are no transportation or public utility-related concerns as a result of this petition.
- There are no concerns about impacts on other public infrastructure.
- The site's use will create minimal impact on the surrounding area.
- There is not a demonstrated need for the proposed car wash use until 2033.
- Many of the project's proposed development standards are consistent with the proposed draft US 41 East zoning overlay.
- The site can be potentially rezoned to C-5 (utilizing the Office and Infill Commercial Subdistrict provision of the FLUE) to allow more intensive land uses than the proposed limited car wash use allowed in the C-4 zoning district.

LEGAL REVIEW: The County Attorney's office reviewed the staff report on October 15, 2024.

STAFF RECOMMENDATION:

Staff recommends the Collier County Planning Commission forward petition PL20220005822 Barefoot Williams Commercial Subdistrict GMPA to the Board of County Commissioners with a recommendation to approve and adopt and transmit to the Florida Department of Commerce and other statutorily required agencies.

NOTE: This petition has been tentatively scheduled for the January 14, 2025, BCC meeting date.

Meeting Notes

As of 10/16/2017 all Zoning applications have revised applications, and your associated Application is included in your notes; additionally a *new Property Ownership Disclosure Form is required for all applications. A copy of this new form is included in your pre-app

Note – link is https://www.colliercountyfl.gov/Home/ShowDocument?id=75093

- Submit a seperate sheet that provides a response to each of the 18 rezone criteria under LDC Section 10.02.08.F
- On Concept. Site plan, adhere to LDC Section 5.05.11 and under the Administrative Code, Chapter 3, Section H, part 9
- Clarify the exact C-4 uses you would like approved with this rezone petition.

Zoning in Final

STORMWATER – RICHARD ORTH – PLEASE CONTACT WITH QUESTIONS
CONTACT INFO ON PAGE 5

If Site is within the City of Naples Water Service Area please send to Naples Utilities and Planning Departments. Then, if the petition is submitted, we are to send it (by email) to the four persons below in their Utilities and Planning Depts. - along with a request that they send us a letter or email of "no objection" to the petition. Subject: Pre-application Meeting Notes for 11760 Tamiami Trail East (GMPA and Rezone)
Attachments: GMPA Pre-App Std Comments_11-19-19 (003).pdf

Thomas,

Please include the following information in the Pre-Application Meeting notes for 11760 Tamiami Trail East (GMPA and Rezone).

Requested information from the applicant:

1) Link to the East Naples Community Development Plan (ENCDP)
   – https://www.colliercountyfl.gov/government/growth-management/divisions/planning-and-zoning-division/comprehensive-planning-section/east-naples-community-development-plan
2) Upcoming Public Outreach Meetings for the US 41 East Zoning Overlay (US 41 EZO)
   a. October 26, 2022 – Communitywide meeting to review the draft zoning overlay (South Regional Library @ 6:00 p.m.)
   b. November 30, 2022 – Communitywide meeting to review the final draft zoning overlay (South Regional Library @ 6:00 p.m.)

Growth Management Plan Amendment (GMPA):

1) Refer to the attached "GMPA Pre-App Std. Comments" document for GMPA submittal requirements.
2) Provide complete GMPA application
   – https://www.colliercountyfl.gov/government/growth-management/divisions/planning-and-zoning-division/planning-and-zoning-applications
3) Provide a narrative to address Chapter 163.3177 (1)(f), FS, related to "community goals and vision" for the US 41 East Trail corridor, based on the Board accepted ENCDP.

Rezone Petition:

1) Address Future Land Use Element Policy 5.6
2) Address Future Land Use Element Objective 7 and related Policies (7.1 – 7.7), as applicable

Respectfully,

Michele R. Mosca, AICP
Principal Planner

GMP Amendment Pre-application Meeting Standard Comments

The Comprehensive Planning Section schedules all GMP amendment pre-application meetings, which are mandatory, and coordinates the review of all amendment petitions received.

Per the Fee Schedule adopted by Resolution 2019-96, **the non-refundable pre-application meeting fee is $500.00**; it is credited towards the petition fee – if the petition is submitted within nine months. The **petition fee** is $16,700.00 for a large-scale petition ($9,000.00 for a small-scale petition), which is non-refundable, ***plus* a proportionate share of the legal advertising costs**. For small-scale petitions, there are only two hearings – one each before the Collier County Planning Commission (CCPC) and Board of County Commissioners (BCC. For large-scale amendment petitions, a total of four public hearings are held - Transmittal hearing before CCPC and BCC, and Adoption hearing before CCPC and BCC. The estimated legal advertising costs will be provided to each petitioner and payment will be required prior to advertising for any hearings; any refund due the petitioner after hearings are held will be provided at that time.

In addition to the petition fee and legal ad costs noted above, payment must also be made for a Traffic Impact Study Review Fee. This fee should be submitted directly to the Transportation Planning Section. Please see their website at: http://www.colliergov.net/Index.aspx?page=566 and/or contact that Section for more details.

A small-scale amendment is limited to a parcel ~~<10~~ 50 acres in size and is limited to a map amendment only or map amendment with directly related text; further, the map amendment cannot result in a conflict between the map and text – there can be no internal inconsistency in the GMP.

For the most part, there is no guidance/criteria/standards provided in the GMP itself by which to review amendments for consistency; one exception is for significant impacts upon public facilities as provided for in Policy 1.1.2 of the CIE. However, Chapter 163, Florida Statutes, does provide guidance. *Note particularly the requirement to provide appropriate data and analysis to demonstrate the amendment is needed*. Generally, staff reviews for, and an applicant should adequately address in the submittal:

- Appropriateness of uses/compatibility with surrounding area.
- Impact upon surrounding properties – will it make them less developable under their present FLUM designation? Will it create a domino effect leading to future designation changes on the surrounding properties?
- *Need for the designation change – data and analysis*, e.g. market demand study for commercial uses, to demonstrate the change is warranted, that more inventory of the requested uses is needed. Too often, the data only demonstrates the petition site is *viable* for the proposed uses ("build it & they will come") rather than demonstrate there is a *need* for a new or expanded GMP provision to provide for the proposed uses, and that the need is at the subject location. The data should be specific to the proposed land uses, proposed trade service area, persons per household in subject area, etc. as applicable. It is recognized there is more than one acceptable methodology, e.g. radial distance from site (ULI standards for neighborhood/community/regional commercial centers), drive time, etc. Regardless of methodology, the raw data needs to be submitted to allow staff to review it for completeness and accuracy (sometimes parcels are omitted, double counted, included when shouldn't be, etc.). Also, as with all submitted documents, maps of trade service area need to be legible and include adequate identification features, e.g. major roads, Section-Township-Range.
- LOSS (level of service standards) impacts upon public facilities – roads, potable water, sanitary sewer, drainage, solid waste, parks & recreation facilities, etc.
- Within the above is consideration of site-specific impacts, e.g. impact upon wetlands and listed species habitats on-site and nearby; and, traffic impacts (operational/safety) from the

traffic volume generated/attracted and/or the ingress/egress points - turning movements, median openings, traffic signals, etc. Included within this would be a comparison between impacts that would be expected under the existing zoning and/or FLUM designation vs. that which could be expected under the proposed amendment.

- Consistency/conformity/harmony with other Goals, Objectives, Policies (GOPs) and provisions in the Element being amended and any other Element of the GMP relevant to the petition, as well as any other applicable regulations (e.g. Manatee Protection Plan, specific LDC provisions).
- Furtherance of existing GOPs relevant to the petition.
- Furtherance of any other plans or designations that is applicable or relevant to the petition (e.g. a redevelopment plan, Area of Critical State Concern, Rural Area of Critical Economic Concern).
- Energy efficiency and conservation, as required in HB 697 (2008).

Market Study Info for Commercial Requests

It is the responsibility of every applicant to utilize and provide the best available data as a sound foundation on which to build their requested amendment.

Collier County annually produces population estimates and projections. The County also prepares regular updates to its commercial inventory – and these are available to use in market studies.

Generally, the actual need for a FLUM designation change is determined through data and analysis, e.g. market demand study for commercial uses, with results which demonstrate the change is warranted, and that additional inventory of the requested uses is needed.

Too often, the data fails to reach the desired standard, merely demonstrating the subject site is *viable* for the proposed uses ("build it & they will come) rather than demonstrating there is an actual *need* for a new or expanded GMP provision to provide for the proposed uses, and that this need is best served at this location. Data and analysis should substantiate that benefits from the proposed project will be evident Countywide – or at least throughout the market area to be served, without detriment to other existing and planned developments – and not only to the property owner.

The data should be specific to the proposed land uses, proposed trade, market or service area, persons per household in subject area, etc., as applicable.

Market demand studies should develop scenarios to explain how the subject property will compete with other 'like areas' in or near the market, service or trade, area.

Market demand studies should also gauge the amount of vacant units/square footage/leasable area within the Planning Community/Communities involved, and of 'like area' nodes in the market area, such as within each Mixed Use Activity Center (MUAC), each Estates Neighborhood Center, each Subdistrict, and so on – acknowledging the premise that vacancies and vacancy rates are valid indicators for determining need/demand/support.

A commercial market study should contain a sufficient amount of information for a substantive review, including:

1. Identification and description of the project's trade/market area:

   - Trade/market area – radial, gravity, drive-time model or other method?

     - Radial: analyses are performed by selecting and evaluating demographics that fall within a pre-defined radial distance from the business location.

- Gravity: provides an approximation of business trade area by looking spatially at the distribution of all locations, including competitors, and evaluating each location's relative attractiveness.
- Drive-time: analyses include digitized roadway systems (accounts for speed, lanes, barriers, etc.). Method is valid for convenience scenarios where patrons are expected to go to the closest or most logistically convenient location.

- Trade/market area size varies depending upon the scale of the development.

The boundary may not be spherical – adjusted on the basis of transportation network, geographic constraints, density, etc.

2. Guidelines for determining the Market Area (ULI)

Center Type	Leading Tenant	Typical GLA	General Range in GLA	Typical Minimum Site Area	Minimum Support Required	Market Size (Radius)
Neighborhood	Supermarket or Drugstore	50,000 sq. ft.	30,000 – 100,000 sq. ft.	3 acres	2,500 – 40,000 people	1 ½ miles
Community	Variety Discount or Junior Dept. Store	150,000 sq. ft.	100,000-450,000 sq. ft.	10 + acres	40,000 – 150,000 people	3-5 miles
Regional	One or more full-line Dept. stores of at least 100,000 sq. ft. of GLA	400,000 sq. ft.	300,000 – 1,000,000 or more	30-50 acres or more	150,000 or more people	8 miles

3. Trade/market data must include the following figures:
(estimates and projections are needed for most categories)

- Population
- Number of dwelling units
- Household income
- Total trade area income
- Sales per sq. ft. (method – divide total retail sales w/in county by # of sq. ft. of retail space)
- Floor Area Ratios (building to land ratios – derive from inventory)
- Retail expenditures (some studies break down figures by retail type, others by percentage from Census or other source)
- Supportable square feet
(divide projected retail expenditures by sales per sq. ft. then multiply supportable sq. ft. by vacancy rate [to obviously account for vacancies])
- Land use requirement (divide total supportable sq. ft. by 43,560 and then by FAR to determine acreage requirements)
- Supply of commercial land uses
- Compare supply to demand

4. Office demand is calculated on a per capita method (sq. ft./person) must factor in the vacancy percentage/rate.

Too often the "Market Factors"/ "Population Factors" / "Commercial Analysis" portions of a Study appear to provide only some of these figures, but in the form of broad statements and drawn conclusions, with the lack of proper data and analysis evident. Of course, many applicants have chosen to provide more data and analysis, but the items shown above represent the minimum amount of information necessary to form a determination.

It is important to carefully organize the amendment package; be sure all exhibits are consistently labeled, are in the proper order, and are correctly referenced on the pages of the application. For site-specific amendments, be sure to clearly identify the subject site, include North arrow and scale, and source. A petition narrative is usually helpful. For corporate ownership, it is not acceptable to only list the corporation name. In some instances, property is owned by a corporation that in turn is comprised of other corporations. It is necessary to provide a list of individuals as officers or stockholders of the corporation(s) for purposes of full disclosure. The objective of disclosure is to reveal the individuals with an interest in the property (including seeing if any staff or public officials are included).

For a submitted petition, after the sufficiency review process is complete and the petition package is deemed sufficient, an electronic version of the entire submittal is needed. This is because the County has instituted an electronic (paperless) agenda process for the Board of County Commissioners' hearings.

The Land Development Code (LDC) requires the petitioner of a site-specific GMP amendment to hold a Neighborhood Information Meeting (NIM) similar to that presently required for Rezone petitions; this would occur after a finding of sufficiency of the petition submittal but prior to the CCPC Transmittal hearing (or CCPC Adoption hearing in case of small-scale amendment). The LDC also requires the petitioner of a site-specific GMP amendment to post a notice(s) of the CCPC hearing on the property, for both Transmittal and Adoption hearings, and notify surrounding property owners within a specified distance by letter.

Subject: RE: Pre-App ~~RESEARCH~~ for 11760 Tamiami Trail East (RZ) - PL20220005137 -Zoom on Tues.9/6/22 at 1:30pm NOTES

Hi Thomas,
I won't be able to make this meeting.
Below are landscape comments.

If a conceptual plan is required as part of the rezone application, label the perimeter buffers per the LDC. If enhanced buffers are required for staff approval of the GMPA, include these enhanced buffer standards as notes on the rezone master plan and/or in the rezone language.

Respectfully,

Mark Templeton, RLA
Principal Planner/Landscape Review

Name and Address

_____

G. Date subject property acquired (X): 2/17/2023 Term of lease___yrs./mos.
If, Petitioner has option to buy, indicate date of option: _____ and date option terminates: _____, or anticipated closing: _____.

H. Should any changes of ownership or changes in contracts for purchase occur subsequent to the date of application, but prior to the date of the final public hearing, it is the responsibility of the applicant, or agent on his behalf, to submit a supplemental disclosure of interest form.

III. DESCRIPTION OF PROPERTY:

A. LEGAL DESCRIPTION See Exhibit "I.C" Warranty Deed

B. GENERAL LOCATION The subject site is located on the south side of Tamiami Trail East, approximately 350 feet east of the intersection of Tamiami Trail East and Barefoot Williams Road.

C. PLANNING COMMUNITY South Naples

D. TAZ 2819

E. SIZE IN ACRES 1.92±

F. ZONING C-3

G. SURROUNDING LAND USE PATTERN See Exhibit "V.B.1" Future Land Use Map

H. FUTURE LAND USE MAP DESIGNATION(S) Urban Coastal Fringe Subdistrict

IV. TYPE OF REQUEST:

A. GROWTH MANAGEMENT PLAN ELEMENT (S) TO BE AMENDED:

_____ Housing Element	_____ Recreation/Open Space
_____ Traffic Circulation Sub-Element	_____ Mass Transit Sub-Element
_____ Aviation Sub-Element	_____ Potable Water Sub-Element
_____ Sanitary Sewer Sub-Element	_____ NGWAR Sub-Element
_____ Solid Waste Sub-Element	_____ Drainage Sub-Element
_____ Capital Improvement Element	_____ CCME Element
X_____ Future Land Use Element	_____ Golden Gate Master Plan
_____ Immokalee Master Plan	

B. AMEND PAGE(S) _____54_____AS FOLLOWS: Use ~~Strike-through~~ to identify language to be deleted; Use Underline to identify language to be added). Attach additional pages if necessary:
See Exhibit "IV.B.1" GMP Text Amendment

C. AMEND FUTURE LAND USE MAP(S) DESIGNATION FROM Urban Coastal Fringe to Barefoot Williams Commercial Subdistrict

D. AMEND OTHER MAP(S) AND EXHIBITS AS FOLLOWS: See Exhibit "IV.D.1" Barefoot Williams Commercial Subdistrict Map

E. DESCRIBE ADDITIONAL CHANGES REQUESTED: N/A

V. REQUIRED INFORMATION:

NOTE: ALL AERIALS MUST BE AT A SCALE OF NO SMALLER THAN I"=400'. At least one copy reduced to 8-1/2 x 11 shall be provided of all aerials and/or maps.

A. **LAND USE**

Exh. V.A.1 Provide general location map showing surrounding developments (PUD, DRI's, existing zoning) with subject property outlined.

Exh. V.A.2 Provide most recent aerial of site showing subject boundaries, source, and date.

Exh. V.A.3 Provide a map and summary table of existing land use and zoning within a radius of 300 feet from boundaries of subject property.

B. **FUTURE LAND USE AND DESIGNATION**

Exh. V.B.1 Provide map of existing Future Land Use Designation(s) of subject property and adjacent lands, with acreage totals for each land use designation on the subject property.

C. **ENVIRONMENTAL**

N/A Provide most recent aerial and summary table of acreage of native habitats and soils occurring on site. HABITAT IDENTIFICATION MUST BE CONSISTENT WITH THE FDOT-FLORIDA LAND USE, COVER AND FORMS CLASSIFICATION SYSTEM (FLUCCS CODE). NOTE: THIS MAY BE INDICATED ON SAME AERIAL AS THE LAND USE AERIAL IN "A" ABOVE.

N/A Provide a summary table of Federal (US Fish & Wildlife Service) and State (Florida Game & Freshwater Fish Commission) listed plant and animal species known to occur on the site and/or known to inhabit biological communities similar to the site (e.g. panther or black bear range, avian rookery, bird migratory route, etc.). Identify historic and/or archaeological sites on the subject property.

D. **GROWTH MANAGEMENT**

Reference 9J-11.006, F.A.C. and **Collier County's Capital Improvements Element Policy 1.1.2 (Copies attached).**

1. INSERT "Y" FOR YES OR "N" FOR NO IN RESPONSE TO THE FOLLOWING:

N Is the proposed amendment located in an Area of Critical State Concern? (Reference 9J-11.006(1)(a)(5), F.A.C.). IF so, identify area located in ACSC.

N Is the proposed amendment directly related to a proposed Development of Regional Impact pursuant to Chapter 380 F.S. ? (Reference 9J-11.006(1)(a)7.a, F.A.C.)

N Is the proposed amendment directly related to a proposed Small Scale Development Activity pursuant to Subsection 163.3187 (1)(c), F.S. ? (Reference 9J-11.006(1)(a)7.b, F.A.C.)

N Does the proposed amendment create a significant impact in population which is defined as a potential increase in County-wide population by more than 5% of population projections? (Reference Capital Improvement Element Policy 1.1.2). If yes, indicate mitigation measures being proposed in conjunction with the proposed amendment.

Exh. V.D.1 Does the proposed land use cause an increase in density and/or intensity to the uses permitted in a specific land use designation and district identified (commercial, industrial, etc.) or is the proposed land use a new land use designation or district? (Reference Rule 9J-5.006(5) F.A.C.). If so, provide data and analysis to support the suitability of land for the proposed use, and of environmentally sensitive land, ground water and natural resources. (Reference Rule 9J-11.007, F.A.C.)

E. PUBLIC FACILITIES

1. Exh. V.E.1 Provide the existing Level of Service Standard (LOS) and document the impact the proposed change will have on the following public facilities:

Exh. V.E.1 Potable Water
Exh. V.E.1 Sanitary Sewer
Exh. V.E.3 Arterial & Collector Roads; Name specific road and LOS **See TIS**
Exh. V.E.1 Drainage
Exh. V.E.1 Solid Waste
Exh. V.E.1 Parks: Community and Regional

If the proposed amendment involves an increase in residential density, or an increase in intensity for commercial and/or industrial development that would cause the LOS for public facilities to fall below the adopted LOS, indicate mitigation measures being proposed in conjunction with the proposed amendment. (Reference Capital Improvement Element Objective 1 and Policies)

2. Exh. V.E.2 Provide a map showing the location of existing services and public facilities that will serve the subject property (i.e. water, sewer, fire protection, police protection, schools and emergency medical services.

3. Exh. V.E.1 Document proposed services and public facilities, identify provider, and describe the effect the proposed change will have on schools, fire protection and emergency medical services.

F. OTHER

Identify the following areas relating to the subject property:

Exh. V.F.1	Flood zone based on Flood Insurance Rate Map data (FIRM).
N	Location of wellfields and cones of influence, if applicable. (Identified on Collier County Zoning Maps)
N	Traffic Congestion Boundary, if applicable
N	Coastal Management Boundary, if applicable
N	High Noise Contours (65 LDN or higher) surrounding the Naples Airport, if applicable (identified on Collier County Zoning Maps).

G. SUPPLEMENTAL INFORMATION

N	$16,700.00 non-refundable filing fee made payable to the Board of County Commissioners due at time of submittal. (Plus proportionate share of advertising costs)
Y	$9,000.00 non-refundable filing fee for a Small Scale Amendment made payable to the Board of County Commissioners due at time of submittal. (Plus proportionate share of advertising costs)
Y	Proof of ownership (copy of deed)
Y	Notarized Letter of Authorization if Agent is not the Owner (See attached form)
Y	1 Original and 5 complete, signed applications with all attachments including maps, at time of submittal. After sufficiency is completed, 25 copies of the complete application will be required.

* If you have held a pre-application meeting and paid the pre-application fee of $500.00 at the meeting, deduct that amount from the above application fee amount when submitting your application. All pre-application fees are included in the total application submittal fee. Otherwise the overage will be applied to future proportionate share advertising costs.

* Maps shall include: North arrow, name and location of principal roadways and shall be at a scale of 1" = 400' or at a scale as determined during the pre-application meeting.

AFFIDAVIT OF AUTHORIZATION

FOR PETITION NUMBERS(S) RZ-PL-20220005137 AND GMPA-PL-20220005822

I, RICKIE SCALI (print name), as MGR (title, if applicable) of 11760 PROPERTY, LLC (company, If applicable), swear or affirm under oath, that I am the (choose one) owner [✔] applicant [✔] contract purchaser [ ] and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Collier County to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application; and that
4. The property will be transferred, conveyed, sold or subdivided subject to the conditions and restrictions imposed by the approved action.
5. We/I authorize ROBERT J. MULHERE, FAICP, CLAY C. BROOKER, ESQ. & ELLEN SUMMERS, AICP to act as our/my representative in any matters regarding this petition including 1 through 2 above.

Notes:

- *If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.*
- *If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."*
- *If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.*
- *If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.*
- *If the applicant is a trust, then they must include the trustee's name and the words "as trustee".*
- *In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, and then use the appropriate format for that ownership.*

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

WARRANTY DEED

THIS WARRANTY DEED made this 21st day of February, 2023, between Barefoot 11700 LLC, a Florida limited liability company, whose post office address is P.O. Box 5319, Buffalo Groves, IL 60089, grantor,

TO

11760 Property LLC, a Florida limited liability company, whose post office address is 21 Sawgrass Drive, Lemont, IL 60439, grantee,

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

WITNESSETH:

That said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in Collier County, Florida to-wit:

See Attached Exhibit "A" Legal Description

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except restrictions, reservations, and easements of record and taxes accruing subsequent to December 31, 2022.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

EXHIBIT V.D.1 - NARRATIVE & JUSTIFICATION

EXHIBIT V.D.1

BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT
SMALL SCALE GROWTH MANAGEMENT PLAN AMENDMENT
NARRATIVE AND JUSTIFICATION

SITE DESCRIPTION:
The subject site is approximately 1.92 acres in size and located on the south side of Tamiami Trail East, approximately 350 feet east of the intersection of Tamiami Trail East and Barefoot Williams Road, and within Section 33, Township 50 South, Range 26 East, in Collier County, Florida.

The subject site is currently zoned C-3 and is located within the Urban Coastal Fringe Subdistrict of the Future Land Use Element of Collier County. The site was previously cleared prior to 2014, when the property was under different ownership, includes an access easement benefiting the adjacent RaceTrac gas station facility to the west, and is otherwise undeveloped. The property is also subject to a companion rezone application seeking to rezone to the C-4 zoning district to permit C-3 permitted uses and a car wash facility.

SURROUNDING PROPERTY:

Direction	Zoning	FLUE	Land Use
Subject Property	C-3	Urban Coastal Fringe	Vacant
North	P	Urban Residential	Tamiami Trail E. / Community Park
South	RT	Urban Coastal Fringe	Mobile Home Park Community Center
East	C-3	Urban Coastal Fringe	Office
West	C-3	Urban Coastal Fringe	Gas Station

SPECIFIC NATURE OF PROPOSED GMP AMENDMENT:
This is a Small Scale Growth Management Plan amendment to create the Barefoot Williams Commercial Subdistrict. The Subdistrict is intended to permit a variety of commercial land uses, which include those uses permitted within the C-3 Zoning District as well as Car Washes. Development within the subdistrict is limited to a maximum square footage of 10,000 square feet, with car wash facilities not to exceed 5,000 square feet.

GMP AND STATUTORY CONSISTENCY EVALUATION:

Consistency with Florida Statutes relating to Plan Amendments, Chapter 163.3177 (1)(f),

163.3177(1)(f) All mandatory and optional elements of the comprehensive plan and plan amendments shall be based upon relevant and appropriate data and an analysis by the local government that may include, but not be limited to, surveys, studies, community goals and vision, and other data available at the time of adoption of the comprehensive plan or plan amendment. To be based on data means to react to it in an appropriate way and to the extent necessary indicated by the data available on that particular subject at the time of adoption of the plan or plan amendment at issue.

East Naples Community Development Plan

The subject site is located within an area that was studied by Collier County, in collaboration with the East Naples community, to create a development plan known as the East Naples Community Development Plan (ENCDP). The ENCDP was reviewed and accepted by the Collier County Board of County Commissioners (BCC). County staff has since received direction from the BCC to draft LDC amendments that implement the vision of the ENCDP. These LDC amendments (the US 41 East Zoning Overlay) have been drafted by staff and are anticipated to go to hearings within the next few months.

The ENCDP identified certain land uses, such as car washes, other auto-oriented uses, and fast foot establishments that were deemed to be undesirable without specialized design standards being applied. This application for a SSGMPA to create the Barefoot Williams Commercial Subdistrict proposes to allow one car wash facility (maximum 5,000 SF) and a maximum of 5,000 SF of another use permitted within the C-3 zoning district.

As car washes and fast food establishments were deemed undesired uses within the ENCDP, the proposed subdistrict includes limitations to the maximum area of a car wash facility (5,000 square feet), and the companion rezone application includes Conditions of Approval (Exhibit A) that impose design standards for a car wash and fast food establishments, similar to what is proposed in the US 41 East Zoning Overlay.

It is important to note that although car washes have been deemed an undesirable use, without additional design standards, the proposed site is uniquely appropriate for a car wash. The site abuts a large gas station facility (RaceTrac) to the west, serving as a complementary use to the car wash. The site is also burdened by (a) an existing ingress/egress easement at the frontage along US 41, benefiting the adjacent gas station facility and (b) an easement that prevents structures or signs within the NW quadrant, measuring 100 feet by 130 feet. Given these pre-existing, limiting factors, the site would not be able to conform to the street-forward building design as encouraged by the ENCDP.

To the east of the subject site, a PUD rezone application and companion SSGMPA is proposed to permit a Home Depot, a large home improvement store. Given this surrounding development along US 41, the proposed car wash is not out of scale in comparison to the area. Additionally, the site will accommodate an area for future commercial development to the east of the car wash facility.

BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT SSGMPA

(PL-20220005822)

EXHIBIT V.E.1 – PUBLIC FACILITIES REPORT

EXHIBIT V.E.1
BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT

PUBLIC FACILITIES REPORT

The proposed amendment to the Collier County Growth Management Plan to create the Barefoot Williams Commercial authorizes commercial development, including a car wash and C-3 uses.

For the purposes of this report, the proposed subdistrict does not authorize residential development and does not increase permanent population within the County. Therefore, no significant increased demands on public facilities will occur as a result of approving this request.

The subject site is located within the Collier County Water-Sewer District service area. Collier County Public Utilities has sufficient treatment capacity.

Stormwater retention and detention will comply with SFWMD requirements, and State and County standards for off-site discharges will be met, resulting in no adverse impacts to stormwater management (drainage) level of service. The site does not affect County-maintained canals, ditches, or stormwater control structures.

No permanent residential development is approved through the subdistrict; therefore, there are no impacts to level of service for schools.

The proposed subdistrict will not increase the population and will not increase demands for emergency medical services or county parks and recreation services. An EMS/fire station is located approximately 3.5 miles from the property. The subject site is within the Greater Naples Fire and Rescue District.

The proposed amendment does not create any significant and adverse impacts to the area roadway network. The roadway network is projected to operate above the Level of Service (LOS) standard with or without the project at future build-out conditions. Please see the Traffic Analysis, included with this SSGMPA application packet, for transportation impacts and further details.

Project Description

The 11760 Tamiami Trail East project is a proposed development located on the south side of US 41 (Tamiami Trail East) between Barefoot Williams Road and Habitat Drive, west of Collier Boulevard in Section 33, Township 50 South, Range 26 East, in Collier County Florida. Refer to **Figure 1 – Location Map**.

Figure 1 – Location Map

The site is comprised of a single parcel which is currently vacant. The parcel is approximately 1.92 acres and is zoned C-3, Commercial Intermediate District. The requested rezoning is to C-4, General Commercial District. The site plan is in **Appendix A: Master Concept Plan**.

There is an existing interconnection between the subject parcel and the existing gas station to the west.

The proposed development is illustrated in **Table 1.**

Table 1
ITE – Development Land Use Designation

Development	Land Use [SIC Code in Brackets]	ITE LUC	Size (ITE variable)
Fast-Food Restaurant	Fast-Food Restaurant with Drive-Through Window [5812]	934 – Fast-Food Restaurant with Drive-Through Window	5,000 SF
Automated car wash	Automated Car Wash [7542]	948 – Automated Car Wash	5,000 SF and 1 Car Wash Tunnel

Traffic generation associated with the proposed development is evaluated generally based on ITE Trip Generation Manual, 11th Edition and ITE Trip Generation Handbook, 3rd Edition. In agreement with ITE Land Use Code (LUC) descriptions, the ITE land use designations are illustrated in **Table 1.**

A methodology meeting was held with Collier County Transportation Planning staff via email on March 13, 2023. Refer to **Appendix B: Methodology Meeting.**

For purposes of this evaluation, the project build-out year is assumed to be consistent with the Collier County 2028 planning horizon.

Trip Generation

The project's site trip generation is based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition. The software program OTISS (Online Traffic Impact Study Software), most current version, is used to create the raw unadjusted trip generation for the project. The ITE average rates are used for the trip generation calculations. The ITE – OTISS trip generation calculation worksheets and the LUC descriptions are provided in **Appendix C: ITE Trip Generation Calculations**. The trip generation associated with the proposed build-out conditions for the project, is summarized in **Table 2: Project Trip Generation – Average Weekday**.

Based on ITE recommendations and consistent with Collier County TIS Guidelines and Procedures, reductions for internal capture and pass-by trips are considered for this project. Internal capture was evaluated based on the ITE balancing method and capped at 20% maximum per Collier County TIS Guidelines and Procedures.

ITE does not have pass-by rates for a car wash. Trips are expected to use the business on their way to a primary destination, but conservatively car wash pass-by is not considered. The restaurant pass-by was capped at 50% per Collier County TIS Guidelines and Procedures. The report uses 40%/50%/50% for daily, am and pm respectively.

ITE has two variables that can be used for the trip generation for the automated car wash: size and number of tunnels. As shown in **Appendix C**, the number of tunnels results in a higher trip generation for the automated car wash and is conservatively used.

The ITE Trip Generation Manual does not provide daily or AM peak hour traffic data for the Automated Car Wash, LUC 948. In addition, consistent with the nature of this business, typically PM peak hour traffic activity is more intense than the AM peak hour.

Table 2

Project Trip Generation – Average Weekday

ITE Land Use	Size[(1)]	Daily Two-Way Volume	AM Peak Hour			PM Peak Hour		
			Enter	Exit	Total	Enter	Exit	Total
Fast-Food Restaurant with Drive-Through Window	5 k SF	2,338	114	109	223	86	79	165
Automated Car Wash	1 Tunnel	N/A	N/A	N/A	N/A	39	39	78
Total Traffic		2,338	114	109	223	125	118	243
Internal Capture		0	0	0	0	22	22	44
External Traffic		2,338	114	109	223	103	96	199
Pass-by		0	57	55	112	39	33	72
Net External		2,338	57	54	111	64	63	127

Note: (1) k SF = 1,000 Square Feet

In agreement with the Collier County TIS guidelines, significantly impacted roadways are identified based on the proposed project highest peak hour trip generation (net external traffic) and consistent with the peak hour of the adjacent street traffic. Based on the information contained in Collier County 2022 Annual Update and Inventory Report (AUIR), the peak hour for the adjacent roadway network is PM peak hour.

For the concurrency analysis, the net external traffic volumes will be used (PM Peak Hour total 127 trips).

Trip Distribution and Assignment

The traffic generated by the proposed project is assigned to the adjacent roadways using the knowledge of the area and engineering judgement.

The site-generated trip distribution for the PM peak hour of the adjoining street is shown in **Table 3: Traffic Distribution for PM Peak Hour** and is graphically depicted in **Figure 2A: Project Distribution by Percentage** and **Figure 2B: Project Distribution by PM Peak Hour**.

Table 3
Traffic Distribution for PM Peak Hour

Roadway Link	Collier County Link No.	Roadway Link Location	Distribution of Project Traffic	PM Peak Hour Project Vol.*	
				Enter	Exit
Tamiami Trl	93.0	Project to Lely Resort Blvd	40%	WB – 26	**EB – 25**
Tamiami Trl	93.0	Lely Resort Blvd to Triangle Blvd	25%	WB-16	**EB – 16**
Lely Resort Blvd	**	North of Tamiami Trl	15%	SB-10	NB-9
Tamiami Trl	93.0	Project to Rattlesnake Hammock Rd	45%	**EB – 29**	WB – 28

Note(s): *Peak hour, peak direction traffic volumes are **underlined** and **bold** to be used in Roadway Link Level of Service calculations. Peak Direction is taken from the Collier County 2022 AUIR.
** Not a Collier County monitored link.

Figure 2A – Project Distribution by Percentage

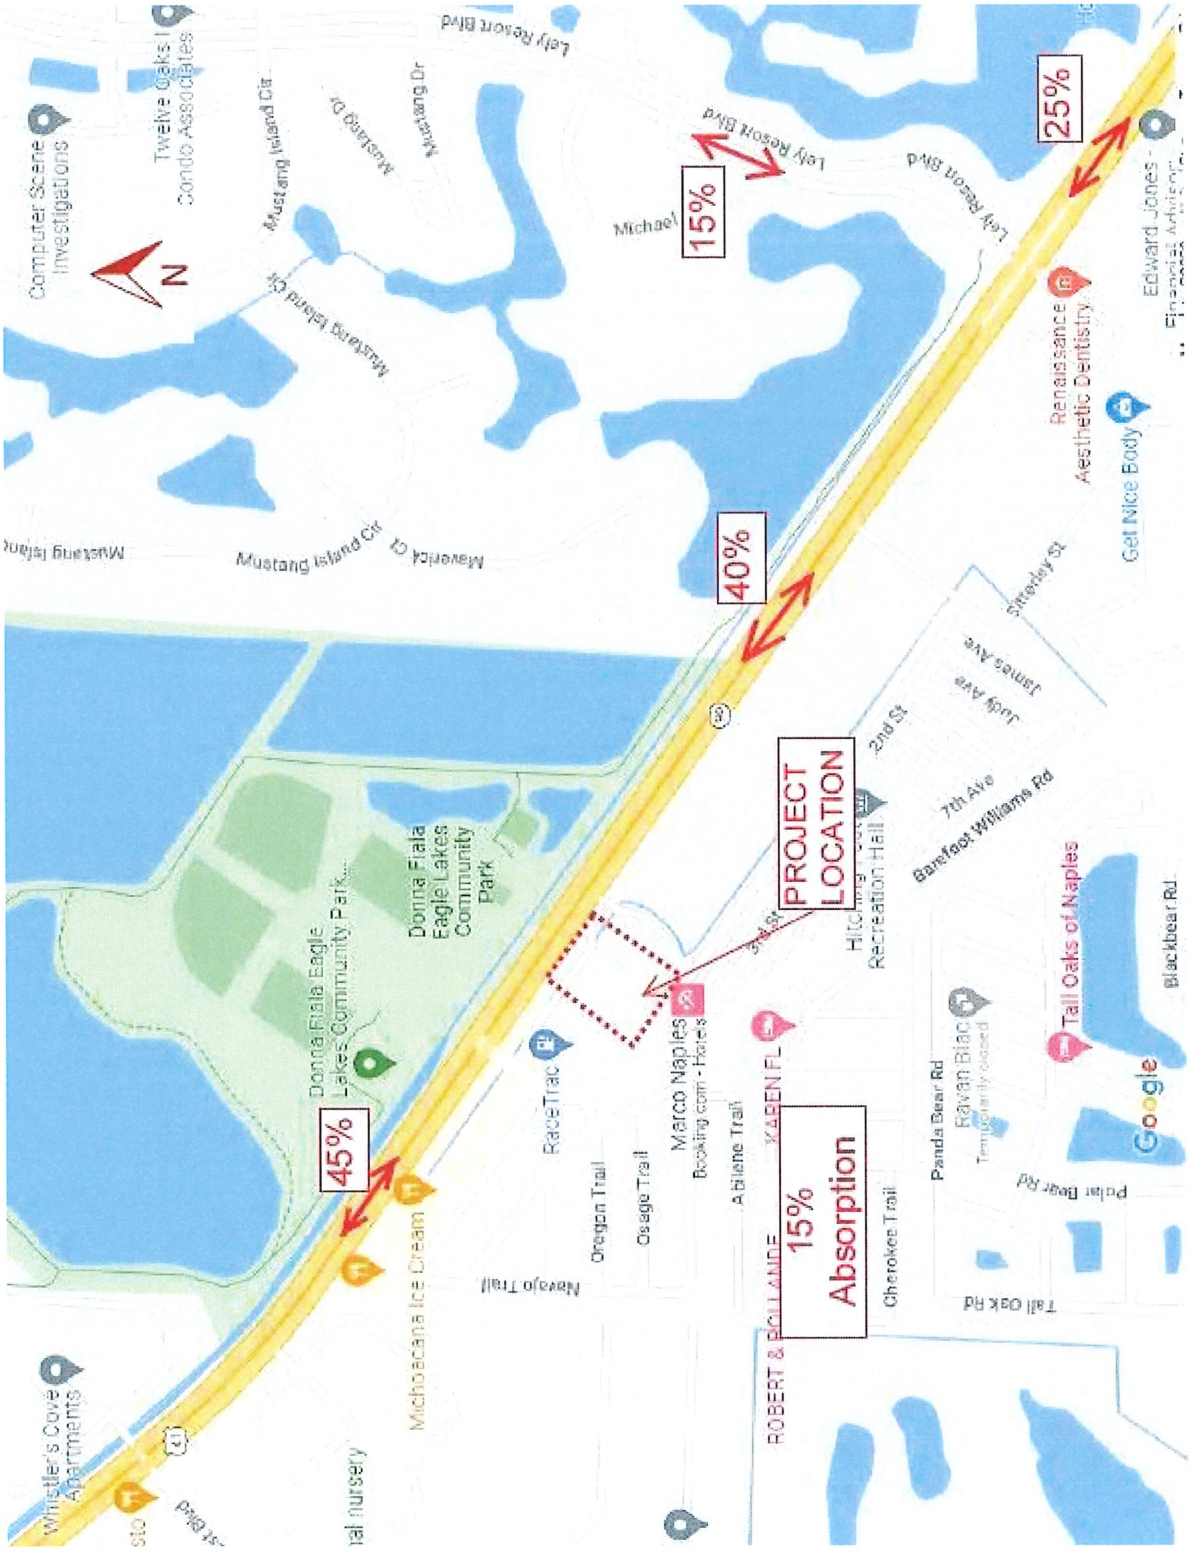

Figure 2B – Project Distribution by PM Peak Hour

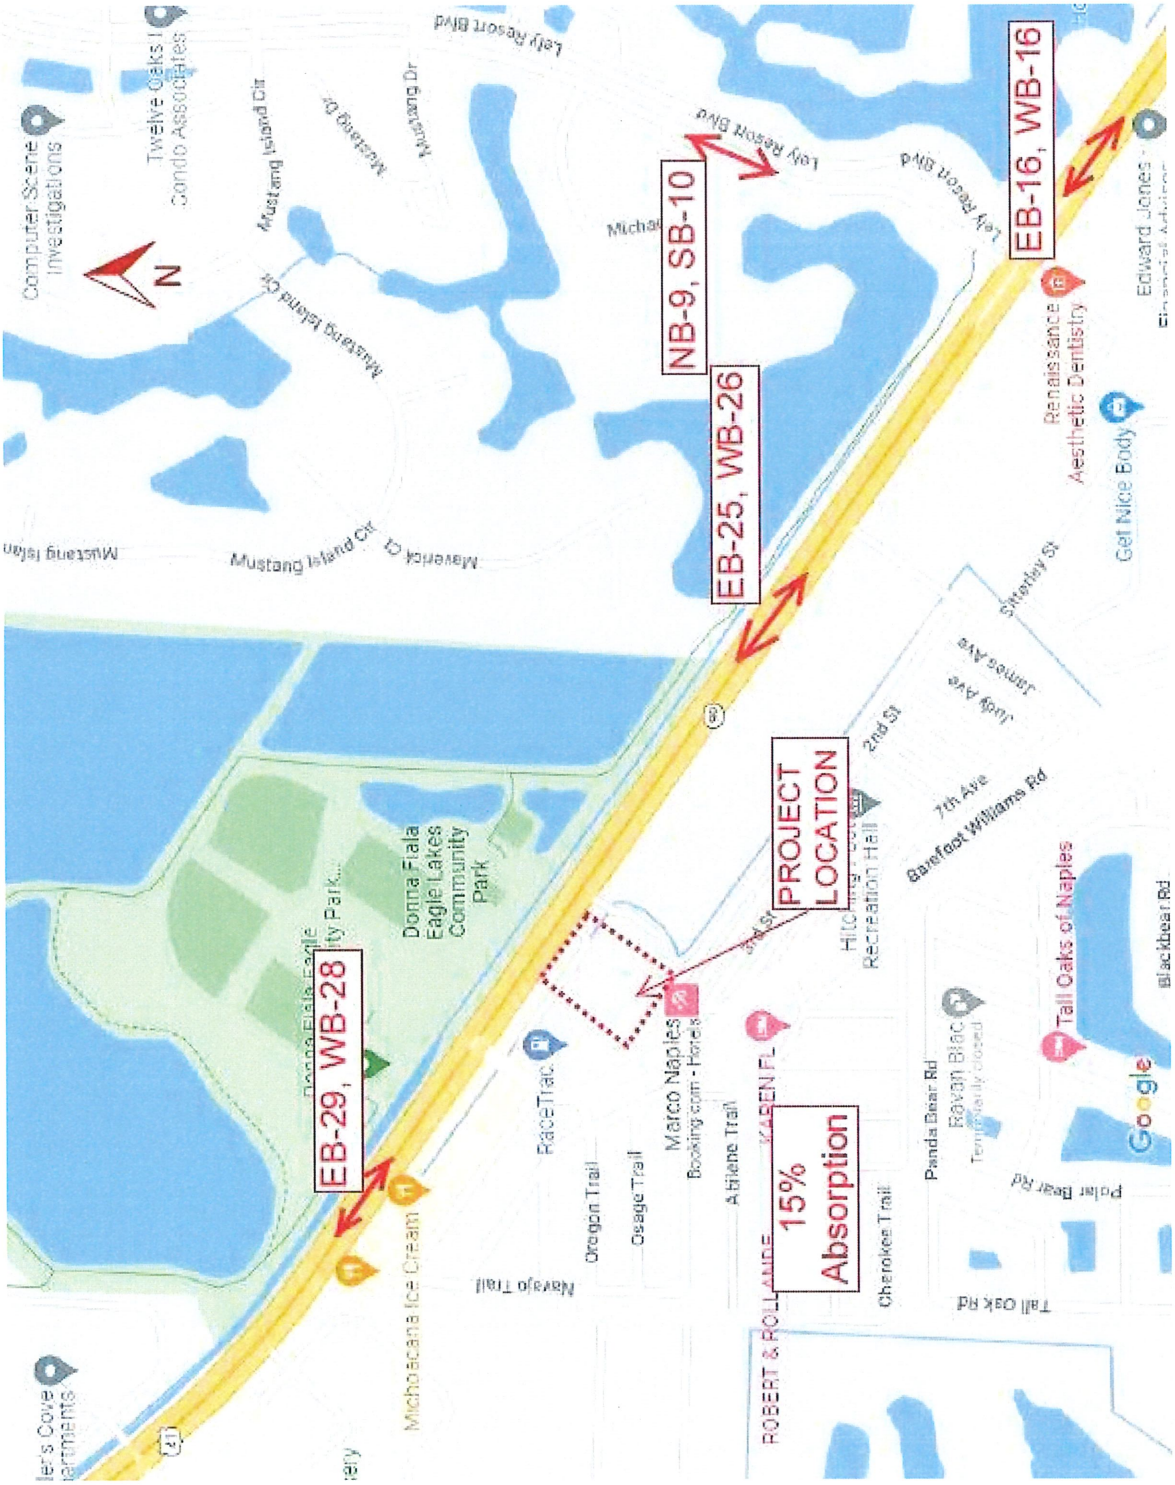

Background Traffic

Average background traffic growth rates are estimated for the segments of the roadway network in the study area using the Collier County Transportation Planning Staff guidance of a minimum 2% growth rate, or the historical growth rate from peak hour peak direction volume (estimated from 2008 through 2022), whichever is greater.

Another way to derive the background traffic is to use the 2022 Annual Update and Inventory Report (AUIR) volume plus the trip bank volume. The higher of the two determinations is to be used in the Roadway Link Level of Service analysis.

Table 4, Background Traffic without Project illustrates the application of projected growth rates to generate the projected background (without project) peak hour peak direction traffic volume for the build-out year 2028

Table 4
Background Traffic without Project (2022 - 2028)

Roadway Link	CC AUIR Link ID #	Roadway Link Location	2022 AUIR Pk Hr, Pk Dir Background Traffic Volume (trips/hr)	Projected Traffic Annual Growth Rate (%/yr)*	Growth Factor	2028 Projected Pk Hr, Peak Dir Background Traffic Volume w/out Project (trips/hr) Growth Factor**	Trip Bank	2028 Projected Pk Hr, Peak Dir Background Traffic Volume w/out Project (trips/hr) Trip Bank***
Tamiami Trl	93.0	Project to Lely Resort Blvd	2,110	2.00%	1.1262	2,377	610	**2,720**
Tamiami Trl	93.0	Lely Resort Blvd to Triangle Blvd	2,110	2.00%	1.1262	2,377	610	**2,720**
Tamiami Trl	93.0	Project to Rattlesnake Hammock Rd	2,110	2.00%	1.1262	2,377	610	**2,720**

Note(s): *Annual Growth Rate – based on peak hour, peak direction volume (from 2008 through 2022), or 2% minimum.
**Growth Factor = (1 + Annual Growth Rate)^6. 2028 Projected Volume = 2022 AUIR Volume x Growth Factor.
***2028 Projected Volume = 2022 AUIR Volume + Trip Bank.
The projected 2028 Peak Hour – Peak Direction Background Traffic is the greater of the Growth Factor or Trip Bank calculation, which is **underlined** and **bold** as applicable.

Existing and Future Roadway Network

The existing roadway conditions are extracted from the Collier County 2022 AUIR. Roadway improvements that are currently under construction or are scheduled to be constructed within the five-year Transportation Improvement Plan (TIP) or Capital Improvement program (CIP) are considered to be committed improvements. Based on our review of the most current Five Year Work Program available for Collier County and Florida Department of Transportation (FDOT), no roadway improvements were identified for the analyzed roadway network. As such, the existing roadway segment capacities are anticipated to remain unchanged through project build-out.

The existing and future roadway conditions are illustrated in **Table 5: Existing and Future Roadway Conditions**.

Table 5
Existing and Future Roadway Conditions

Roadway Link	CC AUIR Link ID #	Roadway Link Location	2022 Roadway Condition	Min. Standard LOS	2022 Peak Dir, Peak Hr Capacity Volume	2028 Roadway Condition	2028 Peak Dir, Peak Hr Capacity Volume
Tamiami Trl	93.0	Project to Lely Resort Blvd	6D	E	3,000(EB)	6D	3,000(EB)
Tamiami Trl	93.0	Lely Resort Blvd to Triangle Blvd	6D	E	3,000(EB)	6D	3,000(EB)
Tamiami Trl	93.0	Project to Rattlesnake Hammock Rd	6D	E	3,000(EB)	6D	3,000(EB)

Note(s): 2U = 2-lane undivided roadway; 4D, 6D, 8D = 4-lane, 6-lane, 8-lane divided roadway, respectively; LOS = Level of Service.

Project Impacts to Area Roadway Network-Link Analysis

The Collier County Transportation Planning Services developed Level of Service (LOS) volumes for the roadway links impacted by the project, which are evaluated to determine the project impacts to the area roadway network in the future horizon year 2028. The Collier County Transportation Planning Services guidelines have determined that a project will be considered to have a significant and adverse impact if **both** the percentage volume capacity exceeds 2% of the capacity for the link directly accessed by the project and for the link adjacent to the link directly accessed by the project; 3% for other subsequent links **and** if the roadway is projected to operate below the adopted LOS standard.

Table 6: Roadway Link Level of Service (LOS) – with Project in the Year 2028 illustrates the LOS traffic impacts of the project to the area roadway network. As illustrated in Table 6, the project will generate a de minimus impact on the area roadway network. None of the analyzed links are projected to have a significant impact or exceed the adopted LOS standard with or without the project at 2028 build-out conditions.

The proposed development is not located within the Collier County's Transportation Concurrency Exception Area (TCEA). In addition, the proposed development is not situated within the County's designated Transportation Concurrency Management Area (TCMA). The TCEA's and TCMA's designations are provided in Policy 5.4 and 5.6 of the Transportation Element – Collier County Growth Management Plan (GMP).

Policy 5.1 of the Collier County Transportation Element of the Growth Management Plan (GMP) states that "the County Commission shall review all rezone petitions, SRA designation applications, conditional use petitions, and proposed amendments to the Future Land Use Element (FLUE) affecting the overall countywide density or intensity of permissible development, with consideration of their impact on the overall County transportation system, and shall not approve any petition or application that would directly access a deficient roadway segment as identified in the current AUIR or if it impacts an adjacent roadway

segment that is deficient as identified in the current AUIR, or which significantly impacts a roadway segment or adjacent roadway segment that is currently operating and/or is projected to operate below an adopted Level of Service Standard within the five year AUIR planning period, unless specific mitigating stipulations are also approved."

Table 6
Roadway Link Level of Service (LOS) – with Project in the Year 2028

Roadway Link	CC AUIR Link ID #	Roadway Link Location	2028 Peak Dir, Peak Hr Capacity Volume	Roadway Link, Peak Dir, Peak Hr (Project Vol Added)*	2028 Peak Dir, Peak Hr Volume w/Project**	% Vol Capacity Impact by Project	Min LOS exceeded without Project? Yes/No	Min LOS exceeded with Project? Yes/No
Tamiami Trl	93.0	Project to Lely Resort Blvd	3,000(EB)	**EB-25**	**2,745**	0.83%	No	No
Tamiami Trl	93.0	Lely Resort Blvd to Triangle Blvd	3,000(EB)	**EB-16**	**2,736**	0.53%	No	No
Tamiami Trl	93.0	Project to Rattlesnake Hammock Rd	3,000(EB)	**EB-29**	**2,749**	0.97%	No	No

Note(s): *Refer to **Table 3** from this report.
2028 Projected Volume = 2028 background (refer to **Table 4) + Project Volume added.

Access Management

Existing US 41 (Tamiami Trail East) is a six-lane divided roadway. It is an Access Class 3 with a 50 mph posted speed limit and design speed. Future geometric conditions are unchanged. The access to US 41 is an existing right-in / right-out access with turn lane.

A detailed evaluation of the proposed site access point will be performed at the time of site development permitting/platting to determine turn lane requirements and capacity availability, as applicable.

Improvement Analysis

Based on the results illustrated within this traffic analysis, the proposed project not a significant traffic generator for the roadway network at this location. The analyzed roadway network facilities have sufficient capacity to accommodate the proposed project within the 5-year planning period.

The maximum total daily trip generation for the proposed development shall not exceed 127 two-way PM peak hour net new trips based on the land use codes in the ITE Trip Generation Manual in effect at the time of the application for SDP/SDPA or subdivision plat approval.

Mitigation of Impact

The developer proposes to pay the appropriate Collier County Road Impact Fee as building permits are issued for the project.

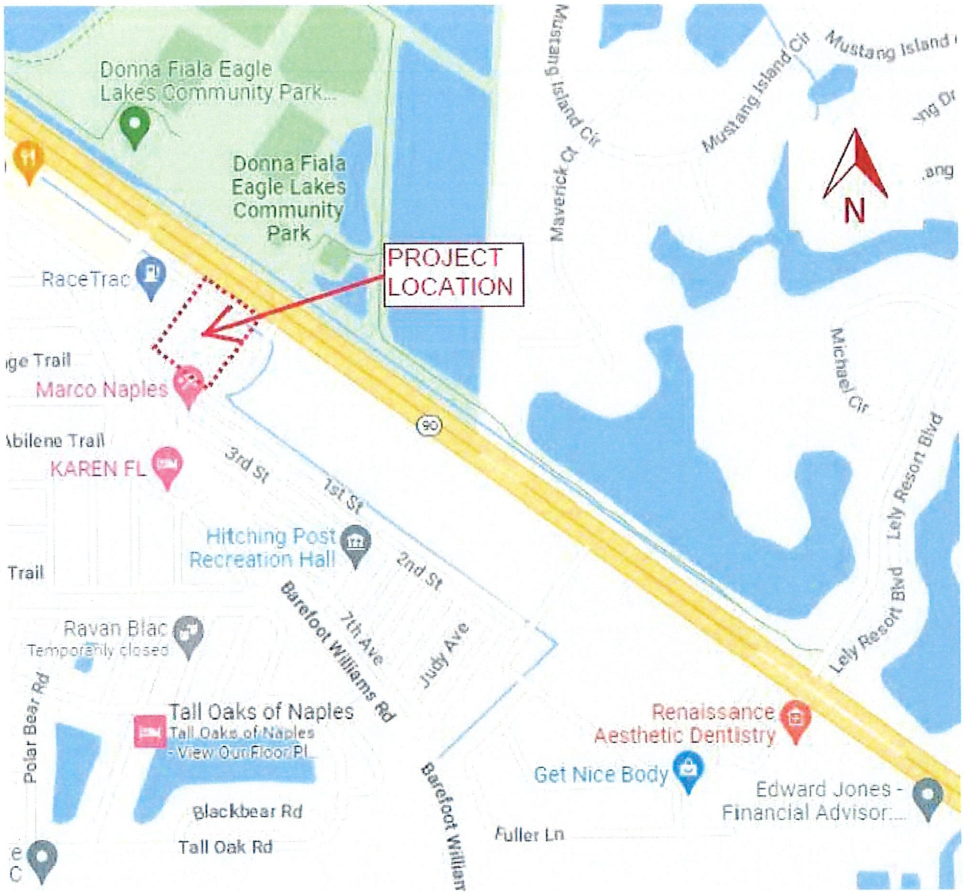
Description: The TIS is in support of a rezone. The 11760 Tamiami Trail East proposal includes construction of a 5,000 square foot (SF) Fast-Food Restaurant with Drive-Through Window and a 5,000 SF 1 Tunnel Car Wash. Project access is via an existing right-in / right-out access to Tamiami Trail East and cross-access with the existing gas station to the west and cross-access with the parcel to the east..

Zoning
Existing: C-3 Commercial Intermediate District
Comprehensive plan recommendation: No change

Page **1** of **14**

Requested: Rezone to C-4 General Commercial District.

Figure 1 – Project Location Map



Findings of the Preliminary Study: The project is not located within a TCMA or TCEA designated area.

Study type: Since estimated project net new traffic volume exceeds 100 PM 2-way peak hour trips, this study qualifies as a Major Study TIS.

The ITE Trip Generation Manual does not provide daily or AM peak hour traffic data for the Automated Car Wash – LUC 948. In addition, consistent with the nature of this business, typically PM peak hour traffic activity is more intense than the AM peak hour. So the TIS will include trip generation (PM Peak Hour for the car wash), traffic distribution and assignments, significance test (based on 2%/2%/3% criterion), and roadway link analysis. Site operational analysis will be analyzed in the TIS for the future site development plan application. While ITE

results in a 25% internal capture, per TIS Guidelines, the internal capture will be limited to 20%. No intersection analysis will be performed. Refer to **Figure 2** for the distribution of project traffic.

Figure 2: Distribution of Project Traffic

Roadway concurrency analysis – based on PM Peak Hour weekday traffic – 2%/2%/3% criterion.

Study Type: (if not net increase, operational study)

Small Scale TIS ☐ Minor TIS ☐

Major TIS ☒

Study Area:
Boundaries: Tamiami Trail East from Rattlesnake Hammock Road to Collier Boulevard. No intersection analysis will be performed.
Additional intersections to be analyzed: N/A
Build-out Year: 2028
Planning Horizon Year: 2028
Analysis Time Period(s): Concurrency – PM Peak Hour.
Future Off-Site Developments: N/A
Source of Trip Generation Rates: ITE 11th Edition

Reductions in Trip Generation Rates:
None: N/A
Pass-by trips: 50% for fast-food restaurant with drive-through window
Internal trips: Internal capture between car wash and restaurant.
Transit use: N/A
Other: N/A

Horizon Year Roadway Network Improvements: 2028

Methodology & Assumptions:
Non-site traffic estimates: Collier County traffic counts and 2022 AUIR
Site-trip generation: OTISS – ITE 11th Edition
Trip distribution: Engineer's Estimate
Traffic assignment method: project trip generation with background growth
Traffic growth rate: historical growth rate or 2% minimum
Turning movement assignment: Turning movement analysis will be performed at the time of future site development plan application TIS when final actual development parameters are available.

Special Features: (from preliminary study or prior experience)
Accidents locations: N/A
Sight distance: N/A
Queuing: N/A
Access location & configuration: N/A
Traffic control: MUTCD
Signal system location & progression needs: N/A
On-site parking needs: N/A
Data Sources: CC 2022 AUIR; CC Traffic Counts
Base maps: N/A
Prior study reports: N/A
Access policy and jurisdiction: N/A
Review process: N/A
Requirements: N/A
Miscellaneous: N/A

Small Scale Study – No Fee	_____
Minor Study - $750.00	_____
Major Study - $1500.00	X
Methodology Fee $500.00	X
Includes 0 intersections	_____
Additional Intersections - $500.00 each	_____

All fees will be agreed to during the Methodology meeting and must be paid to Transportation prior to our sign-off on the application.

Applicant

Collier County
Traffic Impact Study Review Fee Schedule

Fees will be paid incrementally as the development proceeds: Methodology Review, Analysis Review, and Sufficiency Reviews. Fees for additional meetings or other optional services are also provided below.

Methodology Review - $500 Fee
Methodology Review includes review of a submitted methodology statement, including review of submitted trip generation estimate(s), distribution, assignment, and review of a "Small Scale Study" determination, written approval/comments on a proposed methodology statement, and written confirmation of a re-submitted, amended methodology statement, and one meeting in Collier County, if needed.

"Small Scale Study" Review - No Additional Fee (Includes one sufficiency review)
Upon approval of the methodology review, the applicant may submit the study. The review includes: a concurrency determination, site access inspection and confirmation of the study compliance with trip generation, distribution and maximum threshold compliance.

"Minor Study Review" - $750 Fee (Includes one sufficiency review)
Review of the submitted traffic analysis includes: optional field visit to site, confirmation of trip generation, distribution, and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of off-site improvements within the right-of-way, review of site access and circulation, and preparation and review of "sufficiency" comments/questions.

"Major Study Review" - $1,500 Fee (Includes two intersection analysis and two sufficiency reviews)
Review of the submitted traffic analysis includes: field visit to site, confirmation of trip generation, special trip generation and/or trip length study, distribution and assignment, concurrency determination, confirmation of committed improvements, review of traffic volume data collected/assembled, review of traffic growth analysis, review of off-site roadway operations and capacity analysis, review of site access and circulation, neighborhood traffic intrusion issues, any necessary improvement proposals and associated cost estimates, and preparation and review of up to two rounds of "sufficiency" comments/questions and/or recommended conditions of approval.

"Additional intersection Review" - $500 Fee
The review of additional intersections shall include the same parameters as outlined in the "Major Study Review" and shall apply to each intersection above the first two intersections included in the "Major Study Review"

"Additional Sufficiency Reviews" - $500 Fee
Additional sufficiency reviews beyond those initially included in the appropriate study shall require the additional Fee prior to the completion of the review.

Appendix C:

Trip Generation Calculations

Land Use: 934
Fast-Food Restaurant with Drive-Through Window

Description

This land use includes any fast-food restaurant with a drive-through window. This type of restaurant is characterized by a large drive-through and large carry-out clientele, long hours of service (some are open for breakfast, all are open for lunch and dinner, some are open late at night or 24 hours a day) and high turnover rates for eat-in customers. The restaurant does not provide table service. A patron generally orders from a menu board and pays before receiving the meal. A typical duration of stay for an eat-in patron is less than 30 minutes. Fast casual restaurant (Land Use 930), high-turnover (sit-down) restaurant (Land Use 932), fast-food restaurant without drive-through window (Land Use 933), and fast-food restaurant with drive-through window and no indoor seating (Land Use 935) are related uses.

Additional Data

Users should exercise caution when applying statistics during the AM peak periods, as the sites contained in the database for this land use may or may not be open for breakfast. In cases where it was confirmed that the sites were not open for breakfast, data for the AM peak hour of the adjacent street traffic were removed from the database.

If the restaurant has outdoor seating, its area is not included in the overall gross floor area. For a restaurant that has significant outdoor seating, the number of seats may be more reliable than GFA as an independent variable on which to establish a trip generation rate.

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (https://www.ite.org/technical-resources/topics/trip-and-parking-generation/).

The sites were surveyed in the 1980s, the 1990s, the 2000s, and the 2010s in Alaska, Alberta (CAN), California, Colorado, Florida, Indiana, Kentucky, Maryland, Massachusetts, Minnesota, Montana, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Washington, and Wisconsin.

Land Use: 948
Automated Car Wash

Description

An automated car wash is a facility that allows for the mechanical cleaning of the exterior of vehicles. Manual cleaning service may also be available at the facility. Self-service car wash (Land Use 947) and car wash and detail center (Land Use 949) are related uses.

Additional Data

The sites were surveyed in the 1990s and the 2000s in New Jersey, New York, and Washington.

BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT SSGMPA

(PL-20220005822)

RESPONSE LETTER DATED 6/27/2024

Bowman

June 27, 2024

Michele Mosca, Planner III
Collier County Government – Comprehensive Planning
2800 North Horseshoe Drive
Naples, FL 34104

Re: Barefoot Williams Commercial Subdistrict SSGMPA
(PL-20220005822)
HM File No.: 2023.006

Dear Ms. Mosca:

We are in receipt of the County Comment Letter and offer the following responses and request to be scheduled for hearing:

COMPREHENSIVE PLANNING REVIEW – MICHELE MOSCA
Review #3

1. Market Study:

1) Explain the correlation, if any, between the proposed car wash target users aged 35 yrs. to 55 yrs., identified on pages 3 and 7 of the Study, and the number of total users/drivers 15 years and older, identified in the demand analysis beginning on page 11.

(Note: Staff recognizes the demand analysis is based on all drivers aged 15 yrs. and older; however, certain statistical data are provided for target users aged 35 yrs. to 55 yrs. If the target users are the focus of the Study, please revise all relevant tables and the Demand Section of the Study to reflect that age group. If the focus of the Study is all drivers aged 15 yrs. and older, please explain how the statistics provided for the target users are applicable to the non-target users.)

Response: There is no correlation. The target users age range was a national average and used for marketing purposes. The local focus is on the number of registered cars in the market area and their propensity to use local car wash facilities.

2) 5.0, Market Demographics, Pg. 6 – If the statistic regarding "target age of users is 35 to 55" is significant to the overall study, please revise Table 5.1 to include household data by age and gender, and other applicable sections of the Study, as appropriate.

950 Encore Way, Naples, FL 34110
P: 239.254.2000
bowman.com

Response: As noted in #1, the target age of users is not significant or relevant to the overall study.

3) 5.1, Car Wash Consumer Demographics, Pg. 7 – The figure of 7,900 for target age customers does not equal the population totals identified in Table 5.2. If an estimate was included in the total for customers aged 55 yrs., please include this estimate in the table for both genders.

Response: As noted in #1, the target age of users is not significant or relevant to the overall study. Therefore Table 5.2 is irrelevant to the study and was only included to compare to the national average.

4) 6.0, Market Area Automotive Demographics, Table 6.0 – Staff was unable to locate a subset of the "Vehicle Cleaning Services including Car Washes," such as auto detailing services, etc. in ESRI. If a subgroup of this category exists, please provide the expenditures for car wash services only. If there is no breakdown of this category, please provide a list of other vehicle cleaning services that potentially would be included in the overall category.

Response: Consultant was also unable to locate a subset of the "Vehicle Cleaning Services including Car Washes" category. The reason for this table is to provide information as to the amount of money spent on vehicle cleaning services in the market area. This information is not used in any of the demand/supply calculations.

5) 7.0, Demand, Pgs. 11 -12 – The methodology used to calibrate the total licensed drivers to determine the total number of registered vehicles in the county appears to be overstated by +57,539 vehicles. The county's current registered vehicle figure prepared by the FLHSMV is 348,718 for all autos and pickup trucks, as of 3/2024. Please explain why the methodology used in the Study is preferred over the figure provided by the State or use the State's figure for the demand analysis. (Note: Revising the figure to reflect the State's figure will require revisions to the Demand Section of the Study.)

Response: Consultant agrees that the information source for the registered vehicle figure prepared by FLHSMV is a more reliable source of information. The Consultant included the FLHSMV data in the demand portion of the analysis. Here are the two demographic tables used in the analysis:

TABLE 7.2 Collier County Demographic and Income Profile

TABLE 7.3 Market Area Demographic and Income Profile

esri Demographic and Income Profile

11760 Tamiami Trl E, Naples, Florida, 34113
3-Mile Radius

Prepared by Esri

	Census 2010		2023		2028	
Population by Age	Number	Percent	Number	Percent	Number	Percent
0 - 4	1,467	5.6%	1,516	4.4%	1,579	4.3%
5 - 9	1,426	5.4%	1,613	4.7%	1,605	4.4%
10 - 14	1,290	4.9%	1,595	4.7%	1,743	4.8%
15 - 19	1,359	5.2%	1,458	4.3%	1,543	4.2%
20 - 24	1,146	4.4%	1,282	3.7%	1,279	3.5%
25 - 34	2,574	9.8%	3,121	9.1%	2,788	7.6%
35 - 44	2,597	9.9%	3,151	9.2%	3,575	9.8%
45 - 54	2,827	10.7%	3,289	9.6%	3,396	9.3%
55 - 64	3,517	13.4%	4,758	13.9%	4,814	13.1%
65 - 74	4,346	16.5%	6,523	19.1%	6,933	18.9%
75 - 84	2,851	10.8%	4,437	13.0%	5,583	15.2%
85+	912	3.5%	1,461	4.3%	1,819	5.0%
Total 15+ Population			29,480		31,730	

Using the demographic information above, the Consultant then estimated the population for 2033 based on the growth between 2023 and 2028. The Consultant also estimated the number of registered cars in the County for 2028 and 2033 and the market area based on the current (2024) cars per person (1.03) in the County. The reason for looking out to

2033 provides for a future analysis of the demand and supply for a full-service car wash if needed to accommodate the future growth of the market area. The revised supply/demand analysis is shown in Table 7.4.

TABLE 7.4 Market Area Demographic and Income Profile

	2023	2028	2033
Total Cars in Collier County (FLHSMV 3/3/24)	348,718	361,102	373,485
Collier Population 15+ (Table 7.2)	339,888	351,958	364,028
Cars per Person 15+	1.03	1.03	1.03
Market Area Population 15+ (Table 7.3)	29,480	31,730	33,980
Cars in Market Area	30,246	32,554	34,863
Percent of Cars Washed	66.0%	66.0%	66.0%
Times per month	1	1	1
Times per Year	12	12	12
Total Potential Car Washes	239,547	257,830	276,113
Average Car Wash customers per Year (Appendix C)	45,750	45,750	45,750
Number of Market Area Car Wash Businesses Required	5.24	5.64	6.04

= Estimated based on 2024 FLHSMV cars per person
= Estimated based on 2023-2028 population growth

Table 7.4 shows that currently there is a need for one (1) car wash in the market area as there is a demand for 5.24 car wash facilities in the market area while there are five (5) existing car wash facilities serving that demand. Looking out to the horizon year of 2033, the demand requires another full-service car wash facility.

6) 9.0, Potential C-4 and C-5 Sites and PUDs – 1) The Downtowner Car Wash (a competitor, pg. 15) is not adjacent or connected to a fuel station and is approximately 3 miles from the proposed car wash. Additionally, there are other car washes throughout the county (e.g., Luv-A-Wash on Pine Ridge Rd. and Auto Spa Naples on the N. Tamiami Trail) that are not adjacent to fuel stations. Please explain in detail why a car wash would not be suitable on a property within the market area that is currently zoned C-4 and not adjacent to a fuel station. 2) Also, please explain in detail, if known or anticipated, the impact that this proposed car wash will have on the other 5 car washes currently operating within the same 3-mile radius (market area) – i.e., market share reallocation, if any.

Response:

1.) The report does not specifically address the requirement for a car wash facility to be located adjacent to a fuel station. The location of a car wash facility next to or a part of a fuel station is synergistic but not an absolute requirement.

2.) ***Markets are efficient in terms of supply and demand. The supply always rises to meet demand (new facilities) or will decrease if there is an over supply (facilities closing or changing use). In the case of this market area, there is a demand for one additional car was facility by the horizon year of 2033. The current demand is just over available supply, so it is being absorbed by the existing facilities.***

A new car wash facility will absorb most of the future growth and will take away a portion of the existing facilities' demand. However, that demand will be filled by the growth around the existing facility that won't be accommodated by the new facility most likely due to geographic distances. The market will again be in equilibrium.

2. Exhibit IV.B:
   1) Barefoot Williams Commercial Subdistrict text, Pg. 2, 1st Paragraph – Revise to state that Barefoot Williams Road is approximately 350 feet "*East*"…
   2) Subdistrict text, Pg. 3, b.1. – Remove "and by conditional use" to make the text/uses consistent with the proposed rezone petition.

Response: Revised as requested.

3. The rezone petition and GMPA petition include LDC deviations for side yard setbacks, LBEs, and landscape islands. Please provide justification for these reductions and provide a typical site plan with the proposed uses (car wash and fast food), setbacks, and LBEs, so staff can evaluate the on-site traffic circulation.

Response: Please see the companion Rezone Application - Response Letter Supplement document. This document details the conditions of approval and if the proposed standards deviate from the LDC requirements, are derived from the draft US 41 EZO LDC Amendments, or if it is a design standard that exceeds the minimum LDC requirements. A detailed concept plan (Potential Development Scenario) is also included to demonstrate the vehicular flow of the site.

COUNTY ATTORNEY REVIEW – HEIDI ASHTON-CICKO
Review #3

1. GMP text: First paragraph, line 5: Please replace "Intermediate Commercial District" with "Commercial Intermediate District." 3-12-24 UPDATE: Please capitalize the first letter in each word in "Commercial Intermediate."

Response: Revised as requested.

2. GMP text: p. 3 of 4. Subparagraph c.2 a). There is no residentially zoned property adjacent to the side yard of the subject property. To the west is Racetrac. To the east is the proposed Home Depot PUD.

   Response: The language related to a side yard setback adjacent to residentially zoned property has been removed. This subparagraph now only references a side yard setback when adjacent to commercially zoned property.

3. GMP text: p. 3 of 4. Subparagraph c.2 b). Where will the sound barrier be located? To the rear?

   Response: Yes, the sound barrier will be located along the rear of the property. The GMP text has been revised to clarify the location.

GENERAL COMMENTS – MICHELE MOSCA

1. Please be advised that pursuant to the LDC, a petition can be considered closed if there has been no activity on the petition for a period of six (6) months. In addition, a GMP Amendment application that is a companion item can likewise be considered closed. That six-month period will be calculated from the date of this letter.
2. Additional comments or stipulations may be forthcoming once a sufficient petition has been submitted for review. This correspondence should not be construed as a position of support or non-support for any issues within the petition. Staff will analyze the petition and the recommendation will be contained in the staff report prepared for the Collier County Planning Commission (CCPC) or Hearing Examiner (HEX).
3. Please ensure that all members of your team that may testify before the HEX or CCPC and the Board of County Commissioners (BCC) are registered as lobbyists with the County pursuant to the regulations regarding that issue.
4. When addressing review comments, please provide a cover letter outlining your response to each comment. Include a response to all comments.
5. Please put revised dates on all exhibits and in the title block of all Plans. The PUD document should include a footer that reflects the project name, petition number, date and page X of Y for the entire document. Documents without this information will be rejected.
6. A partial resubmittal cannot be accepted; please do not resubmit until you can respond to ALL review comments.
7. Public hearings cannot be held until the Neighborhood Information Meeting (NIM) criteria has been met. In some petition types a NIM must be held while other petition types only require the agent to send a letter. All letters and newspaper ads must be pre-approved by

the county planner. For additional information about the process please contact me. Please note that the NIM must be held at least 15 days prior to the first hearing. As you prepare for that meeting, please be aware of the following items:

a) Please provide the required NIM notice affidavit and its attachments prior to the meeting (in compliance with the LDC); and
b) Please post signs to direct attendees to the exact meeting location; and
c) Please ensure that there is sound amplification equipment available and working for this meeting. If there is no permanent equipment, please bring a tested/working portable microphone; and
d) You must provide a written synopsis of the meeting that includes a list of all questions and answers as well as providing the audio/video tape; and
e) Please prepare documents for hand out to all NIM attendees and the public hearing file, that show the differences in the uses that would be allowed in the existing and proposed zoning districts. This request is based upon recent CCPC direction.

8. Pursuant to F.S. 125.022, exhibits and application materials are subject to review upon each resubmittal until deemed sufficient and complete. Should the project receive a third request for additional information, staff requests that the applicant provide written acknowledgement with the resubmittal to waive the regulation that restricts the County from requesting additional information. Projects that do not include such written acknowledgement and that fail to address any outstanding review items with the 4th submittal will be denied/recommended for denial.
9. Note the adopted fee schedule requires payment of additional fees for petition review upon the 5th and subsequent submittals; please contact the appropriate staff and resolve issues to avoid this fee.
10. If you would like to discuss the review comments, require clarification and/or wish to identify agree-to-disagree issues, a post-review meeting can be arranged including all rejecting reviewers. To schedule a post-review meeting, please contact me, and Zoning Operations staff will proceed with scheduling.

Response: Acknowledged.

Neighborhood Information Meeting (NIM) Documents

Hosting a Neighborhood Information Meeting (NIM) is required for this application type. To resolve this condition, please upload all supporting NIM documents from meeting to the GMD Public Portal. Contact Planner of this project for additional questions. If you experience issues uploading, please contact Client Services at 239-252-1036.

Response: A NIM has been held for this application.

We enclose the following:

- One (1) copy of Response Letter (this is the Response Letter);
- One (1) copy of Exhibit "IV.B.1" – Proposed GMPA Amendment Language (revised); and
- One (1) copy of Exhibit "IV.B.1" – Proposed GMPA Amendment Language (redlined).

If you have any questions, please don't hesitate to contact me.

Very truly yours,

Ellen Summers/sek

Ree-i.com

1.0 Background

11760 Property LLC ("Applicant") is proposing a site-specific, less than 5,000 square-foot car wash facility on a 1.92-acre parcel (the "Subject Site") located on the south side of East Tamiami Trail approximately 1.2-miles west of Collier Boulevard (CR 951) in Collier County, Florida ("County"). The Subject Site is currently vacant.

The Applicant is submitting a Small-Scale Collier County Comprehensive Plan ("Comprehensive Plan") amendment ("SSGMPA") for the parcel to change the designation from C-3 to C-4 to accommodate a car wash facility under 5,000 square feet.

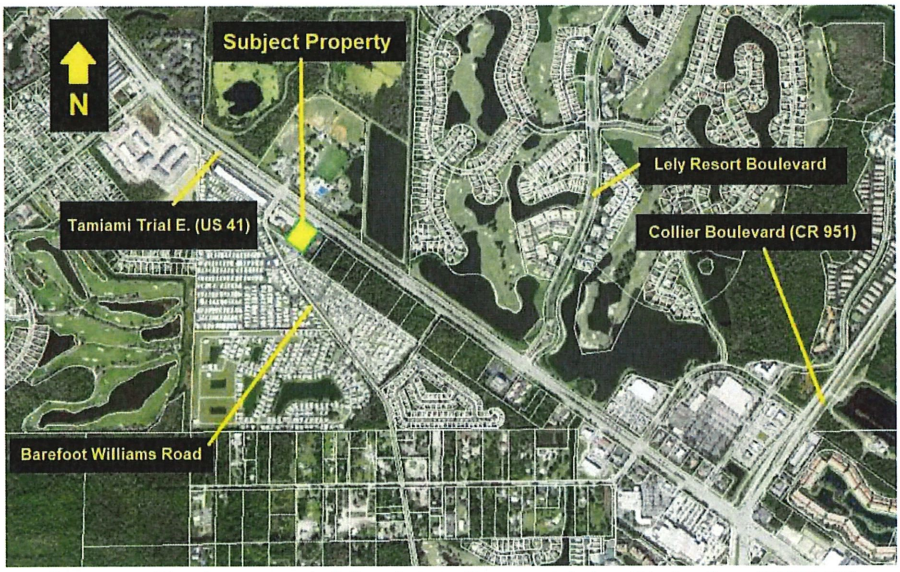
This is a request to rezone the subject site from the C-3 Zoning District to the C-4 Zoning District. The request to rezone to the C-4 Zoning District Use is limited to a single use: a car wash facility. The rezone will also allow the full range of C-3 uses (as current C-3 zoning allows). A companion SSGMPA has also been submitted to permit the desired uses and to establish the maximum allowed intensity (square feet).

2.0 Site Analysis

The Subject Site is a proposed development located on the south side of US 41 ("Tamiami Trail East") between Barefoot Williams Road and Habitat Drive, west of Collier Boulevard in Section 33, Township 50 South, Range 26 East, in Collier County Florida. The Subject Site is approximately 1.36 miles west of C.R. 951 ("Collier Boulevard").

Figure 2.1 below shows the geographical location of the Subject Site in relation to its surrounding area.

Figure 2.1 Subject Site Location Map



Source: Environmental Systems Research Institute, Inc ("ESRI")

There is an existing interconnection between the subject parcel and the existing RaceTrac gas station to the west. The gas station and the Subject site are connected by a service road that enters and exits onto Tamiami Trail East.

The Subject Site fronts Tamiami Trail East which is a six-lane divided roadway. It is an Access Class 3 with a 50-mph posted speed limit and design speed. The access to Tamiami Trail East is an existing right-in / right-out access with turn lane on to the service road mentioned above.

The Consultant relied on Trebilcock Consulting Solutions ("Traffic Engineer") to determine the potential amount of traffic on Tamiami Trail East that would possibly be passing the Subject Site during business hours. The Traffic Engineer noted it its study for the Subject Site that the Institute of Traffic Engineers ('ITE") does not have pass-by rates for a car wash. Trips are expected to use the business on their way to a primary destination, but conservatively car wash pass-by is not considered.

The Consultant reviewed the hours of operation for the three full-service car wash establishments in the Market Area as defined in Section 4.0 on Page 4. The average hours of operation for the Subject Site would be 8 a.m. to 6 p.m. equating to 10 hours daily. 2022 The Collier County Annual Update and Inventory Report ("AUIR") background traffic volume for this section of Tamiami Trail East is 2,100 hourly trips.

Multiplying the average daily hours of operation by the AUIA background trips shows that daily pass-by trips could be 21,000 as shown in Table 2.1 below.

Table 7.1 Subject Site Potential Pass-By Trips

Daily Operating Hours	Tamiami Trail East Hourly Trips	Potential Pass-By Trips
10	2,100	21,000

Source: 2022 Collier County AUIR, Table 4 of TIS Report, page 10, Trebilcock Consulting Solutions.

3.0 General Car Wash Market Studies & Statistics

For many Americans, their car, SUV or pick-up truck is the second-most expensive item (after a house) that they will purchase and maintaining that investment on wheels is paramount. And because many see their cars as an extension of their personality, maintaining an image by keeping their cars clean also matters.

While some may cherish pulling out a hose, wash mitt and soap to give their "baby" a customized shine, others opt for a more convenient ritual: trips to the local car wash.

According to the 2019 County Business Patterns program, there were 16,976 Car Washes with paid employees in the United States, 6.8% or 1,074 more than in 2015.[1]

These businesses had 163,178 workers (up from 153,970 in 2015) who earned an average annual salary of $21,911 (up from $18,703 in 2015).

California, the state with the largest population and a legendary love of the automobile, not surprisingly ranked first in the number of car washes and car wash employees in 2019 (2,025 and 24,851, respectively).

But Florida added the most car washes — 225 or 21.1% — from 2015 to 2019. The District of Columbia saw the highest percentage increase in the number of car washes, up 30.0%, from 10 to 13 during the same period.

According to Richard Peysakhovich from One Desk (Appendix A, Page 21), 66% of U.S. car owners will get their cars washed from 1 to 2 times a month. He also points out that 8 million cars get washed every day in car washes and there are 276-million cars registered in U.S. That equates to just under 3% of the registered vehicles in the United States are washed every day. There are also 9,000 full-service car washes in the United States.

In the January 2023 edition of Motor and Wheels (Appendix B, Page 40), writer Peter Jones highlighted the following statistics about car washes:

- Approximately 65% of car wash facilities in the U.S. serve as fuel dispensers.
- Target age of users is 35 to 55 with more than half being women.
- Use of professional car wash facilities has increased 29% from 1994 to 2019.
- The average price of a car wash in the U.S. is $15.

The State of Florida is one of the leading states in the growth of the car wash industry. In the January 18, 2023 edition of Florida Weekly, explained the Mark Wozniak of Florida Weekly succinctly explained the rapid growth of the car wash industry in Florida.

"A host of circumstances have come together to fuel the rapid rise. Experts cite profitability, private equity firms pouring money into the market, technological advances, lower labor costs, ability to use point of sales tracking, convenience, increases in car wash subscription memberships and market fragmentation.

---

[1] *https://www.census.gov/library/stories.html?tagfilter_List_1688678669=Census:Topic/business-economy#List_1688678669*

"The number of car washes nationwide are growing at a pace faster than I've ever seen before," said Harry Caruso, founder of Car Wash Advisory, based in Miami, a firm that focuses exclusively on selling car washes nationally. "Florida is the hotbed and where everybody wants to be, with a couple of other select geographies."

Florida is the third largest car wash state, with 5,555 car washes, just behind Texas and California, according to IBISWorld, a global industry research firm.

An IBISWorld report says the Florida car wash business is a $904 million industry, employing 14,600 workers. Nationwide, the report says, the market size is $15 billion, with employment of about 212,260.

The state's population growth is part of the increase, but it's more than that, said Eric Wulf, CEO of International Carwash Association, a nonprofit that represents the car wash industry, with members in all 50 states and more than a dozen countries.

"I mean, the demand for car wash services has outstripped population growth," he said. Another way to look at it is, if there are 20% more cars on the road than there were 20 years ago, car washing should be up 20%, he said. "And I can tell you it's growing faster than that."

One reason is "the American consumer has gone from a do-it- myself to a do-it-for-me kind of an economy," he said. "I remember washing my car with my dad in our driveway, and people just don't do that anymore. They don't take the time for it."

Time is the most valuable commodity now for people, he said. "So, the convenience and the quality that car washes offer has made them much more attractive."

Commercial car washes today use less than half of the fresh water you use when you wash your car at home or at outdated car washes, depending on the type of car wash, Earth 911 says. Washing your car in your driveway uses about 100 gallons of water. A regular tunnel car wash uses about 30 gallons per vehicle."

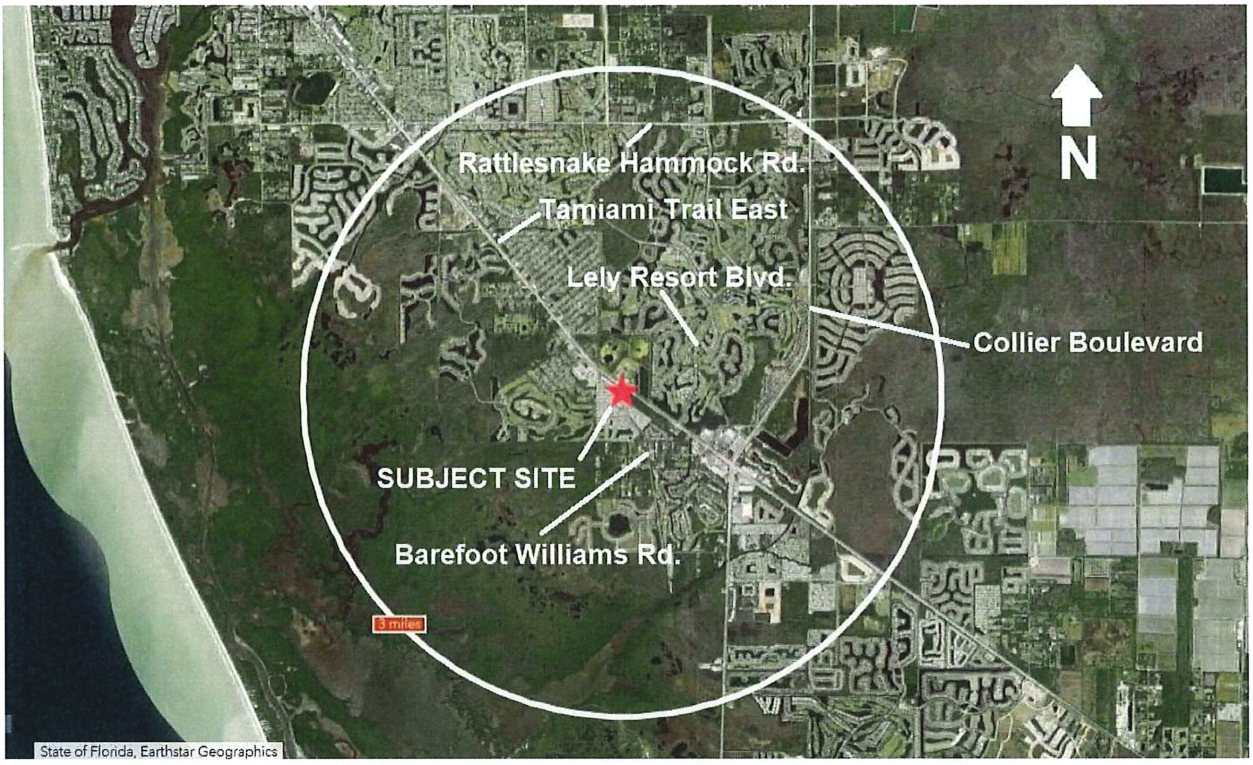
All statistics and indicators along with the continued Florida population growth point to a continued expansion of the car wash market both state wide and locally.

4.0 Market Area Definition

The Consultant basically triangulated the three full-service car wash establishments to determine the market area. Two of the three comparable full-service car wash facilities are three miles to the west and north of the Subject Site. Therefore, a three-mile radius ("Market Area") is being used to determine the market area demographics, analyze competitive car wash establishments and identify potential real estate parcels that could conceivably have a car wash establishment on its site.

Figure 4.1 below shows the Subject Site's Market Area.

Figure 4.1 Subject Site's Market Area.



Source: Environmental Systems Research Institute, Inc ("ESRI")

5.0 Market Demographics

Table 5.1 and 5.2 on the next two (2) pages provide the demographic and income profile for the Market Area.

Some of the highlights include:

- Current population is 34,040 and is expected to increase to 36,496 over the next five years.
- The median age is 55.2 years old.
- The median household income is $66,881, the average household income is $104,569 and the per capita income is $48,151.
- The female population of 17,243 is larger than the male population of 16,797.

5.1 Car Wash Consumer Demographics

As mentioned earlier in this report, Pete Jones in the January 2, 2023 edition of Motor and Wheels (Appendix B, Page 40) presented demographics on American car wash consumers and workforce. The demographics are listed below along with how the Market Area demographics in Tables 5.1 and 5.2 align with the national car wash demographics.

- The target age for customers is between 35 and 55, with more than half being women.
    - Market Area demographics show that 7,900 or 19% of the population fall in this age range.
    - Overall, Market Area demographics show that 51% of the population is women.

- Women in the Market Area target age range make up 19% of the total women in the Market Area.

- The most common ethnicity of car washers is Caucasian (55.2%).
  - 67% of the Market Area population is Caucasian.
- Hispanic or Latino individuals make up 19.8% of car washers.
  - 24.5% of the Market Area population is Hispanic or Latino.
- About 5.7% of car washers are considered Unknown ethnicity.
  - 7.9% of the Market Area population is of Unknown ethnicity.

- Educationally, 64% have a high school diploma.
    - 25.5% of the Market Area population has a high school diploma.
- 12% possess a diploma, potentially indicating vocational education or some college experience.
    - 23.5% of the Market Area population has a GED or some college.
- 9% hold an associate degree; 9% have a bachelor's degree.
    - 7.8% of the Market Area population has a high school diploma and 22.3% has a bachelor's degree.
- 6% of car washers have other types of degrees or educational qualifications.
    - 13.6% of the Market Area population has other types of degrees or educational qualifications.

5.2 Car Wash Employees

There is no local demographic information on car wash employees but nationally:

- Male car cleaners, however, make up a significant portion at 81.6%, while women account for 18.4% of the workforce in the industry.
- Black or African American individuals constitute 13.8% of car wash workers.

6.0 Market Area Automotive Demographics

The U.S. Census collects data on automotive aftermarket expenditures during its survey. This data is important as it identifies annual automobile expenses including vehicle cleaning services including car washes. Tabel 6.0 on the next page shows the Market Area automotive aftermarket expenditures. The population in the market area annually spends $32.17 per car on cleaning services.

Auto Service Clubs & GPS Services	110	$48.57	$762,278

Data Note: The Spending Potential Index (SPI) is household-based, and represents the amount spent for a product or service relative to a national average of 100.
Source: Esri forecasts for 2023 and 2028; Consumer Spending data are derived from the 2019 and 2020 Consumer Expenditure Surveys, Bureau of Labor Statistics.

Source: Environmental Systems Research Institute, Inc ("ESRI"), U.S. Census Bureau

- Consumers spend $5.8 billion annually on car wash services, and each car wash has about 20,000 clients annually.
    - The Market Area population spends just over a half million ($504,907) on vehicle cleaning services including car washes.

7.0 DEMAND

Calculating the demand for a car wash is multi-step process using the best available data. The calculation steps include determining the total number of cars in the Market Area, the total potential car wash episodes in the Market Area then dividing the total potential car wash episodes by the average car wash customers per year at a car wash facility to determine the number of car wash facilities needed in the Market Area.

The first step in calculating car wash demand is to determine the number of licensed drivers in the County. The Florida Department of Highway Safety and Motor Vehicles indicates that there are 347,311 licensed drivers in the County as shown in Table 7.1 below.

Table 7.1 Florida Licensed Drivers by County, Sex, and Age Group as of February, 2023

County	Gender	Grand Total
Collier	Total	347,311
	Female	175,150
	Male	172,161

Source: Florida Department of Highway Safety and Motor Vehicles

In order to calibrate the number of total licensed drivers to the number of vehicles per 1,000 population, the total licensed drivers in the County (347,311) is divided by 1,000 resulting in 347.31 licensed drivers per 1,000 population.

The next step is to determine the number of registered vehicles per 1,000 population. Forbes Advisor in its August 23, 2023 edition says that there are 1,169.72 vehicles per 1,000 population in the County as shown in Table 7.2 on the next page.

Forbes ADVISOR

Source: Forbes Advisor, Car Ownership, August 24, 2023

Multiplying the number of licensed drivers per 1,000 licensed drivers (347.31) by the number of registered motor vehicles in the County per 1,000 licensed drivers (1,169.72) results in the 406,257 registered vehicles in the County.

Table 7.2 on the next page indicates that there are 339,888 people in the County over 15+ that have the potential to have a driver's license.

Dividing the total number of cars in the County (406,257) by the number of potential driver's licenses (339,888) results in 1.20 cars per population over 15+ in the County.

The next step in the calculation is to determine the number of 15+ population in the Market Area. Table 7.3 below indicates that there are 29,480 people in the 15+ age category in the Market Area.

Multiplying 1.2 cars per person by the number of people 15+ in the Market Area (29,480) results in a total of 35,236 cars in the Market Area.

According to Richard Peysakhovich from One Desk (Appendix A, Page 21), 66% of U.S. car owners will get their cars washed from 1 to 2 times a month as noted earlier in this study. Multiplying the number of cars in the Market Area by 66% results in 23,255.76 of the cars in the Market Area being washed 1 to 2 times per month.

The Consultant was conservative and used one (1) time per month for each of the washed cars in the Market Area. That equates to 12 times per year. Multiplying the 23,256 cars by 12 indicates that there are 279,073 annual potential car wash episodes in the Market Area.

According to Statistic Brain (Appendix C, Page 50) the average annual number of car washes for a single operation tunnel car wash facility is 45,750 (averaging 125 car washes per day). Dividing the total potential car washes in the Market Area (279,073) by the average annual number of car washes for a single operation tunnel car wash facility (45,750) results in 6.10 car wash facilities needed to satisfy the demand for car washes in the Market Area. Table 7.4 shows the demand calculation steps.

Table 7.4 Demand for Market Area Car Wash Facilities

Collier County Total Licenses (Table 7.1)	347,311

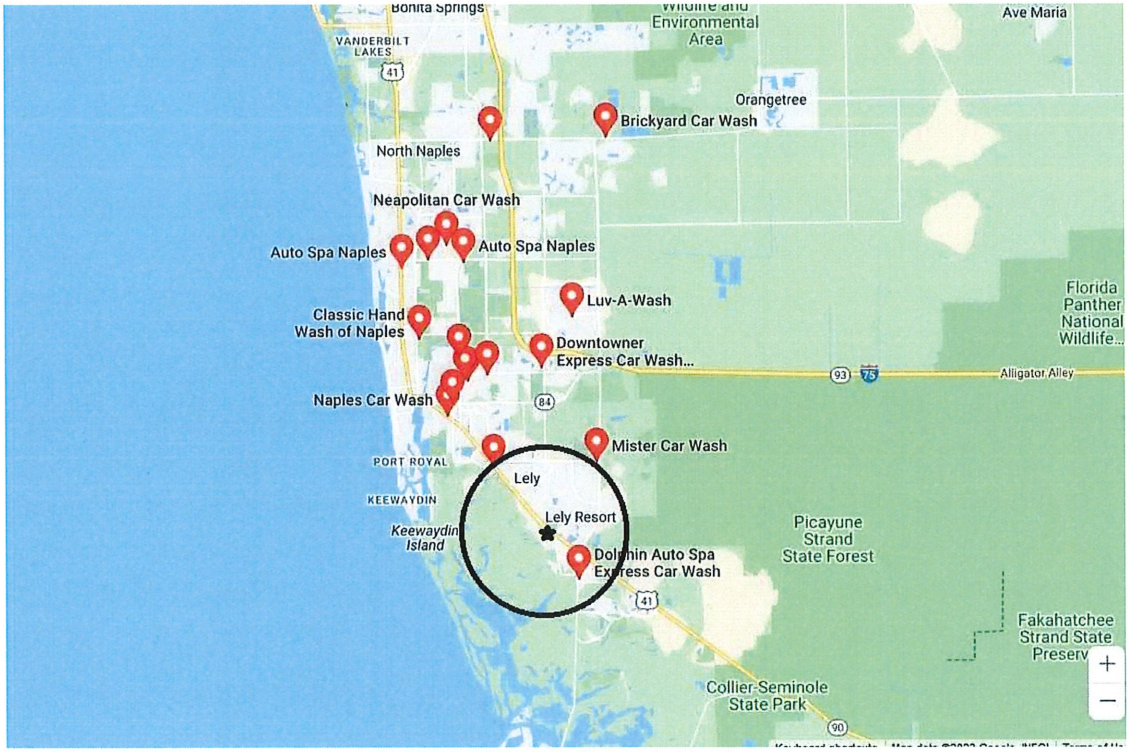
8.0 Supple - Competing Car Wash Facilities

The overall number of car wash facilities in the County is shown in Figure 8.1 below. This map doesn't account for all of the car wash facilities since it doesn't include the self-wash or the car wash facilities connected with fuel stations. The vast concentration of car wash facilities is located in the west central area of the County where most of the County population is located.

The Subject Site's Market Area is shown in the black circle. This map only shows three car washes in the market area with two located on the extreme fringes of the Market Area.

Figure 8.1 Collier County Car Wash Facilities



Source: Google Search Engine

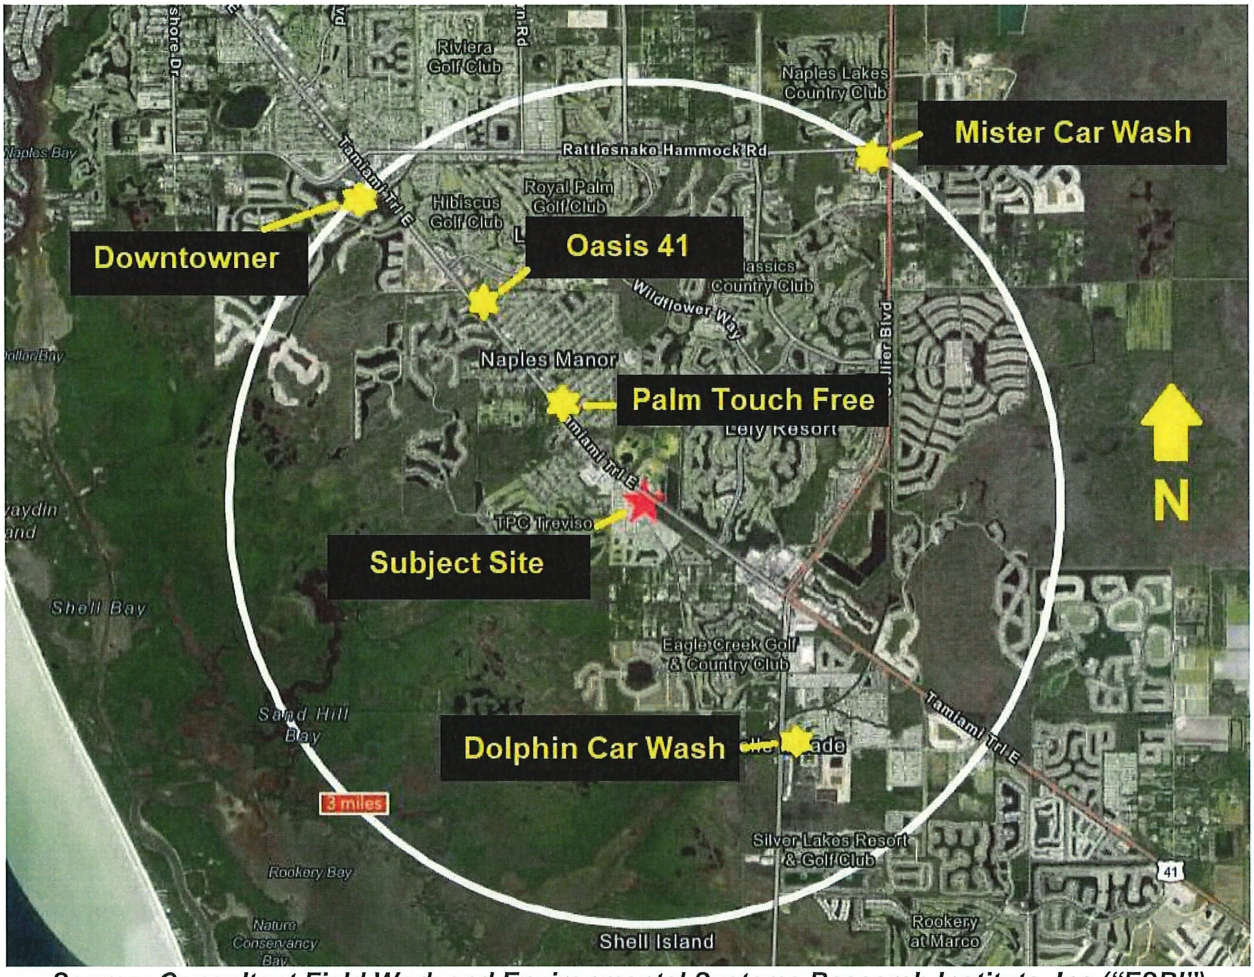
As noted previously there are three car wash facilities located within the Subject Site's Market Area. Further investigation discovered two additional comparable (single tunnel) car wash facilities located along the north side of Tamiami Trail East and to the west of the Subject Site.

The three main competitors are the Downtowner Car Wash near the intersection of Rattlesnake Hammock Road and Tamiami Trail East, the Mister Car Wash on Rattlesnake Hammock Road just west of Collier Boulevard and the Dolphin Car Wash on Collier Boulevard just south of the Tamiami Trail East intersection. Those three car wash facilities are single tunnel full-service types and the Downtowner also has self-service available.

The Oasis 41 car wash facility is a full- and self-service facility that is connected to a fuel station and a few eateries. The Palm Touch Free is a single tunnel touch free self- service car wash along with an adjacent self-service facility consisting of five (5) bays.

Figure 8.2 below shows the location of the competing car wash facilities in the Market Area as they geographically relate to the Subject Site. The list of Market Area Car Wash Facilities is located in Appendix D, Page 52.

Figure 8.2 Subject Site Market Area Car Wash Facilities

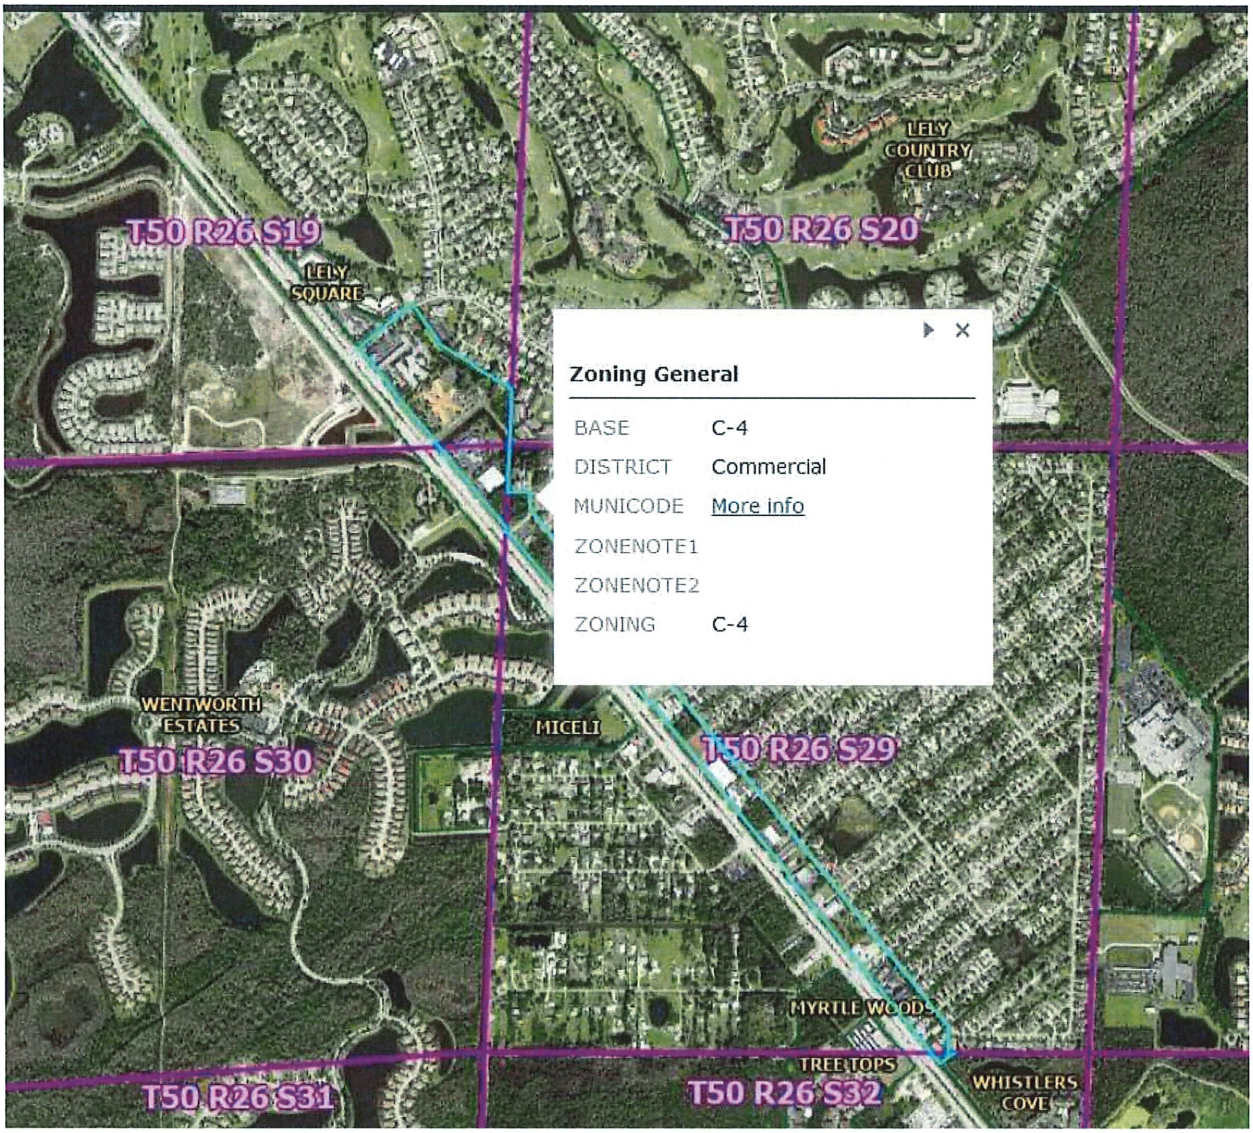


Source: Consultant Field Work and Environmental Systems Research Institute, Inc ("ESRI")

9.0 Potential C-4 & C-5 Sites and PUDs

There are a number of sites along Tamiami Trail East that are zoned C-4 and located to the west of the Subject Site. Figure 9.1 below shows the location of the C-4 sites on the north side of Tamiami Trail East. There are 10 vacant commercial sites located in this C-4 commercial sector. There are already two (2) car wash facilities in this C-4 corridor so it would be unlikely that another car wash facility would open here unless it was connected to a fuel station.

Figure 9.1 Sites Zoned C-4 on North Side of Tamiami Trail East

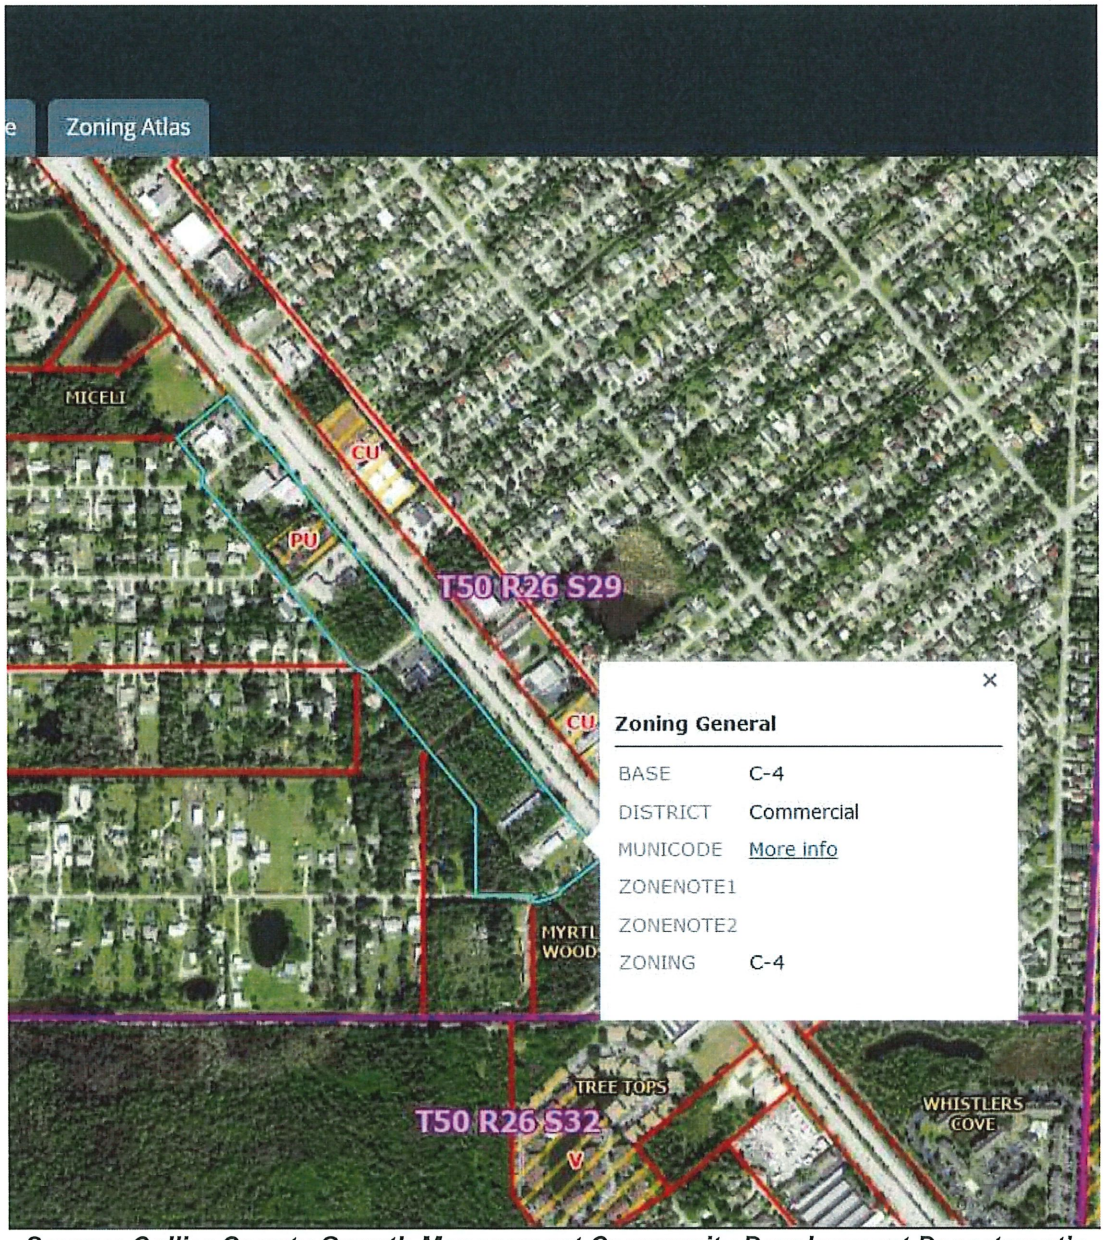


Source: Collier County Growth Management Community Development Department's Planning and Zoning website

Figure 9.2 below shows the location of the C-4 sites on the south side of Tamiami Trail East. There are six (6) vacant commercial sites located in this C-4 commercial sector. All six sites are already zoned to accommodate a car wash facility but again it is unlikely since there are already two (2) car wash facilities located in that vicinity on the north side of Tamiami Trail North.

Appendix E on Page 57 lists the vacant commercial sites that are currently zoned C-4.

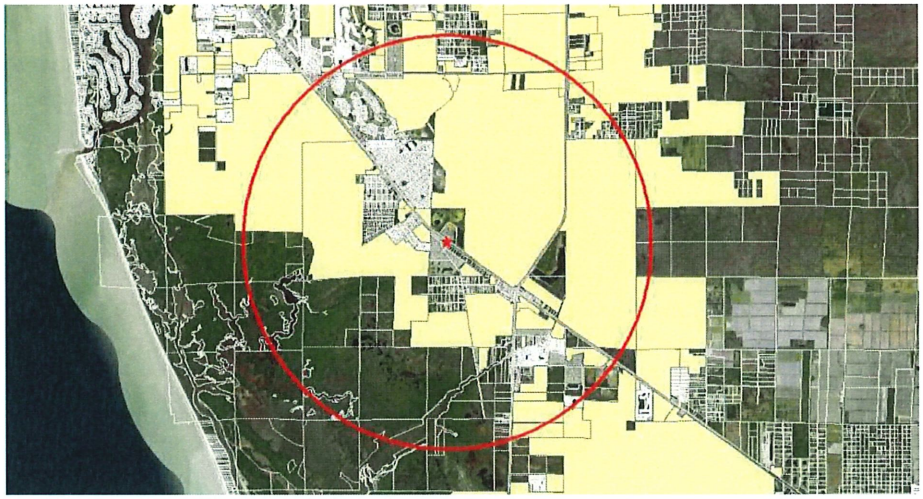
Figure 9.2 Sites Zoned C-4 on South Side of Tamiami Trail East



Source: Collier County Growth Management Community Development Department's Planning and Zoning website

There are also a number of Planned Unit Developments ("PUDs") that have a portion of their boundaries within the Market Area. Figure 9.3 below shows where those PUDs are located.

Figure 9.3 Planned Unit Developments located in Market Area



Source: Collier County Growth Management Community Development Department's Planned Unit Development shapefile, Environmental Systems Research Institute, Inc ("ESRI") and the Consultant

The Consultant and Project Engineering Firm researched the PUDs shown in Figure 9.3 listed in Appendix F on Page 62 and found that none of the PUDs have C-4 zoning in their land within the Market Area.

10.0 Conclusion

The demand for car wash facilities is growing nationally as automobile owners shift from a do-it- myself to a do-it-for-me kind of an economy. The shift in the economy along with the continued population growth in Florida and Collier County are providing a strong need for future car was facilities.

Table 7.4 on Page 14 calculates that currently there is a demand for 6.10 car wash facilities in the Market Area. And Figure 8.2 on Page 16 shows that there five (5) car wash facilities already operating in the Market Area.

Table 7.4 Demand for Market Area Car Wash Facilities

Demand (Table 7.4)	6.1
Supply (Figure 8.2)	5.0
Supply Deficit	-1.1

The demand/supply calculation in Table 10.1 on the previous page indicates that there is enough demand to support another car wash facility in the Market Area. The Subject Site is strategically and ideally located to accommodate the additional demand and equally distanced from the other three (3) major and independent car wash facilities in the Market Area.

49+ Car Wash Industry Statistics

by Roman Peysakhovich · August 12th, 2022

66% of car owners that live in the U.S. will get their vehicle washed anywhere from one to two times every month.

Here you'll find new car wash statistics related to:

- How often Americans get their cars washed
- How many car washes are in the US
- Car wash industry revenue, size, & growth
- How profitable is a car wash
- And a whole lot more

Let's dive right in.

Key Car Wash Statistics and Trends:

1. **66% of car owners that live in the U.S.** will get their vehicle washed anywhere from one to two times every month.
2. The car wash industry generated **$5.8 billion** in revenue in 2021.
3. The car wash industry is worth **$13.1 billion** in 2021.
4. **8 million** cars get washed every day in car washes.

5. There are **113,000** car wash establishments globally in 2021.
6. Roughly **38 gallons** of water are used each time a single car is washed.
7. **304 million gallons** of water are used for car washes per day, globally.
8. With a whopping **$1.6 billion in revenue**, California is the leading state in the United States when it comes to the revenue received from all types of car washes.
9. **32% of all car wash revenue** comes from vehicles being washed in winter, 25% comes from the sprint and summer months, and 18% comes from washes in the fall.
10. A smaller car wash can have **an annual profit of $55,000 to $100,000 per year** for a self-service car wash.
11. Self-serve car washes do not make as much money as tunnel car washes or in-bay automatic car washes, but **they can still generate up to $41,000 a year on average**.
12. **The average profit margin per car is approximately 29%**, which for the average $15 ticket is $4.35.
13. **Most cars on average last for 12 years**, which has changed over the years. However, this is just an average because **some cars can last up to 20 years** if they are properly maintained.

CHAPTER 1

Car Wash Industry Statistics

The car wash industry is growing rapidly because of the need and want for cleaner vehicles. This is a growing industry, and here are some of the car wash industry statistics that might shock you as a consumer, car wash employee or owner.

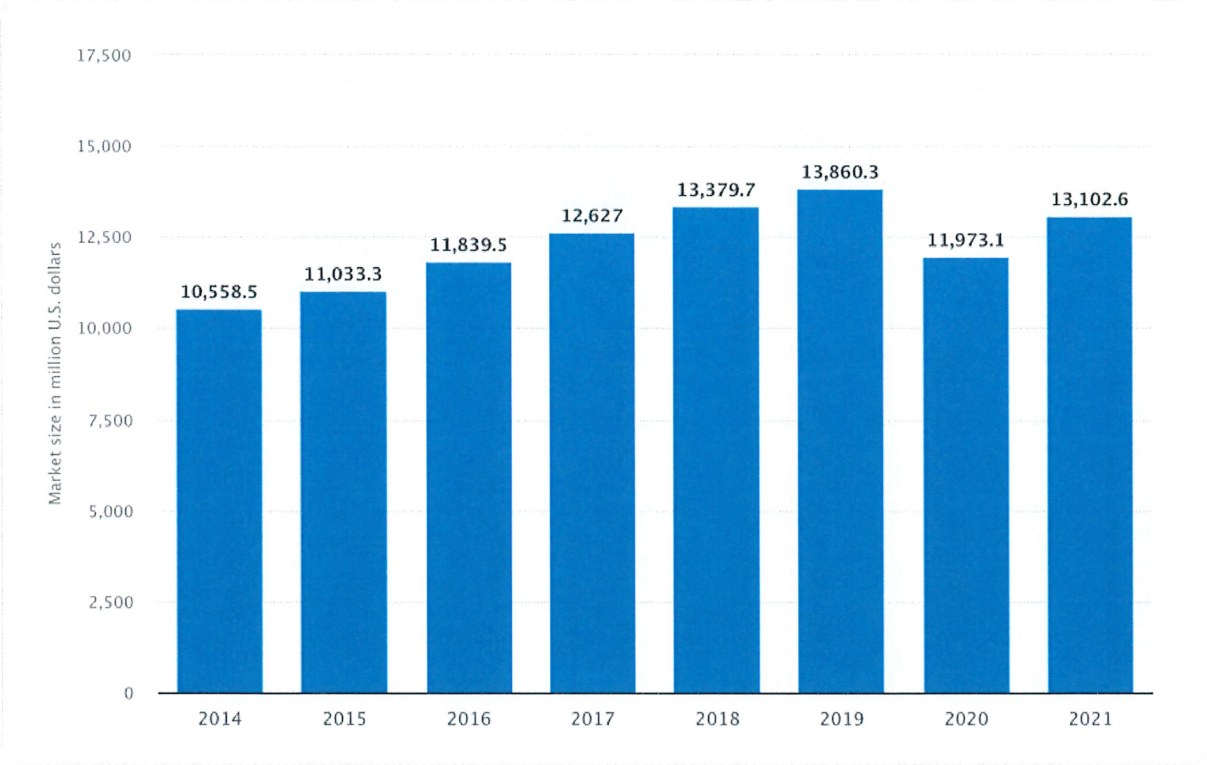
Overview Of The Car Wash Industry

Industry	Car Wash
Market Size in 2021	$13.1 billion
Revenue in 2021	$5.8 billion
2020-2028 Growth Rate	3.8%
Number Of Car Washes Globally	113,000
Revenue forecast in 2028	$37.6 billion

The car wash industry generated $5.8 billion in revenue in 2021.

Revenue	Amount (USD)
2021 Revenue	$5.8 billion
2021 Annual Revenue Including Gas Purchases	$48 billion

The car wash industry is worth $13.1 billion in 2021.



How many cars do car washes wash a day?

In the United States, approximately 8 million vehicles are washed at car washes every day.

This number has increased over the years, as more people have grown to prefer having their vehicles washed professionally instead of taking the time to do it at home.

How many car washes are there?

There are **113,000** car wash establishments globally in 2021.

Number Of Car Washes Globally	113,000
Number Of Car Washes In The USA	16,000
Number of full-service carwashes	9,000
Number of exterior conveyor washes	10,500

Number of self-serve car washes	36,500

How many times per month do Americans get their car washed?

In the United States, around 66% of car owners will get their vehicle washed anywhere from one to two times every month, depending on the various factors.

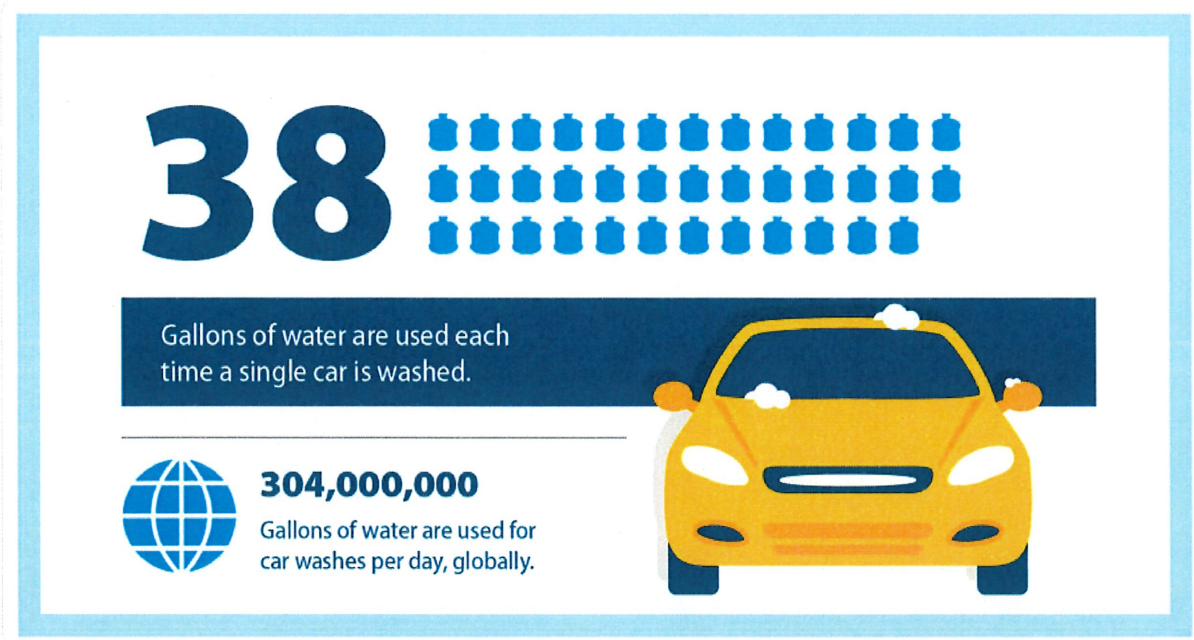
Approximately 66% of car owners that live in the U.S. will get their vehicle washed one to two times every month.

Source: Onedesk

onedesk

However, the answer to this question can vary based on where someone lives and the type of terrain that people are forced to drive on regularly.

Roughly 38 gallons of water are used each time a single car is washed.



304 million gallons of water are used for car washes per day, globally.

What U.S. state has the most car washes?

California has the highest number of car washing businesses available for citizens when it comes to car washes in the United States.

Less than 2 years ago, the total car wash sales from California were approximately $1.6 billion, and that is projected to increase in the next few years.

With a whopping $1.6 billion in revenue, California is the leading state in the U.S. when it comes to the revenue received from car washes.

Source: Onedesk

onedesk

However, based on population size, the District of Columbia actually had a higher average sales than California.

There are 350,000 car wash employees globally in 2021.

What is the car wash service market growth?

Overall, the car wash service market has been increasing over the last few years by approximately 3%, and it is expected to continue growing at this rate until 2028.

However, this is an estimate. It could be higher or slightly lower from year to year, but it is still expected to grow.

How competitive is the car wash industry?

The car wash industry is a very competitive market. Unlike with other industries, this market is capable of making way for smaller businesses that want to get in on the industry because it isn't controlled by a single or small larger group of businesses.

This makes it easier for smaller businesses to get on the ground floor of the industry without being taken over. It is also competitive because there are other services that you can offer at a car wash that can increase your customer count on a regular basis, like auto-detailing.

In order to be successful in this type of business, there are various things that you need to consider before opening up.

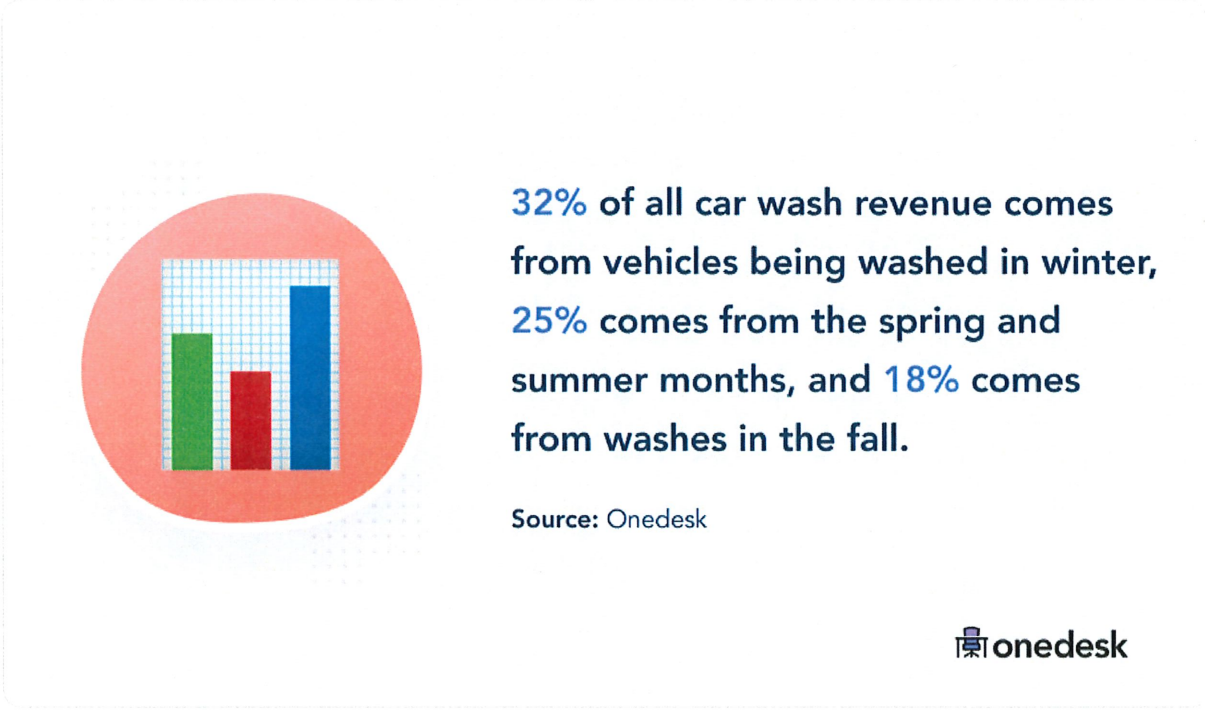
For instance, are you going to open a self-service or a full-service car wash? Also, what is the average price per gallon of water in your area?

Although there are a number of factors that you need to consider, there are numerous ways for you to ensure that you are competitive in the industry and can make it work for you.

What is the most popular season for car washes?

The most popular season for having a vehicle washed at a car wash is in winter.

Approximately 32% of yearly revenue in the car wash industry is generated during the winter, and this is closely followed by spring and summer that both make up 25% each.



Car Wash Profitability Statistics

Just like in any industry, profitability is extremely important, otherwise, the industry would not be worth taking a risk on for new business owners. Here are the most important profitability statistics that come from the car wash industry.

How profitable is a car wash?

The profitability of a car wash depends on the type of car wash that you are looking at.

For instance, an in-bay automatic car wash is capable of washing approximately 20,000 cars annually, and this yields an annual profit of about $86,531.

However, a self-serve car wash only yields about $30,000 in profit, but a tunnel car wash can reach well over $500,000 in profits each year.

These figures are just averages for the industry, but there are a lot of factors that go into these numbers.

Location is one of the biggest factors because the larger the population in the area, the higher the revenue chances for the car wash.

How much money do car washes make per year?

Just like the profitability of car washes, the amount of money that a car wash can generate depends on where it is located and the type of services that the car wash provides.

For instance, self-serve car washes do not make as much money as tunnel car washes or in-bay automatic car washes, but they can still generate up to $41,000 a year on average.

Self-serve car washes do not make as much money as tunnel car washes or in-bay automatic car washes, but they can still generate up to $41,000 a year on average.

Source: Onedesk

onedesk

This is the lowest car wash revenue generator, and the tunnel car wash is the most profitable and generates the most revenue annually at an average of $686,250.

So, there is definitely money to be made in the car wash industry.

How much do car wash owners make?

The answer to this question can be a little difficult to determine because it depends on the type of car wash that is provided, the location of the car wash, and the amount of money that the car wash charges per car.

However, a smaller car wash can have an annual profit of $55,000 to $100,000 per year for a self-service car wash.

A smaller self-service car wash can have an annual profit of $55,000 to $100,000 per year.

Source: Onedesk

onedesk

However, a full-service car wash business can actually make anywhere from $500,000 to $900,000 annually in profits.

These numbers are vastly different, but it makes sense because these two types of car washes take different resources, both in materials and labor, which can account for the difference in these numbers.

So, all in all, car wash owners can definitely profit from their business and live comfortably.

Are self service car washes profitable?

Although self-service car washes are not as profitable as in-bay or full-service car washes, they are an excellent way to generate a passive stream of income with little to no effort.

Due to it being a self-service business, the owner can cut costs and increase their profits by running and checking on everything themselves.

On average, depending on the location, a self-service car wash can make close to $1,500 a day, but it is more realistic to expect $250 to $750 per day.

What is the average car wash profit margin?

The average profit margin per car is approximately 29%, which for the average $15 ticket is $4.35. Obviously, the more the ticket price for the car wash the higher the

average profit margin will be more.

When looking at a profit margin it can be difficult to calculate, depending on the size of the business.

When calculating these numbers, some of the things that should go into calculating this average are the daily traffic count, price per car, the number of days the car wash is open, the cost of materials and maintenance, and the cost of labor if it requires it.

The average ticket price for a car wash is approximately $15 and after all of the costs that go into running the car wash.

CHAPTER 3

Car Auto Detailing Industry Statistics

Car auto-detailing businesses are often coupled with car washing businesses, but in general, auto-detailing businesses provide higher profit margins.

However, it can cost more to run these businesses because of the extra labor and materials that are needed to run them properly. Here are a few statistics about the auto detailing industry.

How many years do cars last?

In the past, cars lasted longer than some of the newer models, but that is part of choosing to drive a car with higher technology than was available in the past.

Currently, most cars on average last for approximately 12 years, but this is just an average.

There are many cars that are capable of lasting even longer, but it is better to expect the average than think it could last longer.

Do consumers prefer to get their cars washed professionally or at home?

This is entirely based on the preference of the consumer because some people prefer to do the work on their car at home, but others like the idea of having a professional take care of their car to ensure the best results.

In North America alone, there are more than 2 billion cars washed by professional car washes every year.

Not to mention, people who are concerned about the environment tend to go to car washes.

Due to proficiency, professional car washes are faster than washing cars, which means that they are less of a drain on the environment. They are capable of minimizing the amount of water than someone washing their car at home, which is an important distinction for the environment.

Plus, they often use environmentally friendly materials to wash cars that consumers appreciate like phosphate-free and biodegradable cleaners that consumers might not have access to when washing their own cars.

What percentage of consumers are willing to pay more for eco-friendly services?

Approximately 77% of Americans are concerned about the environment and take this into consideration when purchasing products.

According to statistics, 75% of millennials and 57% of boomers take note of this sort of thing, and they will generally pay more for a car wash that is professionally done as long as it is done with eco-friendly materials and services.

What US cities have the highest concentration of detailing businesses?

There are a lot of excellent detailing businesses throughout the United States, and currently, the following cities are the five cities that have the highest concentration of detailing businesses:

- Glendale, Arizona
- East Honolulu, Hawaii
- Silver Spring, Maryland
- Knik-Fairview, Alaska
- Waipahu, Hawaii

What US cities have the lowest concentration of detailing businesses?

The cities that have the lowest concentration of detailing businesses are generally smaller towns and areas that have less pollen count than other cities, which require the need for as many car washes and detailing businesses.

It's important to keep these types of statistics in mind when you are planning on opening a detailing business because it can directly affect the amount of business that you will have to contend with in the area.

What are the annual sales of chemicals in the car wash market?

There are a lot of different types of chemicals that are used in detailing businesses and car washes, and it's important to take the cost of these chemicals into account when you are considering opening your own detailing business.

On average, car washes and auto detailing businesses can use anywhere from $5,000 to $20,000 worth of chemicals annually.

However, this depends on the size of the business and the frequency of cars that go through the business on a daily basis.

Companies that use eco-friendly products do spend more on their chemicals, but these businesses are also able to sell their services for more than if they were using other types of chemicals in their business.

What is the average price of car detailing services in the US?

Many people do not realize that regular car washes are different than car detailing services. The average price for a regular car wash is approximately $15, but the average detailing price in the United States runs about $160.

There are several types of services that come with car detailing, and many businesses have different packages that people are capable of choosing from to provide a variety of services for different income budgets, which can allow them to work with people from all income brackets.

How much do American car detailers make per year?

On average in the United States, car detailers make about $12 an hour, and for those that are willing to work overtime, they will get approximately $4,000 in extra pay a year.

Currently, they make an annual average of $27,735, but this is just an average.

Car detailers that work in larger cities or for larger companies tend to make more, and if they do a good job, they often are able to generate their own client base, which can help to increase their annual income.

CHAPTER 4

Car Wash Water Usage Statistics

When it comes to washing cars, one of the biggest statistics that people take into account is water usage. This goes for business owners and their customers.

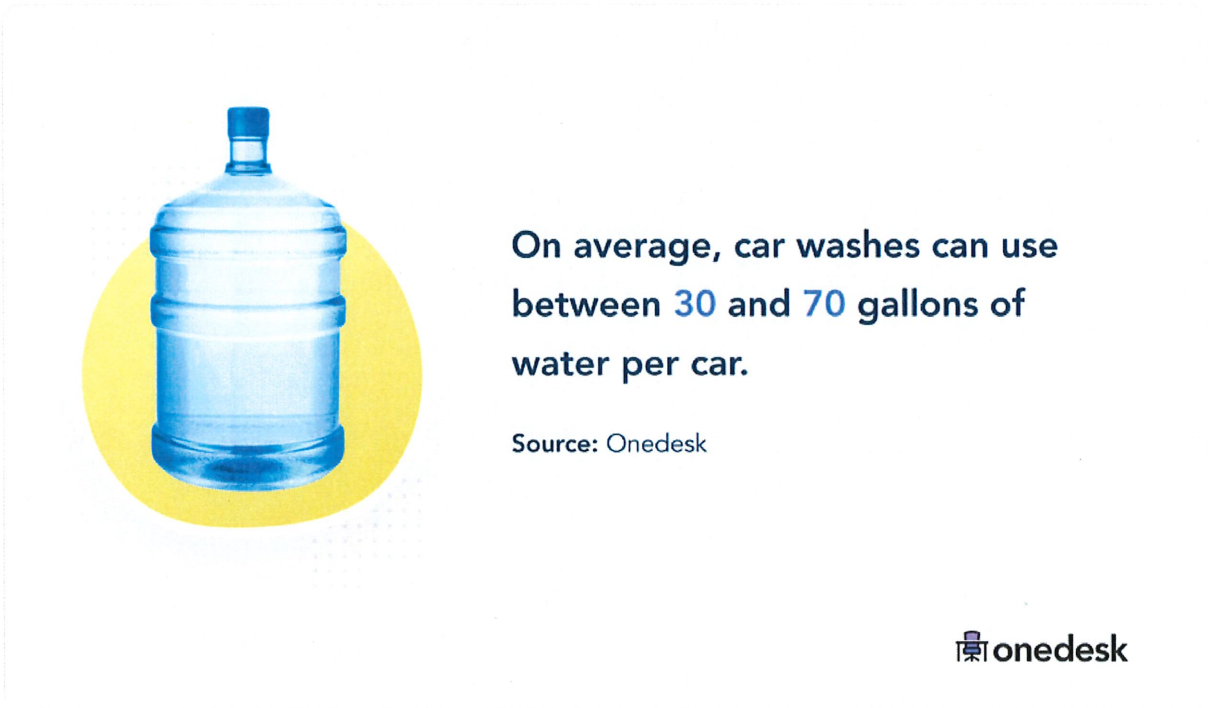
Business owners need to pay for the water usage, and their customers like to know that they are doing business with an eco-friendly conscious business, which includes the amount of water that they use.

Here are some water usage statistics you've probably never seen before.

How much water does an average car wash use?

There are all types of car washes, and depending on the type of car wash, the amount of water usage can vary.

Some car washes only use approximately 35 gallons of water per vehicle, but there are other car washes that can use up to 70 gallons of water per vehicle like a high-pressure touchless car wash.



So, when you are thinking of getting your car washed or if you are planning on opening your own car wash business, you will want to consider the water cost before making a decision on the type of car wash that you will open or use.

Water usage is one of the most expensive expenses that you have to consider in this

business. So you will want to consider the price of water usage to be able to set your prices properly so that you still get an ample profit per car to ensure the business will be successful.

How many gallons of soap does a car wash use?

After you consider the water usage that your business will require, you will want to consider the amount of soap that will be used.

Most car washes will use 1 ounce of car wash solution per gallon of water. Therefore, you have to consider the type of car wash you want to run here, as well.

For instance, some car washes only use 30 gallons of water per car, and therefore, it will lower the gallons of soap that you will need to use per car.

However, if you use the higher-pressure car wash type, you could use up to 70 gallons of water. Therefore the amount of soap solution that you will need to use will be doubled, as well.

Conclusion

Overall, the car wash industry is a profitable business to be in. It provides an ample amount of revenue and profits for the business owner and their employees.

Finally, this industry is an excellent one to go into by a smaller business owner because the industry is not locked down by just a few larger companies, which means there is potential to grow for smaller car washes.

Car Wash Demographics: 65 User Facts & Numbers [2023]

January 2, 2023 / By Peter Jones / Cars

In this blog post, we'll take a closer look at the demographics of car wash users.

From age and gender to income and location, we'll explore the characteristics that define the typical car wash user.

So, if you're curious about who's keeping their cars squeaky clean, keep reading to learn more.

Table of Contents

LATEST VIDEOS

AdChoices

Quick Facts About Car Wash Users

- On average, Americans get their cars washed approximately 13 times per year, which translates to around one or two times per month.
- More than 2 billion cars are washed every year in North America, with Americans spending USD 5.8 billion at car wash facilities annually.
- Over the past decade, more than 70% of car owners in the United States have switched from handwashing their vehicles to using car washing facilities.
- Approximately 65% of car wash facilities in the United States also serve as fuel dispensers.

These facts highlight the significant prevalence and usage of car wash services among the American population.

- The target age for customers is between 35 and 55, with more than half being women
- Many Americans wash their car around 13 times a year, indicating that the majority of car wash users visit a car wash establishment one or two times per month.
- In the United States, the percentage of drivers that report most frequently washing their vehicle at a professional car wash has increased from approximately 48% in 1994 to more than 77% in 2019.

It is evident that the car wash industry in the United States has grown significantly over the years, with a diverse workforce and an increasing number of drivers opting for professional car wash services.

Read also: How and when should you wash a Tesla?

Gender Demographics for Car Wash Users

- There are few more female car wash users than there are male users.
- Male car *cleaners*, however, make up a significant portion at 81.6%, while women account for 18.4% of the workforce in the industry.

The distribution of gender in the car wash industry shows a clear disparity, with men dominating both car cleaning and car washing roles.

This trend extends across different geographic locations and market segments, indicating a pattern that is both widespread and persistent.

Ethnicity Demographics

Car wash demographics show distinct patterns among different ethnic groups working in the industry or owning businesses.

Some statistics regarding car wash demographics based on ethnicity include:

- The most common ethnicity of car washers is White (55.2%)
- Hispanic or Latino individuals make up 19.8% of car washers
- Black or African American individuals constitute 13.8% of car wash workers
- About 5.7% of car washers are considered Unknown ethnicity

In terms of business ownership, several trends can be observed:

- Car washes are predominantly owned by non-Hispanic White men

demographic patterns can help inform strategies and initiatives aimed at promoting diversity and inclusion within the industry.

Education Level Demographics

According to the available data, the education level demographics for car washers in the United States are as follows:

- 64% have a high school diploma
- 12% possess a diploma, potentially indicating vocational education or some college experience
- 9% hold an associate degree
- 9% have a bachelor's degree
- 6% of car washers have other types of degrees or educational qualifications

These statistics illustrate that the majority of car washers have at least completed high school, with a significant percentage pursuing education beyond that level to various extents. It is important to note that these numbers may vary depending on the location, type of car wash establishment, and

employees in this field possess a variety of skills that could contribute to the overall service quality and customer experience. It is evident that the industry succeeds in accommodating a diverse workforce with differing education levels, which can lead to a unique blend of knowledge and expertise.

Average Income Level

- In the United States, car washes with paid employees had 163,178 workers in 2019, earning an average annual salary of $21,911.
- American car dealers with wash facilities make around $27,735 annually, with Maryland having the highest at $100K per year.
- Small self-service car washes' average annual profit is over $40,000, while larger and luxurious car washes can earn over $500,000 per year.
- Consumers spend $5.8 billion annually on car wash services, and each car wash has about 20,000 clients annually.
- Among car wash attendants, men earn an average income of $27K, while women earn slightly less at $26K.

The data reveals a diverse demographic of car wash employees and varying income levels within the industry, from smaller self-service facilities to high-end luxury establishments.

Other Interesting Facts About The Effect Of Car Wash Users

- Employees of car washes in Maine were the most "productive," generating $94,234 in sales per employee compared to $60,099 for the nation.
- Washing and Cleaning Services for Automobiles and Light-Duty Trucks made up 84.2% of the $9.7 billion of total sales of car washes in 2017.
- Car wash water statistics indicate that 66% of Americans get their cars washed approximately 13 times per year, putting the average washes per month at one or two times.
- Most car wash stations are also fuel dispensers, with approximately 65% of car wash facilities serving as fuelling points as well.
- The percentage of drivers that report most frequently washing their vehicle at a professional car wash has increased from approximately 48% in 1994 to more than 77% in 2019.
- In 2019, there were over 160,000 car wash facilities in the US.
- The car wash industry employs over 700,000 people in the US.
- Full-service car washes account for approximately 22% of all car wash facilities in the US.
- The average price of a car wash in the US is around $15.
- The global car wash and detailing services market was valued at $47.5 billion in 2020.
- In 2021, the number of vehicles in operation in the US reached a record high of 284.5 million.
- In the US, automatic car washes are the most common type of car wash facility, making up approximately 80% of all car washes.
- The cost of starting a car wash business can range from $10,000 to over $1 million.
- The car wash industry in the US is expected to grow at a CAGR of 3.2% from 2020 to 2025.
- In 2017, the average car wash facility generated $670,000 in annual revenue.
- California has the most car wash facilities of any US state, with over 10,000 locations.
- The average car wash takes between 10 and 15 minutes to complete.
- Approximately 20% of car washes in the US are owned by chains with multiple locations.
- The car wash industry in the US is highly fragmented, with the top 50 companies accounting for less than 20% of total revenue.
- In 2021, the revenue of the car wash and detailing services market in the US is expected to reach $10.6 billion.
- The average revenue per car wash in the US is approximately $20.
- In 2019, the most common car wash location was a gas station or convenience store, accounting for 48% of all car washes.

2020 to 2025.

- Hand car washes make up approximately 4% of all car wash facilities in the US.
- In 2019, approximately 60% of car washes in the US offered unlimited wash plans or memberships.
- Approximately 30% of car wash customers in the US are loyal to a specific brand or location.
- In 2019, the average cost of a basic car wash was $11.
- The US car wash industry uses approximately 2.8 billion gallons of water per year.
- The most common type of car wash brush is made of nylon, accounting for approximately 80% of all brushes used in the industry.

The data demonstrates the changing landscape of car wash usage over time, highlighting the impact of factors such as productivity, fuel dispensing capabilities, and consumer preferences.

BAREFOOT WILLIAMS COMMERCIAL SUBDISTRICT SSGMPA

(PL-20220005822)

NIM #1 DOCUMENTS

Neighborhood Meeting Summary
Barefoot Williams Commercial Subdistrict SSGMPA (PL-20220005822)
11760 Tamiami Trail East Rezone (RZ-PL-20220005137)

July 24, 2023 at 5:30 PM
Rookery Bay National Estuarine Research Reserve, The Auditorium
300 Tower Road, Naples, FL 34113.

A NIM was held for the above-referenced petitions. The petitions are described as follows:

1) **SSGMPA-PL-20220005822 (Barefoot Williams Commercial Subdistrict):** A Small-Scale Growth Management Plan Amendment (SSGMPA) application to amend the future land use designation of the property from the Urban Coastal Fringe Subdistrict to establish the Barefoot Williams Commercial Subdistrict. The proposed subdistrict will permit C-3 commercial uses, which are currently permitted under existing zoning, and add car wash as an additional permitted use (limited to one within the district); and
2) **RZ-PL-20220005137 (11760 Tamiami Trail East Rezone):** An application to rezone the property from the C-3 Zoning District to the C-4 Zoning District. However, the proposed C-4 Zoning District for the property will be limited to permit only one C-4 commercial use (car wash, limited to one on the property), along with the currently permitted C-3 commercial uses.

Property Owners/Applicants:
11760 Property, LLC

Applicant Attendees:
Rick Scali, Owner

Consultant Attendees on Behalf of the Applicant:
Clay C. Brooker, Esq., Cheffy Passidomo, P.A.
Robert J. Mulhere, FAICP, Senior Vice President, Hole Montes, a Bowman Company
Ellen Summers, AICP, Principal Planner, Hole Montes, a Bowman Company
Norman Trebilcock, P.E., AICP, Trebilcock Consulting Solutions, PA

Attendees on Behalf of Collier County:
Michelle Mosca, AICP, Planner III
Timothy Finn, Planner III

There was one member of the public physically in attendance, and one member of the public in attendance via Zoom. Ellen Summers provided a presentation on the proposed SSGMPA and the Rezone request. The presentation lasted approximately 10 minutes.

Following the presentation, the meeting was opened up for comments and questions from the members of public in attendance in person and on Zoom. There was one question raised by a member of the public regarding what the plans are to develop the other portion of the site (that will not be occupied by the car wash). Ellen Summers responded that the portion of the site in question does not have a definitive use in mind, but may be developed with retail, a small restaurant, or office space. The NIM concluded at approximately 5:42 PM.

AFFIDAVIT OF COMPLIANCE

I hereby certify that pursuant to Ordinance 2004-41, of the Collier County Land Development Code, I did cause the attached newspaper advertisement to appear and I did give notice by mail to the following property owners and/or condominium and civic associations whose members may be affected by the proposed land use changes of an application request for a rezoning, PUD amendment, or conditional use, at least 15 days prior to the scheduled Neighborhood Information Meeting. *For the purposes of this requirement, the names and addresses of property owners shall be deemed those appearing on the latest tax rolls of Collier County and any other persons or entities who have made a formal request of the county to be notified.* The said notice contained the laymen's description of the site property of proposed change and the date, time, and place of a Neighborhood Information Meeting.

Per the attached letters, property owner's list, and copy of newspaper advertisement which are hereby made a part of this Affidavit of Compliance.

(Signature of Applicant)

STATE OF FLORIDA
COUNTY OF COLLIER

The foregoing Affidavit of Compliance was acknowledged before me this 10th day of July 2023 by means of X physical presence or _____ online notarization, by Robert J. Mulhere, FAICP, Senior Vice President of Hole Montes, a Bowman Company, who is personally known to me X or who has produced _____ as identification.

Re: Barefoot Williams Commercial Subdistrict SSGMPA (PL-20220005822)
11760 Tamiami Trail East Rezone (RZ-PL-20220005137)
HM File No. 2023.006

Dear Property Owner:

Please be advised that Robert J. Mulhere, FAICP, Senior Vice President, Ellen Summers, AICP, Planner III of Hole Montes, a Bowman Company, and Clay C. Brooker, Esquire of Cheffy Passidomo, P.A., on behalf of the applicant, have made the following two concurrent applications to Collier County Growth Management:

1) **SSGMPA-PL-20220005822 (Barefoot Williams Commercial Subdistrict):** A Small-Scale Growth Management Plan Amendment (SSGMPA) application to amend the future land use designation of the property from the Urban Coastal Fringe Subdistrict to establish the Barefoot Williams Commercial Subdistrict. The proposed subdistrict will permit C-3 commercial uses, which are currently permitted under existing zoning, and add car wash as an additional permitted use (limited to one within the district); and
2) **RZ-PL-20220005137 (11760 Tamiami Trail East Rezone):** An application to rezone the property from the C-3 Zoning District to the C-4 Zoning District. However, the proposed C-4 Zoning District for the property will be limited to permit only one C-4 commercial use (car wash, limited to one on the property), along with the currently permitted C-3 commercial uses.

The property is comprised of 1.92± acres and is located in Section 33, Township 50 South, Range 26 East, Collier County, Florida. The property is situated approximately 350 feet east of the intersection of Tamiami Trail East and Barefoot Williams Road, as depicted in the location map below.

In compliance with the Land Development Code requirements, a Neighborhood Information Meeting will be held to provide you an opportunity to hear a presentation about this petition and ask questions. The Neighborhood Information Meeting will be held on Monday, July 24, 2023, at 5:30 p.m. at the Rookery Bay National Estuarine Research Reserve, The Auditorium, 300 Tower Road, Naples, FL 34113.
